The Languages and Linguistics of South Asia Hans Henrich Hock,Elena Bashir,2016-05-24 With nearly a quarter of the world's population, members of at least five major language families plus several putative language isolates, South Asia is a fascinating arena for linguistic investigations, whether comparative-historical linguistics, studies of language contact and multilingualism, or general linguistic theory. This volume provides a state-of-the-art survey of linguistic research on the languages of South Asia, with contributions by well-known experts. Focus is both on what has been accomplished so far and on what remains unresolved or controversial and hence offers challenges for future research. In addition to covering the languages, their histories, and their genetic classification, as well as phonetics/phonology, morphology, syntax, and sociolinguistics, the volume provides special coverage of contact and convergence, indigenous South Asian grammatical traditions, applications of modern technology to South Asian languages, and South Asian writing systems. An appendix offers a classified listing of major sources and resources, both digital/online and printed.

Language Issues in Comparative Education Carol Benson,Kimmo Kosonen,2013-06-13 This volume compiles a unique yet complementary collection of chapters that take a strategic comparative perspective on education systems, regions of the world, and/or ethnolinguistic communities with a focus on non-dominant languages and cultures in education. Comparison and contrast within each article and across articles illustrates the potential for using home languages - which in many cases are in non-dominant positions relative to other languages in society - in inclusive multilingual and multicultural forms of education. The 22 authors demonstrate how bringing non-dominant languages and cultures into schooling has liberatory, transformative potential for learners from ethnolinguistic communities that have previously been excluded from access to quality basic education. The authors deal not only with educational development in specific low-income and emerging countries in Asia (Afghanistan, Bangladesh, Cambodia, the Philippines Thailand and Vietnam), Latin America (Guatemala and Mexico) and Africa (Mozambique, Senegal and Tanzania), but also with efforts to reach marginalized ethnolinguistic communities in high-income North American countries (Canada and the USA). In the introductory chapter the editors highlight common and cross-cutting themes and propose appropriate, sometimes new terminology for the discussion of

linguistic and cultural issues in education, particularly in low-income multilingual countries. Likewise, using examples from additional countries and contexts, the three final chapters address cross-cutting issues related to language and culture in educational research and development. The authors and editors of this volume share a common commitment to comparativism in their methods and analysis, and aim to contribute to more inclusive and relevant education for all. "A richly textured collection which offers a powerful vision of the possible, now and in the future." Alamin Mazrui, Rutgers State University of New Jersey, USA "This book takes the local perspective of non-dominant language communities in arguing for a multilingual habitus in educational development. Benson and Kosonen masterfully extend theories and clarify terminology that is inclusive of the non-dominant contexts described here." Ofelia García, City University of New York, USA

Empowering Students Through Multilingual and Content Discourse Finley, Stacie Lynn, Correll, Pamela, Pearman, Cathy, Huffman, Stephanie, 2023-07-25 Empowering Students Through Multilingual and Content Discourse is a peer-reviewed research book that challenges the traditional monolingual classroom approach, where the teacher's voice dominates and only the dominant culture's language is considered the path to success. The book aims to empower students by creating classroom spaces where all voices are heard, valued, and empowered. It draws on research from scholars who study discourse and offers insights into how discourse can be used to promote language and literacy development, honor all students' voices, and empower them. This book also provides guidance on culturally and linguistically sustaining discourse practices and encourages educators to incorporate students' home languages and discourse practices in classroom instruction. It challenges educators to move away from centering White English and represent language more responsibly within the classroom. This research is a valuable resource for academic scholars and a useful tool for teachers looking to cultivate student-centered classroom practices. By encouraging discourse among students, educators can create a space where human life holds meaning, and students feel empowered to act and use their voices.

Language Policy and Language Conflict in Afghanistan and Its Neighbors Harold Schiffman, 2011-12-09 The contribution of this collection of articles is to construct an updated picture of languages and language policy in and around Afghanistan, and give potential language learners a clearer picture of what kinds of resources exist, and what is still needed. The book was co-edited by Brian Spooner, Professor of Anthropology at the University of Pennsylvania.

Discovering Hidden Gems in Foreign Languages M.D. Miller, 2023-04-27 This book offers a practical approach to conducting research in foreign languages on topics with a global nexus. It introduces the problem researchers face when getting started with a research problem, such as setting up the research environment and establishing goals for the research. The researcher then needs to prepare and to conduct foreign-language research by generating key terms and searching the right places where the information they seek is most likely to be stored. Using the appropriate advanced search operators, the researcher narrows down the search results to the desired sources, thereby eliminating the irrelevant sources.

Specialized knowledge of country-specific domains advances the specificity and relevance of the researcher's efforts. The methods and tools demonstrated in this book are applicable to a variety of academic and practical fields. A doctor may ask "what are other experts in my field saying about ABC disease?" A sommelier may ask "where else in the world are XYZ grape varieties grown?" A businessman may ask "who are my global competitors in my market?" A doctoral student may ask "have any other students at universities abroad ever written a dissertation about my topic, too?" With the tools and techniques demonstrated in this book, all of these questions are answerable. This book concludes with chapters on translation and citation methods, and includes three case studies that demonstrate the practical use of the methods discussed above. This book targets academic researchers as well as students and faculty. This book will also be a good fit as an assigned reading for a college course on thesis/dissertation research.

Awareness Matters Claudia Finkbeiner, Agneta Svalberg, 2016-01-22 This collection argues that being aware of and reflecting on language form and language use is a powerful tool, not only in language learning, but also in wider society. It adopts an interdisciplinary stance: one chapter argues the need for Language Awareness in business contexts, while another examines the role of critical cultural awareness and Language Awareness in education as 'bildung'. Others report on research studies in language classrooms and in teacher education. Language Awareness is interrogated from a range of perspectives such as peer interaction, teaching young learners, learner strategies and strategies for writing, online reading, and oral fluency training. The scope is global, including contributions from Canada, Germany, Iran, Japan, Spain, and the UK, and covers bilingual as well as multilingual contexts. The book will be of interest to language teachers, language teacher educators, other language professionals, and generally to the language aware. This book was originally published as a special issue of Language Awareness.

Global Perspectives on Language Education Policies JoAnn (Jodi) Crandall, Kathleen M. Bailey, 2018-02-01 Presenting research on language policy and planning, with a special focus on educational contexts in which English plays a role, this book brings readers up-to-date on the latest developments in research, theory, and practice in a rapidly changing field. Language in Multicultural Education Farideh Salili,Rumjahn Hoosain,2005-03-01 Many books on multicultural education focus on a country and provide indepth discussion of issues pertinent to that country at the time. Alternately, understanding of multicultural education is sought through comparison between a society of special interest and a reference society, often the United States. An interesting recent example is Constructing Multicultural Education in a Diverse Society by Ilghiz Sinagatullin (2003), drawing on the author's knowledge of Russia and more particularly the Republic of Bashkortostan, itself an ethnically and culturally diverse part of Russia. The approach taken in this volume is to focus on an aspect of diversity, and look at its ramifications across the world. This provides an understanding of the nature of multicultural education itself, as well as insights into local issues through the experience of other places.
