Austro-Hungarian Naval Policy, 1904-1914 Milan Vego, 2013-10-31 This unique and comprehensive account describes the interplay of internal and external factors in the emergence of the Austro-Hungarian Navy from a coastal defence force in 1904 to a respectable battle force capable of the joint operations with other Triple Alliance fleets in the Mediterranean by the eve of World War I. By 1914 the Austro-Hungarian Navy was the sixth largest navy in the world and the quality of its officers and men was widely recognised by most European naval observers at the time. The book describes the relationships between naval leaders, the heir to the throne Archduke Francis Ferdinand, and the Parliament in shaping the dual Monarchy's naval policy. It also shows how the changes in foreign policy in Italy and underlying animosities between Rome and Vienna led to a naval race in the Adriatic that eventually bolstered Germany's naval position in respect to Great Britain in the North Sea.

Stalin's Ocean-going Fleet: Soviet Jurgen Rohwer, 2017-07-05 In this work, two senior naval historians analyze the discussions held in leading Soviet political, military, and naval circles concerning naval strategy and the decisions taken for warship-building programmes. They describe the reconstitution of the fleet under difficult conditions from the end of the Civil War up to the mid-1920s, leading to a change from classical naval strategy to a Jeune école model in the first two Five-Year Plans, including efforts to obtain foreign assistance in the design of warships and submarines. Their aim is to explain the reasons for the sudden change in 1935 to begin building a big ocean-going fleet. After a period of co-operation with Germany from 1939-41, the plans came to a halt when Hitler attacked the Soviet Union in 1941. Finally, this work covers the reopening of the naval planning processes in 1944 and 1945 and the discussions of the naval leadership with Stalin, the party and government officials about the direction of the new building programmes as the Cold War began.

Stalin's Ocean-going Fleet Mikhail Monakov, Jurgen Rohwer, 2012-11-12 A study of the development of strategic concepts in Stalin's Navy, in the context of his foreign/defence policy, using original archival documents translated from the Russian.

Naval Strategy and Operations in Narrow Seas Milan N. Vego, 2004-11-23 Many books and articles have been written on wars in narrow seas. However, none deals in any comprehensive manner with the problems of strategy and conduct of

naval operations. The aim of this book is to explain in some detail the characteristics of a war fought in narrow seas and to compare and contrast strategy and major operations in narrow seas and naval warfare in the open ocean..

The SS City of Flint Magne Haugseng,2021-07-09 In Europe, World War II was four months old by Christmas 1939. The City of Flint, an American freighter, had been instrumental in rescuing 1200 passengers from a torpedoed ocean liner, making headlines on both sides of the Atlantic. She was captured by a Nazi warship and sent towards a German port, rigged with explosives to ensure the British Navy would not capture it. Norwegian soldiers liberated the ship--by then even Hitler knew her name. Christmas 1942 saw the City of Flint in New York with other freighters loading for North Africa. Allied codes had been cracked and the convoy was expected by a group of U-Boats. Secretly carrying poison gas as part of her cargo, she was torpedoed and exploded on January 25, 1943. Eleven survivors in her fourth lifeboat fought mountainous seas, sharks and hunger. One went mad and walked overboard. The others survived 46 days before rescue. Eyewitness accounts, war diaries and archival sources bring this untold story to life.

Joint Operational Warfare Milan N. Vego,2009 Smallholder farmers and pastoralists fulfil an invaluable yet undervalued role in conserving biodiversity. They act as guardians of locally adapted livestock breeds that can make use of even marginal environments under tough climatic conditions and therefore are a crucial resource for food security. But in addition, by sustaining animals on natural vegetation and as part of local ecosystems, these communities also make a significant contribution to the conservation of wild biodiversity and of cultural landscapes. This publication provides a glimpse into the often intricate knowledge systems that pastoralists and smallholder farmers have developed for the management of their breeds in specific production systems and it also describes the multitude of threats and challenges these often marginalized communities have to cope with.

Lambi, 2019-06-28 When originally published in 1984, and based on archival research, this book was the first fully documented discussion of German naval strategy and planning from 1862-1914 against France, Russia, Great Britain, the United States and Japan. The book is a complete study of the relationship of the navy to Prusso-German power politics both in terms of the complexity of the problems discussed and in the length of the period covered. Exercising Control of the Sea Milan Vego, 2020-10-14 This book explains both the strategic and the operational aspects of exercising control of the sea. The struggle for sea control consists of three mutually related and overlapping phases: obtaining, maintaining and exercising sea control. It is in the phase of exercising sea control when one's strategic or operational success is exploited; otherwise, the fruits of victories achieved would be wasted. This work describes the strategy of a stronger side in wartime after a desired degree of control has been obtained, which is followed by a discussion on the objectives and main methods used in exercising sea control. The remaining chapters explain and analyze in some detail each of the main methods of exercising sea control: defence and protection of one's own and destruction/neutralization of the enemy's military-economic potential at sea, capturing the enemy's operationally important positions ashore, destroying/weakening the enemy's military-economic potential ashore and supporting one's ground forces in their offensive and defensive operations on the coast. This book will be of much interest to students of strategic studies, sea power and naval history.

Life, Earth, Colony Ian Klinke, 2023-08-23 *Life, Earth, Colony* explores the ideas, life, and historical significance of

German zoologist turned geographer Friedrich Ratzel (1844-1904), famous for developing the foundations of geopolitical thought. Ratzel produced a remarkable body of work that revolutionized the study of space, movement, colonization, and war. He also served as a source of intellectual inspiration for national socialism, particularly through his Lebensraum (living space) concept, which understood all life as being caught in an eternal struggle for space. This book closely analyzes this radical conservative intellectual, focusing on his often-overlooked ethnography, biogeography, travel, and creative writing, and colonial activism as well as his more widely-known political geography. Life, Earth, Colony finds that there is an as yet unexplored necropolitical impulse at the heart of Ratzel’s entire oeuvre, a preoccupation with death and dying, which had a profound impact on twentieth-century history.
