Oliver Sacks

Thinking in Pictures Temple Grandin, 2009-09-07 The idea that some people think differently, though no less humanly, is explored in this inspiring book. Temple Grandin is a gifted and successful animal scientist, and she is autistic. Here she tells us what it was like to grow up perceiving the world in an entirely concrete and visual way - somewhat akin to how animals think, she believes - and how it feels now. Through her finely observed understanding of the workings of her mind she gives us an invaluable insight into autism and its challenges.

Making Animals Happy Temple Grandin, Catherine Johnson, 2010 'The modern day Doctor Dolittle' (Guardian), bestselling author of *Animals in Translation*, investigates the secrets of mental health in animals.

Temple Grandin Sy Montgomery, Temple Grandin, 2012-04-03 When Temple Grandin was born, her parents knew that she was different. Years later she was diagnosed with autism. While Temple's doctor recommended a hospital, her mother believed in her. Temple went to school instead. As an advocate for autism, Temple uses her experience as an example of the unique contributions that autistic people can make. This compelling biography complete with Temple's personal photos takes us inside her extraordinary mind and opens the door to a broader understanding of autism.

The Loving Push Temple Grandin, Debra Moore, 2016 How parents and professionals can help spectrum kids become successful adults

Calling All Minds Temple Grandin, Ph.D., 2018-05-15 From world-renowned autism spokesperson, scientist, and inventor Temple Grandin -- a book of personal stories, inventions, and facts that will blow young inventors' minds and make them soar. Have you ever wondered what makes a kite fly or a boat float? Have you ever thought about why snowflakes are symmetrical, or why golf balls have dimples? Have you ever tried to make a kaleidoscope or build a pair of stilts? In *Calling All Minds*, Temple Grandin explores the ideas behind all of those questions and more. She delves into the science behind inventions, the steps various people took to create and improve upon ideas as they evolved, and the ways in which young inventors can continue to think about and understand what it means to tinker, to fiddle, and to innovate. And laced throughout it all, Temple gives us glimpses into her own childhood tinkering, building, and inventing. More than a blueprint

for how to build things, in *Calling All Minds* Temple Grandin creates a blueprint for different ways to look at the world. And more than a call to action, she gives a call to imagination, and shows readers that there is truly no single way to approach any given problem—but that an open and inquisitive mind is always key. Praise for *Calling All Minds*: An impassioned call to look at the world in unique ways with plenty of practical advice on how to cultivate a curious, inquiring, imaginative mind. —Kirkus Reviews Both practical and inspirational, this useful book describes an overall approach to viewing the world creatively, as exemplified by the numerous projects and supporting material provided here. —VOYA Grandin offers a nuanced perspective on the qualities of a successful inventor—notably, a sense of wonder and curiosity, careful observation, and the willingness to learn from mistakes. —Publishers Weekly

An Anthropologist on Mars Oliver Sacks, 2011-06-16 As with his previous bestseller, *The Man Who Mistook His Wife for a Hat*, in *An Anthropologist on Mars* Oliver Sacks uses case studies to illustrate the myriad ways in which neurological conditions can affect our sense of self, our experience of the world, and how we relate to those around us. Writing with his trademark blend of scientific rigour and human compassion, he describes patients such as the colour-blind painter or the surgeon with compulsive tics that disappear in the operating theatre; patients for whom disorientation and alienation – but also adaptation – are inescapable facts of life. 'An inexhaustible tourist at the farther reaches of the mind, Sacks presents, in sparse, unsentimental prose, the stories of seven of his patients. The result is as rich, vivid and compelling as any collection of short fictional stories' – Independent on Sunday

The Way I See It: a Personal Look at Autism and Asperger's Temple Grandin, 2015-11 This third edition of this book is a compilation of articles I have written for the *Autism Asperger's Digest* magazine from 2000 to present--Page xi.

Animals in Translation Temple Grandin, Catherine Johnson, 2009-08-11 With unique personal insight, experience, and hard science, *Animals in Translation* is the definitive, groundbreaking work on animal behavior and psychology. Temple Grandin's professional training as an animal scientist and her history as a person with autism have given her a perspective like that of no other expert in the field of animal science. Grandin and coauthor Catherine Johnson present their powerful theory that autistic people can often think the way animals think—putting autistic people in the perfect position to translate “animal talk.” Exploring animal pain, fear, aggression, love, friendship, communication, learning, and even animal genius, Grandin is a faithful guide into their world. *Animals in Translation* reveals that animals are much smarter than anyone ever imagined, and Grandin, standing at the intersection of autism and animals, offers unparalleled observations and extraordinary ideas about both.

Animals Make Us Human Temple Grandin, Catherine Johnson, 2010-01-12 How can we give animals the best life—for them? What does an animal need to be happy? In her groundbreaking, best-selling book *Animals in Translation*, Temple Grandin drew on her own experience with autism as well as her experience as an animal scientist to deliver extraordinary

insights into how animals think, act, and feel. Now she builds on those insights to show us how to give our animals the best and happiest life—on their terms, not ours. Knowing what causes animals physical pain is usually easy, but pinpointing emotional distress is much harder. Drawing on the latest research and her own work, Grandin identifies the core emotional needs of animals and then explains how to fulfill the specific needs of dogs and cats, horses, farm animals, zoo animals, and even wildlife. Whether it's how to make the healthiest environment for the dog you must leave alone most of the day, how to keep pigs from being bored, or how to know if the lion pacing in the zoo is miserable or just exercising, Grandin teaches us to challenge our assumptions about animal contentment and honor our bond with our fellow creatures. *Animals Make Us Human* is the culmination of almost thirty years of research, experimentation, and experience. This is essential reading for anyone who's ever owned, cared for, or simply cared about an animal.

Carly's Voice Arthur Fleischmann, 2012-03-27 In this international bestseller, father and advocate for Autism awareness Arthur Fleischmann blends his daughter Carly's own words with his story of getting to know his remarkable daughter—after years of believing that she was unable to understand or communicate with him. At the age of two, Carly Fleischmann was diagnosed with severe autism and an oral motor condition that prevented her from speaking. Doctors predicted that she would never intellectually develop beyond the abilities of a small child. Carly remained largely unreachable through the years. Then, at the age of ten, she had a breakthrough. While working with her devoted therapists, Carly reached over to their laptop and typed "HELP TEETH HURT," much to everyone's astonishment. Although Carly still struggles with all the symptoms of autism, she now has regular, witty, and profound conversations on the computer with her family and her many thousands of supporters online. One of the first books to explore firsthand the challenges of living with autism, *Carly's Voice* brings readers inside a once-secret world in the company of an inspiring young woman who has found her voice and her mission

Through her books and speaking engagements she has inspired and enlightened teachers, therapists, professionals, mother, fathers and family members with her perspectives about life with autism. Now, in *Manners Matter!* Temple steps away from the world of adults and talks directly to kids themselves, sharing her experiences living with and growing up with autism in kid-friendly language and colorfully illustrated stories and characters. Turn Autism Around Mary Lynch Barbera, Ph.D.,2022-03-29 Help remediate—and in some cases eliminate—autism and other developmental delays in young children, even in as little as 15 minutes a day with this toolkit of behavioral practices that can be taught at home. Developmental delays and signs of autism usually show up before 18 months of age, yet children are often not diagnosed until they are 4 or 5 years old. In Turn Autism Around, Dr. Mary Barbera explains why parents can't afford to worry and wait in long lines for evaluations and treatment while not knowing how to help their children. She empowers parents, caregivers, and early intervention professionals to regain hope and take back control with simple strategies to dramatically improve outcomes for their children. Dr. Barbera has created a new approach to teaching kids with developmental delays that uses the science of Applied Behavior Analysis (ABA) married with a positive, child-friendly methodology that any parent can use—whether or not their child has delays—to learn to teach communication skills, socialization strategies, as well as tackle sleep, eating, potty training, and behavior challenges in a positive, effective, and lasting way. Turn Autism Around is the first book of its kind that calls attention to an important fact: parents can make a tremendous impact on their child's development through behavioral practices taught at home, even in as little as 15 minutes a day. Her program shows these autism and developmental delays can be remediated, and in some cases, delays can be caught up altogether, if parents intervene while the child is young. This book is for parents of young children aged one-to-five years who are passionate about helping their child as well as learning how they can change the trajectory of their child's and family's life.
