Meter As Rhythm Christopher Hasty,1997-04-10 In this book Christopher Hasty presents a striking new theory of musical duration. Drawing on insights from modern process philosophy, he advances a fully temporal perspective in which meter is released from its mechanistic connotations and recognized as a concrete, visceral agent of musical expression. Part one of the book reviews oppositions of law and freedom, structure and process, determinacy and indeterminacy in the speculations of theorists from the eighteenth century to the present. Part two reinterprets these contrasts to form a highly original account of meter that engages diverse musical repertoires and aesthetic issues.

The Cambridge Companion to Conducting José Antonio Bowen,2003-11-20 In this wide-ranging inside view of the history and practice of conducting, analysis and advice comes directly from working conductors, including Sir Charles Mackerras on opera, Bramwell Tovey on being an Artistic Director, Martyn Brabbins on modern music, Leon Botstein on programming and Vance George on choral conducting, and from those who work closely with conductors: a leading violinist describes working as a soloist with Stokowski, Ormandy and Barbirolli, while Solti and Abbado's studio producer explains orchestral recording, and one of the world's most powerful managers tells all. The book includes advice on how to conduct different types of groups (choral, opera, symphony, early music) and provides a substantial history of conducting as a study of national traditions. It is an unusually honest book about a secretive industry and managers, artistic directors, soloists, players and conductors openly discuss their different perspectives for the first time.

Worlds of Music Jeff Todd Titon,1996

[The Palgrave Handbook of Languages and Conflict](#) Michael Kelly,Hilary Footitt,Myriam Salama-Carr,2019-02-18 This Handbook maps the contours of an exciting and burgeoning interdisciplinary field concerned with the role of language and languages in situations of conflict. It explores conceptual approaches, sources of information that are available, and the institutions and actors that mediate language encounters. It examines case studies of the role that languages have played in specific conflicts, from colonial times through to the Middle East and Africa today. The contributors provide vibrant evidence to challenge the monolingual assumptions that have affected traditional views of war and conflict. They show that languages are woven into every aspect of the making of war and peace, and demonstrate how language shapes public policy and military strategy, setting frameworks and expectations. The Handbook's 22 chapters powerfully illustrate how the encounter

between languages is integral to almost all conflicts, to every phase of military operations and to the lived experiences of those on the ground, who meet, work and fight with speakers of other languages. This comprehensive work will appeal to scholars from across the disciplines of linguistics, translation studies, history, and international relations; and provide fresh insights for a broad range of practitioners interested in understanding the role and implications of foreign languages in war.

Rhetoric and Kairos Phillip Sipiora, James S. Baumlin, 2012-02-01 This collection offers the first comprehensive discussion of the history, theory, and pedagogical applications of kairos, a seminal and recently revised concept of classical rhetoric. Augusto Rostagni, James L. Kinneavy, Richard Leo Enos, John Poulakos, and John E. Smith are among the international list of scholars who explore the Homeric and literary origins of kairos, the technologies of time-keeping in antiquity, the role of right-timing in Hippocratic medicine, the improvisations of Gorgias, as well as the uses of kairos in Isocrates, Plato, Aristotle, Cicero, and the New Testament. Broad in its scope, the book also examines the distinctive philosophies of time reflected in Renaissance Humanism, Nineteenth-Century American Transcendentalism, Oriental art and ritual, and the application of kairos to contemporary philosophy, ethics, literary criticism, rhetorical theory, and composition pedagogy.

What to Listen for in Rock Ken Stephenson, 2002-01-01 In this concise and engaging analysis of rock music, music theorist Ken Stephenson explores the features that make this internationally popular music distinct from earlier music styles. The author offers a guided tour of rock music from the 1950s to the present, emphasizing the theoretical underpinnings of the style and, for the first time, systematically focusing not on rock music's history or sociology, but on the structural aspects of the music itself. What structures normally happen in rock music? What theoretical systems or models might best explain them? The book addresses these questions and more in chapters devoted to phrase rhythm, scales, key determination, cadences, harmonic palette and succession, and form. Each chapter provides richly detailed analyses of individual rock pieces from groups including Chicago; the Beatles; Emerson, Lake, and Palmer; Kansas; and others. Stephenson shows how rock music is stylistically unique, and he demonstrates how the features that make it distinct have tended to remain constant throughout the past half-century and within most substyles. For music students at the college level and for practicing rock musicians who desire a deeper understanding of their music, this book is an essential resource.

Gongs & Bamboo José Maceda, 1998 This panorama is a pictorial view of music instruments starting with older bamboo and other instruments of undetermined age, going on two types of gongs-flat in Northern Luzon and bossed in the South. These two areas may be viewed as pocket cultures comparable to other pocket cultures in Borneo, Sumatra, other islands in Southeast Asia and the mountain regions south of and including Yunnan province of China, thus placing the music of Luzon

and Mindanao in a larger geographical context. For example, mouth organs in Borneo and continental Southeast Asia are absent in the Philippines, where, however, separate pipes of panpipes are on occasion still being played by groups of boys among the Kalingga of Luzon. The musical elements of drone and melody identified in two lutes in Borneo or ensembles in Yunnan find examples in two players of the same tube zither in Mindanao and flat gongs in Luzon. The nearly 500 photographs in the book are almost all taken in the field, showing details of making and playing bamboo buzzers, jaw harps, zithers, percussion tubes, flutes and other instruments. Manners of tapping and sliding with the hands on flat gongs differ from beating them with sticks. Examples of big bossed gongs with wide rims (agung) struck with a mallet on the boss and a stick on the rim show affinities with a manner of playing bronze drums in Yunnan. In North Luzon, men and women dancing in circles with outstretched hands distinguish them from solo dancers with minimum body movements in the South.

Music and the Child Natalie Sarrazin, 2016-06-14 Children are inherently musical. They respond to music and learn through music. Music expresses children's identity and heritage, teaches them to belong to a culture, and develops their cognitive well-being and inner self worth. As professional instructors, childcare workers, or students looking forward to a career working with children, we should continuously search for ways to tap into children's natural reservoir of enthusiasm for singing, moving and experimenting with instruments. But how, you might ask? What music is appropriate for the children I'm working with? How can music help inspire a well-rounded child? How do I reach and teach children musically? Most importantly perhaps, how can I incorporate music into a curriculum that marginalizes the arts? This book explores a holistic, artistic, and integrated approach to understanding the developmental connections between music and children. This book guides professionals to work through music, harnessing the processes that underlie music learning, and outlining developmentally appropriate methods to understand the role of music in children's lives through play, games, creativity, and movement. Additionally, the book explores ways of applying music-making to benefit the whole child, i.e., socially, emotionally, physically, cognitively, and linguistically.

Classroom Observation Friedrich Lenz, Revert Klattenberg, Maximiliane Frobenius, 2020 Classroom observation has become a tool for analysing and improving English Language Teaching (ELT). This book represents the state of the art in language education and classroom interaction research from a data-driven empirical perspective. The micro-analytic, multimodal, and videographic approaches represented here understand classrooms as sites of complex, naturally occurring

interaction. The volume demonstrates that the investigation of this communicative setting is the basis for insights into the inner workings of classrooms and the development of strategies for teacher education. The introductory article complements the volume by giving a comprehensive overview of the theories and methods that have come to bear in classroom observation.

The Bond King Mary Childs, 2022-03-15 From the host of NPR's Planet Money, the deeply-investigated story of how one visionary, dogged investor changed American finance forever. Before Bill Gross was known among investors as the Bond King, he was a gambler. In 1966, a fresh college grad, he went to Vegas armed with his net worth (\$200) and a knack for counting cards. \$10,000 and countless casino bans later, he was hooked: so he enrolled in business school. The Bond King is the story of how that whiz kid made American finance his casino. Over the course of decades, Bill Gross turned the sleepy bond market into a destabilized game of high risk, high reward; founded Pimco, one of today's most powerful, secretive, and cutthroat investment firms; helped to reshape our financial system in the aftermath of the Great Recession—to his own advantage; and gained legions of admirers, and enemies, along the way. Like every American antihero, his ambition would also be his undoing. To understand the winners and losers of today's money game, journalist Mary Childs argues, is to understand the bond market—and to understand the bond market is to understand the Bond King.

The Story of Music Howard Goodall,2013-01-10 *** Accompanies BBC2's major new TV series and The Story of Music in 50 Pieces on Radio 3 *** In his dynamic tour through 40,000 years of music, from prehistoric instruments to modern-day pop, Howard Goodall leads us through the story of music as it happened, idea by idea, so that each musical innovation - harmony, notation, sung theatre, the orchestra, dance music, recording, broadcasting - strikes us with its original force. He focuses on what changed when and why, picking out the discoveries that revolutionised man-made sound and bringing to life musical visionaries from the little-known Pérotin to the colossus of Wagner. Along the way, he also gives refreshingly clear descriptions of what music is and how it works: what scales are all about, why some chords sound discordant and what all post-war pop songs have in common.

Health Systems Improvement Across the Globe Jeffrey Braithwaite,Russell Mannion,Yukihiro Matsuyama,Paul Shekelle,Stuart Whittaker,Samir Al-Adawi,2017-08-07 Following on from 2015's Healthcare Reform, Quality and Safety: Perspectives, Participants, Partnerships and Prospects in 30 Countries, this book encompasses a global perspective on healthcare while shifting the focus from reform to showcasing success stories of healthcare systems worldwide. It provides explanations of why various facets of healthcare systems work well in different contexts and offers the reader alternative models for consideration. The book features contributions from 60 countries, going much further than the common practice of focusing on affluent Western nations, to provide a comprehensive exploration of the success of healthcare systems globally. The majority of literature on health-sector improvement attempts to address the problems within systems, relating the errors that can and do occur, for example, and offering solutions and preventative strategies. This book of country case studies will approach the enhancement of health systems, patient safety and the quality of care in a new and innovative way, comprehensively surveying and synthesizing the success stories of healthcare systems around the world, utilizing Hollnagel's Safety-II approach to acknowledge the importance of exploring what goes right, what works well, and why it works. These success stories may include reference to macro, meso or micro levels of healthcare systems, various sectors (e.g., aged care, acute care or primary care), or specific programs or projects. Health System Improvement Across the Globe: Success Stories from 60 Countries is unprecedented in terms of both reach and positive emphasis, and as such will be instrumental in changing ways of thinking about and guiding health-sector improvement.
