Riccardo Antonilli riesce a offrire una sintesi adatta a un pubblico di ricercatori e curiosi, sbrogliando dati e fornendo informazioni esatte sul mondo in costante evoluzione dei social network.

L'era della Web Communication Riccardo Di Bari, 2012-10-17 Da quando il World Wide Web - la Rete delle Reti - è entrato prepotentemente a far parte delle nostre vite, la nostra società sta sperimentando un cambiamento profondo. Ma come è cominciato tutto questo? Quando, come e perché il Web ha cessato di essere una semplice fonte di informazioni, per diventare uno strumento di interazione tra persone? E come si evolverà il Web nel futuro? Partendo dalle origini di Internet e del Web, il testo esamina in profondità le caratteristiche del Web 2.0, il Web Sociale; affronta poi il tema del Web del futuro prossimo, il Web 3.0 (Web Semantico), senza tralasciare l'evoluzione futura più remota, ossia il Web 4.0 (Web Ubiquo). Spiega come tutto ebbe inizio con la digitalizzazione, il presupposto fondamentale per fenomeni di grande attualità come la convergenza digitale e quella multimediale, la crossmedialità, la rimediazione digitale. Dal punto di vista più strettamente comunicazionale, il lavoro - nell'attribuire al Web una natura mediale - affronta il tema del passaggio dalla comunicazione tradizionale alla web communication, in tutte le sue declinazioni e modalità: la comunicazione screen to face asincrona e quella sincrona. Anche gli aspetti più concreti non vengono trascurati: un intero capitolo spiega come comunicare nel Web e fornisce utili indicazioni pratiche per fare web communication in modo efficace. La seconda parte del libro è dedicata a un'approfondita analisi delle tre aree mediali del Web di oggi: l'area della conoscenza e condivisione (dai motori di ricerca alle enciclopedie online, sino alla nuova didattica rappresentata dall'e-learning), l'area del business (e-commerce come strategia di e-business, marketing virale e web advertising come strumenti di web marketing) e l'area delle relazioni sociali (social media e blog, colonne portanti del Web 2.0). Il libro comprende oltre 30 focus, approfondimenti relativi a casi concreti - tutti legati al Web - di storie di successo o particolarmente significative. Prefazione di Marino Livolsi, sociologo e Presidente del Corso di Laurea in Scienze della Comunicazione, Facoltà di Psicologia, Università Vita - Salute San Raffaele, Milano.

Social network Francesco Tisconi, 2014-02 Per operare consapevolmente nel mondo della comunicazione e del marketing

sono necessari strumenti critici e culturali: il volume unisce una conoscenza teorica al sapere pratico oggi necessario per districarsi fra innumerevoli software e applicazioni. Il testo offre una panoramica su alcuni dei fenomeni più significativi della “comunicazione 2.0” e illustra, in particolare, le tecniche di scrittura nel Web, il tema dell’usabilità nella progettazione di siti e applicazioni, i blog come elemento per rinforzare l’identità online e alcuni strumenti utili, come le infografiche, i CMS e WordPress. Vengono poi presi in esame i principali social network - Facebook, Twitter, Google+, LinkedIn - e la loro storia, con un occhio particolare ad alcune problematiche generali: privacy, motori di ricerca, BOT (agenti software che imitano il comportamento umano). Una parte, infine, è dedicata al social media marketing e illustra nel dettaglio la teoria, la pratica e gli strumenti necessari per condurre una campagna di marketing tramite i social media, oltre a fare riferimento ad alcune campagne di successo condotte da aziende italiane e multinazionali. Francesco Tisconi è docente di Editoria multimediale e di Teorie e tecniche della comunicazione Web presso il Dipartimento di Beni culturali e ambientali dell’Università degli Studi di Milano.

Fenomenologia dei social network. Presenza, relazioni e consumi mediali degli italiani online Giovanni Boccia Artieri, Laura Gemini, Francesca Pasquali, Simone Carlo, Manolo Farci, Marco Pedroni, 2018-02-07 Il libro si spinge alle radici della realtà dei social network, per interrogare condizioni di possibilità e pratiche sociali che hanno permesso ad ambienti comunicativi come Facebook di diventare un orizzonte diffuso di senso individuale e collettivo e un luogo di osservazione privilegiato dell’importanza che i media e il Web hanno nella nostra vita. Attraverso i racconti degli utenti raccolti nell’ambito di un progetto di ricerca nazionale, il lavoro indaga in che modo Facebook sia diventato una palestra sociale in cui gli intrecci tra pratiche d’uso, forme di consumo e affordance della piattaforma mettono in luce sia le dinamiche di socializzazione all’inclusione comunicativa, sia la costante ricerca di senso della e nella connessione.

Networks in the Early History of Capitalism Stefania Montemezzo, 2024-10-31 Drawing on a detailed examination of Venetian commerce in the Middle Ages, this book explores the business practices and structures that enabled merchants to compete in a challenging international market. Contributing to the literature on the early history of capitalism, this book demonstrates how Venetian merchants combined innovation with traditional methods to maintain their edge in a competitive world, providing valuable lessons on resilience and strategic planning in commerce. Small- and mid-sized commercial companies operating across borders and geographies in the early Renaissance period faced numerous challenges, including identifying profitable sectors and businesses, developing effective business strategies, dealing with peers and subordinates, managing the flow of information, and assessing risks and potential rewards. The chapters explore a range of topics in this context, including the roles of family-based firms, the strategic deployment of agents, and the impact of state policies on private enterprise. Readers are introduced to the ways Venetian merchants managed capital, adapted to market demands, and overcame obstacles like wars and resource shortages. This book will be of significant interest to historians and social

scientists researching economic history, the history of trade, the history of capitalism, medieval and Renaissance history, and historical network analysis.

I social network nell'educazione Maria Ranieri, Stefania Manca, 2017-12-15 Nella storia recente delle tecnologie digitali uno dei fenomeni più significativi è stato quello della nascita dei cosiddetti social media e, in particolare, dei social network. L'ampia diffusione di queste tecnologie sta sollevando nuovi interrogativi anche sul versante educativo. Trattandosi di artefatti che mediano le relazioni sociali e l'accesso alle informazioni, il loro impiego ha un impatto sulla vita socio-relazionale delle persone e sulle modalità di fruizione e produzione della conoscenza. Il problema può essere affrontato distinguendo tre dimensioni rilevanti: l'educazione ai social network, l'apprendimento e la formazione con i social network. Il volume intende offrire un quadro completo di queste tre tematiche, con un'attenzione sia agli aspetti teorici sia a quelli applicativi, nell'ottica di fornire a studenti, insegnanti e policy maker le coordinate metodologiche e operative utili per orientarsi nei nuovi scenari delineati dai social network.

La solitudine del social networker Carlo Mazzucchelli, 2014-03-25 SAGGIO (304 pagine) - TECNOLOGIA - Un libro davvero interessante su tematiche attuali: come i social network entrano nella nostra vita e la cambiano portandoci a isolarci dalla realtà virtuale. La solitudine, la demenza e la dipendenza da internet e dai social sono quindi prodotti della tecnologia. Approfondire il tema della solitudine come prodotto della tecnologia non è affatto semplice, poiché esistono opinioni antitetiche che in questo libro vengono espone in modo trasparente. L'argomento trattato è molto affascinante e, come scrive lo stesso autore, è possibile analizzarne tutte le sue sfaccettature il tutto con l'obiettivo di combattere l'isolamento e la solitudine negativa, causa di sofferenza, angoscia e ansia, e dare maggiori opportunità a quella creativa, fonte di maggiore benessere (well-ness) e maggiore felicità. Dirigente d'azienda, filosofo e tecnologo, Carlo Mazzucchelli è il fondatore del progetto editoriale SoloTablet (www.solotablet.it) dedicato alle nuove tecnologie e ai loro effetti sulla vita individuale, sociale e professionale delle persone. Esperto di marketing, comunicazione e management, ha operato in ruoli manageriali e dirigenziali in aziende italiane e multinazionali. Focalizzato da sempre sull'innovazione ha implementato numerosi programmi finalizzati al cambiamento, ad incrementare l'efficacia dell'attività commerciale, il valore del capitale relazionale dell'azienda e la fidelizzazione della clientela attraverso l'utilizzo di tecnologie all'avanguardia e approcci innovativi. Giornalista e writer, communication manager e storyteller, autore di e-book, formatore e oratore in meeting, seminari e convegni. È esperto di Internet, social network e ambienti collaborativi in rete e di strumenti di analisi delle reti social, abile networker, costruttore e gestore di comunità professionali e tematiche online.

Italian Academies and their Networks, 1525-1700 Simone Testa, 2017-03-21 Italian Academies have typically been

studied individually or in the context of specific cities, leaving an important lacuna in the scholarship on Italian culture and early modernity. Cutting across various disciplines, this volume traces the relationships of these Academies and explains how they prefigured networks like the République des letters.

The Rise of Early Rome Francesca Fulminante,2023-08-31 Focusing on transportation systems in Etruria and Latium Italy from ca. 1000-500 BC, this book explores Rome's rise to power.

Psicopatologia web-mediata Federico Tonioni,2013-10-11 Il concetto di psicopatologia web-mediata nasce dalla necessità di distinguere la dipendenza da internet, intesa come dipendenza patologica comportamentale, da dinamiche disfunzionali più complesse che coinvolgono bambini e adolescenti nativi digitali. Questo libro, che rappresenta un tentativo di comprensione di tali dinamiche, affonda le sue radici nell'esperienza clinica svolta, presso il Policlinico Gemelli di Roma, su pazienti con forme morbose che espandono i confini della clinica psichiatrica classica e che quindi lasciano pensare all'acquisizione di basi mentali diverse. La crescita inarrestabile delle relazioni internet-mediate, destinate nel tempo a prevalere sui contatti "dal vivo", ha moltiplicato le possibilità di comunicare tra i giovani e complicato invece le relazioni con la generazione precedente, quella dei genitori, i quali spesso sull'argomento risultano paradossalmente meno competenti dei figli. Il volume esplora quindi la complessità dei quadri psicopatologici che ne scaturiscono, analizzando la dipendenza da internet nel contesto allargato di altre dipendenze comportamentali, come quella da gioco d'azzardo (online gambling) e varie forme di perversione delle condotte sessuali (cybersex). Dopo la descrizione delle trasformazioni socioculturali che l'era digitale ha generato nel modo di vivere il tempo e lo spazio e l'emergere di gravi condotte di ritiro sociale negli adolescenti (fenomeno noto in Giappone come hikikomori), viene affrontato il concetto di dissociazione come nucleo fondante della maggior parte delle manifestazioni cliniche internet-correlate, con la proposta di trattamenti specifici. La psicopatologia web-mediata coinvolge quindi molte aree cognitive, come la percezione, l'attenzione, la memoria, il pensiero e l'istintualità, e dà origine a un nuovo profilo cognitivo, frutto di un diverso modo di apprendere, comunicare e pensare.

Le illusioni dei social media Luca Chittaro,Giuliano Castigliero,2024-04-29T00:00:00+02:00 I social media occupano una parte rilevante della vita quotidiana. Il dibattito pubblico gli attribuisce, in toni spesso allarmistici, effetti emozionali, comportamentali, cognitivi e relazionali, che spaziano dai conflitti agli inganni, dall'ansia alla gelosia, dall'esibizionismo alla delusione. Questo saggio fa luce sulla natura profonda del rapporto fra persone e social, integrando diverse discipline (human-computer interaction, psicologia e psicoanalisi). Il testo fornisce al lettore gli strumenti per analizzare e comprendere le illusioni in cui cadono gli utenti nell'uso dei social e le motivazioni, anche inconsce, che spingono a proiettare sul digitale le proprie ansie, i propri desideri, gli impulsi e tratti di personalità, instaurando dinamiche relazionali apparentemente contraddittorie. Vengono quindi offerti esercizi e indicazioni per vivere consapevolmente l'esperienza dei social media, riconoscendo ed evitando le trappole psicologiche, per usare positivamente gli strumenti digitali.

Sotto il Velo Virtuale: Incomunicabilità ai Tempi dei Social Media Carlo Iacobelli, 2023-12-20 Viviamo in un'epoca straordinaria, in cui la connettività digitale avvolge ogni aspetto delle nostre vite. I social media hanno trasformato il modo in cui ci relazioniamo, condividiamo esperienze e percepiamo il mondo che ci circonda. Tuttavia, dietro la facciata apparentemente interconnessa di questa era digitale, si nasconde un fenomeno silenzioso e potente: l'incomunicabilità.

Urban Informality Maria Vittoria Ferroni, Rossana Galdini, Giovanni Ruocco, 2023-05-29 This book analyzes the informal practices of contemporary cities through a close dialogue between different research perspectives, with the shared goal of giving voice to informality and evaluating its benefits and potential in a multidimensional key of social factors. Recently, the human sciences have seen the emergence of this new term “informality,” at first sight in conflict with their function of giving order and form to social phenomena. A term with which, in this book, the authors, having as reference the Italian and European experience, specifically identify those unsatisfied social demands and those collective actions “from below” that aim at the recovery of urban space and the renewal of its organization, often not following the trajectories of legality and institutions. By means of a close dialogue between different areas of social research, this book attempts to establish the different declinations and applications of the term, evaluating the causes and effects, benefits, and potential of the phenomena attributable to it, within a multidimensional analysis that calls into question the regeneration and collective use of spaces, political-institutional confrontation and conflict, legal innovation, and social-economic benefits.

Transnational Fascism in the Twentieth Century Matteo Albanese, Pablo del Hierro, 2016-09-22 Developing a knowledge of the Spanish-Italian connection between right-wing extremist groups is crucial to any detailed understanding of the history of fascism. *Transnational Fascism in the Twentieth Century* allows us to consider the global fascist network that built up over the course of the 20th century by exploring one of the significant links that existed within that network. It distinguishes and analyses the relationship between the fascists of Spain and Italy at three interrelated levels - that of the individual, political organisations and the state - whilst examining the world relations and contacts of both fascist factions, from Buenos Aires to Washington and Berlin to Montevideo, in what is a genuinely transnational history of the fascist movement. Incorporating research carried out in archives around the world, this book delivers key insights to further the historical study of right-wing political violence in modern Europe.

Handbook of Anthropology in Business Rita M Denny, Patricia L Sunderland, 2016-06-16 The first comprehensive work on the burgeoning field of business anthropology, this innovative reference book, including more than 60 international scholar-practitioners, provides a foundation for the field for years to come.

Resilience Nicola Canessa, 2021-05-28 The Resili(g)ence publication is part of the outputs produced within the European project KAAU, Knowledge Alliance for Advanced Urbanism (www.ka-au.net), Erasmus + program, and consists of two volumes: the first Resili(g)ence Intelligent Cities / Resilient Landscapes offers reflections on the general framework and on

the theme of resilience applied to intelligent cities and the landscape, while the second volume GOA Resili(g)ent City, analyses the case study of Genoa. RESILI(G)ENCE is a combined word, created by Manuel Gausa, merging the words resilience and intelligence. Intelligence is intended not only as the artificial but also as the human one, though undoubtedly today the world of BigData and OpenData can help the better understand of the city and its dynamics. Resilience, instead, is a term derived from the materials science and indicates the property that some materials have to maintain their structure or to regain its original shape after being subjected to crushing or deformation. The history of making the city of Genoa safe from floods is ancient history. And complex, very complex. It is the story of the wrong relationship between the river and the city, between nature and the urban and industrial development of the capital, between the flow of watercourses and their covering and cementing of the banks and beds of streams. It is perhaps one of the paradigmatic examples of the senselessness of man's choices towards his environment. But it is also the story of the delays of politics and institutions, of bureaucracies, of the system of public works in our country: of an Italy more attentive to formal respect for rules than for the rules of nature. In the midst of this history there are the disasters, floods, the dead, the injured, the damage of the flooding of the Bisagno torrent, which with its 30 km cuts the city from north to south, in one of the most built up areas of Italy, to reach the sea in the Foce district.

Social media e politiche dell'identità Angela Biscaldi, Vincenzo Matera, 2023-01-03 Il testo prende in considerazione l'aspetto politico dell'identità, vale a dire il ruolo delle piattaforme digitali nella creazione di sistemi simbolici, saperi condivisi, sentimenti di appartenenza, dinamiche di inclusione/esclusione, movimenti innovativi e di trasformazione sociale. A partire dall'analisi di alcuni casi etnografici si interroga sull'aspetto sempre più interreale di questi processi: i social media infatti hanno creato uno spazio sociale ibrido che mette in costante interazione il digitale e il mondo fisico, con un impatto diretto sui processi di costruzione della realtà e delle identità individuali e collettive. Per indagare queste dinamiche lo sguardo dell'antropologia come sapere critico sulle pratiche e sulle rappresentazioni in atto si rivela strumento fondamentale in quanto in grado di mettere a fuoco e interpretare i modi in cui nelle piattaforme social emergono e si consolidano nuove forme di negoziazione e riproduzione delle identità dei partecipanti ma anche nuove forme di resistenza e di cambiamento sociale.
