Liber Amicorum, dedicated to Professor Budislav Vukas, his colleagues and former students have contributed essays on topical issues of contemporary international law, primarily in the fields that were the focus of Professor Vukas's interest during his long-lasting academic and international career at the University of Zagreb, Faculty of Law, the International Tribunal for the Law of the Sea, the International Labour Organization, the Institut de Droit International and many other law schools and international institutions and organizations. The essays in this collection, thus, deal with current developments concerning the subjects of international law (i.a. jurisdictional immunities of states, responsibility of states, international organizations, other non-state entities), the law of the sea (i.a. jurisdictional zones, delimitation, piracy, underwater cultural heritage protection, fisheries, land-locked states), human rights law, including minorities' protection (i.a. European Court of Human Rights, humanitarian assistance, protection in the event of disasters, social and labour rights, rights of the child), and dispute settlement (i.a. International Court of Justice, International Tribunal for the Law of the Sea, arbitration, diplomatic means). Of the 49 essays written by scholars and practitioners from different parts of the world six are in French.

Deciphering Earth's History: the Practice of Stratigraphy Angela Coe, 2022-11-08 Stratigraphy allows us to establish and communicate the timings for the course of Earth history and provides the means to determine the duration and rates of Earth processes. *Deciphering Earth's History: the Practice of Stratigraphy* focuses on how to apply the wide spectrum of stratigraphical techniques. It also explains how these techniques can be integrated and details their individual strengths and limitations. Chapters are laid out in a step-by-step style, guiding the reader through a recommended approach and explaining the factors to be considered. The methods are illustrated with flow charts, marginal top tips, checklists, worked examples and over 200 figures. Authors from academia, research centres and industry have contributed to ensure a wide range of perspectives are included. In addition to chapters on each of the stratigraphical techniques there is also material on accounting for stratigraphical incompleteness, constructing geological timescales, handling and archiving stratigraphical

data and the application of stratigraphy to space exploration and other disciplines. This book is designed for a wide audience ranging from advanced level undergraduates to professional practitioners wishing to use other stratigraphical techniques or understand the advantages and weaknesses of particular techniques.

Germany in the Great War Joshua Bilton,2021-12-08 This book documents the experiences of the Central Powers, specifically Austria-Hungary, Germany and the Ottoman Empire during 1917, as they fought on land, at sea and in the air. Drawing on hundreds of contemporary photographs, many of them never previously published, this book examines the experiences of these three nations, spotlighting not only the events that occurred throughout the year, but the lives of those individuals fighting and dying to defend their homelands, families and friends. Each chapter includes a succinct overview of a single front or theatre of operation, complimenting the hundreds of professional and amateur photographs contained within. Though many of the images are of the German and Austro-Hungarian armies on the Westfront and Ostfront, several additional chapters also explore the fighting across other, lesser-known fronts, including the Südwest Front and in Sinai and Palestine, and Mesopotamia. This book is an excellent pictorial guide that would be of benefit to anyone seeking to gain a better understanding of what life was like from the perspective of the German, Austro-Hungarian and Ottoman armies, and their peoples during the fourth year of the First World War.
