Health Promotion Practice: Building Empowered Communities Laverack, Glenn, 2007-04-01 The book provides an excellent combination of broad theoretical background with a generous helping of vocational guidance on the practice of health promotion. A very welcome addition to the practical side of health promotion! Laverack's brief and simply-worded text weaves together just the right balance of theory, evidence, tips and case studies to satisfy the new learner looking to gain a grasp of health promotion's empowering whole, while still offering new insights to the more seasoned practitioner. Ronald Labonté, Institute of Population Health, University of Ottawa How can health promotion practitioners help communities to become more empowered? How do you encourage different communities to work together towards a shared goal? How can you focus your resources to be most effective in building empowered communities? How do you evaluate your success (and failures) in building empowered communities? Power and empowerment are two complex concepts that are central to health promotion practice. People experience empowerment in many different ways and this book explains an approach that has been used by health promoters to intentionally build and evaluate empowerment. The book provides a special focus on communities and is illustrated throughout with useful field experiences in the United Kingdom, Asia, North America, the Pacific region and Africa. The book aims to provide the reader with: An understanding of the key concepts of power and empowerment and the link to improved health outcomes in the context of health promotion programmes An understanding of practical approaches that can be used in health promotion programming to build and evaluate empowered communities Case study examples of how communities can be empowered in practice This unique book offers sound theoretical principles to underpin the practical approaches used to build empowered communities and brings together new and innovative approaches in health promotion practice. Health Promotion Practice is essential reading for health promotion students and practitioners who want to learn more about innovative approaches to build empowered communities in their everyday work. It will inspire them to work in more empowering ways in health promotion practice and to carefully contemplate how they can influence the way others gain power.

Diabetic Foot Syndrome Dirk Hochlenert, Gerald Engels, Stephan Morbach, Stefanie Schliwa, Frances L. Game, 2018-09-04 This book provides a clear and integrated guide to the diagnostic pathways and therapeutic options available for the treatment of diabetic foot syndrome. The link between the location of the lesion and its potential causes are

discussed in relation to its diagnosis, biomechanics, treatment and prognosis. Chapters covering interdigital lesions, the lateral side of the foot, torsion of the hallux, and the charcot foot are included. Diabetic Foot Syndrome: From Entity to Therapy aims to facilitate interdisciplinary understanding and is relevant to endocrinologists, as well as vascular and orthopedic surgeons.

Research Handbook of Expatriates Yvonne McNulty, Jan Selmer, 2017-05-26 'In the Research Handbook of Expatriates, Yvonne McNulty and Jan Selmer have created a seminal work that should be on the bookshelf of all social scientists who work in the field of expatriation. More senior scholars will appreciate the "deep dive" each chapter takes into the literature, each one acting as a reservoir they can draw from to powerfully inform their future research efforts. Doctoral students and newly minted PhDs will find this book to be especially valuable - the final chapter of the book alone provides inestimable career and "how-to-publish" guidance for them in the field of expatriation. The coverage of the history, construct, milieu, research methodologies, and issues is the best I have come across in a single volume in over 30 years of working in the field. In short, this is a monumental contribution to the study of expatriates and global mobility.' - Mark E. Mendenhall, University of Tennessee 'McNulty and Selmer's edited volume does a wonderful job of consolidating and integrating everything we know about expatriates and their different types. This long-overdue Handbook, featuring chapters by top researchers, lays a trail for scholars to further advance the study of expatriates.' - Joyce Osland, San Jose State University 'McNulty and Selmer's edited book of readings on virtually all aspects of expatriates deserves a prominent place in the library of researchers and practitioners interested in this subject. The Handbook provides a historical overview as well as the latest trends in expatriate studies and concludes with useful guidelines on how to conduct as well as improve the quality of research in this field.' - Rosalie L. Tung, Simon Fraser University, Canada Constituting a comprehensive and carefully designed collection of contributions, the Research Handbook of Expatriates provides a nuanced and up-to-date discussion of expatriates. Theoretically broad and groundbreaking, it offers important and contemporary insights into emerging areas of research warranting future consideration. Drawing upon a range of perspectives from the field's most distinguished academics, contributions review the history of the literature in relation to expatriates, from the development of the expatriate construct through to the current state of research on business expatriates. Subsequent chapters progress into detailed examinations of the various types of business expatriates including LGBT, self-initiated expatriates, female assignees, inpatriates, international business travellers and commuters, and millennials. Other themes include expatriate performance, adjustment, expatriates to and from developing countries, global talent management, and expatriates' safety and security. The Research Handbook also covers expatriates in diverse communities such as education, military, missionary, sports and Aidland, and provides additional commentaries relating to methodological issues, research with practitioners, case studies, biculturals and ATCKs, and global families. The Research Handbook concludes with publishing advice for PhD and early career researchers.

Stimulating insightful new areas of study, this collection is a must read for academics and scholars in the field of expatriate research, international management, global human resource management and business administration. It also offers a wealth of guidance for executives and recruiters along with expatriates and professionals who may expatriate. Contributors: M. Andresen, C. Brewster, L. Care, J.-L. Cerdin, L. Global Health Diplomacy Ilona Kickbusch, Graham Lister, Michaela Told, Nick Drager, 2012-12-09 The world's problems are indeed world problems: social and environmental crises, global trade and politics, and major epidemics are making public health a pressing global concern. From this constantly changing scenario, global health diplomacy has evolved, at the intersection of public health, international relations, law, economics, and management—a new discipline with transformative potential. Global Health Diplomacy situates this concept firmly within the human rights dialogue and provides a solid framework for understanding global health issues and their negotiation. This up-to-the-minute guide sets out defining principles and the current agenda of the field, and examines key relationships such as between trade and health diplomacy, and between global health and environmental issues. The processes of global governance are detailed as the UN, WHO, and other multinational actors work to address health inequalities among the world's peoples. And to ensure maximum usefulness, the text includes plentiful examples, discussion questions, reading lists, and a glossary. Featured topics include: The legal basis of global health agreements and negotiations. Global public goods as a foundation for global health diplomacy. Global health: a human security perspective. Health issues and foreign policy at the UN. National strategies for global health. South-south cooperation and other new models of development. A volume of immediate utility with a potent vision for the future, Global Health Diplomacy is an essential text for public health experts and diplomats as well as schools of public health and international affairs.

EU Enlargement: The Constitutional Impact at EU and at National Level Alfred Kellermann, 2001-08-15 The subject of this Conference concerns the impact the enlargement of the European Union has on the constitutional provisions of both levels of European administration, the national and the European level. This subject is the more attractive because the 'constitutional' impact of enlargement is an essential element in the context of the 'rule of law' as one of the 1 general principles of the Union. Here a relationship does exist with objectives such as a good and transparent system of governance, a democratic legislative process, an independent judiciary and an adequate system of legal protection. As to the national level, the implications membership of the Union has for the constitutional texts of the (candidate) member States have a connection with the fundamental characteristics of Community law such as priority of European law (over national law),

direct applicability and direct effect. These principles reflect the interest in ensuring that European law, once applied in the national context by the public authorities or the judiciary, is made fully effective, for the benefit not only of the public authorities but also of the ordinary citizen.

Evolutionary Aesthetics Eckart Voland, Karl Grammer, 2013-04-17 Evolutionary aesthetics is the attempt to understand the aesthetic judgement of human beings and their spontaneous distinction between beauty and ugliness as a biologically adapted ability to make important decisions in life. The hypothesis is - both in the area of natural beauty and in sexuality, with regard to landscape preferences, but also in the area of artificial beauty (i.e. in art and design) - that beauty opens up fitness opportunities, while ugliness holds fitness risks. In this book, this adaptive view of aesthetics is developed theoretically, presented on the basis of numerous examples, and its consequences for evolutionary anthropology are illuminated.

Intersex (For Lack of a Better Word) Thea Hillman, 2008-09-01 "In Hillman's world, the surer you become about who you are, the more vulnerable you get."—The San Francisco Bay Guardian "Hillman's writing is sexy because it's smart and refuses to simplify things."—Fabula Magazine Hillman's utterly unabashed memoir...showcases both the personal, embodied realities of intersex, and the social and political milieus that shape them... Intersex, too, is gorgeously written.—Women's Review of Books It's utterly impossible to not be spellbound by performer-activist Thea Hillman, in person or in print ... A must-read.—Curve "There's nothing else in print like this amazing and courageous book."—Patrick Califia, author of *Sex Changes: The Politics of Transgenderism* "An important and wonderfully disarming book. Poetic, political, and deeply personal."—Beth Lisick, author of *Helping Me Help Myself* *Intersex (For Lack of a Better Word)* chronicles one person's search for self in a world obsessed with normal. What is "intersex"? According to the Intersex Society of North America, the word describes someone born with sex chromosomes, genitalia, or an internal reproductive system that are neither clearly male nor clearly female. In first-person prose as intimate as a diary, Thea Hillman redefines memoir in a series of compelling stories that take a no-holds-barred look at sex, gender, family, and community. Whether she's pondering quirky family tendencies ("Drag"), reflecting on "queerness" ("Another"), or recounting scintillating adventures in San Francisco's sex clubs, Hillman's brave and fierce vision for cultural and societal change shines through.

Distributed Objects Liana Chua, Mark Elliott, 2013-03-01 One of the most influential anthropological works of the last two decades, Alfred Gell's *Art and Agency* is a provocative and ambitious work that both challenged and reshaped anthropological understandings of art, agency, creativity and the social. It has become a touchstone in contemporary artifact-based scholarship. This volume brings together leading anthropologists, archaeologists, art historians and other scholars into

an interdisciplinary dialogue with Art and Agency, generating a timely re-engagement with the themes, issues and arguments at the heart of Gell's work, which remains salient, and controversial, in the social sciences and humanities. Extending his theory into new territory – from music to literary technology and ontology to technological change – the contributors do not simply take stock, but also provoke, critically reassessing this important work while using it to challenge conceptual and disciplinary boundaries.

Cultural Property and Contested Ownership Brigitta Hauser-Schäublin, Lyndel V. Prott, 2016-06-10 Against the backdrop of international conventions and their implementation, *Cultural Property and Contested Ownership* explores how highly-valued cultural goods are traded and negotiated among diverging parties and their interests. Cultural artefacts, such as those kept and trafficked between art dealers, private collectors and museums, have become increasingly localized in a 'Bermuda triangle' of colonialism, looting and the black market, with their re-emergence resulting in disputes of ownership and claims for return. This interdisciplinary volume provides the first book-length investigation of the changing behaviours resulting from the effect of the 1970 UNESCO Convention on the Means of Prohibiting and Preventing the Illicit Import, Export and Transfer of Ownership of Cultural Property. The collection considers the impact of the Convention on the way antiquity dealers, museums and auction houses, as well as nation states and local communities, address issues of provenance, contested ownership, and the trafficking of cultural property. The book contains a range of contributions from anthropologists, lawyers, historians and archaeologists. Individual cases are examined from a bottom-up perspective and assessed from the viewpoint of international law in the Epilogue. Each section is contextualised by an introductory chapter from the editors.

Rebel Code Glyn Moody, 2009-02-18 Open source began as the mantra of a small group of idealistic hackers and has blossomed into the all-important slogan for progressive business and computing. This fast-moving narrative starts at ground zero, with the dramatic incubation of open-source software by Linux and its enigmatic creator, Linus Torvalds. With firsthand accounts, it describes how a motley group of programmers managed to shake up the computing universe and cause a radical shift in thinking for the post-Microsoft era. A powerful and engaging tale of innovation versus big business, *Rebel Code* chronicles the race to create and perfect open-source software, and provides the ideal perch from which to explore the changes that cyberculture has engendered in our society. Based on over fifty interviews with open-source protagonists such as Torvalds and open source guru Richard Stallman, *Rebel Code* captures the voice and the drama behind one of the most significant business trends in recent memory.

Projecting History Nora M. Alter, 2009-08-27 Between 1967 and 2000, film production in Germany underwent a number of significant transformations, including the birth and death of New German Cinema as well as the emergence of a new transnational cinematic practice. In *Projecting History*, Nora M. Alter explores the relationship between German cinematic

practice and the student protests in both East and West Germany against the backdrop of the U.S. war in Vietnam in the sixties, the outbreak of terrorism in West Germany in the seventies, West Germany's rise as a significant global power in the eighties, and German reunification in the nineties. Although a central tendency of New German Cinema in the 1970s was to reduce the nation's history to the product of individuals, the films addressed in *Projecting History* focus not on individual protagonists, but on complex socioeconomic structures. The films, by Rainer Werner Fassbinder, Harun Farocki, Alexander Kluge, Ulrike Ottinger, Wim Wenders and others, address basic problems of German history, including its overall peculiarity within the European context, and, in particular, the specific ways in which the National Socialist legacy continues to haunt Germans. Nora M. Alter is Associate Professor of German, Film and Media Studies, and Women and Gender Studies at the University of Florida. A specialist in twentieth-century film, comparative literature, and cultural studies, Alter has been the recipient of a National Endowment for the Humanities Fellowship and a Howard Foundation Fellowship. She is also the author of *Vietnam Protest Theatre: The Television War on Stage*.

Substance and Attribute Christian Kanzian, Muhammad Legenhausen, 2007 The aim of this volume is to investigate the topic of Substance and Attribute. The way leading to this aim is a dialogue between Islamic and Western Philosophy. Our project is motivated by the observation that the historical roots of Islamic and of Western Philosophy are very similar. Thus some of the articles in this volume are dedicated to the history of philosophy, in Islamic thinking as well as in Western traditions. But the dialogue between Islamic and Western Philosophy is not only an historical issue, it also has systematic relevance for actual philosophical questions. The topic Substance and Attribute particularly has an important history in both traditions; and it has systematic relevance for the actual ontological debate. The volume includes contributions (among others) by Hans Burkhardt, Hans Kraml, Muhammad Legenhausen, Michal Loux, Pedro Schmechtig, Muhammad Shomali, Erwin Tegtmeier, and Daniel von Wachter.

Profane Culture Paul E. Willis, 2014-08-24 A classic of British cultural studies, *Profane Culture* takes the reader into the worlds of two important 1960s youth cultures—the motor-bike boys and the hippies. The motor-bike boys were working-class motorcyclists who listened to the early rock 'n' roll of the late 1950s. In contrast, the hippies were middle-class drug users with long hair and a love of progressive music. Both groups were involved in an unequal but heroic fight to produce meaning and their own cultural forms in the face of a larger society dominated by the capitalist media and commercialism. They were pioneers of cultural experimentation, the self-construction of identity, and the curating of the self, which, in different ways, have become so widespread today. In *Profane Culture*, Paul Willis develops an important and still very contemporary theory and methodology for understanding the constructions of lived and popular culture. His new preface discusses the ties between the cultural moment explored in the book and today.

Preventing Breast Cancer John W. Gofman, 1996

The Cross-Cultural Process in Christian History Andrew F. Walls ,2015-02-26 Walls shows how the demographic transformation of the church has brought us to a new Ephesian moment. The church is challenged as never before to become one global body with its many cultural and ethnic members contributing their gifts. Former patterns of domination need to be superseded. His seer's eyes probe beneath the surface to bring the reader insights into Pentecostalism, African traditional religion, and the ironic ways in which the Western missionary movement often accomplished things--both for good and for ill--that its agents never dreamed of

Queer Desire in Henry James Jacob Jacobson,2000 Drawing on queer theory, this study locates unorthodox desire in Henry James with a special focus on his two most deliberately queer novels, *The Bostonians* and *The Princess Casamassima*. Jacob Jacobson shows how queer desire in these texts is exploited beyond the personal to solicit pawns for subversive causes. More than banal prattle, anarchism and feminism are viable threats to the status quo. By subtly depicting the potency of the politics of same-sex erotics, James legitimates queer desire. If fictional deaths are possible metaphors for sex, Jacobson argues that Hyacinth's unlawful suicide can be concurrently read as a veiled act of licentious masturbation. Hyacinth recovers through death both his body politic and his body erotic in what is James's biggest challenge to patriarchy.

Varieties of Feminism Myra Ferree,2012-03-07 *Varieties of Feminism* investigates the development of German feminism by contrasting it with women's movements that arise in countries, like the United States, committed to liberalism. With both conservative Christian and social democratic principles framing the feminist discourses and movement goals, which in turn shape public policy gains, Germany provides a tantalizing case study of gender politics done differently. The German feminist trajectory reflects new political opportunities created first by national reunification and later, by European Union integration, as well as by historically established assumptions about social justice, family values, and state responsibility for the common good. Tracing the opportunities, constraints, and conflicts generated by using class struggle as the framework for gender mobilization—juxtaposing this with the liberal tradition where gender and race are more typically framed as similar—Ferree reveals how German feminists developed strategies and movement priorities quite different from those in the United States.
