Federalism and Second Chambers Wilfried Swenden,2004 The theory of comparative federalism asserts that federations require a second chamber for the representation of regional interests in central law-making. Yet there has been little systematic analysis of the contribution of second chambers in parliamentary federations to this task. The main purpose of this book is to demonstrate to what extent the two strongest parliamentary second chambers, the Australian Senate and the German Bundesrat are linked to the federal structures in which they are embedded. The study analyzes the contribution of the members of these second chambers in advancing interests that are linked to the regional constituents whom they represent or to the collective fiscal or administrative interests of a regional government with whom they are associated. The analysis underscores the largely 'executive' character of intergovernmental relations in parliamentary federations, a feature that corresponds with the composition of the German Bundesrat, but not of the Australian Senate. In the concluding chapter some preliminary observations are made as to whether our findings also generate interesting insights for the larger group of parliamentary second chambers in federal or quasi-federal states, such as the Belgian, Spanish and Canadian Senates, the UK House of Lords and the Indian Raiya Sabha.

International Handbook of Network Industries Matthias Finger,R. W. K_nneke,2011 'To learn about how economic and institutional forces have shaped the network industries and policies towards them, read the first part of the book. To discover their impacts on particular industries, read the second part. And to find out what has happened in particular countries, read

the third part. I think anyone interested in network industries should read all of it! The book's structure allows for many interesting comparisons across countries and sectors.' Richard Green, University of Birmingham, UK 'This is a very useful and comprehensive guide to reforms in network industries in communications, energy, transport and water. It is organized by generic topic, sector and region. Its authors are acknowledged experts. I am confident that this Handbook will be a widely read and valuable resource for many years.' Martin Cave, London School of Economics, UK 'Quite an accomplishment, this Handbook provides by far the most comprehensive overview of the role of the private sector and competition in infrastructure industries, with thoughtful surveys of each of the major infrastructure sectors and of the key regions and countries.' José Gómez-Ibáñez, Harvard University, US In recent decades, all infrastructures have undergone significant restructuring. This worldwide phenomenon is often labelled 'liberalization' and although expectations were high with respect to lower prices, greater efficiency and innovation, the expected gains have not always been fully realized. This extensive, state-of-the-art Handbook provides a comprehensive overview of the various experiences of liberalization across different sectors, regions and disciplines. The multidisciplinary approach focuses on the economic, political and institutional aspects of liberalization as well as, to a lesser extent, on technological issues. As such, it constitutes a unique contribution, as this broad overview is often lost in the sector specific, country-focused and purely disciplinary approaches prevalent in the current literature. Sectors explored include telecoms, the Internet, energy and transport, whilst the truly global perspective incorporates unique case studies from an array of developed and developing countries including the US, China, India and the EU. The International Handbook of Network Industries will become the definitive volume for academics researchers and students of economics, political science and law interested in infrastructure regulation. It will also prove a valuable guide to practitioners and policy-makers involved in liberalization and competition.

Pigs at the Trough Adam Schwab,2010-09-16 The past decade has seen a period of unparalleled growth in executive remuneration. But while CEO pay exploded, shareholders looked on helplessly as some of Australia's best-known companies

self-destructed. When the fall eventually came, executives were well protected. Shareholders and creditors were not so lucky. From Telstra's enriching of Sol Trujillo to the toppling of Eddy Groves's ABC Learning Centres and the untold accounts of the billions lost by the collapsed Babcock & Brown, Allco Finance Group and MFS, *Pigs at the Trough* tells the story of how a generation of executives, under the supervision of well-known and respected non-executive directors, pushed all the boundaries and sometimes sailed right over them ... and got away with it. A pacey, irreverent read but with a devastatingly serious message, *Pigs at the Trough* gives investors invaluable insights into how to spot the telltale signs of impending corporate collapse, and how to avoid being another victim.

Ellie hates the computer; to her it is a monster. Ellie answers a newspaper

advertisement placed by a man named Don, who teaches people how to use computers. Now Ellie becomes the monster, completely addicted to the Internet. Brad asks Don to do something about his mothers obsession. Unfortunately, the solution Don finds is not to Brads liking.
