International Law Lori Fisler Damrosch,2001 Updated with an emphasis on current issues, this classic casebook emphasizes developments in international law, with expertly edited cases and problems for class discussion. Cases and Materials on International Law offers a treatment of the subject for introductory and advanced classes and detailed readings and reference materials for those who wish to pursue topics in depth. The fourth edition enriches every chapter with new information on institutions contributing to the sources and enforcement of international law, including the World Trade Organization, the International Criminal Tribunals for Yugoslavia and Rwanda, the prospective International Criminal Court, and organizations in the fields of law of the sea and arms control. International criminal law now has a chapter of its own, and the casebook gives expanded treatment to human rights, environmental law, and economic law.

International Law in the 21st Century Christopher C. Joyner,2005 In the freshest new international law text in 20 years, Christopher C. Joyner offers a critical assessment of international legal rules in the early 21st century as they are applied by governments to the real world. Looking at concepts and principles, processes and critical problems, Joyner steers clear of an old-time case method approach, preferring to treat issues thematically. He shows the challenges of international law in terms of peace, security, human rights, the environment, and economic justice. Particular features of the book include engaging vignettes, clearly defined key terms, and special coverage of emerging topics including common spaces; international criminal law; rules, norms, and regimes; and trade relations and commercial exchange. Through it all, Joyner maintains an intent focus on the role of the individual in the evolving international legal order.

Human Rights Louis Henkin,2001 This law school casebook supplement includes international instruments establishing comprehensive human rights obligations, such as the Universal Declaration of Human Rights, the International Covenant on Civil and Political Rights, and the International Covenant on Economic, Social and Cultural Rights, and treaties and declarations addressing specific areas of international human rights law. It includes specialized human rights instruments adopted under the auspices of regional organizations such as the Council of Europe, the Organization of American States, the Organization of African Unity, and the Organization for Security and Co-operation in Europe, and select instruments relating to international courts.

Global Environmental Change and International Law Lynne M. Jurgielewicz,1996 This is one of the few books dealing with regime theory to be written from a legal point of view. Jurgielewicz's book is part of an effort to promote interdisciplinary research on the nature of the international legal order. Her work explores the concept of international regimes within the international legal order, utilizing the policy-oriented approach to international law. The study uses examples of global environmental change as models. By examining the general international law applicable to climate change and ozone layer depletion, the author attempts to explain the original need for regime formation in these areas. Next, Jurgielewicz looks at the role of regimes within international law, focusing on their formation, maintenance, source of legal obligation, and compliance mechanisms. The book concludes that regimes are present within the international legal order and play a vital role in maintaining that order. This book will appeal to students in law schools, graduate schools, or advanced undergraduate seminars covering international relations, international legal theory, international law, and international organizations.

Regional perspectives on these issues reveal differing priorities and approaches.

Immigrants Out! Juan F. Perea, 1997 Nativism - an intense opposition to immigrants and other non-native members of society - has been deeply imbedded in the American character from the earliest days of the nation. Dating from the Alien and Sedition controversy of 1798 to California's recent Proposition 187, nativism has long been a driving force in policy making, a particular irony in a country founded and populated by immigrants.

International Environmental Policy Lynton Keith Caldwell, Paul Stanley Weiland, 1996 In this newly revised and expanded edition of the award-winning *International Environmental Policy*, Lynton Keith Caldwell updates his comprehensive survey of the global international movement for protection of the environment. With implications for multinational commerce, population policy, agriculture, energy issues, biological and cultural diversity, transnational equity, ideology, and education, this book takes a broad view of the policy outcomes of what may be the most important social movement of the 20th century, and addresses the events and politics that have significantly affected the movement over the last twenty years and will continue to affect it into the next century.

Community Interests Across International Law Eyal Benvenisti, Georg Nolte, 2018-05-16 This book explores the extent to

which contemporary international law expects states to take into account the interests of others - namely third states or their citizens - when they form and implement their policies, negotiate agreements, and generally conduct their relations with other states. It systematically considers the various manifestations of what has been described as 'community interests' in many areas regulated by international law and observes how the law has evolved from a legal system based on more or less specific consent and aimed at promoting particular interests of states, to one that is more generally oriented towards collectively protecting common interests and values. Through essays by experts in the field, this book explores topics such as the sources of international law and the institutional aspects of developing the law and covers a range of areas within the law.

Human Rights Related Trade Measures Under International Law Anthony Cassimatis, 2007 When does international law allow a State or group of States to adopt trade measures in order to coerce another State to comply with its international obligations to ensure respect for human rights? In answering this question this book draws together complex areas of international law which include the rules prohibiting interference in the internal affairs of sovereign States, the rules regulating extra-territorial exercises of jurisdiction, the law of State responsibility and the international legal rules requiring the protection of human rights and regulating international trade. The literature on Trade and ... issues invariably focuses on a limited number of these areas, or approaches the issues from an international relations or economic perspective. This book will assist specialists in international human rights law and international trade law, academic and government lawyers who advise on or implement international trade policy and those studying the use of human rights related trade measures.
