*Biodiversity in Agroecosystems* Wanda W. Collins, Calvin O. Qualset, 1998-08-14 between the diversity of plant and animal species and host/dependent agricultural systems. Biodiversity in Agroecosystems shows how biodiversity can be thought of not only as the rich make-up of a great number of related and competing species within an ecologically defined community, but also as the robust behavior and resilience of those species over time and as the endurance of their eco-community. This book brings to the fore new research on biodiversity in agricultural ecosystems at both micro and macro levels, heretofore available only in journals and proceedings papers.

*Cultures of Mass Tourism* Pau Obrador Pons, 2016-05-13 With more than 230 million international tourists a year, the Mediterranean region is the largest tourist destination in the world. This book outlines that its economic importance is matched by its significance as a cultural and aesthetic phenomenon. Through a series of ethnographic insights into some of the key sites of mass Mediterranean tourism, it focuses on package tourists' experiences of the serial, banal and depthless spaces that are mushrooming along the coast and the enchantments, dissolutions and dreams that saturate them. Moving away from the notion of authentic places corrupted by mass tourism, the book shows how new forms and spaces are made and remade by the mobilities and performances of locals, workers and tourists. Finally, the book looks at the complex materialities of mass tourism and the many networks that make it possible.

**Ending the Siege of Leningrad** Carlos Caballero Jurado, 2020-07-30 The Battle of Krasny Bor in 1943 was part of the

Soviet Red Army's efforts to lift the blockade of Leningrad, one of the longest and most destructive in history. Previous works on the Battle of Krasny Bor have focused primarily on the infantry involved, especially when using veteran testimonies, and the use of artillery has been conspicuously absent. This book aims to put the reader right in the heart of the battle, describing the action from an artilleryman's point of view, seeing it fundamentally as a duel between the Soviet and German-Spanish soldiers.

*The Oxford Handbook of Ancient Greek Religion* Esther Eidinow,Julia Kindt,2015 This handbook offers both students and teachers of ancient Greek religion a comprehensive overview of the current state of scholarship in the subject, from the Archaic to the Hellenistic periods. It not only presents key information, but also explores the ways in which such information is gathered and the different approaches that have shaped the area. In doing so, the volume provides a crucial research and orientation tool for students of the ancient world, and also makes a vital contribution to the key debates surrounding the conceptualization of ancient Greek religion. The handbook's initial chapters lay out the key dimensions of ancient Greek religion, approaches to evidence, and the representations of myths. The following chapters discuss the continuities and differences between religious practices in different cultures, including Egypt, the Near East, the Black Sea, and Bactria and India. The range of contributions emphasizes the diversity of relationships between mortals and the supernatural - in all their manifestations, across, between, and beyond ancient Greek cultures - and draws attention to religious activities as dynamic, highlighting how they changed over time, place, and context.

**Ancient Greek Hero Cult** Robin Hägg,1999

**The Chronicle of San Juan de la Peña** Pedro IV (King of Aragon),1991 Commissioned and supervised by King Pedro IV, and compiled some time around 1380, The Chronicle of San Juan de la Pena was long valued as the earliest complete history of the Crown of Aragon. With Lynn H. Nelson's translation, the Chronicle is at last available in English.

**Artistic Approaches to Cultural Mapping** Nancy Duxbury,W.F. Garrett-Petts,Alys Longley,2018-09-03 Making space for imagination can shift research and community planning from a reflective stance to a future forming orientation and practice. Cultural mapping is an emerging discourse of collaborative, community-based inquiry and advocacy. This book looks at artistic approaches to cultural mapping, focusing on imaginative cartography. It emphasizes the importance of creative process that engages with the felt sense of community experiences, an element often missing from conventional mapping practices. International artistic contributions in this book reveal the creative research practices and languages of artists, a prerequisite to understanding the multi-modal interface of cultural mapping. The book examines how contemporary artistic approaches can challenge conventional asset mapping by animating and honouring the local, giving voice and definition to the vernacular, or recognizing the notion of place as inhabited by story and history. It explores the processes of

seeing and listening and the importance of the aesthetic as a key component of community self-expression and self-representation. Innovative contributions in this book champion inclusion and experimentation, expose unacknowledged power relations, and catalyze identity formation, through multiple modes of artistic representation and performance. It will be a valuable resource for individuals involved with creative research methods, performance, and cultural mapping as well as social and urban planning.

**Bite-Sized Operations Management** Mark S. Daskin, 2022-05-31 This text is an introduction to Operations Management. Three themes are woven throughout the book: optimization or trying to do the best we can, managing tradeoffs between conflicting objectives, and dealing with uncertainty. After a brief introduction, the text reviews the fundamentals of probability including commonly used discrete and continuous distributions and functions of a random variable. The next major section, beginning in Chapter 7, examines optimization. The key fundamentals of optimization—inputs, decision variables, objective(s), and constraints—are introduced. Optimization is applied to linear regression, basic inventory modeling, and the newsvendor problem, which incorporates uncertain demand. Linear programming is then introduced. We show that the newsvendor problem can be cast as a network flow linear programming problem. Linear programming is then applied to the problem of redistributing empty rental vehicles (e.g., bicycles) at the end of a day and the problem of assigning students to seminars. Several chapters deal with location models as examples of both simple optimization problems and integer programming problems. The next major section focuses on queueing theory including single- and multi-server queues. This section also introduces a numerical method for solving for key performance metrics for a common class of queueing problems as well as simulation modeling. Finally, the text ends with a discussion of decision theory that again integrates notions of optimization, tradeoffs, and uncertainty analysis. The text is designed for anyone with a modest mathematical background. As such, it should be readily accessible to engineering students, economics, statistics, and mathematics majors, as well as many business students.

The Impact of Internet on the Mass Media in Europe Nikos Leandros, 2006 Media and the wider sector of communication are changing under the impact of the Internet. The changes affect all aspects of the communication process, audiences, media and information producers and, inevitably, the role of the media in society. As communication industries are converging it becomes possible for companies to expand the range of their services. Previously clearly defined industry

structures are dissolving and integrated media companies turn into cross - media service companies and traditional publishers into new media ventures, which publish across various distribution channels, such as Internet, wireless devices or CD-ROM. The practices of journalism and content creation also change by the overwhelming mass of information that the Internet offers. New opportunities for information delivery to readers require the acquisition of new skills in the spheres principally of information presentation and organization. This book discusses the new phenomena and the dynamics of change of the European media landscape. It includes a selection of papers from the final conference of the COST Action A20 on the impact of the internet on the existing mass media in Europe. Nikos Leandros is Assistant Professor at the Department of Communication, Media and Culture of Panteion University of Social and Political Sciences, Greece. COST is an intergovernmental framework for European CO-operation in the field of Scientific and Technical Research, allowing the co-ordination of nationally funded research on a European level. COST Actions cover basic and pre-competitive research as well as activities of public utility. The goal of COST is to ensure that Europe holds a strong position in the field of scientific and technical research for peaceful purposes, by increasing European cooperation and interaction in this field.

**The Sacrificial Rituals of Greek Hero-Cults in the Archaic to the Early Hellenistic Period** Gunnel Ekroth, 2013-05-15 This study questions the traditional view of sacrifices in hero-cults during the Archaic to the early Hellenistic periods. The analysis of the epigraphical and literary evidence for sacrifices to heroes in these periods shows, contrary to the traditional notion, that the main ritual in hero-cults was a thysia at which the worshippers consumed the meat from the animal victim. A particular handling of the animal's blood or a holocaust, rituals previously taken to be typical for heroes, can rarely be documented and must be considered as marginal features in hero-cults. The terms eschara, escharon, bothros, enagizein, enagisma, enagismos and enagisterion, believed to be characteristic for hero-cults, are seldom used in hero-contexts before the Roman period and occur mainly in the Byzantine lexicographers and in the scholia. Since the main kind of sacrifice in hero-cults was a thysia, a ritual intimately connected with the social structure of society, the heroes must

have fulfilled the same role as the gods within the Greek religious system. The fact that the heroes were dead seems to have been of little significance for the sacrificial rituals and it is questionable whether the rituals of hero-cults are to be considered as originating in the cult of the dead.

It concludes by providing management and marketing implications and recommendations for tourism business, destination managers and local planners to enable them to successfully operate such alliances.
