**What We Leave Behind** Anna Mansell,2020-09-29 I watch for a moment, my heart explodes. This little girl, dressed in white, her face bright as she swirls and twirls, dancing in the sunshine. 'Mummy!' she says, running towards me. I catch her, no question. 'Mummy, you're here,' she says.' And I hold her tight. Imagine you get home one day... and waiting for you on your doorstep is a gift. It is wrapped beautifully, and inside is a notebook, its pages empty. There is no message. But its sender has a story to tell. About a secret. About the little girl you once were. About everything you know about your family. The gifts keep arriving. But when tragedy strikes - leaving your beloved only daughter fighting for her life - the person who has been sending the gifts will have no choice but to come forward. And to finally tell the truth. Even if it's the very thing that will tear your family apart... A heartbreakingly beautiful novel about motherhood, loss and family secrets, for fans of Kerry Fisher, Susan Lewis and Jodi Picoult. Strategy for Managing Complex Systems Fredmund Malik, 2016-05-12 Malik demonstrates that management and management theory have strong foundations in systems science, and most specifically in a certain type of cybernetics of truly complex systems, of organismic, self-organizing, and evolving systems. This book provides the basics on how to create robust, functional, and sustainably viable systems. One of the reasons why it has become a classic on management cybernetics, now in its 11th edition, is that the strategies and heuristic principles of complexity management are still relevant - now more than ever.--Back cover.

Seven Keys to Modern Art Simon Morley,2019-03-19 A liberating approach to interpreting modern and contemporary art, focusing on twenty major artworks from around the world and representing a diversity of styles, mediums, and artists. With modern art's proclivity for self-expression, originality, and the abstract, great works can often seem indecipherable. This book provides the tools to help interpret the seemingly bizarre and often intimidating aspects of modern and contemporary art by exploring twenty works in terms of seven key perspectives: history, biography, aesthetics, experience, theory, criticism, and the market. Author, artist, and art historian Simon Morley shows how twenty well-known but little-understood works of art can serve as useful gateways not only for understanding each other, but also for appreciating works by the same artists and the wider world of art in general. Morley points to visual and theoretical dimensions of art that are not immediately obvious, reconstructing the perspectives of artists and the context within which works were made. Seven Keys to Modern Art is a liberating approach, offering a highly practical and universally applicable method of art interpretation and appreciation.

Paid Migrant Domestic Labour in a Changing Europe Berit Gullikstad,Guro Korsnes Kristensen,Priscilla Ringrose,2016-07-13 This book analyses the changing face of work, gender equality and citizenship in Europe. Drawing on in-depth research conducted in nine different countries, it focuses on the discourses, social relations and political processes that surround paid domestic labour. In doing so, it rethinks the vital relationship between this kind of employment, the formal and informal citizenship of migrant workers and their employers, and the cultural and political value of gender equality. Approaching these as fluid, complex and interrelated phenomena that change according to local context, it will appeal to sociologists, political scientists, geographers, anthropologists and gender studies scholars.

Gender and Far Right Politics in Europe Michaela Köttig,Renate Bitzan,Andrea Petö,2016-12-20 This book is a systematic consideration of the link between the extreme right and the discourse about developments in regard to gender issues within different national states. The contributors analyze right-wing extremist tendencies in Europe under the specific perspective on gender. The volume brings together the few existing findings concerning the quantitative dimension of activities carried out by men and women in different countries, and illuminates and juxtaposes gender ratios along with the role of women in right-wing extremism. Along with the gender-specific access to right-wing groups, the chapters look at networks, organizational forms, specific strategies of female right-wing extremists, their ideologies (especially regarding femininity and masculinity), hetero normativity, discourses on sexuality, and preventive and counter-strategies. The book will be of use to students and scholars interested in gender and politics, European politics, and political extremism.

Community Pharmacy Paul Rutter,2016-12-03 Now in its fourth edition, this best-selling book is fully updated to address the ever increasing demands on healthcare professionals to deliver high-quality patient care. A multitude of factors impinge on healthcare delivery today, including an ageing population, more sophisticated medicines, high patient expectation and

changing health service infrastructure. Time demands on primary care doctors have caused other models of service delivery to be adopted across the world, leading to ongoing changes in the traditional boundaries of care between doctors, nurses, and pharmacists. Certain medical tasks are now being performed by nurses and pharmacists, for example prescribing. Healthcare policies to encourage patients to manage their own health have led to more medicines becoming available over the counter, allowing community pharmacists to manage and treat a wide range of conditions. Further deregulation of medicines to treat acute illness from different therapeutic areas seems likely. Government policy now encourages chronic disease management as a self-care activity, and could well be the largest area for future growth of reclassification of medicines. Pharmacists, now more than ever before, need to be able to recognise the signs and symptoms, and use an evidence-based approach to treatment. Community Pharmacy is intended for all non-medical prescribers but especially for pharmacists, from undergraduate students to experienced practitioners. Key features - Guidance for arriving at a differential diagnosis - Practical prescribing tips - Trigger points for referral boxes - Other hints and tips boxes - Specific questions to ask boxes - Case studies - Self-assessment questions Consistent approach gives: - Anatomy overview - History taking and physical examination - Prevalence and epidemiology - Aetiology - Arriving at a differential diagnosis - Clinical features - Conditions to eliminate Likely causes Unlikely causes Very unlikely causes - Evidence base for OTC medicine - Practical prescribing and product selection - More on the examination of eyes, ears and mouth - New sections on future-proofing (vaccinations etc.) - New material covering inter-professional education for clinical skills. Now with a free accompanying e-book on StudentConsult which also gives additional material on: - evidence-based medicine - videos on physical examination - additional written case studies - more multiple-choice questions

**Pharmacotherapies for the Treatment of Opioid Dependence** Richard P. Mattick, Robert Ali, Nicholas

Lintzeris, 2009-03-25 The most comprehensive text of its kind, this book addresses both the management of opioid withdrawal and opioid maintenance therapy, and combines up-to-date reviews of the scientific literature with evidence-based clinical guidelines for all of the relevant pharmacotherapies. A unique work, Pharmacotherapies for the Treatment of Opioid Dependence presents: · detailed information on the cost-effectiveness of the various types of opioid treatment · the range of pharmacotherapies used for the management of opioid dependence · the state of knowledge from the international research literature on the value and relative efficacy of the various pharmacological approaches. This includes pharmacotherapies used in the management of withdrawal from opioids such as clonidine, lofexidine, methadone, buprenorphine and naltrexone and also symptomatic medications. It also includes different forms of maintenance therapy using opioid agonists such as methadone, LAAM, buprenorphine, slow-release oral morphine and diamorphine, and opioid antagonists such as naltrexone. This text should appeal to researchers, to identify gaps in the research literature and provide a basis for determining appropriate research directions, to clinicians by providing clinical with clinical guidelines and information concerning the

empirical basis for the treatments, and to policy makers in assisting them to make decisions about the various treatments from a public health perspective, taking into account the relative cost and effectiveness of the interventions.

Atlas of Clinical Diagnosis Mohammad Afzal Mir,2003 Presents a sign-orientated approach to the diagnosis of both common and rare medical disorders that physicians may encounter in hospital or in the community. The comprehensive collection of clinical pictures, organised by anatomical region from scalp to sole, reflects actual clinical practice where a diagnosis has to be constructed from a single sign or a collection of signs. Fundamental, pathognomonic, and commonly seen non-specific clinical signs are presented with clinical features highlighted for rapid recognition and interpretation. In addition, the book provides guidance on appropriate bedside clinical tests for establishing diagnoses.

Gender and Family in European Economic Policy Diana Auth,Jutta Hergenhan,Barbara Holland-Cunz,2016-12-13 This collection explores how pioneering gender equality policies have shaped women's economic presence in Europe since 2000. Equal pay policies, parental leave reforms, corporate quotas and electoral quotas have raised pressing questions about the effectiveness in promoting equal participation, as researchers quote both quantitative improvement in gender diversity and qualitative lag in cultural change. The chapters in this book present interlocking cross-national and cross-policy comparisons of the three most controversial reforms: equal pay, parental leave, and quotas for political representatives. The contributors address the cultural context in which reforms arose, internally contradictory policies, and the relative effectiveness of fast-track quotas and incentives compared to long-term efforts to change the overall culture of gender. This critical examination of the new millennium's groundbreaking gender policies will appeal to academics and practitioners interested in the progress of gender equality in the economic, political, and social welfare fields.

**Rape in Marriage** Diana E. H. Russell,1990 This is a groundbreaking contribution to the literature of sexual assault and family violence. -- Susan Brownmiller [Russell] has done a superb study which yields comprehensive and undeniable findings about a subject no one had even whispered about before... a classic work. -- Phyllis Chesler One out of seven American women who have ever been married has been raped by a husband or ex-husband. Written by the principal investigator for the National Institute of Mental Health study that discovered this shocking statistic, this book is a monumental, eye-opening work that dispels misinformation and illusions about a previously ignored aspect of family violence.

Gender and the Economic Crisis in Europe Johanna Kantola, Emanuela Lombardo, 2017-02-22 This book is a unique exploration into the gendered politics of the economic crisis in Europe. It focuses, firstly, on the changes in the political and economic decision-making institutions and processes of the EU and their consequences for gender equality policy. Secondly, the book analyses the gendered impacts of austerity politics on member states' gender equality policies, institutions, regimes, and debates. Finally, it addresses feminist and intersectional struggles and resistances against neoliberal, conservative and racist politics across Europe. The authors consider the gendered politics of the economic crisis from a variety of feminist approaches, shedding new light on the concept of the crisis and on questions of politics, institutions and intersectionality. The case studies included refer to different parts of Europe, from North to South and from East to West, capturing the multifaceted gendered impacts of the crisis. The volume will be of interest to students and scholars of politics, international relations, gender studies, economics, law, sociology, social policy, and European studies.

*Childhood and Migration* Jacqueline Knörr, 2005 This volume puts an emphasis on the question how children themselves experience and manage migration and by means of which they construct an identity for themselves which takes into account their experiences from both their places of origin and their host societies. What role does the cultural background of the society of origin on the one hand and the strategies of integration found in the host society on the other play in the creation of identity and of a concept of home, origin and belonging? How do children express processes of cultural orientation and integration (music, media, fashion, style) and what role do peer groups and social milieus play in this regard? How do migrant children experience xenophobia and a lack of acceptance on the side of the host society and how do they counter-balance such experiences? The approach taken is both comparative and interdisciplinary, the contributors having different theoretical and methodological backgrounds, the contributions dealing with different social and cultural settings both with regard to place of origin and host society.
