Indigenous Pathways, Transitions and Participation in Higher Education Jack Frawley,Steve Larkin,James A. Smith,2017-05-31 This book is open access under a CC BY 4.0 license. This book brings together contributions by researchers, scholars, policy-makers, practitioners, professionals and citizens who have an interest in or experience of Indigenous pathways and transitions into higher education. University is not for everyone, but a university should be for everyone. To a certain extent, the choice not to participate in higher education should be respected given that there are other avenues and reasons to participate in education and employment that are culturally, socially and/or economically important for society. Those who choose to pursue higher education should do so knowing that there are multiple pathways into higher education and, once there, appropriate support is provided for a successful transition. The book outlines the issues of social inclusion and equity in higher education, and the contributions draw on real-world experiences to reflect the different approaches and strategies currently being adopted. Focusing on research, program design, program evaluation, policy initiatives and experiential narrative accounts, the book critically discusses issues concerning widening participation.

Professionalism in the Information and Communication Technology Industry John Weckert,Richard Lucas,2013-10-15 Professionalism is arguably more important in some occupations than in others. It is vital in some because of the life and death decisions that must be made, for example in medicine. In others the rapidly changing nature of the occupation makes efficient regulation difficult and so the professional behaviour of the practitioners is central to the good functioning of that occupation. The core idea behind this book is that Information and Communication Technology (ICT) is changing so quickly that professional behaviour of its practitioners is vital because regulation will always lag behind.

Charlotte Perriand Justin McGuirk, 2021 An affordable, concise survey on the influential modernist designer's interiors, buildings, furniture and more, from a sawtooth ski resort to sculptural chaises longues From the onset of her career, Charlotte Perriand was a maverick who believed in good design as a force for the betterment of society. Many young designers would be devastated by a rejection from Le Corbusier's studio, but when the great architect told her they had no use for a female furniture designer, Perriand only became more determined to prove her mettle as an artist. Under Le Corbusier, and long after she left his studio, Perriand's contributions to both furniture design and architecture demonstrated a unique attention to the organic artistry of nature as well as the egalitarian possibilities of the machine age. Her leftwing populist politics motivated much of her work, from modular furniture systems to major architectural projects. This monograph explores Perriand's most famous interiors, original furniture and architectural projects, as well as her never-before-seen sketchbooks, shedding new light on her creative process and place in design history. Charlotte Perriand (1903-99) experienced the first breakthrough in her career with *Le Bar sous le toit*, a 1927 interior design piece that predicted the elegant minimalism and utilitarian nature of her future work. Although today she is perhaps best known for her early chaise longue designs, Perriand also created the plans for a number of major buildings across Europe and contributed interior designs to Le Corbusier's Unit d'habitation. She worked in places as diverse as Tokyo, Rio de Janeiro and London in her pursuit of accessible design.
