Daily Reflections for Educators, Coaches, Leaders, and Life Constant Hine, 2024-06-25 With Daily Reflections for Educators, Coaches, Leaders, and Life, build a practice of daily reflection to transform your teaching and leadership. Reflection is the best way to bring “sticky” sustainable change. Developing a reflective mindset helps us become self-empowered, lifelong problem solvers who create meaningful and fulfilling lives both personally and professionally. Coaches, leaders, and all agents of change in early childhood education need to hone their own reflective practices not only to gain self-awareness and make mindful decisions but also to facilitate reflection with the people they support. Through reflection, we make intentional choices to achieve the success we desire. Reflection is not an event, not just an activity, but a lifestyle. This book offers 12 reflective themes for cultivating both personal and professional self-realization and becoming a transformational change agent who helps others do the same. There are 365 entries, one for each day of the year. Each entry has a quotation with a commentary to feed the day’s reflection, as well as a suggestion for reflective practice. One entry every week offers the opportunity to review the previous week or sets up a focus for the coming week.

**The Handbook of Salutogenesis** Maurice B. Mittelmark, Georg F. Bauer, Lenneke Vaandrager, Jürgen M. Pelikan, Shifra Sagy, Monica Eriksson, Bengt Lindström, Claudia Meier Magistretti, 2022-01-01 This open access book is a thorough update and expansion of the 2017 edition of The Handbook of Salutogenesis, responding to the rapidly growing salutogenesis research and application arena. Revised and updated from the first edition are background and historical chapters that trace the development of the salutogenic model of health and flesh out the central concepts, most notably generalized resistance resources and the sense of coherence that differentiate salutogenesis from pathogenesis. From there, experts describe a range of real-world applications within and outside health contexts. Many new chapters emphasize intervention research findings. Readers will find numerous practical examples of how to implement salutogenesis to enhance the health and well-being of families, infants and young children, adolescents, unemployed young people, pre-retirement adults, and older people. A dedicated section addresses how salutogenesis helps tackle vulnerability, with chapters on at-risk children, migrants, prisoners, emergency workers, and disaster-stricken communities. Wide-ranging coverage includes new topics beyond health, like intergroup conflict, politics and policy-making, and architecture. The book also focuses on applying salutogenesis in birth and neonatal care clinics, hospitals and primary care, schools and universities, workplaces, and towns and cities. A special section focuses on developments in salutogenesis methods and theory. With its comprehensive coverage, The Handbook of Salutogenesis, 2nd Edition, is the standard reference for researchers, practitioners, and health policy-makers who wish to have a thorough grounding in the topic. It is also written to support post-graduate education courses and self-study in public health, nursing, psychology, medicine, and social sciences.

**A COMPREHENSIVE GUIDE FOR CAREGIVERS IN DAY-CARE SETTINGS** Nettie Becker, Paul Becker, 1999-01-01 An increasing number of people in our country today acknowledge the fact that there is an enormous crisis in the field of early child care. The first chapter of this book examines the major reasons for the crisis and why the economic reality for most American households will cause the problem to continue to grow in the coming years. Following this, the second chapter discusses the criteria of a good early child care setup, based on professional literature in the field and the author's experience. The remainder of the book addresses the serious problem that most day-care workers are very poorly trained for their jobs. Six chapters are devoted to providing a practical guide for people who work with young children. They discuss, from current research in the field but without using technical language, current practical methods of working with children-at-risk or those who may potentially be at-risk. The focus is on working with children in groups, helping day-care workers and substitute parents to minimize or remediate the at-risk factor in the children in their care. The book also addresses parents of these children and emphasizes the need for cooperation between day-care workers and them so that child care providers can

effectively convey the skills presented here. There is also a chapter on approaches to working with special children, such as children with autism, and those with physical or neurological impairments. This informative and sensitive book will be useful in advancing the training of workers in infant and early child care settings.

*Teaching and Learning with Infants and Toddlers* Mary Jane Maguire-Fong, 2020 Maguire-Fong has updated her groundbreaking book designed to assist pre- and inservice professionals working with infants and their families. The researchers represent a variety of cultural backgrounds, including England, France and the USA. Work in training intervenors, and in implementing a wide variety of programmatic modes is presented. What kind of practical solutions have been created and evaluated that aim at both providing good childhood experiences and supporting children's positive development? This book considers the reality of childhood in Finland. **Finding the Body in the Mind** Marianne Leuzinger-Bohleber, 2018-03-26 Since the 1990s many different scientific disciplines have intensified their interest in the so called 'mind-body-problem': psychoanalysis, philosophy, academic psychology, cognitive science and modern neuroscience. The conceptualization of how the mind works has changed completely, and this has profound implications for clinical psychoanalytical practice as well as for theorizing in contemporary psychoanalysis. The question of how unconscious fantasies and conflicts, as well as traumatic experiences, can be understood and worked through is, and has been, one of the central topics of psychoanalysis. Interdisciplinary studies from the fields of embodied cognitive science, epigenetics, and cognitive neuroscience offer challenging explanations of the functions in the analysts mind which might allow him to create spontaneous associations through which he unconsciously 'understands' the traumatic, embodied experiences of the patient.
