What's Wrong with Climate Politics and How to Fix It Paul G. Harris, 2013-07-11 Governments have failed to stem global emissions of carbon dioxide and other greenhouse gases causing climate change. Indeed, climate-changing pollution is increasing globally, and will do so for decades to come without far more aggressive action. What explains this failure to effectively tackle one of the world's most serious problems? And what can we do about it? To answer these questions, Paul G. Harris looks at climate politics as a doctor might look at a very sick patient. He performs urgent diagnoses and prescribes vital treatments to revive our ailing planet before it's too late. The book begins by diagnosing what's most wrong with climate politics, including the anachronistic international system, which encourages nations to fight for their narrowly perceived interests and makes major cuts in greenhouse pollution extraordinarily difficult; the deadlock between the United States and China, which together produce over one-third of global greenhouse gas pollution but do little more than demand that the other act first; and affluent lifestyles and overconsumption, which are spreading rapidly from industrialized nations to the developing world. The book then prescribes several remedies for the failed politics of climate change, including a new kind of climate diplomacy with people at its center, national policies that put the common but differentiated responsibilities of individuals alongside those of nations, and a campaign for simultaneously enhancing human wellbeing and environmental sustainability. While these treatments are aspirational, they are not intended to be utopian. As Harris shows, they are genuine, workable solutions to what ails the politics of climate change today.

Gridlock Thomas Hale, David Held, Kevin Young, 2013-07-11 The issues that increasingly dominate the 21st century cannot be solved by any single country acting alone, no matter how powerful. To manage the global economy, prevent runaway environmental destruction, reign in nuclear proliferation, or confront other global challenges, we must cooperate. But at the same time, our tools for global policymaking - chiefly state-to-state negotiations over treaties and international institutions - have broken down. The result is gridlock, which manifests across areas via a number of common mechanisms. The rise of new powers representing a more diverse array of interests makes agreement more difficult. The problems themselves have also grown harder as global policy issues penetrate ever more deeply into core domestic concerns. Existing institutions, created for a different world, also lock-in pathological decision-making procedures and render the field ever more complex. All of these processes - in part a function of previous, successful efforts at cooperation - have led global cooperation to fail us even as we need it most. Ranging over the main areas of global concern, from security to the global economy and the environment, this book examines these mechanisms of gridlock and pathways beyond them. It is written in a highly accessible way, making it relevant not only to students of politics and international relations but also to a wider general readership.

Immunity to Change Robert Kegan, Lisa Laskow Lahey, 2009-02-15 Unlock your potential and finally move forward. A recent study showed that when doctors tell heart patients they will die if they don't change their habits, only one in seven will be able to follow through successfully. Desire and motivation aren't enough: even when it's literally a matter of life or death, the ability to change remains maddeningly elusive. Given that the status quo is so potent, how can we change ourselves and our organizations? In *Immunity to Change*, authors Robert Kegan and Lisa Lahey show how our individual beliefs--along with the collective mind-sets in our organizations--combine to create a natural but powerful immunity to change. By revealing how this mechanism holds us back, Kegan and Lahey give us the keys to unlock our potential and finally move forward. And by pinpointing and uprooting our own immunities to change, we can bring our organizations forward with us. This persuasive and practical book, filled with hands-on diagnostics and compelling case studies, delivers the tools you need to overcome the forces of inertia and transform your life and your work.

The Negro Motorist Green Book Victor H. Green, *The Negro Motorist Green Book* was a groundbreaking guide that provided African American travelers with crucial information on safe places to stay, eat, and visit during the era of segregation in the United States. This essential resource, originally published from 1936 to 1966, offered a lifeline to black

motorists navigating a deeply divided nation, helping them avoid the dangers and indignities of racism on the road. More than just a travel guide, *The Negro Motorist Green Book* stands as a powerful symbol of resilience and resistance in the face of oppression, offering a poignant glimpse into the challenges and triumphs of the African American experience in the 20th century.

Ecovillages Karen T. Litfin, 2014-01-15 In a world of dwindling natural resources and mounting environmental crisis, who is devising ways of living that will work for the long haul? And how can we, as individuals, make a difference? To answer these fundamental questions, Professor Karen Litfin embarked upon a journey to many of the world's ecovillages—intentional communities at the cutting-edge of sustainable living. From rural to urban, high tech to low tech, spiritual to secular, she discovered an under-the-radar global movement making positive and radical changes from the ground up. In this inspiring and insightful book, Karen Litfin shares her unique experience of these experiments in sustainable living through four broad windows - ecology, economics, community, and consciousness - or E2C2. Whether we live in an ecovillage or a city, she contends, we must incorporate these four key elements if we wish to harmonize our lives with our home planet. Not only is another world possible, it is already being born in small pockets the world over. These micro-societies, however, are small and time is short. Fortunately - as Litfin persuasively argues - their successes can be applied to existing social structures, from the local to the global scale, providing sustainable ways of living for generations to come. You can learn more about Karen's experiences on the Ecovillages website: <http://ecovillagebook.org/>

Moral Blindness Zygmunt Bauman, Leonidas Donskis, 2013-04-24 Evil is not confined to war or to circumstances in which people are acting under extreme duress. Today it more frequently reveals itself in the everyday insensitivity to the suffering of others, in the inability or refusal to understand them and in the casual turning away of one's ethical gaze. Evil and moral blindness lurk in what we take as normality and in the triviality and banality of everyday life, and not just in the abnormal and exceptional cases. The distinctive kind of moral blindness that characterizes our societies is brilliantly analysed by Zygmunt Bauman and Leonidas Donskis through the concept of *adiaphora*: the placing of certain acts or categories of human beings outside of the universe of moral obligations and evaluations. *Adiaphora* implies an attitude of indifference to what is happening in the world - a moral numbness. In a life where rhythms are dictated by ratings wars and box-office returns, where people are preoccupied with the latest gadgets and forms of gossip, in our 'hurried life' where attention rarely has time to settle on any issue of importance, we are at serious risk of losing our sensitivity to the plight of the other. Only celebrities or media stars can expect to be noticed in a society stuffed with sensational, valueless information. This probing inquiry into the fate of our moral sensibilities will be of great interest to anyone concerned with the most profound changes that are silently shaping the lives of everyone in our contemporary liquid-modern world.

A History of the Senses Robert Jütte, 2005 This path-breaking book examines our attitudes to the senses from antiquity

through to the present day. Robert Jutte explores a wealth of different traditions, images, metaphors and ideas that have survived through time and describes how sensual impressions change the way in which we experience the world. Throughout history, societies have been both intrigued or unsettled by the five senses. The author looks at the way in which the social world conditions our perception and traces the 'rediscovery' of sensual pleasure in the twentieth century, paying attention to experiences as varied as fast food, deodorization, and extra-sensory perception. He concludes by exploring technological change and cyberspace, reflecting on how developments in these fields will affect our relationship with the senses in the future.
