Role of Japan in Modern Chinese Art Joshua A. Fogel,2013 The modern histories of China and Japan are inexorably intertwined. Their relationship is perhaps most obvious in the fields of political, economic, and military history, but it is no less true in cultural and art history. Yet the traffic in artistic practices and practitioners between China and Japan remains an understudied field. In this volume, an international group of scholars investigates Japan's impact on Chinese art from the mid-nineteenth century through the 1930s. Individual essays address a range of perspectives, including the work of individual Chinese and Japanese painters, calligraphers, and sculptors, as well as artistic associations, international exhibitions, the collotype production or artwork, and the emergence of a modern canon.

**Combating Desertification with Plants** D. Pasternak,Arnold Schlissel,2012-12-06 The conference Combating Desertification with Plants was held in Beer Sheva, Israel, from November 2-5, 1999, and was attended by 70 participants from 30 countries and/or international organisations. Desertification - the degradation of soils in drylands - is a phenomenon occurring in scores of countries around the globe. The number of people (in semiarid regions) affected by the steady decline in the productivity of their lands is in the hundred millions. The measures required to halt and reverse the process of desertification fall into many categories - policy, institutional, sociological-anthropological, and technical. Although technical

solutions are not currently in vogue, the conference organizers felt that perhaps the pendulum had swung too far in the direction of participatory approaches. Hence IPALAC - The International Program for Arid Land Crops - whose function is to serve as a catalyst for optimizing the contribution of plant germplasm to sustainable development in desertification-prone regions - felt the time was opportune for providing a platform for projects where the plant-driven approach to development finds expression. Some 45 papers were delivered at the conference, falling into the categories of this volume: Overview, Potential Germplasm for Arid Lands, Introduction, Domestication and Dissemination of Arid Land Plants, Land Rehabilitation, and Mechanisms of Plant Transfer. The conference was funded by UNESCO (Division of Ecological Sciences), the Ministry of Foreign Affairs of Finland, and MASHAV, Israel's Center for International Development Cooperation.

**Asianisms** Marc Frey,Nicola Spakowski,2015-11-11 At the core of this book is a seemingly simple question: What is Asia? In search of common historical roots, traditions and visions of political-cultural integration, first Japanese, then Chinese, Korean and Indian intellectuals, politicians and writers understood Asianisms as an umbrella for all conceptions, imaginations and processes which emphasized commonalities or common interests among different Asian regions and nations. This book investigates the multifarious discursive and material constructions of Asia within the region and in the West. It reconstructs regional constellations, intersections and relations in their national, transnational and global contexts. Moving far beyond the more well-known Japanese Pan-Asianism of the first half of the twentieth century, the chapters investigate visions of Asia that have sought to provide common meanings and political projects in efforts to trace, and construct, Asia as a united and common space of interaction. By tracing the imagination of civil society actors throughout Asia, the volume leaves behind state-centered approaches to regional integration and uncovers the richness and depth of complex identities within a large and culturally heterogeneous space.

**Writing the Community** Linda Adler-Kassner,Robert Crooks,Ann Watters,1997 The first volume in AAHE and Campus Compact's series on service-learning in the disciplines, the book discusses the microrevolution in college-level Composition through service-learning. The essays in this volume show why service-learning and communication are a natural pairing and give a background on the relationship between service-learning and communication with maps to suggest where it should go in the future.

**Transition and Development in China** Yun Chen, 2009 China's transition from a planned economy to a market economy has succeeded in producing more than a decade of phenomenal growth. How the difficult task of balancing the diverse array of often competing concerns has been achieved is the subject of this book, which examines the dismantling of the centrally planned system and the mechanism of institutional change in Chinese transition

**Ritual** Catherine Bell, 2009-12-29 From handshakes and toasts to chant and genuflection, ritual pervades our social interactions and religious practices. Still, few of us could identify all of our daily and festal ritual behaviors, much less explain them to an outsider. Similarly, because of the variety of activities that qualify as ritual and their many contradictory yet, in many ways, equally legitimate interpretations, ritual seems to elude any systematic historical and comparative scrutiny. In this book, Catherine Bell offers a practical introduction to ritual practice and its study; she surveys the most influential theories of religion and ritual, the major categories of ritual activity, and the key debates that have shaped our understanding of ritualism. Bell refuses to nail down ritual with any one definition or understanding. Instead, her purpose is to reveal how definitions emerge and evolve and to help us become more familiar with the interplay of tradition, exigency, and self-expression that goes into constructing this complex social medium.

**The Japanese Conspiracy** Masayo Duus, 1999-10 A dramatic tale of how a little-remembered strike in Hawaii fanned the flames of anti-Japanese sentiment in the United States and, the author argues, ultimately led to the infamous Japanese Exclusion Act of 1924.

**Wandering in Northern China (Classic Reprint)** Harry A. Franck, 2018-03-17 Excerpt from *Wandering in Northern China* At home there are numbers of young men, five or ten years out of college, who can tell you just what is the matter with the world, and exactly how to remedy it. I am more or less ready to agree with them that the world is going to the dogs. What of it? You have only to step outdoors on any clear night to see that there are hundreds of other worlds, which may be arranging their lives in a more intelligent manner. The most striking thing about these young political and sociological geniuses sitting in their suburban gardens or their city flats is that while they can toss off a recipe guaranteed to cure our own sick world overnight, if only some one can get it down its throat, they seldom seem to have influence enough in their own cozy little corner of it to drive out one grafting ward-heeler. In other words, if you must know what is to be the future of

China, I regret that I have not been vouchsafed the gift of prophecy and cannot tell you. In the minor matter of Chinese words and names, I have deliberately not tried to follow the usual Romanization, but rather to cause the reader to pronounce them as nearly like what they are on the spot as is possible with our mere twenty-six letters. Of course I could not follow this rule entirely or I must have called the capital of China Bay-jing, have spoken of the evacuation of Shahn - doong, and so on; so that in the case of names already more or less familiar to the West I have used the most modern and most widely accepted forms, as they have survived on the ground. At that I cannot imagine what ailed the men who Romanized the Chinese language, but that is another story. International Relations and the Origins of the Pacific War Ko Unoki, 2016-04-08 *International Relations and the Origins of the Pacific War* takes the unique approach of examining the history of the relationship between Japan and the United States by using the framework of international relations theories to search for the origins of the Pacific War, that erupted with Japan's attack on Pearl Harbour in 1941.

**To the Distant Observer** Noël Burch, 1979-01-01

*Banking on Death* Robin Blackburn, 2020-05-05 *Banking on Death* offers a panoramic view of the history and future of pension provision. A work of unique scope, it traces the origins and development of the pension idea, from the days of the French Revolution to the troubles of the modern welfare state. As we live longer, employers are closing their pension schemes and many claim that public treasuries will not be able to cope with the retirement of the baby boomers. *Banking on Death* analyses the challenge facing public schemes and the malfunctioning of private retirement provision, concluding with a bold proposal for how to pay for decent pensions for all. Robin Blackburn argues that pension funds have been depleted by wasteful promotion and used as gambling chips by ruthless and overpaid top executives. This is the world of 'grey capitalism,' where employees' savings are sequestered from them and pressed into the service of corporate aggrandisement. Even the best companies find it hard to run a business and a pension fund at the same time—especially when the latter is larger than the former. The fund managers' notorious short-termism and herd instinct, and their failure to curb the greed and

irresponsibility of the corporate elite, lead to obscene inequalities and a blighted social landscape. The pension privatisation lobby, Blackburn shows, has lost major battles in France and Germany, the United States and Italy, because of the popular fears it evokes. And the case for privatisation looks intellectually threadbare after withering critiques from such notable theorists as Joseph Stiglitz and Pierre Bourdieu. Banking on Death shows that pensions are political dynamite, and have undone governments from France and Italy to Argentina. Popular outcries led Reagan, Clinton, and Blair to change tack: will this happen to George W. Bush too? Blackburn argues that the ageing society will generate increased costs but, so long as the new life course is properly financed, all age groups will gain. He proposes a public regime of asset-based welfare, drawing on the ideas of John Maynard Keynes and Rudolf Meidner, that could ensure secondary pensions for all and foster a more responsible, egalitarian and humane pattern of economic development.
