Tratado de ultrasonografía abdominal Asociación Española de Ecografía Digestiva, 2010-12-17 Desde el año 1986, la Comisión de la Especialidad de Aparato Digestivo de nuestro país, a instancias de la Asociación Española de Ecografía Digestiva (AEED) estableció la obligatoriedad de la ecografía en el programa de formación del residente de Aparato Digestivo. Aunque no está concretado el tiempo necesario de rotación por la Unidad de Ecografía, parece evidente que al ser

una técnica muy explorador dependiente, con una curva de aprendizaje relativamente lenta, este tiempo no debería ser inferior a los seis meses. La importancia de una buena formación ecográfica es fundamental para el gastroenterólogo. La disponibilidad y fiabilidad que implica el que el mismo especialista de aparato digestivo realice la exploración ecográfica de sus enfermos cuyos síntomas conoce en detalle, ofrece una capacidad diagnóstica probablemente superior a la que pueda ofrecer otro profesional que lógicamente no tiene los mismos conocimientos clínicos de nuestra especialidad. La elaboración de este Tratado surgió de esta necesidad de formación y actualización ecográfica, que constituye la esencia y el sentido de existir de la AEED y de la conciencia clara de que no existía una publicación que recogiera los diferentes aspectos ecográficos necesarios para un desarrollo integral de nuestra especialidad. El tratado ha sido coordinado en sus diferentes partes por los miembros de la Junta Directiva de la AEED. El Tratado fue concebido con la suficiente amplitud para que sirva como libro de aprendizaje o libro de texto y con una distribución que permite su uso como libro de consulta en la práctica diaria. Consta de una parte diagnóstica de ecografía en modo B, en la que nos pareció obligado incluir dos capítulos generales de ecografía urológica y ginecológica, cuyo conocimiento permite al gastroenterólogo evitar consultas ecográficas la mayor parte de las veces innecesarias a otros especialistas. Un tercer capítulo sobre ecografía pediátrica, pretende informar al gastroenterólogo sobre aspectos especiales de la edad pediátrica, aspectos que nos plantean dudas en la práctica diaria. La segunda parte referida a ecografía Doppler, incluidas su aplicación en el trasplante hepático, se trata con extensión en seis capítulos. La ecografía intervencionista percutánea, se desarrolla en la tercera parte del tratado de una forma eminentemente práctica y comprensible, La última parte del tratado se ha dedicado a la Ultrasonografía endoscópica, cada vez con más auge y trascendencia en nuestra especialidad. Se han incluido en esta parte aspectos novedosos de diagnóstico con minisondas, y un capítulo sobre elastografía ecoendoscópica, técnica que ha demostrado su importancia en el diagnóstico diferencial incruento entre patología inflamatoria y tumoral pancreática, y que sin duda tendrá un importante desarrollo en el futuro. INDICE RESUMIDO: Principio físicos de Ecografía. Anatomía Ecográfica y seccional del abdomen. Lesiones focales hepáticas. Ecografía de la vesícula y las vías biliares. Ecografía del páncreas y su patología. Ecografía del bazo, retroperitoneo y glándulas suprarrenales. Ecografía abdominal urológica. Ecografía del tubo digestivo. Ecografía ginecológica. Principios básicos de la ecografía Doppler. Ecografía Doppler en el trasplante hepático. Biopsia hepática percutánea. Punción aspiración con aguja fina. Comprehensive Gynecology Gretchen M. Lentz, David M. Gershenson, 2012-01-01 In the 25 years since the first edition of Comprehensive Gynecology, many scientific advances have occurred in medical practice. The first four editions were largely the work of the original four editors: Drs. William Droegemueller, Arthur L. Herbst, Daniel R. Mishell, Jr., and Morton A. Stenchever...With the staggering volume of medical literature published and the complexities of the gynecologic subspecialties, we have collaborated with additional experts for the sixth edition. We've examined disease and added a new chapter on the interaction of medical diseases and female physiology. We've investigated discord with new authors to completely rewrite the emotional and psychological issues in gynecology and the legal issues for obstetrician-gynecologists. Other chapters have delved into the controversies in breast cancer screening, vitamin D use, the ongoing debates in hormone therapy, and vaginal mesh use for pelvic organ prolapse surgery. Histological Typing of Ovarian Tumours Robert Scully, L.H. Sobin, 1999-04-23 Although the histological typing of ovarian tumours is the focus of this volume, other aspects of investigation of a specimen of ovarian tumour are also important. Some of these aspects are mentioned in the text or illustrated. They include tumour grading, which is important prognostically and therapeutically for certain types of ovarian tumour, quantification of components in mixed tumours and evaluation of the stroma of certain tumours that are associated with endocrine function. Grading methodologies have varied from one tumour type to another and from one group of investigators to another for the same type of tumour. Because a standard

internationally recognized grading methodology has not been established, no specific guidance is presented in this volume. Nevertheless, grading by any generally acceptable method should be incorporated in the diagnosis whenever appropriate. The clinical and pathological classification of the extent of tumour growth (staging) should be taken into account for the purposes of treatment and prognosis. The TNM/FIGO system is therefore included (p. 45).
