Critical Racial and Decolonial Literacies Debbie Bargallie, Nilmini Fernando, 2024-08-22 This collection offers a unique exploration of critical racial literacy and anti-racist praxis in Australia's educational landscape. Combining critical race and Indigenous theories and perspectives, contributors articulate a decolonial liberatory imperative for our times. In an age when 'decolonization' has become a buzzword, the book demystifies 'critical anti-racism praxis,' advocating for critical and multidisciplinary approaches. Educators from a range of disciplines including Law, Indigenous Studies, Health, Sociology, Policy and the Arts collectively share compelling stories of educating on race, racism and anti-racism, offering strategies that can be put into practice in classrooms, activism and structural reforms.

Towards a Post-Bertalanffy Systemics Gianfranco Minati, Mario Abram, Eliano Pessa, 2015-12-23 This book contains the proceedings of the Sixth National Conference of the Italian Systems Society. The title, Towards a post-Bertalanffy Systemics, aims to underline the need for Systemics and Systems Science to generalize theoretically concepts related to complexity (the great enemy of Bertalanffy Systemics). Hopefully this goal should be achieved by working in an interdisciplinary and trans-disciplinary fashion, using systemic concepts arising from various disciplines and from the original, or Bertalanffy Systemics, as well. The interdisciplinary nature of the original Systemics and its power of generalization were given, overall, by the fact that the problems and solutions of one discipline become problems and solutions for another. Today, the modeling and interpretation of multidisciplinary approaches and representations makes easier to recognize these interconnections. The context, however, has changed dramatically. Of course, the challenge is still to find theoretical generalizations and applications, even where we have a lot of specificities, but we know very little on how to combine them. We cannot, however, simply replace the old with the new, but we must introduce strategies to recognize, represent, model and act on new levels, combining multiple representations, functions and emergence. In many disciplines this has been already done, and inevitably well, since targets and projects are well specified and oriented. The challenge is to do it for Systemics, with the vocations of cultural and theoretical generalization. Examples of new issues introduced by such theoretical disciplinary improvements, dealt with by many disciplines, include the study of mesoscopic or middle-way level, of

multiple and dynamic coherence, of equivalence/non-equivalence, of fractality, of networks, of non-causality, of non-invasiveness, of non-prescribability, of non-separability, of quasi properties, of symmetry properties, of topological dynamics, as well as of quantum theories and concepts. The conference was devoted to identifying, discussing and understanding possible interrelationships of theoretical disciplinary improvements, recognized as having prospective fundamental roles for a new post-Bertalanffy Systemics. The latter should be able to deal with problems related to complexity in a generalized way. In this context the inter-disciplinarity should consist, for instance, in a disciplinary reformulation of problems, as from algebraic to geometrical, from military to political, from biological to chemical, while the trans-disciplinarity should be related to the study of such reformulations and their properties. The Italian Systems Society (AIRS) was founded in the 1996. The AIRS is a network of academicians, scientists, researchers and professionals involved in Systemics. A partial list of disciplines represented is: Architecture Biology Economics Education Engineering Mathematics Neurosciences Medicine Music Philosophy Psychology Physics. Previous conferences had as open lecturers professors Arecchi, Haken, Klir, and Kauffman. The proceedings have been published as: 1. Minati, G., (ed.), (1998), Proceedings of the first Italian Conference on Systemics, Apogeo Scientifica, Milan, Italy. 2. Minati, G., and Pessa, E., (eds.) Australia Under Construction John Butcher,2008-04-01 The Australian nation is a work in progress. So conclude the authors whose views are represented in this most recent offering in the ANZSOG monograph series, AUSTRALIA UNDER CONSTRUCTION: NATION-BUILDING PAST, PRESENT AND FUTURE. From its beginnings as a settler society through to present day concerns about 'broadbanding the nation', the nation-building narrative has resonated with Australians. The very idea of nation-building has both excited the popular imagination about what we might achieve as a society and a nation, and has occasioned despair about missed opportunities. The eleven authors contributing to this monograph reflect on these, and other themes from a variety of perspectives. They challenge our understanding of the term 'nation-building', reflect on its contemporary relevance as a framework for public policy and even re-appraise the contribution of past 'iconic' nation-building endeavours. To this subject the authors bring intelligence, wit and a healthy disdain for sacred cows. A stimulating read for anyone interested in the history, challenges and prospects of nation-building in Australia.

Researching the Visual Michael Emmison, Dr Philip D Smith, 2000-03-15 `The book has a solid practical feel to it, and although it deals philosophically with leading theorists such as Foucault, Goffman, Bourdieu and Hall it grounds the practice of visual research into everyday use... Weaved cleverly throughout are numerous practical exercises which draw together the theoretical concepts and give them a grounded rational element. This book is a valuable research tool and I would anticipate that many researchers will find it a worthwhile addition to their armoury' - Mental Health Care Providing a comprehensive introduction to the entire field of visual research, this book reviews the contributions of traditions as diverse as semiotics, ethnomethodology, symbolic interactionism and

The Mayne Inheritance Rosamond Siemon, 2003 Opening with a macabre mid-nineteenth century murder, *The Mayne Inheritance* unfolds like a gothic thriller. Was it the murder victim's money that founded patriarch Patrick Mayne's Queen Street business empire? And were the whispered accusations of murder and genetic madness true? For 150 years scandal and mystery have surrounded the Maynes, a wealthy family who donated the magnificent site on which the University of Queensland now stands.

Roars from the Mountain R. Wally Johnson, 2020-04-07 Mount Lamington broke out in violent eruption on 21 January 1951, killing thousands of Orokaiva people, devastating villages and destroying infrastructure. Generations of Orokaiva people had lived on the rich volcanic soils of Mount Lamington, apparently unaware of the deadly volcanic threat that lay dormant beneath them. Also unaware were the Europeans who administered the Territory of Papua and New Guinea at the time of the eruption, and who were uncertain about how to interpret the increasing volcanic unrest on the mountain in the preceding days of the disaster. *Roars from the Mountain* seeks to address why so many people died at Mount Lamington by examining the large amount of published and unpublished records that are available on the 1951 disaster. The information sources also include the results of interviews with survivors and with people who were part of the relief, recovery and remembrance phases of what can still be regarded as one of Australia's greatest natural-hazard disasters.
