Magic Eyes Leo Angart, 2015-04-01 Leo Angart runs workshops all over the world, helping people to regain their natural vision and throw away their glasses for good. He regularly encounters children whose eyesight is being adversely affected by their glasses or who don't really need glasses at all. In *Magic Eyes: Vision Training for Children* Leo shares his experience and explains what you can do to help transform your child's eyesight, eliminating the need for glasses. In *Magic Eyes* Leo Angart demystifies common eye conditions, explains the causes of these issues and suggests simple solutions you can try at home. These fun exercises can make children's eyes healthy and strong and eliminate the need for glasses. In fact with children it is actually quite easy to restore natural eyesight within a week or two. *Magic Eyes* also contains detailed explanations of, and exercises for: amblyopia (or lazy eye), anisometropia (when vision is different between the left and right eye), astigmatism (irregular shaping of the cornea), diplopia (double vision), hyperopia (far-sightedness), myopia (near-sightedness) and strabismus (turning in or out of the eye).

Better Eyesight William H. Bates, 2000-12-14 Artists, teachers, army officers, housewives, elderly people, parents, and children with vision problems write about their experiences with the Bates Method and giving up their glasses in *Better Eyesight*. Major eye conditions (myopia, astigmatism, farsightedness, presbyopia, amblyopia, strabismus, cataract, glaucoma, blindness) are discussed by Bates, other ophthalmologists, the medical community, and readers. The significance of this literature is both historical and immediate. For the first time, the connection between eyestrain to shoulder and neck pain, headaches, and other muscular tension is discussed.

Optimal Eyesight Esther van der Werf, 2019-11

The Bates Method for Better Eyesight Without Glasses William H. Bates, 2011-04-01 *Better Eyesight Without Glasses* is not only the definitive source for the classic Bates Method, it is in itself a remarkable phenomenon. Dr. William H. Bates's revolutionary and entirely commonsensical theory of self-taught improved eyesight has helped hundreds of thousands of people to triumph over normal defects of vision without the mechanical aid of eyeglasses. If you think that your eyesight could be made better by natural methods, you are right. After years of experimentation, Dr. Bates came to the conclusion that many people who wore glasses did not need them. He gradually and carefully developed a simple group of exercises for improving the ability of the eyes themselves to see, eliminating the tension caused by poor visual habits that are the major

cause of bad eyesight. These exercises are based on the firm belief that it is the natural function of the eyes to see clearly and that anyone, child or adult, can learn to see better without glasses.

A Neotropical Companion John C. Kricher, 1997 Widely praised, *A Neotropical Companion* is an extraordinarily readable introduction to the American tropics, the lands of Central and South America, their rainforests and other ecosystems, and the creatures that live there. 177 color illustrations.

Rethinking education: towards a global common good? UNESCO, 2015-05-26 Economic growth and the creation of wealth have cut global poverty rates, yet vulnerability, inequality, exclusion and violence have escalated within and across societies throughout the world. Unsustainable patterns of economic production and consumption promote global warming, environmental degradation and an upsurge in natural disasters. Moreover, while we have strengthened international human rights frameworks over the past several decades, implementing and protecting these norms remains a challenge. These changes signal the emergence of a new global context for learning that has vital implications for education. Rethinking the purpose of education and the organization of learning has never been more urgent. This book is inspired by a humanistic vision of education and development, based on respect for life and human dignity, equal rights, social justice, cultural diversity, international solidarity and shared responsibility for a sustainable future. It proposes that we consider education and knowledge as global common goods, in order to reconcile the purpose and organization of education as a collective societal endeavour in a complex world.

Tango Lessons Marilyn G. Miller, 2014-02-07 From its earliest manifestations on the street corners of nineteenth-century Buenos Aires to its ascendancy as a global cultural form, tango has continually exceeded the confines of the dance floor or the music hall. In *Tango Lessons*, scholars from Latin America and the United States explore tango's enduring

vitality. The interdisciplinary group of contributors—including specialists in dance, music, anthropology, linguistics, literature, film, and fine art—take up a broad range of topics. Among these are the productive tensions between tradition and experimentation in tango nuevo, representations of tango in film and contemporary art, and the role of tango in the imagination of Jorge Luis Borges. Taken together, the essays show that tango provides a kaleidoscopic perspective on Argentina's social, cultural, and intellectual history from the late nineteenth to the early twenty-first centuries. Contributors. Esteban Buch, Oscar Conde, Antonio Gómez, Morgan James Luker, Carolyn Merritt, Marilyn G. Miller, Fernando Rosenberg, Alejandro Sust

Better Eyesight Magazine William Horatio Bates,2009-12 William Horatio Bates (1860-1931) was an American physician who practiced ophthalmology and developed what is now known as the Bates Method for better eyesight, an educational method intended to improve vision by undoing a supposed habitual strain to see. The efficacy of the method is questionable, and his theory that the eye does not focus by changing the power of the lens, but rather by elongating the eyeball, through use of the extraocular oblique muscles, was contradicted by mainstream ophthalmology and optometry of his day and is still today. He graduated A. B. from Cornell University in 1881 and received his medical degree at the college of physicians and surgeons in 1885. He formulated a theory about vision health, and published the book *Perfect Sight Without Glasses* in 1920. He also discovered the astringent and haemostatic properties of the substance produced by the suprarenal gland, and its value in medicine, especially in surgeries. The substance would later be commercialized as adrenaline.

Improve Your Vision Martin Brofman,2004 Using the psychology behind the process of seeing provides an alternative method of improving vision.

Poor Economics Abhijit V. Banerjee,Esther Duflo,2012-03-27 The winners of the Nobel Prize in Economics upend the most common assumptions about how economics works in this gripping and disruptive portrait of how poor people actually live. Why do the poor borrow to save? Why do they miss out on free life-saving immunizations, but pay for unnecessary drugs? In *Poor Economics*, Abhijit V. Banerjee and Esther Duflo, two award-winning MIT professors, answer these questions based on years of field research from around the world. Called marvelous, rewarding by the *Wall Street Journal*, the book offers a radical rethinking of the economics of poverty and an intimate view of life on 99 cents a day. *Poor Economics* shows that creating a world without poverty begins with understanding the daily decisions facing the poor.

Managing Technology in Higher Education A. W. (Tony) Bates,Albert Sangra,2011-05-31 Universities continue to struggle in their efforts to fully integrate information and communications technology within their activities. Based on examination of current practices in technology integration at 25 universities worldwide, this book argues for a radical approach to the management of technology in higher education. It offers recommendations for improving governance,

strategic planning, integration of administrative and teaching services, management of digital resources, and training of technology managers and administrators. The book is written for anyone wanting to ensure technology is integrated as effectively and efficiently as possible.

Why Nations Fail Daron Acemoglu, James A. Robinson, 2012-03-20 NEW YORK TIMES AND WALL STREET JOURNAL BESTSELLER • From two winners of the 2024 Nobel Prize in Economic Sciences, “who have demonstrated the importance of societal institutions for a country’s prosperity” “A wildly ambitious work that hopscoches through history and around the world to answer the very big question of why some countries get rich and others don’t.”—The New York Times FINALIST: Financial Times and Goldman Sachs Business Book of the Year Award • ONE OF THE BEST BOOKS OF THE YEAR: The Washington Post, Financial Times, The Economist, BusinessWeek, Bloomberg, The Christian Science Monitor, The Plain Dealer Why are some nations rich and others poor, divided by wealth and poverty, health and sickness, food and famine? Is it culture, the weather, or geography that determines prosperity or poverty? As *Why Nations Fail* shows, none of these factors is either definitive or destiny. Drawing on fifteen years of original research, Daron Acemoglu and James Robinson conclusively show that it is our man-made political and economic institutions that underlie economic success (or the lack of it). Korea, to take just one example, is a remarkably homogenous nation, yet the people of North Korea are among the poorest on earth while their brothers and sisters in South Korea are among the richest. The differences between the Koreas is due to the politics that created those two different institutional trajectories. Acemoglu and Robinson marshal extraordinary historical evidence from the Roman Empire, the Mayan city-states, the Soviet Union, the United States, and Africa to build a new theory of political economy with great relevance for the big questions of today, among them: • Will China’s economy continue to grow at such a high speed and ultimately overwhelm the West? • Are America’s best days behind it? Are we creating a vicious cycle that enriches and empowers a small minority? “This book will change the way people think about the wealth and poverty of nations . . . as ambitious as Jared Diamond’s *Guns, Germs, and Steel*.”—BusinessWeek

What Video Games Have to Teach Us About Learning and Literacy. Second Edition James Paul Gee, 2014-12-02 Cognitive Development in a Digital Age James Paul Gee begins his classic book with I want to talk about video games—yes, even violent video games—and say some positive things about them. With this simple but explosive statement, one of America's most well-respected educators looks seriously at the good that can come from playing video games. This revised edition expands beyond mere gaming, introducing readers to fresh perspectives based on games like *World of Warcraft* and *Half-Life 2*. It delves deeper into cognitive development, discussing how video games can shape our understanding of the world. An undisputed must-read for those interested in the intersection of education, technology, and pop culture, *What Video Games Have to Teach Us About Learning and Literacy* challenges traditional norms, examines the educational potential of video games, and opens up a discussion on the far-reaching impacts of this ubiquitous aspect of modern life.

Blackout Mira Grant, 2012-05-22 The explosive conclusion to the Newsflesh trilogy from New York Times bestseller Mira Grant — a saga of zombies, geeks, politics, social media, and the virus that runs through them all. The year was 2014. The year we cured cancer. The year we cured the common cold. And the year the dead started to walk. The year of the Rising. The year was 2039. The world didn't end when the zombies came, it just got worse. Georgia and Shaun Mason set out on the biggest story of their generation. They uncovered the biggest conspiracy since the Rising and realized that to tell the truth, sacrifices have to be made. Now, the year is 2041, and the investigation that began with the election of President Ryman is much bigger than anyone had assumed. With too much left to do and not much time left to do it, the surviving staff of After the End Times must face mad scientists, zombie bears, rogue government agencies—and if there's one thing they know is true in post-zombie America, it's this: Things can always get worse. More from Mira Grant: Newsflesh Feed Deadline Blackout Feedback Rise Praise for Feed: It's a novel with as much brains as heart, and both are filling and delicious.—The A. V. Club Gripping, thrilling, and brutal... McGuire has crafted a masterpiece of suspense with engaging, appealing characters who conduct a soul-shredding examination of what's true and what's reported.—Publishers Weekly (Starred Review) “Feed is a proper thriller with zombies.” —SFX

Discipline and Punish Michel Foucault, 2012-04-18 A brilliant work from the most influential philosopher since Sartre. In this indispensable work, a brilliant thinker suggests that such vaunted reforms as the abolition of torture and the emergence of the modern penitentiary have merely shifted the focus of punishment from the prisoner's body to his soul.
