Ilan Eshkeri's Stardust Ian Sapiro,2013-07-16 Based on Neil Gaiman's novel of the same name, Stardust (2007) was an instant hit with fans of fantasy and science-fiction. The film follows the adventures of a young man who crosses through a gap in a wall which separates England from a magical kingdom. The fantastical atmosphere required by the narrative is maintained by the scale and grandeur of much of the musical score, written by rising British composer Ilan Eshkeri. Trained in the craft by composers Michael Kamen, Ed Shearmur, and Hans Zimmer, Eshkeri more than lived up to the task of producing music for one of his first feature films. In Ilan Eshkeri's Stardust: A Film Score Guide, Ian Sapiro carefully examines both Eshkeri's music for the film and the working habits of the composer himself. An introduction to Eshkeri establishes the context within which he developed as a film-score composer, followed by an analysis of his musical style and his scoring strategies, particularly for the film Stardust. Eshkeri's collaborative partnerships with music producer Steve McLaughlin, contractor/conductor Andy Brown, orchestrator Robert Elhai, and copyist Vic Fraser are also discussed, in addition to Eshkeri's relationship with Stardust director Matthew Vaughn. Eshkeri's involvement in the musical identity of the film during the production phase is also evaluated, as are developments in the score in the context of a new conceptual model of film-score production in the UK. With complete cooperation from Eshkeri, who provided the author privileged access to primary materials, Sapiro presents a unique look into the art of film scoring. The first detailed investigation of this composer and his music, Ilan Eshkeri's Stardust: A Film Score Guide is sure to be of interest to film and music scholars and fans.

**The Healthy Edit** John Rosenberg,2013-02-11 Every film or show that we watch, no matter how great the final cut, has its problems during production. Whether it's a bad performance from an actor, a hole in the story or script, continuity or pacing issues, or something being placed in a shot that shouldn't be, there's no shortage of problems encountered once postproduction has begun. Fixing these problems then becomes the job of the editor. This book provides those editors with creative editing solutions they can employ to overcome these problems and is the key to nursing a sick project back to health in the editing room. Though the book takes an application-agnostic approach, specific solutions are presented for today's most commonly used non-linear editing applications. Solutions more relevant to certain genres are discussed in-depth, as are solutions that editors can employ through the use of simple VFX techniques. Case studies and interviews with Hollywood

editors provide readers with real-world problems encountered, and solutions used to overcome them. The companion website provides Quicktime videos and Flash animations visually demonstrating problems and how they were dealt with.

**Multimedia Information Extraction** Mark T. Maybury, 2012-07-11 The advent of increasingly large consumer collections of audio (e.g., iTunes), imagery (e.g., Flickr), and video (e.g., YouTube) is driving a need not only for multimedia retrieval but also information extraction from and across media. Furthermore, industrial and government collections fuel requirements for stock media access, media preservation, broadcast news retrieval, identity management, and video surveillance. While significant advances have been made in language processing for information extraction from unstructured multilingual text and extraction of objects from imagery and video, these advances have been explored in largely independent research communities who have addressed extracting information from single media (e.g., text, imagery, audio). And yet users need to search for concepts across individual media, author multimedia artifacts, and perform multimedia analysis in many domains. This collection is intended to serve several purposes, including reporting the current state of the art, stimulating novel research, and encouraging cross-fertilization of distinct research disciplines. The collection and integration of a common base of intellectual material will provide an invaluable service from which to teach a future generation of cross disciplinary media scientists and engineers.

**The Music of Harry Potter and The Lord of the Rings** Daniel White, 2024-05-20 The Music of Harry Potter and The Lord of the Rings provides an in-depth study of the music of two of the biggest fantasy franchises, focussing on music's worldbuilding roles within the film-watching experience and elsewhere in videogames, trailers, plays, theme parks and other attractions, and the world of fandom. Daniel White takes a range of approaches and techniques of motivic and thematic musical analysis, and pairs this with transformational harmonic analysis to theorise music's worldbuilding roles in film. Chapters focus in turn on the opening sequences of the case study franchise films, their closing sequences, and on their depiction of houses, homes and homelands. Extra-filmic areas of these fantasy worlds are also explored, including theme parks and other tourist attractions of the Harry Potter franchise, videogames and the immersive power of their music, and the world of fandom with a focus on soundtrack consumption and other musical fan practices. Through this multifaceted approach, readers gain a deeper understanding not only of the music of these franchises, but also of music's power in the multimedia franchise both within and without film to build a home that attracts inhabitants. This book will be valuable for academics and students as well as fans of fantasy franchises.

**Music in Action Film** James Buhler, Mark Durrant, 2020-11-16 Music in Action Film is the first volume to address the central role of music and sound in action film—arguably the most dominant form of commercial cinema today. Bringing together 15 essays by established and emerging scholars, the book encompasses both Hollywood blockbusters and international films, from classic works such as The Seven Samurai to contemporary superhero franchises. The contributors

consider action both as genre and as a mode of cinematic expression, in chapters on evolving musical conventions; politics, representation, and identity; musical affect and agency; the functional role of music and sound design in action film; and production technologies. Breaking new critical ground yet highly accessible, this book will be of interest to students and scholars of music and film studies.

**The Invisible Art of Film Music** Laurence E. MacDonald,2013-05-02 Beginning with the era of synchronized sound in the 1920s, music has been an integral part of motion pictures. Whether used to heighten the tension of a scene or evoke a subtle emotional response, scores have played a significant—if often unrealized—role in the viewer's enjoyment. In *The Invisible Art of Film Music*, Laurence MacDonald provides a comprehensive introduction for the general student, film historian, and aspiring cinematographer. Arranged chronologically from the silent era to the present day, this volume provides insight into the evolution of music in cinema and analyzes the vital contributions of scores to hundreds of films. MacDonald reviews key developments in film music and discusses many of the most important and influential scores of the last nine decades, including those from *Modern Times*, *Gone with the Wind*, *Citizen Kane*, *Laura*, *A Streetcar Named Desire*, *Ben-Hur*, *Lawrence of Arabia*, *The Godfather*, *Jaws*, *Ragtime*, *The Mission*, *Titanic*, *Gladiator*, *The Lord of the Rings*, *Brokeback Mountain*, and *Slumdog Millionaire*. MacDonald also provides biographical sketches of such great composers as Max Steiner, Alfred Newman, Franz Waxman, Bernard Herrmann, Elmer Bernstein, Henry Mancini, Maurice Jarre, John Barry, John Williams, Jerry Goldsmith, Dave Grusin, Ennio Morricone, Randy Newman, Hans Zimmer, and Danny Elfman. Updated and expanded to include scores produced well into the twenty-first century, this new edition of *The Invisible Art of Film Music* will appeal not only to scholars of cinema and musicologists but also any fan of film scores.

*Contemporary Film Music* Lindsay Coleman,Joakim Tillman,2017-05-30 The purpose of this book, through its very creation, is to strengthen the dialogue between practitioner and theorist. To that end, a film academic and musicologist have collaborated as editors on this book, which is in turn comprised of interviews with composers alongside complementary chapters that focus on a particular feature of the composer's approach or style. These chapters are written by a fellow composer, musicologist, or film academic who specializes in that element of the composer's output. In the interview portions of this book, six major film composers discuss their work from the early 1980s to the present day: Carter Burwell, Mychael Danna, Dario Marianelli, Rachel Portman, Zbigniew Preisner, and A.R. Rahman. The focus is on the practical considerations

of film composition, the relationship each composer has with the moving image, narrative, technical considerations, personal motivations in composing, the relationships composers have with their directors, and their own creative processes. Contemporary Film Music also explores the contemporary influence of electronic music, issues surrounding the mixing of soundtracks, music theory, and the evolution of each composer's musical voice.
