Unbored Joshua Glenn, Elizabeth Foy Larsen, 2013-07-18 Unbored is the book every modern child needs. Brilliantly walking the line between cool and constructive, it's crammed with activities that are not only fun and doable but that also get kids standing on their own two feet. If you're a kid, you can: -- Build a tipi or an igloo -- Learn to knit -- Take stuff apart and fix it -- Find out how to be constructively critical -- Film a stop-action movie or edit your own music -- Do parkour like James Bond -- Make a little house for a mouse from lollipop sticks -- Be independent! Catch a bus solo or cook yourself lunch -- Make a fake exhaust for your bike so it sounds like you're revving up a motorcycle -- Design a board game -- Go camping (or glamping) -- Plan a road trip -- Get proactive and support the causes you care about -- Develop your taste and decorate your own room -- Make a rocket from a coke bottle -- Play farting games There are gross facts and fascinating stories, reports on what stuff is like (home schooling, working in an office...), Q&As with inspiring grown-ups, extracts from classic novels, lists of useful resources and best ever lists like the top clean rap songs, stop-motion movies or books about rebellion. Just as kids begin to disappear into their screens, here is a book that encourages them to use those tech skills to be creative, try new things and change the world. And it gets parents to join in. Unbored is fully illustrated, easy to use and appealing to young and old, girl and boy. Parents will be comforted by its anti-perfectionist spirit and humour. Kids will just think it's brilliant.

Palace of the Peacock (Faber Editions) Wilson Harris, 2021-11-02 The visionary masterpiece, tracing a riverboat crew's dreamlike jungle voyage ... 'My new all time favourite book ... A magnificent, breathtaking and terrifying novel.' T'sitsi Dangarembga 'An exhilarating experience ... Makes visions real and reality visions ... Genius.' Jamaica Kincaid 'A masterpiece: I love this book for its language, adventure and wisdoms.' Monique Roffey 'Revel in the inviolate, ever-deepening mystery of Wilson Harris's work.' Jeet Thayil 'The Guyanese William Blake . Such poetic intensity.' Angela Carter I dreamt I awoke with one dead seeing eye and one living closed eye ... A crew of men are embarking on a voyage up a turbulent river through the rainforests of Guyana. Their domineering leader, Donne, is the spirit of a conquistador, obsessed with hunting for a mysterious woman and exploiting indigenous people as plantation labour. But their expedition is plagued by tragedies, haunted by drowned ghosts: spectres of the crew themselves, inhabiting a blurred shadowland between life and

death. As their journey into the interior - their own hearts of darkness - deepens, it assumes a spiritual dimension, guiding them towards a new destination: the Palace of the Peacock ... A modernist fever dream; prose poem; modern myth; elegy to victims of colonial conquest: Wilson Harris' masterpiece has defied definition for over sixty years, and is reissued for a new generation of readers. 'One of the great originals ... Visionary ... Dazzlingly illuminating.' Guardian 'Amazing ... Masterly ... Near-miraculous.' Observer 'Staggering ... Both brilliant and terrifying.' The Times 'The most inimitable [writer] produced in the English-speaking Caribbean.' Fred D'Aguiar 'Extraordinary ... Courageous and visionary ... It speaks to us in tongues.' Pauline Melville

Routledge Handbook of Contemporary India Knut A. Jacobsen,2015-08-11 A second, revised edition of this title is available at <https://www.routledge.com/Routledge-Handbook-of-Contemporary-India/Jacobsen/p/book/9781032244068> India is the second largest country in the world with regard to population, the world's largest democracy and by far the largest country in South Asia, and one of the most diverse and pluralistic nations in the world in terms of official languages, cultures, religions and social identities. Indians have for centuries exchanged ideas with other cultures globally and some traditions have been transformed in those transnational and transcultural encounters and become successful innovations with an extraordinary global popularity. India is an emerging global power in terms of economy, but in spite of India's impressive economic growth over the last decades, some of the most serious problems of Indian society such as poverty, repression of women, inequality both in terms of living conditions and of opportunities such as access to education, employment, and the economic resources of the state persist and do not seem to go away. This Handbook contains chapters by the field's foremost scholars dealing with fundamental issues in India's current cultural and social transformation and concentrates on India as it emerged after the economic reforms and the new economic policy of the 1980s and 1990s and as it develops in the twenty-first century. Following an introduction by the editor, the book is divided into five parts: Part I: Foundation Part II: India and the world Part III: Society, class, caste and gender Part IV: Religion and diversity Part V: Cultural change and innovations Exploring the cultural changes and innovations relating a number of contexts in contemporary India, this Handbook is essential reading for students and scholars interested in Indian and South Asian culture, politics and society. Chapter 11 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution-Non Commercial-No Derivatives (CC-BY-NC-ND) 4.0 license.

How to Be a Movie Star William J. Mann,2010-03-04 From her days as a youthful minx at Metro Goldwyn Mayer to her post-studio reign as America's lustiest middle-aged movie queen, Taylor has defined the very essence of Hollywood stardom. How to be a Movie Star is a different kind of book about Elizabeth Taylor: an intimate, up-close look at a girl who grew up with fame, who learned early-and well-how to be famous, and how that fame was used and constructed to carry her through more than sixty years of public life. Indeed, one might say Elizabeth went to school to learn how to be famous, her education courtesy of Metro Goldwyn Mayer, the greatest, most glamorous movie studio of all time.

My Pal, Blaise Richard Leviton, 2012-09-04 In 2020 angels of a high order started incarnating on Earth as humans. In early 2020 guards at Teotihuacan, an archeological site in Mexico, find eight fat handwritten notebooks on a ledge at the Palace of the Jaguars. They purport to be the journal, and maybe last testament, of an American, age 69, hiding out in the high desert of New Mexico and on the run from intelligence agencies. He sums up his life spent with a most unusual colleague named Blaise. The journal entries span seven months in 2019 then end as 2020 begins, but they cover the history of the Earth. Offered in a matter-of-fact manner, the writers revelations grow increasingly alarming and hard to credit. Wormholes on the Earth. Pleiadian influence in human evolution. Hyperdimensional Light grids. Clairvoyant scientists. Shapeshifting Ascended Masters. Accounts of planetwide psychic access. An apparitional theater of mythic figures. Angels 60 billion years old on the verge of human incarnation. Yet the journals, written with warmth, fondness, and amusement, read like the memoir of truly one mans best friend, Blaise yet this Blaise is too big, too old, too vast to be a human. What then? And who wrote the journals? He seems untraceable. In 2023 the notebooks passed to Dartmouth College professor Frederick Graham Atkinson, Ph.D., who, starting in 2025, prepared them for publication, adding helpful editorial notes. The journals, though never intended for publication by their author and its a miracle they survived the desert and years in a dusty unused office, Dr. Atkinson states, offer an unusual, often inspiring, and mostly astonishing report of the inner affairs of planet, culture, myth, humanity, the spiritual world, and where its all heading.

Films from the Future Andrew Maynard, 2018-11-15 "Deftly shows how a seemingly frivolous film genre can guide us in shaping tomorrow's world." —Seth Shostak, senior astronomer, SETI Institute Artificial intelligence, gene manipulation, cloning, and interplanetary travel are all ideas that seemed like fairy tales but a few years ago. And now their possibilities are very much here. But are we ready to handle these advances? This book, by a physicist and expert on responsible technology development, reveals how science fiction movies can help us think about and prepare for the social consequences of technologies we don't yet have, but that are coming faster than we imagine. *Films from the Future* looks at twelve movies that take us on a journey through the worlds of biological and genetic manipulation, human enhancement, cyber technologies, and nanotechnology. Readers will gain a broader understanding of the complex relationship between science and society. The movies mix old and new, and the familiar and unfamiliar, to provide a unique, entertaining, and ultimately

transformative take on the power of emerging technologies, and the responsibilities they come with.

Out There Michael Wall,2018-11-13 In the vein of Randall Munroe's What If? meets Brian Green's Elegant Universe, a senior writer from Space.com leads readers on a wild ride of exploration into the final frontier, investigating what's really out there. We've all asked ourselves the question. It's impossible to look up at the stars and NOT think about it: Are we alone in the universe? Books, movies and television shows proliferate that attempt to answer this question and explore it. In Out There Space.com senior writer Dr. Michael Wall treats that question as merely the beginning, touching off a wild ride of exploration into the final frontier. He considers, for instance, the myriad of questions that would arise once we do discover life beyond Earth (an eventuality which, top NASA officials told Wall, is only drawing closer). What would the first aliens we meet look like? Would they be little green men or mere microbes? Would they be found on a planet in our own solar system or orbiting a star far, far away? Would they intend to harm us, and if so, how might they do it? And might they already have visited? Out There is arranged in a simple question-and-answer format. The answers are delivered in Dr. Wall's informal but informative style, which mixes in a healthy dose of humor and pop culture to make big ideas easier to swallow. Dr. Wall covers questions far beyond alien life, venturing into astronomy, physics, and the practical realities of what long-term life might be like for we mere humans in outer space, such as the idea of lunar colonies, and even economic implications. Dr. Wall also shares the insights of some of the leading lights in space exploration today, and shows how the next space age might be brighter than ever.

When The Stars Fall To Earth Rebecca Tinsley,2012-07-10 This is a novel about people who find themselves in the middle of a horrific conflict and how they survive. Their choices affect their families, the people they love, and the course of their lives. Their stories start before the events in Sudan touch them, following them through challenges and triumphs, as they rebuild their lives. What they have in common with the rest of us is that their journeys are about finding out what kind of people they are: Should they try to draw strength from their anger or should they let it go?
