Sources and Trajectories Jacques Ellul, 1997 This is a print on demand book and is therefore non-returnable. This book is composed of eight articles written by Ellul and not previously translated into English. The eight were chosen not necessarily for their clarity or power to convince, but because they are the earliest formulations of some of Ellul's key ideas.

Nijinsky's Feeling Mind Nicole Svobodny, 2023-07-03 Nijinsky's Feeling Mind: The Dancer Writes, The Writer Dances is the first in-depth literary study of Vaslav Nijinsky's life-writing. Through close textual analysis combined with intellectual biography and literary theory, Nicole Svobodny puts the spotlight on Nijinsky as reader. She elucidates Nijinsky's riffs on Tolstoy, Dostoevsky, and Nietzsche, equating these intertextual connections to marking a dance, whereby the dancer uses a reduction strategy situated between thinking and doing. By exploring the intersections of bodily movement with verbal language, this book addresses broader questions of how we sense and make sense of our worlds. Drawing on archival research, along with studies in psychology and philosophy, Svobodny emphasizes the modernist contexts from which the dancer-writer emerged at the end of World War I. Nijinsky began his life-writing—a book he titled *Feeling*—the day after the Paris Peace Conference opened, and the same day he performed his last dance. Nijinsky's *Feeling Mind* begins with the dancer on stage and concludes as he invites readers into his private room. Illuminating the structure, plot, medium, and mode of *Feeling*, this study calls on readers to grapple with a paradox: the more the dancer insists on his writing as a live performance, the more he points to the material object that entombs it.

History Beyond Trauma Francoise Davoine, Jean-Max Gaudilliere, 2004-03-17 In the course of nearly thirty years of work with patients in psychiatric hospitals and private practice, Francoise Davoine and Jean-Max Gaudilliere have uncovered the ways in which transference and countertransference are affected by the experience of social catastrophe. Handed down from one generation to the next, the unspoken horrors of war, betrayal, dissociation, and disaster in the families of patient and analyst alike are not only revived in the therapeutic relationship but, when understood, actually provide the keys to the healing process. The authors present vivid examples of clinical work with severely traumatized patients, reaching inward to their own intimate family histories as shaped by the Second World War and outward toward an exceptionally broad range of

cultural references to literature, philosophy, political theory, and anthropology. Using examples from medieval carnivals and Japanese No theater, to Wittgenstein and Hannah Arendt, to Sioux rituals in North Dakota, they reveal the ways in which psychological damage is done--and undone. With a special focus on the relationship between psychoanalysis and the neurosciences, Davoine and Gaudilliere show how the patient-analyst relationship opens pathways of investigation into the nature of madness, whether on the scale of History--world wars, Vietnam--or on the scale of Story--the silencing of horror within an individual family. In order to show how the therapeutic approach to trauma was developed on the basis of war psychiatry, the authors ground their clinical theory in the work of Thomas Salmon, an American doctor from the time of the First World War. In their case studies, they illustrate how three of the four Salmon principles--proximity, immediacy, and expectancy--affect the handling of the transference-countertransference relationship. The fourth principle, simplicity, shapes the style in which the authors address their readers--that is, with the same clarity and directness with which they speak to their patients.

The Great War and the Language of Modernism Vincent Sherry, 2003-04-10 With the expressions Lost Generation and The Men of 1914, the major authors of modernism designated the overwhelming effect the First World War exerted on their era. Literary critics have long employed the same phrases in an attempt to place a radically experimental, specifically modernist writing in its formative, historical setting. What real basis did that Great War provide for the verbal inventiveness of modernist poetry and fiction? Does the literature we bring under this heading respond directly to that provocation, and, if so, what historical memories or revelations can be heard to stir in these words? Vincent Sherry reopens these long unanswered questions by focusing attention on the public culture of the English war. He reads the discourses through which the Liberal party constructed its cause, its Great Campaign. A breakdown in the established language of liberal modernity--the idioms of public reason and civic rationality--marked the sizable crisis this event represents in the mainstream traditions of post-Reformation Europe. If modernist writing characteristically attempts to challenge the standard values of Enlightenment rationalism, this study recovers the historical cultural setting of its most substantial and daring opportunity. And this moment was the occasion for great artistic innovations in the work of Virginia Woolf, T.S. Eliot, and Ezra Pound. Combining the records of political journalism and popular intellectual culture with abundant visual illustration, Vincent Sherry provides the framework for new interpretations of the major texts of Woolf, Eliot, and Pound. With its relocation of the verbal imagination of modernism in the context of the English war, *The Great War and the Language of Modernism* restores the historical content and depth of this literature, revealing its most daunting import.

It's Madness Theodore Jun Yoo, 2016-02-16 *It's Madness* examines Korea's years under Japanese colonialism, when mental health first became defined as a medical and social problem. As in most Asian countries, severe social ostracism, shame, and fear of jeopardizing marriage prospects compelled most Korean families to conceal the mentally ill behind closed

doors. This book explores the impact of Chinese traditional medicine and its holistic approach to treating mental disorders, the resilience of folk illnesses as explanations for inappropriate and dangerous behaviors, the emergence of clinical psychiatry as a discipline, and the competing models of care under the Japanese colonial authorities and Western missionary doctors. Drawing upon unpublished archival as well as printed sources, this is the first study to examine the ways in which “madness” was understood, classified, and treated in traditional Korea and the role of science in pathologizing and redefining mental illness under Japanese colonial rule.

The You You Don't Know Webster Riggs, 1997 Unrecognized factors affect human behavior every day: room air humidity, genetic commands, unconscious ulterior moves, misinformation provided by a biased media, and more. We underestimate the infinite number of influences on our actions and tend to lurch from one simplistic conclusion to another to explain human behavior. Intended as a popular, science-oriented book, *The You You Don't Know* combines analysis of cultural and psychological factors with basic scientific pursuits such as physiology and genetics. Skepticism and candid self-analysis pervade, while superstition, the paranormal, and political rhetoric are treated as they deserve. Dr. Riggs recognizes our control by a dishonest, media-dominated world and tells the reader how to recognize, accept, and handle these many human influences, including popular feel good books. This work synthesizes current thought from a broad array of scientific disciplines and distills it to the most fascinating content relevant to causes of human behavior. It is unique in presenting the relationship between our conduct and the chaos-complexity theory. *The You You Don't Know* remains scientific, humanistic, and forthright and will appeal to a large audience of rational, independent thinkers.

Mad Muse Jeffrey Berman, 2019-09-03 Many of the well-respected scholarly studies of autobiographical writing have little or nothing to say about mental illness. This book uncovers the mysterious relationship between mood disorders and creativity through the lives of seven writers, demonstrating how mental illness is sometimes the driving force behind creativity.

What Art Is Michelle Kamhi, Louis Torres, 2016-05-26 What is art? The arts establishment has a simple answer: anything is art if a reputed artist or expert says it is. Though many people are skeptical about the alleged new art forms that have proliferated since the early twentieth century, today's critics claim that all such work, however incomprehensible, is art. A groundbreaking alternative to this view is provided by philosopher-novelist Ayn Rand (1901-1982). Best known as the author of *The Fountainhead* and *Atlas Shrugged*, Rand also created an original and illuminating theory of art, which confirms the widespread view that much of today's purported art is not really art at all. In *What Art Is*, Torres and Kamhi present a lucid introduction to Rand's esthetic theory, contrasting her ideas with those of other thinkers. They conclude that, in its basic principles, her account is compelling, and is corroborated by evidence from anthropology, neurology, cognitive science, and psychology. The authors apply Rand's theory to a debunking of the work of prominent modernists and postmodernists—from

Mondrian, Jackson Pollock, and Samuel Beckett to John Cage, Merce Cunningham, and other highly regarded postmodernist figures. Finally, they explore the implications of Rand's ideas for the issues of government and corporate support of the arts, art law, and art education. This is one of the most interesting, provocative, and well-written books on aesthetics that I know. While fully accessible to the general reader, *What Art Is* should be of great interest to specialists as well. Ayn Rand's largely unknown writings on art—especially as interpreted, released from dogma, and smoothed out by Torres and Kamhi—are remarkably refined. Moreover, her ideas are positively therapeutic after a century of artistic floundering and aesthetic quibbling. Anyone interested in aesthetics, in the purpose of art, or in the troubling issues posed by modernism and post modernism should read this book. —Randall R. Dipert Author of *Artifacts, Art Works, and Agency* Torres and Kamhi effectively situate Rand's long-neglected esthetic theory in the wider history of ideas. They not only illuminate her significant contribution to an understanding of the nature of art; they also apply her ideas to a trenchant critique of the twentieth century's 'advanced art.' Their exposure of the invalidity of abstract art is itself worth the price of admission. —Chris Matthew Sciabarra Author of *Ayn Rand: The Russian Radical* Rand's aesthetic theory merits careful study and thoughtful criticism, which Torres and Kamhi provide. Their scholarship is sound, their presentation is clear, and their judgment is refreshingly free from the biases that Rand's supporters and detractors alike tend to bring to considerations of her work. —Stephen Cox University of California, San Diego

Solving History Raymond Albert Rogers, 1998 An activist's response to current failed environmental policies that simply do not challenge the economic interests that benefit from overexploitation

Modernism and Christianity E. Tønning, 2014-01-29 By theorising the idea of 'formative tensions' between cultural Modernism and Christianity, and by in-depth case studies of James Joyce, David Jones, T. S. Eliot, Ezra Pound, W. H. Auden, Samuel Beckett, the book argues that no coherent account of Modernism can ignore the continuing impact of Christianity.

Cognitive Psychodynamics Mardi J. Horowitz, 1998-05-06 By one of the world's foremost psychological theoreticians, this work presents a major new integration of cognitive science and psychodynamic psychology. It develops a model of how defensive control processes can affect moods and transactional patterns.

Mad Tuscans and Their Families Elizabeth W. Mellyn, 2014-04-02 Based on three hundred civil and criminal cases over four centuries, Elizabeth W. Mellyn reconstructs the myriad ways families, communities, and civic and medical authorities met in the dynamic arena of Tuscan law courts to forge pragmatic solutions to the problems that madness brought to their households and streets. In some of these cases, solutions were protective and palliative; in others, they were predatory or abusive. The goals of families were sometimes at odds with those of the courts, but for the most part families and judges worked together to order households and communities in ways that served public and private interests. For most of the period Mellyn examines, Tuscan communities had no institutions devoted solely to the treatment and protection of the

mentally disturbed; responsibility for their long-term care fell to the family. By the end of the seventeenth century, Tuscans, like other Europeans, had come to explain madness in medical terms and the mentally disordered were beginning to move from households to hospitals. In *Mad Tuscans and Their Families*, Mellyn argues against the commonly held belief that these changes chart the rise of mechanisms of social control by emerging absolutist states. Rather, the story of mental illness is one of false starts, expedients, compromise, and consensus created by a wide range of historical actors.

Insane Passions Christine Coffman, 2006-12-12 In France in 1933, two sisters, presumed to be lovers, murdered the women who employed them as maids. Known as “the Papin affair,” the incident inspired not only Jean Genet's 1947 *The Maids* but also an essay by Jacques Lacan that presents the sisters' crime as fueled by a narcissistic, homosexual drive that culminated in the assault. In this new investigation of the roots of the twentieth-century myth of the lesbian-as-madwoman, Christine Coffman argues that the female psychotic was the privileged object of Lacan's effort to derive a revolutionary theory of subjectivity from the study of mental illness. Examining Lacan's early writings, French surrealism, Djuna Barnes' *Nightwood*, and H.D.'s homoerotic fiction in light of feminist and queer theory, *Insane Passions* argues that the psychotic woman that fascinates modernist writers returns with a murderous vengeance in a number of late twentieth-century films—including *Basic Instinct*, *Sister My Sister*, *Single White Female*, and *Murderous Maids*. Marking the limit of social acceptability, the “psychotic lesbian” repeatedly appears as the screen onto which the violence and madness of twentieth-century life are projected.

Madness and Modernism Louis Arnorsson Sass, 2017 *Madness and Modernism* provides a phenomenological study of schizophrenic disorders, criticizing some standard conceptions of these disorders. Sass argues that many aspects of this group of disorders can actually involve more sophisticated (albeit dysfunctional) forms of mind and experience.
