El dibujo de arquitectura Jorge Sainz Avia,2017-01-29 Este libro trata de cómo se reflejan las ideas y las realidades arquitectónicas sobre un plano gráfico. El dibujo de arquitectura se examina desde una perspectiva teórica, al tiempo que se ofrece un breve repaso histórico de sus ejemplos más significativos. Los arquitectos tienen tres formas de expresar sus ideas y de comunicarlas a los demás: el lenguaje natural, el lenguaje gráfico y el lenguaje arquitectónico. El primero corresponde a lo que habitualmente entendemos como sus 'escritos'; el segundo tiene que ver con sus 'dibujos'; y el tercero hace referencia a sus 'obras'. En este libro se estudia precisamente ese lenguaje intermedio que es el dibujo de arquitectura. A lo largo de sus páginas el lector descubrirá un auténtico esfuerzo por centrar el tema en sus dimensiones propias, huyendo tanto de las tentaciones estéticas de 'el arte por el arte', como de algunas aproximaciones estérilmente utilitarias de la geometría descriptiva. Para los amantes del dibujo arquitectónico, el presente libro será otra excusa más para seguir escudriñando inquisitivamente esos trozos de papel donde siempre se han reflejado las sutilezas creativas de la genialidad arquitectónica.

Ideas sobre análisis, dibujo y arquitectura Antonio Gámiz Gordo,2003 Se presentan algunas ideas sobre el análisis de la arquitectura, entendido como proceso de conocimiento, y sobre el dibujo como lenguaje distintivo, valorando su importancia en la ideación y narración de la arquitectura, para imaginarla, conocerla y darla a conocer.

Manual of Section Paul Lewis,Marc Tsutsumaki,David J. Lewis,2016-08-23 Along with plan and elevation, section is one of the essential representational techniques of architectural design; among architects and educators, debates about a project's section are common and often intense. Until now, however, there has been no framework to describe or evaluate it. Manual of Section fills this void. Paul Lewis, Marc Tsurumaki, and David J. Lewis have developed seven categories of section,

revealed in structures ranging from simple one-story buildings to complex structures featuring stacked forms, fantastical shapes, internal holes, inclines, sheared planes, nested forms, or combinations thereof. To illustrate these categories, the authors construct sixty-three intricately detailed cross-section perspective drawings of built projects—many of the most significant structures in international architecture from the last one hundred years—based on extensive archival research. *Manual of Section* also includes smart and accessible essays on the history and uses of section.

Why Architects Draw Edward Robbins, Edward Cullinan, 1994 Examines the social uses of architectural drawing: how it acts to direct architecture; how it helps define what is important about a design; and how it embodies claims about the architect's status and authority. Case study narratives are included with drawings from projects at all stages.

Manual of Biogenic House Sections Paul Lewis, Marc Tsurumaki, David J. Lewis, 2022 The book focuses on houses built from materials that either sequester carbon (plants), use materials with very low embodied carbon (earth and stone) or reuse substantial amounts of existing materials. Organized by those materials (wood, bamboo, straw, hemp, cork, earth, brick, stone and re-use), and incorporating life cycle diagrams demonstrating how the raw material is processed into building components, the book shows how the unique properties of each material can transform the ways architects conceive the sections of houses--publisher's description.

Mensajes de modernidad en la revista Proa. Gómez Amaya, Luz Mariela, O'Byrne Orozco, María Cecilia, Vargas Caicedo, Hernando Ignacio, Sánchez García, Manuel, Arango González, Alfonso, 2020-09-01 Esta obra da mucho más de lo que promete en el título. Analizando la revista Proa, incide en el papel protagonista de las publicaciones periódicas en el debate arquitectónico colombiano. Se aportan datos de gran relevancia sobre edificios, arquitectos y programas urbanos, poniendo en relieve la exigencia de analizar la publicidad de arquitectura no como algo meramente anecdótico, sino como un componente esencial tanto de la relación entre arquitectura, ciudad y tejido industrial como del imaginario arquitectónico de una sociedad. En este sentido, su estudio se inserta en una reciente pero pujante línea de investigación en arquitectura contemporánea, que ha producido ya en diversos países resultados notables sobre el estudio de las relaciones entre publicidad y arquitectura.

Más allá de la imagen Pablo Manuel Millan Millan, 2021-06-01 El libro Más allá de la imagen. La arquitectura del

artesano, es el resultado de varios artículos, conferencias, comentarios y algunas reflexiones escritas sobre la deriva de una arquitectura subyugada por el peso de la forma y apartada a cualquier razonamiento de servicio y compromiso con el hombre. Todos ellos han sido revisados desde la perspectiva del arquitecto artesano. Tras diversos debates y confrontaciones desarrolladas en los últimos años en diversos foros concluía que el arquitecto necesita volver a poner en práctica herramientas que, por la saturación de una sociedad postmoderna, ha ido entumeciendo y dejando en desuso. El dibujo, el conocimiento del material y de la historia, el taller, el trabajo colectivo o el simple hecho del posicionamiento frente a la máquina, son algunas de las características de lo que hemos llamado la cultura del artesano. Con Prólogo de Alberto Campo Baeza.

Una historia universal de la arquitectura. Un análisis cronológico comparado a través de las culturas Francis D. K. Ching, Vikramaditya Prakash, Mark M. Jarzombek, 2013-05-09 Este libro ofrece un excepcional recorrido cronológico por más de 500 obras paradigmáticas de la historia universal de la arquitectura. Lejos de centrarse en países y regiones específicos, el manual se organiza en estricto orden cronológico para que todas las culturas y civilizaciones converjan a través de sus legados arquitectónicos. Gracias a este enfoque innovador, el lector dispondrá de una lectura transversal comparada que permite comprender las conexiones, contrastes e influencias mutuas de las diferentes culturas arquitectónicas. Cada obra cuenta con una descripción completa del contexto en que se edificó y de sus características más relevantes, y viene acompañada de un rico material gráfico, que puede incluir mapas, fotografías y, por supuesto, las ilustraciones elaboradas por el célebre maestro del dibujo arquitectónico Francis D. K. Ching. Este primer volumen abarca desde las culturas primitivas (hacia el año 3500 a.C.) hasta el siglo XIV, y presenta reveladoras coincidencias temporales, como las del período centrado alrededor del año 200, donde la construcción del Panteón de Roma coincide con la proyectación de la ciudad mexicana de Teotihuacán y la arquitectura china de la dinastía Han; o las que rodean al año 1200, cuando se están construyendo simultáneamente las iglesias rupestres de Lalibela en Etiopía, la Alhambra de Granada o el templo japonés de Itsukushima.

A Visual Dictionary of Architecture Francis D. K. Ching, 2011-09-06 The classic, bestselling reference on architecture now revised and expanded! An essential one-volume reference of architectural topics using Francis D.K. Ching's signature presentation. It is the only dictionary that provides concise, accurate definitions illustrated with finely detailed, hand-rendered drawings. From Arch to Wood, every concept, technology, material and detail important to architects and designers are presented in Ching's unique style. Combining text and drawing, each term is given a minimum double-page spread on large format trim size, so that the term can be comprehensively explored, graphically showing relations between concepts and sub-terms A comprehensive index permits the reader to locate any important word in the text. This long-awaited revision brings the latest concepts and technology of 21st century architecture, design and construction to this classic reference work

It is sure to be by the side of and used by any serious architect or designer, students of architecture, interior designers, and those in construction.

Arquitectura y Urbanismo del Cusco Inka Ricardo Mar,Ramiro Matos,José Alejandro Beltrán Caballero,2021-12-10 Cusco, la ciudad más importante del Tawantinsuyu, fue morada de la nobleza y sede del poder político y religioso. El alto nivel de su arquitectura y urbanismo ha impresionado tanto a los primeros europeos del siglo XVI, como a los académicos y turistas que hoy visitan la ciudad. Los primeros la compararon con otras ciudades de España y vieron en el Qhapaq Ñan, la red de caminos que conectaba el sistema de asentamientos andinos, un equivalente de la vasta red de caminos romanos. Afortunadamente para Cusco aún quedan en pie partes significativas de su pasado Inka. Hemos catalogado las antiguas edificaciones, identificado escondidos entre muros o cimientos de construcciones coloniales y modernas, también los que perdieron su contexto y los que aparecen durante los nuevos trabajos en calles y plazas de la ciudad contemporánea. Estos datos combinados con la información que aportan los cronistas de la Colonia, la literatura arqueológica moderna, las fuentes históricas, etnohistóricas y de la antigua capital. Partiendo de la singularidad que representa Cusco en el contexto americano, *Arquitectura y Urbanismo del Cusco Inka* se ocupa principalmente de su geografía, planeamiento y arquitectura, mostrando a través de un amplio repertorio de planos, fotografías y restituciones tridimensionales cómo pudo ser la sede del poder incaico. El desarrollo de nuevas tecnologías digitales aplicadas a la arqueología ofrece la posibilidad de avanzar en el estudio de la ciudad histórica de un modo hasta ahora desconocido. La gestión de fotos aéreas y satelitales, los sistemas geográficos integrados (GIS), el láser scanner, el uso de los drones o los programas de modelado 3D automatizado, abren nuevas perspectivas en la investigación de campo y en la documentación de los restos arqueológicos, estimulando nuevas aproximaciones a la realidad del urbanismo Inka.

El saber de la arquitectura y de las artes Marta Llorente Díaz,Marta Llorente,2000 Este libro sigue el alzado de ese espectro que se ha convenido en denominar el saber de las artes, fortalecido con el paso del tiempo, desde los frágiles tanteos de sus inicios hasta la clara y destacada conciencia de su identidad, ya culminado el siglo XVII, que nos pone a las puertas de la Ilustración. La formación de este territorio se sigue bajo el esbozo de los grandes sistemas de conocimiento que se suceden, cuya transformación determina, durante nuestro arco histórico, los propios modelos teóricos que envuelven el universo de las artes. Nuestro libro va trazando la figura del saber de las artes, en concreto del saber de la arquitectura, a partir de sucesivos bocetos de un sistema general del conocimiento: porque, hasta la aparición de una mayor autonomía en la teoría de las artes, alcanzada a finales del XVII, la estructura del dominio artístico se encuentra engarzada en el tapiz continuo del saber.

Aprendiendo a ser arquitectos José Manuel Prieto González,2004 Es el relato de las vicisitudes históricas, en lo

referente a la formación de los arquitectos españoles, documentan el paso de la vieja Academia de San Fernando a la nueva Escuela de Arquitectura. Esta obra aborda todos los aspectos de la cuestión: planes de estudio, profesores, alumnos, oposiciones y concursos, recursos y métodos pedagógicos, instalaciones, pensiones de Roma, proyectos de fin de carrera, rivalidades profesionales. También se habla del notable lugar que ocupa la Escuela española en el contexto europeo y occidental.

Diseño arquitectónico Daniel Rodríguez Medina, 2014-10-17 El dibujo constituye una herramienta capaz de construir y transformar ideas de manera rápida y eficaz. La habilidad de pensar por medio de una imagen es fundamental para transitar por las diversas propuestas conceptuales y conformar la idea arquitectónica. Esta obra propone reorientar el proceso de pensamiento gráfico como el medio idóneo para el desarrollo de ideas y su proyección en el espacio, así como el dominio del entorno creativo, pues este acto de construcción conceptual encuentra su origen en el equilibrio de un dominio de conocimientos técnicos, científicos y artísticos que se perfeccionan en la frontera de la racionalidad con la irracionalidad, entre lo divergente y lo convergente. Este libro presenta elementos para reflexionar sobre las nociones que nos permiten sentar las bases teóricas y filosóficas en la construcción de nuevas formas de pensamiento, y explica cómo se detona una idea, cómo se trabaja hasta concluir su desarrollo en un proyecto arquitectónico, contrastando las teorías pedagógicas y artísticas con casos de estudio específicos en el ámbito universitario.
