**Construction Management** Daniel W. Halpin, Bolivar A. Senior, Gunnar Lucko, 2017-08-07 It's often said that the construction professional has to be a "jack of all trades, and master of all." This text covers a wide range of subjects, reflecting the breadth of knowledge needed to understand the dynamics of this large and complex industry. This edition includes updated chapters on planning and scheduling, a new chapter addressing linear scheduling methods, material regarding the historical background of construction as a profession, and includes an Instructor Resource of solutions to the end-of-chapter review exercises. This text has become a standard course text at many universities. The first four editions have enjoyed wide success as an introductory treatment of the subjects which are critical to success in the construction industry. This fifth edition preserves the features that have been most appreciated by its users throughout the years, and adds suggestions provided by instructors and students through formal surveys and informal feedback to the authors.

Construction Management Eugenio Pellicer, Víctor Yepes, José C. Teixeira, Helder P. Moura, Joaquín Catalá, 2013-10-09 The management of construction projects is a wide ranging and challenging discipline in an increasingly international industry, facing continual challenges and demands for improvements in safety, in quality and cost control, and in the avoidance of contractual disputes. Construction Management grew out of a Leonardo da Vinci project to develop a series of Common Learning Outcomes for European Managers in Construction. Financed by the European Union, the project aimed to develop a library of basic materials for developing construction management skills for use in a pan-European context. Focused exclusively on the management of the construction phase of a building project from the contractor's point of view, Construction Management covers the complete range of topics of which mastery is required by the construction management professional for the effective delivery of new construction projects. With the continued internationalisation of the construction industry, Construction Management will be required reading for undergraduate and postgraduate students across Europe.

The Built Environment Wendy R. McClure, Tom J. Bartuska, 2011-09-09 This book takes a sweeping view of the ways we build things, beginning at the scale of products and interiors, to that of regions and global systems. In doing so, it answers

questions on how we effect and are affected by our environment and explores how components of what we make—from products, buildings, and cities—are interrelated, and why designers and planners must consider these connections.

**Project Management and Engineering** José Luis Ayuso Muñoz, José Luis Yagüe Blanco, Salvador F. Capuz-Rizo, 2015-04-01 Project Management and Engineering is an emergent area. Projects have a tendency to grow in size, involve more stakeholders, and be of greater environmental, organizational and technological complexity. They must also fulfil continuously increasing requirements. This causes greater demands on the effectiveness of Project Engineering and the efficiency of Project Management. This volume brings together a collection of recent work by researchers and professionals in the fields of project management and design in civil engineering, environmental engineering, energy efficiency, rural development, production and process engineering, industrial design and information technology and communication.

Applied Behavioral Economics Research and Trends Ianole, Rodica, 2016-12-12 Interdisciplinary factors in the modern business realm have significant impacts on economic agents within organizations. These behavioral influences affect multiple decision-making processes on both the individual and organizational levels. Applied Behavioral Economics Research and Trends provides a comprehensive examination of the social, psychological, and emotional factors in organizational behavior and economic decision-making and how these issues provide a deeper understanding of various economic behaviors. Highlighting relevant coverage across a range of topics, such as consumer behavior, inter-temporal choices, and self-employment, this book is ideally designed for managers, researchers, professionals, graduate students, and practitioners seeking scholarly material on the implications of behavioral economics across numerous industries.

**Construction Company Management** Abid Hasan, Asheem Shrestha, Kumar Neeraj Jha, 2024-09-23 Construction Company Management will give readers a detailed understanding of the critical aspects of managing a successful construction company in a dynamic and complex construction business environment characterised by intense competition, supply chain disruptions, and rapid changes in technology, regulations, client preferences, and market conditions. The book will introduce readers to different dimensions of construction company management. The topics covered reflect current business practices in the construction industry, including company strategy and business models, stakeholder management, contract management, resource management, risk management, knowledge management, company finance, digital innovation, organisational resilience, and the regulatory environment. The book also includes much-needed discussions on ethics, integrity and professional standards, and diversity, equity, and inclusion in construction companies. It explores the opportunities and challenges relevant to construction company management in global contexts with the help of case studies from different regions of the world. Providing a concise book on this essential subject, Construction Company Management serves both students and those educators who teach it in their built environment courses. Practitioners will find the theory-informed company management practices discussed in the book valuable and useful in their practical contexts.

**Cooperative Design, Visualization, and Engineering** Yuhua Luo,2015-09-21 This book constitutes the refereed proceedings of the 12th International Conference on Cooperative Design, Visualization, and Engineering, CDVE 2015, held in

Mallorca, Spain, in September 2015. The 30 full papers presented together with 4 short papers were carefully reviewed and selected from numerous submissions. There is a group of papers dressing the big data related to the cooperative work. It includes the information modeling, intensive task management, how to use the cloud technology to foster the cooperation etc. To deal with the social network issues is the topic of another group of papers in this volume. They range from creating programming languages to automate cooperative processes, social network information visualization, and the ranking cooperative research teams by analyzing the social network data.

*Engineering Your Future* Stuart G. Walesh, 2012-03-06 Round out your technical engineering abilities with the business know-how you need to succeed Technical competency, the hard side of engineering and other technical professions, is necessary but not sufficient for success in business. Young engineers must also develop nontechnical or soft-side competencies like communication, marketing, ethics, business accounting, and law and management in order to fully realize their potential in the workplace. This updated edition of *Engineering Your Future* is the go-to resource on the nontechnical aspects of professional practice for engineering students and young technical professionals alike. The content is explicitly linked to current efforts in the reform of engineering education including ABET's Engineering Criteria 2000, ASCE's Body of Knowledge, and those being undertaken by AAEE, AIChE and ASME. The book treats essential nontechnical topics you'll encounter in your career, like self-management, interpersonal relationships, teamwork, project and total quality management, design, construction, manufacturing, engineering economics, organizational structures, business accounting, and much more. Features new to this revised edition include: A stronger emphasis on management and leadership A focus on personal growth and developing relationships Expanded treatment of project management Coverage of how to develop a quality culture and ways to encourage creative and innovative thinking A discussion of how the results of design, the root of engineering, come to fruition in constructing and manufacturing, the fruit of engineering New information on accounting principles that can be used in your career-long financial planning An in-depth treatment of how engineering students and young practitioners can and should anticipate, participate in, and ultimately effect change If you're a student or young practitioner starting your engineering career, *Engineering Your Future* is essential reading.

*Construction Project Management* Kumar Neeraj Jha, 2011 *Construction Project Management* deals with different facets of construction management emphasizing the basic concepts that any engineering student is supposed to know. The major principles of project management have been derived through real life case studies from the field. Simplified examples have been used to facilitate better understanding of the concepts before going into the large and complex problems. The book features computer applications (Primavera and MS Project) used to explain planning, scheduling, resource leveling, monitoring and reporting; it is highly illustrated with line dia.

Proceedings of the 21st International Symposium on Advancement of Construction Management and Real Estate K. W.

Chau, Isabelle Y.S. Chan, Weisheng Lu, Chris Webster, 2017-12-18 This book presents the proceedings of CRIOCM\_2016, 21st International Conference on Advancement of Construction Management and Real Estate, sharing the latest developments in real estate and construction management around the globe. The conference was organized by the Chinese Research Institute of Construction Management (CRIOCM) working in close collaboration with the University of Hong Kong. Written by international academics and professionals, the proceedings discuss the latest achievements, research findings and advances in frontier disciplines in the field of construction management and real estate. Covering a wide range of topics, including building information modelling, big data, geographic information systems, housing policies, management of infrastructure projects, occupational health and safety, real estate finance and economics, urban planning, and sustainability, the discussions provide valuable insights into the implementation of advanced construction project management and the real estate market in China and abroad. The book is an outstanding reference resource for academics and professionals alike.

**Computational Logistics** Hao Hu, Xiaoning Shi, Robert Stahlbock, Stefan Voß, 2012-08-27 This book constitutes the refereed proceedings of the Third International Conference on Computational Logistics, held in Shanghai, China, in September 2012. The 15 revised full papers presented were carefully reviewed and selected from various submissions. The papers are organized in topical sections on maritime shipping; logistics and supply chain management; planning and operations; and case studies.

**Measuring Construction** Rick Best, Jim Meikle, 2015-04-17 Despite the size, complexity and importance of the construction industry, there has been little study to date which focuses on the challenge of drawing reliable conclusions from the available data. The accuracy of industry reports has an impact on government policy, the direction and outcomes of research and the practices of construction firms, so confusion in this area can have far reaching consequences. In response to this, Measuring Construction looks at fundamental economic theories and concepts with respect to the construction industry, and explains their merits and shortcomings, sometimes by looking at real life examples. Drawing on current research the contributors tackle: industry performance productivity measurement construction in national accounts comparing international construction costs and prices comparing international productivity The scope of the book is international, using data and publications from four continents, and tackling head on the difficulties arising from measuring construction. By addressing problems that arise everywhere from individual project documentation, right up to national industrial accounts, this much-needed book can have an impact at every level of the industry. It is essential reading for postgraduate construction students and researchers, students of industrial economics, construction economists and policy-makers.

**Risk Management Treatise for Engineering Practitioners** Chike F Oduoza, 2019-04-23 This book Risk Management Treatise for Engineering Practitioners has been published by academic researchers and experts on risk management

concepts mainly in the construction engineering sector. It addresses basic theories and principles of risk management backed up, in most cases, with case studies. The contributions for this book came from authors in Europe, the Far East and Africa, and it is hoped that the contents of this book will be useful to anyone interested in understanding the principles and applications of risk management, especially within the construction engineering sector. Researchers and postgraduate students in science and engineering disciplines, especially those interested in project management, will find this book useful.

**Implementing IT Business Strategy in the Construction Industry** Hua, Goh Bee, 2013-06-30 Technology development has provided fundamental benefits of speed, precision, and convenience to common business strategies; providing not only a means for functional integration, but also an opportunity to enhance competitive capability of a business firm. Implementing IT Business Strategy in the Construction Industry brings together topics on understanding business strategy and competitive advantage, as well as essential benefits of concepts and technologies for improving efficiency of the construction industry. This reference source is directed toward researchers, policy-makers, practitioners, undergraduate, and postgraduate students, in order to gain insights into the complex workings of the traditional construction industry and the concepts and tools used to facilitate a strategically IT enabled industry.

**CONVR 2023 - Proceedings of the 23rd International Conference on Construction Applications of Virtual Reality** Pietro Capone, Vito Getuli, Farzad Pour Rahimian, Nashwan Dawood, Alessandro Bruttini, Tommaso Sorbi, Within the overarching theme of “Managing the Digital Transformation of Construction Industry” the 23rd International Conference on Construction Applications of Virtual Reality (CONVR 2023) presented 123 high-quality contributions on the topics of: Virtual and Augmented Reality (VR/AR), Building Information Modeling (BIM), Simulation and Automation, Computer Vision, Data Science, Artificial Intelligence, Linked Data, Semantic Web, Blockchain, Digital Twins, Health & Safety and Construction site management, Green buildings, Occupant-centric design and operation, Internet of Everything. The editors trust that this publication can stimulate and inspire academics, scholars and industry experts in the field, driving innovation, growth and global collaboration among researchers and stakeholders.
