*The Global Findex Database 2017* Asli Demirguc-Kunt, Leora Klapper, Dorothe Singer, Saniya Ansar, Jake Hess, 2018-04-19  
In 2011 the World Bank—with funding from the Bill and Melinda Gates Foundation—launched the Global Findex database, the world's most comprehensive data set on how adults save, borrow, make payments, and manage risk. Drawing on survey data collected in collaboration with Gallup, Inc., the Global Findex database covers more than 140 economies around the world. The initial survey round was followed by a second one in 2014 and by a third in 2017. Compiled using nationally representative surveys of more than 150,000 adults age 15 and above in over 140 economies, *The Global Findex Database 2017: Measuring Financial Inclusion and the Fintech Revolution* includes updated indicators on access to and use of formal and informal financial services. It has additional data on the use of financial technology (or fintech), including the use of mobile phones and the Internet to conduct financial transactions. The data reveal opportunities to expand access to financial services among people who do not have an account—the unbanked—as well as to promote greater use of digital financial services among those who do have an account. The Global Findex database has become a mainstay of global efforts to promote financial inclusion. In addition to being widely cited by scholars and development practitioners, Global Findex data are used to track progress toward the World Bank goal of Universal Financial Access by 2020 and the United Nations Sustainable Development Goals. The database, the full text of the report, and the underlying country-level data for all figures—along with the questionnaire, the survey methodology, and other relevant materials—are available at [www.worldbank.org/globalfindex](http://www.worldbank.org/globalfindex).

Zapata and the Mexican Revolution John Womack, 2011-07-27 This essential volume recalls the activities of Emiliano Zapata (1879-1919), a leading figure in the Mexican Revolution; he formed and commanded an important revolutionary force during this conflict. Womack focuses attention on Zapata's activities and his home state of Morelos during the Revolution. Zapata quickly rose from his position as a peasant leader in a village seeking agrarian reform. Zapata's dedication to the cause of land rights made him a hero to the people. Womack describes the contributing factors and conditions preceding the Mexican Revolution, creating a narrative that examines political and agrarian transformations on local and national levels.

**Tamoanchan, Tlalocan** Alfredo López Austin, 1997 Drawing from historical sources, iconography, and beliefs of modern Indians, Lopez Austin (philosophy and letters, Universidad Nacional Autonoma de Mexico) offers a new interpretation of the two mysterious places in the world vision of the Aztecs. Chapters on each of the two are supported with discussions of the relationships of the essences and making a model based on contemporary native concepts. The Spanish version was published in 1994 by Fondo de Cultura Economica, Mexico. Annotation copyrighted by Book News, Inc., Portland, OR

**WHO Guidelines on Hand Hygiene in Health Care** World Health Organization, 2009 The WHO Guidelines on Hand Hygiene in Health Care provide health-care workers (HCWs), hospital administrators and health authorities with a thorough review of evidence on hand hygiene in health care and specific recommendations to improve practices and reduce transmission of pathogenic microorganisms to patients and HCWs. The present Guidelines are intended to be implemented in any situation in which health care is delivered either to a patient or to a specific group in a population. Therefore, this concept applies to all settings where health care is permanently or occasionally performed, such as home care by birth attendants. Definitions of health-care settings are proposed in Appendix 1. These Guidelines and the associated WHO Multimodal Hand Hygiene Improvement Strategy and an Implementation Toolkit (<http://www.who.int/gpsc/en/>) are designed to offer health-care facilities in Member States a conceptual framework and practical tools for the application of recommendations in practice at the bedside. While ensuring consistency with the Guidelines recommendations, individual adaptation according to local regulations, settings, needs, and resources is desirable. This extensive review includes in one

document sufficient technical information to support training materials and help plan implementation strategies. The document comprises six parts.

**Gender, Time Use, and Poverty in Sub-Saharan Africa** C. Mark Blackden, Quentin Wodon, 2006 The papers in this volume examine the links between gender, time use, and poverty in Sub-Saharan Africa. They contribute to a broader definition of poverty to include time poverty, and to a broader definition of work to include household work. The papers present a conceptual framework linking both market and household work, review some of the available literature and surveys on time use in Africa, and use tools and approaches drawn from analysis of consumption-based poverty to develop the concept of a time poverty line and to examine linkages between time poverty, consumption poverty, and ot.

**Faith and Modernity** Philip Sampson, Vinay Samuel, Chris Sugden, 1994 The context for Christian mission is the world of modern technology and modern thought. Yet how well do we really understand modernity? This book sets out the ideas discussed at a conference of the Lausanne Committee on World Evangelisation, held in Uppsala, Sweden in 1993.

**LGBT-Parent Families** Abbie E. Goldberg, Katherine R. Allen, 2012-10-12 LGBT-Parent Families is the first handbook to provide a comprehensive examination of this underserved area. Reflecting the nature of this issue, the volume is notably interdisciplinary, with contributions from scholars in psychology, sociology, human development, family studies, gender studies, sexuality studies, legal studies, social work, and anthropology. Additionally, scholarship from regions beyond the U.S. including England, Australia, Canada, and South Africa is presented. In addition to gender and sexuality, all contributors address issues of social class, race, and ethnicity in their chapters.

**Adapting to Climate Change in Urban Areas** David Satterthwaite, 2007 This paper discusses the possibilities and constraints for adaptation to climate change in urban areas in low- and middle-income nations. These contain a third of the world's population and a large proportion of the people and economic activities most at risk from sea-level rise and from the heatwaves, storms and floods whose frequency and/or intensity climate change is likely to increase. Section I outlines both the potentials for adaptation and the constraints. Section II discusses the scale of urban change. Section III considers direct and indirect impacts of climate change on urban areas and which nations, cities and population groups are particularly at risk. This highlights how prosperous, well-governed cities could generally adapt, but most of the world's urban population lives in cities or smaller urban centres ill-equipped for adaptation. A key part of adaptation concerns infrastructure and buildings - but much of the urban population in Africa, Asia and Latin America lack the infrastructure to adapt. Most international agencies have long refused to support urban programmes, especially those that address these problems. Section IV discusses innovations by urban governments and community organizations and in financial systems that address such problems, including the relevance of recent innovations in disaster-risk reduction for adaptation. It notes how few city and national governments are taking any action on adaptation. Section V discusses how local innovation in adaptation can be

encouraged and supported at national scale, and the funding needed to support this. Section VI considers the mechanisms for financing this and the larger ethical challenges that achieving adaptation raises - especially the fact that most climate-change-related urban (and rural) risks are in low-income nations with the least adaptive capacity, including many that have contributed very little to greenhouse-gas emissions.

Ancient Oaxaca Richard E. Blanton, 1999-05-27 This book investigates the emergence of social complexity and state formation in a New World region. Around 500 BC, the Valley of Oaxaca, in present-day Mexico, was the site of one of the earliest Native American states, when a new regional capital was established at Monte Alban. Today one of Mexico's most famous and spectacular archaeological sites, Monte Alban signalled an important series of changes in regional political structure in the direction of greater political complexity and integration within a larger domain. The four authors of this introductory text have over the years produced much of the most important primary information we have about developing complex societies in this region. Drawing on the abundance of excavated remains and a survey of regional archaeological settlement patterns, they provide a succinct account of the causes and consequences of political change in the region.

Algae Laura Barsanti, Paolo Gualtieri, 2005-11-14 An exhaustive review on all things algae would require a multi-volume encyclopedic work. Even then, such a tome would prove to be of limited value, as in addition to being quite complex, it would soon be outdated, as the field of phycology is full of continual revelations and new discoveries. *Algae: Anatomy, Biochemistry,*
