*The Excavations at Mut al-Kharab II* Richard J. Long, 2021-12-03 For over a century our knowledge of Egypt's Western Desert during the Third Intermediate Period relied almost entirely on the Greater and Smaller Dakhleh Stelae. These two significant documents were purchased by Henry Lyons in 1894 in Dakhleh Oasis and indicated the existence of a substantial temple at Mut al-Kharab dedicated to the god Seth. Apart from these sources, very little information from the Western Desert could be dated to this period. Excavations at Mut al-Kharab began in 2000 and in recent years, evidence from the Third Intermediate Period temple has grown considerably. A range of artefacts has been unearthed, including decorated temple blocks, stelae, ostraka, in situ architectural remains, other small finds, and a large collection of well-dated ceramics. The scale of evidence suggests Mut al-Kharab was probably the most significant Third Intermediate Period site in the Western Desert. In light of this new material, a re-examination of activity in the Western Desert during this period has been possible. This volume presents all the available evidence relating to the western oases during the Third Intermediate Period, with a particular focus on the ceramics. Occupation appears to have been more widespread than the limited evidence previously suggested, and these oasis communities were closely connected to the populations in the Nile Valley. The Egyptian central administration continued to be interested in the Western Desert, although political control does not seem to have been consistent. Moreover, subtle yet distinct variations in the material record, including aspects of pottery traditions and religious practices, may reveal the existence of an oasis culture. As such, we are developing a much clearer picture of activity in this region.

**Feedback Systems** Karl Johan Åström, Richard Murray, 2021-02-02 The essential introduction to the principles and applications of feedback systems—now fully revised and expanded This textbook covers the mathematics needed to model, analyze, and design feedback systems. Now more user-friendly than ever, this revised and expanded edition of *Feedback Systems* is a one-volume resource for students and researchers in mathematics and engineering. It has applications across a range of disciplines that utilize feedback in physical, biological, information, and economic systems. Karl Åström and Richard Murray use techniques from physics, computer science, and operations research to introduce control-oriented modeling. They begin with state space tools for analysis and design, including stability of solutions, Lyapunov functions, reachability, state feedback observability, and estimators. The matrix exponential plays a central role in the analysis of linear control

systems, allowing a concise development of many of the key concepts for this class of models. Åström and Murray then develop and explain tools in the frequency domain, including transfer functions, Nyquist analysis, PID control, frequency domain design, and robustness. Features a new chapter on design principles and tools, illustrating the types of problems that can be solved using feedback Includes a new chapter on fundamental limits and new material on the Routh-Hurwitz criterion and root locus plots Provides exercises at the end of every chapter Comes with an electronic solutions manual An ideal textbook for undergraduate and graduate students Indispensable for researchers seeking a self-contained resource on control theory

**The Commonwealth Block, Melbourne** Tim Murray, Kristal Buckley, Dr Sarah Hayes, Geoff Hewitt, Justin McCarthy, Professor Richard Mackay, Barbara Minchinton, Charlotte Smith, Jeremy Smith, Bronwyn Woff, 2019-03-01 This groundbreaking book reports on almost three decades of excavations conducted on the Commonwealth Block - the area of central Melbourne bordered by Little Lonsdale, Lonsdale, Exhibition and Spring streets.

**Of Vets, Viruses and Vaccines** Barry W Butcher, 2000-06-08 The story of the Animal Health Research Laboratory must be seen against a background of rapid domestic, global and techno-scientific change. During its sixty year history, it made a crucial contribution to improving the standard of Australian livestock, furthered the cause of animal health generally and helped to promote the cause of science to the wider community. For these reasons and many more, it deserves to be recognised and remembered; this history is an attempt to do just that.

**The Oxford Handbook of Music and Intellectual Culture in the Nineteenth Century** Paul Watt, Sarah Collins, Michael Allis, 2020-03-02 Rarely studied in their own right, writings about music are often viewed as merely supplemental to understanding music itself. Yet in the nineteenth century, scholarly interest in music flourished in fields as disparate as philosophy and natural science, dramatically shifting the relationship between music and the academy. An exciting and much-needed new volume, *The Oxford Handbook of Music and Intellectual Culture in the Nineteenth Century* draws deserved attention to the people and institutions of this period who worked to produce these writings. Editors Paul Watt, Sarah Collins, and Michael Allis, along with an international slate of contributors, discuss music's fascinating and unexpected interactions with debates about evolution, the scientific method, psychology, exoticism, gender, and the divide between high and low culture. Part I of the handbook establishes the historical context for the intellectual world of the period, including the significant genres and disciplines of its music literature, while Part II focuses on the century's institutions and networks - from journalists to monasteries - that circulated ideas about music throughout the world. Finally, Part III assesses how the music research of the period reverberates in the present, connecting studies in aestheticism, cosmopolitanism, and intertextuality to their nineteenth-century origins. The Handbook challenges Western music history's traditionally sole focus on musical work by treating writings about music as valuable cultural artifacts in themselves.

Engaging and comprehensive, The Oxford Handbook of Music and Intellectual Culture in the Nineteenth Century brings together a wealth of new interdisciplinary research into this critical area of study.

**Multiscale Fatigue Crack Initiation and Propagation of Engineering Materials: Structural Integrity and Microstructural Worthiness** George C. Sih, 2008-06-01 What can be added to the fracture mechanics of metal fatigue that has not already been said since the 1900s? From the view point of the material and structure engineer, there are many aspects of failure by fatigue that are in need of attention, particularly when the size and time of the working components are changed by orders of magnitude from those considered by traditional means. The 21 century marks an era of technology transition where structures are made larger and devices are made smaller, rendering the method of destructive testing unpractical. While health monitoring entered the field of science and engineering, the practitioners are discovering that the correlation between the signal and the location of interest depends on a priori knowledge of where failure may initiate. This information is not easy to find because the integrity of the physical system will change with time. Required is software that can self-adjust in time according to the monitored data. In this connection, effective application of health monitoring can use a predictive model of fatigue crack growth. Earlier fatigue crack growth models assumed functional dependence on the maximum stress and the size of the pre-existing crack or defect. Various possibilities were examined in the hope that the data could be grouped such that linear interpolation would apply.

**Advanced Information Networking and Applications** Leonard Barolli, Isaac Woungang, Tomoya Enokido, 2021-04-23 This book covers the theory, design and applications of computer networks, distributed computing and information systems. Networks of today are going through a rapid evolution, and there are many emerging areas of information networking and their applications. Heterogeneous networking supported by recent technological advances in low-power wireless communications along with silicon integration of various functionalities such as sensing, communications, intelligence and actuations is emerging as a critically important disruptive computer class based on a new platform, networking structure and interface that enable novel, low-cost and high-volume applications. Several of such applications have been difficult to realize because of many interconnections problems. To fulfill their large range of applications, different kinds of networks need to collaborate, and wired and next-generation wireless systems should be integrated in order to develop high-performance computing solutions to problems arising from the complexities of these networks. The aim of the book "Advanced Information

Networking and Applications” is to provide latest research findings, innovative research results, methods and development techniques from both theoretical and practical perspectives related to the emerging areas of information networking and applications.

*Run for Your Life* Jill Jolliffe,2014-06-01 Unwillingly given up by her birth mother and adopted into a violent household, Jill Jolliffe found the course of her life set before she even had time to choose. She ran away as a teenager and has been running ever since. Jolliffe became a thorn in the establishment's side and earned herself a hefty ASIO file. Following her instincts, she became a foreign correspondent - risking her life to report on Indonesia's occupation of East Timor, exposing sex-trafficking rackets in Portugal and ducking bullets while covering a war in Angola. Over time she realises that the recurring pattern of her career has been reporting the stories of young women in distress, as though trying to free her younger self from the chains of being a 'Forgotten Australian'. In the course of writing her memoir, an unexpected meeting with her birth mother takes her life full circle.

*Health Care for People with Intellectual and Developmental Disabilities across the Lifespan* I. Leslie Rubin,Joav Merrick,Donald E. Greydanus,Dilip R. **Japanese War Criminals** Sandra Wilson,Robert Cribb,Beatrice Trefalt,Dean Aszkielowicz,2017-02-14 Beginning in late 1945, the United States, Britain, China, Australia, France, the Netherlands, and later the Philippines, the Soviet Union, and the People's Republic of China convened national courts to prosecute Japanese military personnel for war crimes. The defendants included ethnic Koreans and Taiwanese who had served with the armed forces as Japanese subjects. In Tokyo, the International Military Tribunal for the Far East tried Japanese leaders. While the fairness of these trials has been a focus for decades, Japanese War Criminals instead argues that the most important issues arose outside the courtroom. What was the legal basis for identifying and detaining subjects, determining who should be prosecuted, collecting evidence, and granting clemency after conviction? The answers to these questions helped set the norms for transitional justice in the postwar era and today contribute to strategies for addressing problematic areas of international law. Examining the complex moral, ethical, legal, and political issues surrounding the Allied prosecution project, from the first investigations during the war to the final release of prisoners in 1958, Japanese War Criminals shows how a simple effort to punish the guilty evolved into a multidimensional struggle that muddied the assignment of criminal responsibility for war crimes. Over time, indignation in Japan over Allied military actions, particularly the deployment of the atomic bombs, eclipsed anger over Japanese atrocities, and, among the Western powers, new Cold War imperatives took hold. This book makes a unique contribution to our understanding of the construction of the postwar international order in Asia and to our comprehension of the difficulties of implementing transitional justice.
