Sophie's World Jostein Gaarder,2010-07-15 The international bestseller about life, the universe and everything. 'A simply wonderful, irresistible book' DAILY TELEGRAPH 'A terrifically entertaining and imaginative story wrapped round its tough, thought-provoking philosophical heart' DAILY MAIL 'Remarkable ... an extraordinary achievement' SUNDAY TIMES When 14-year-old Sophie encounters a mysterious mentor who introduces her to philosophy, mysteries deepen in her own life. Why does she keep getting postcards addressed to another girl? Who is the other girl? And who, for that matter, is Sophie herself? To solve the riddle, she uses her new knowledge of philosophy, but the truth is far stranger than she could have imagined. A phenomenal worldwide bestseller, SOPHIE'S WORLD sets out to draw teenagers into the world of Socrates, Descartes, Spinoza, Hegel and all the great philosophers. A brilliantly original and fascinating story with many twists and turns, it raises profound questions about the meaning of life and the origin of the universe.

The Spell of the Sensuous David Abram,2012-10-17 Winner of the International Lannan Literary Award for Nonfiction Animal tracks, word magic, the speech of stones, the power of letters, and the taste of the wind all figure prominently in this intellectual tour de force that returns us to our senses and to the sensuous terrain that sustains us. This major work of ecological philosophy startles the senses out of habitual ways of perception. For a thousand generations, human beings viewed themselves as part of the wider community of nature, and they carried on active relationships not only with other people with other animals, plants, and natural objects (including mountains, rivers, winds, and weather patters) that we have only lately come to think of as inanimate. How, then, did humans come to sever their ancient reciprocity with the natural world? What will it take for us to recover a sustaining relation with the breathing earth? In *The Spell of the Sensuous* David Abram draws on sources as diverse as the philosophy of Merleau-Ponty, Balinese shamanism, Apache storytelling, and his own experience as an accomplished sleight-of-hand of magician to reveal the subtle dependence of human cognition on the

natural environment. He explores the character of perception and excavates the sensual foundations of language, which--even at its most abstract--echoes the calls and cries of the earth. On every page of this lyrical work, Abram weaves his arguments with a passion, a precision, and an intellectual daring that recall such writers as Loren Eiseley, Annie Dillard, and Barry Lopez.

Man, Play, and Games Roger Caillois, 2001 According to Roger Caillois, play is an occasion of pure waste. In spite of this - or because of it - play constitutes an essential element of human social and spiritual development. In this study, the author defines play as a free and voluntary activity that occurs in a pure space, isolated and protected from the rest of life.

Role of Seismic Testing Facilities in Performance-Based Earthquake Engineering Michael N. Fardis, Zoran T. Rakicevic, 2011-10-07 Nowadays research in earthquake engineering is mainly experimental and in large-scale; advanced computations are integrated with large-scale experiments, to complement them and extend their scope, even by coupling two different but simultaneous tests. Earthquake engineering cannot give answers by testing and qualifying few, small typical components or single large prototypes. Besides, the large diversity of Civil Engineering structures does not allow drawing conclusions from only a few tests; structures are large and their seismic response and performance cannot be meaningfully tested in an ordinary lab or in the field. So, seismic testing facilities should be much larger than in other scientific fields; their staff has to be resourceful, devising intelligent ways to carry out simultaneously different tests and advanced computations. To better serve such a mission European testing facilities and researchers in earthquake engineering have shared their resources and activities in the framework of the European project SERIES, combining their research and jointly developing advanced testing and instrumentation techniques that maximize testing capabilities and increase the value of the tests. This volume presents the first outcomes of the SERIES and its contribution towards Performance-based Earthquake Engineering, i.e., to the most important development in Earthquake Engineering of the past three decades. The concept and the methodologies for performance-based earthquake engineering have now matured. However, they are based mainly on analytical/numerical research; large-scale seismic testing has entered the stage recently. The SERIES Workshop in Ohrid (MK) in Sept. 2010 pooled together the largest European seismic testing facilities, Europe's best experts in experimental earthquake engineering and select experts from the USA, to present recent research achievements and to address future developments. Audience: This volume will be of interest to researchers and advanced practitioners in structural earthquake engineering, geotechnical earthquake engineering, engineering seismology, and experimental dynamics, including seismic qualification.

Retromania Simon Reynolds, 2011-06-02 We live in a pop age gone loco for retro and crazy for commemoration. Band re-

formations and reunion tours, expanded reissues of classic albums and outtake-crammed box sets, remakes and sequels, tribute albums and mash-ups . . . But what happens when we run out of past? Are we heading toward a sort of cultural-ecological catastrophe, where the archival stream of pop history has been exhausted? Simon Reynolds, one of the finest music writers of his generation, argues that we have indeed reached a tipping point and that although earlier eras had their own obsessions with antiquity - the Renaissance with its admiration for Roman and Greek classicism, the Gothic movement's invocations of medievalism - never has there been a society so obsessed with the cultural artifacts of its own immediate past. *Retromania* is the first book to examine the retro industry and ask the question: Is this retromania a death knell for any originality and distinctiveness of our own?

The Global Football League P. Millward,2011-10-12 This book tackles issues of globalization in the English Premier League and unpicks what this means to fan groups around the world, drawing upon a range of sociological theories to tell the story of the local and global repertoires of action emanating from the popular protests at Liverpool and Manchester United football clubs.

The New Public Diplomacy J. Melissen,2005-11-22 After 9/11, which triggered a global debate on public diplomacy, 'PD' has become an issue in most countries. This book joins the debate. Experts from different countries and from a variety of fields analyze the theory and practice of public diplomacy. They also evaluate how public diplomacy can be successfully used to support foreign policy.

How to Change Your Mind Michael Pollan,2018-05-15 "Pollan keeps you turning the pages . . . cleareyed and assured." —New York Times A #1 New York Times Bestseller, New York Times Book Review 10 Best Books of 2018, and New York Times Notable Book A brilliant and brave investigation into the medical and scientific revolution taking place around psychedelic drugs--and the spellbinding story of his own life-changing psychedelic experiences When Michael Pollan set out to research how LSD and psilocybin (the active ingredient in magic mushrooms) are being used to provide relief to people

suffering from difficult-to-treat conditions such as depression, addiction and anxiety, he did not intend to write what is undoubtedly his most personal book. But upon discovering how these remarkable substances are improving the lives not only of the mentally ill but also of healthy people coming to grips with the challenges of everyday life, he decided to explore the landscape of the mind in the first person as well as the third. Thus began a singular adventure into various altered states of consciousness, along with a dive deep into both the latest brain science and the thriving underground community of psychedelic therapists. Pollan sifts the historical record to separate the truth about these mysterious drugs from the myths that have surrounded them since the 1960s, when a handful of psychedelic evangelists inadvertently catalyzed a powerful backlash against what was then a promising field of research. A unique and elegant blend of science, memoir, travel writing, history, and medicine, *How to Change Your Mind* is a triumph of participatory journalism. By turns dazzling and edifying, it is the gripping account of a journey to an exciting and unexpected new frontier in our understanding of the mind, the self, and our place in the world. The true subject of Pollan's mental travelogue is not just psychedelic drugs but also the eternal puzzle of human consciousness and how, in a world that offers us both suffering and joy, we can do our best to be fully present and find meaning in our lives.

The Five Continents of Theatre Eugenio Barba, Nicola Savarese, 2019-02-11 *The Five Continents of Theatre* undertakes the exploration of the material culture of the actor, which involves the actors' pragmatic relations and technical functionality, their behaviour, the norms and conventions that interact with those of the audience and the society in which actors and spectators equally take part. The material culture of the actor is organised around body-mind techniques (see *A Dictionary of Theatre Anthropology* by the same authors) and auxiliary techniques whose variety concern: ■ the diverse circumstances that generate theatre performances: festive or civil occasions, celebrations of power, popular feasts such as carnival, calendar recurrences such as New Year, spring and summer festivals; ■ the financial and organisational aspects: costs, contracts, salaries, impresarios, tickets, subscriptions, tours; ■ the information to be provided to the public: announcements, posters, advertising, parades; ■ the spaces for the performance and those for the spectators: performing spaces in every possible sense of the term; ■ sets, lighting, sound, makeup, costumes, props; ■ the relations established between actor and spectator; ■ the means of transport adopted by actors and even by spectators. Auxiliary techniques repeat themselves not only throughout different historical periods, but also across all theatrical traditions. Interacting dialectically in the stratification of practices, they respond to basic needs that are common to all traditions when a performance has to be created and staged. A comparative overview of auxiliary techniques shows that the material culture of the actor, with its diverse processes, forms and styles, stems from the way in which actors respond to those same practical needs. The authors' research for this aspect of theatre anthropology was based on examination of practices, texts and of 1400 images, chosen as exemplars.

Carmen Abroad Richard Langham Smith, Clair Rowden, 2020-07-30 A transnational history of the performance, reception, translation, adaptation and appropriation of Bizet's *Carmen* from 1875 to 1945. This volume explores how Bizet's opera swiftly travelled the globe, and how the story, the music, the staging and the singers appealed to audiences in diverse contexts.

Principles of Politics Applicable to All Governments Benjamin Constant, 2003 Benjamin Constant (1767-1830) was born in Switzerland and became one of France's leading writers, as well as a journalist, philosopher, and politician. His colourful life included a formative stay at the University of Edinburgh; service at the court of Brunswick, Germany; election to the French Tribunate; and initial opposition and subsequent support for Napoleon, even the drafting of a constitution for the Hundred Days. Constant wrote many books, essays, and pamphlets. His deepest conviction was that reform is hugely superior to revolution, both morally and politically. While Constant's fluid, dynamic style and lofty eloquence do not always make for easy reading, his text forms a coherent whole, and in his translation Dennis O'Keeffe has focused on retaining the 'general elegance and subtle rhetoric' of the original. Sir Isaiah Berlin called Constant 'the most eloquent of all defenders of freedom and privacy' and believed to him we owe the notion of 'negative liberty', that is, what Biancamaria Fontana describes as the protection of individual experience and choices from external interferences and constraints. To Constant it was relatively unimportant whether liberty was ultimately grounded in religion or metaphysics -- what mattered were the practical guarantees of practical freedom -- autonomy in all those aspects of life that could cause no harm to others or to society as a whole. This translation is based on Etienne Hofmann's critical edition of *Principes de politique* (1980), complete with Constant's additions to the original work.

Heretics of China Nabil Alsabah, 2019-09-12 Why do political leaders often perform fatal miscalculations, take ill-considered actions, and indulge in ludicrous wishful thinking? This book seeks to shed light on these questions by conducting two related case studies from the vantage point of the science of human behavior--psychology. The first one analyzes the decision-making behavior and leadership style of Mao Zedong, a man who, in the words of historian Maurice Meisner, conceived and led the most popular revolution in world history only to squander its fruits by embarking on a series of catastrophic political projects that cost tens of millions of Chinese their lives. The second case study follows the path of Mao's successor, Deng Xiaoping, who renounced his faith in Maoism and embraced a pragmatic decision-making approach that paved the way for China's remarkable rise. This book is the result of five years of research. Despite being based on the author's PhD dissertation, this work should be accessible to non-experts. The investigation begins in Chapter 1 with a historical overview of China's accelerating decline throughout the nineteenth century. This introductory chapter depicts China's so-called century of humiliation (1839-1949). It offers some context as to the repeated failures to achieve national rejuvenation over the decades. The psychological analysis starts in Chapter 2 with a detailed discussion of Mao's

restlessness. The author will argue that Mao was locked in a never-ending battle against recurring self-doubts, which left him with a constant need for reassurance--a need that he attempted to satisfy by seeking to overcome ever more formidable political challenges. This, in turn, condemned China to a state of uninterrupted mass political campaigns, which greatly interfered with the nation's attempts at economic and social modernization. Chapter 3 analyzes why Mao's colleagues went along with his utopian visions. The discussion here will demonstrate that the decision-making behavior of the Chinese leadership exhibited all the hallmarks of groupthink--a modus operandi whereby the yearning to retain the approval of one's leader as well as one's colleagues outweighs the desire to draft effective policies. Chapter 4 explores how and why Mao's principal goal in life eventually shifted from building socialism in China to preventing an imaginary capitalist restoration--a shift that ultimately paved the way for the disastrous Cultural Revolution. The author interprets this shift in Mao's narrative identity as a reaction to his repeated failure to advance the quest for modernization. Chapter 5 centers on Deng's silent rebellion against Mao's decision-making approach. The discussion here will showcase the power of self-reflection--a psychological exercise that subjects one's past behavioral and thought patterns to ruthless scrutiny so as to learn lessons for the future. Having subsequently renounced his faith in Maoism and all other isms, Deng espoused fact-based and practice-oriented decision making. Yet, this did not turn either him or the decision-making apparatus over which he presided into dispassionate robots. Beliefs and values, as shown in Chapter 6, still colored how Deng and his colleagues interpreted complex developments in China. These beliefs and values were shaped by the forces of personality, the power of worldviews, and the subjective manner by which different decision makers processed their past experiences. As a result, the senior leaders greatly differed in terms of their visions for advancing China's quest for modernization. Chapter 7 concludes this book with a summary of the most important findings. It also elaborates on the question of how the developed hypotheses can be validated. Further, this chapter provides an overview of the most pronounced behavioral characteristics of both Mao and Deng.
