The Syriac Language of the Peshitta and Old Syriac Versions of Matthew Jan Joosten, 2017-07-03 The aim of the present work is to make a contribution to the understanding of the inner workings of the Syriac language through a study of one important corpus written in that language. The book contains four chapters on aspects of Syriac syntax. In addition, a chapter on inner-Syriac developments — traceable owing to the fact that the Gospel of Matthew was translated several times and at different dates — and a chapter on the process of translation from Greek into Syriac are included as well. The analysis of the language of the Syriac versions of Matthew facilitates the use of these versions in textual criticism of the New Testament. Moreover, close study of these texts allows some light to be shed on the history of the text of the Gospel.

Praxiology and the Reasons for Action Piotr Makowski, 2017-07-05 This volume explores two traditions in practical philosophy: action theory, which concerns the nature of motivation for human action, and praxiology, the study of human action. By bringing different perspectives together, the volume strives to contribute to the international debate on theories of reasons for action as a philosophy of action. The volume consists of three main parts. The first part, *Reasons for Action*, bridges the gap between reasons for action theories and praxiology. The second part of the volume, titled *Theories of Action*, explores philosophical approaches to action. Finally, in the third part, *Applications*, the contributors show several ways of applying praxiological ways of thinking and acting to the problems of reflection assessment, solving action incompleteness, and knowledge management. The ultimate goal of this volume is to broaden the scientific view of action: to establish a perspective on action that is permeated by moral theories on the one hand, and accounts focused on efficiency and economy of action on the other hand. This work is the newest volume in Transaction's Praxiology series.

The International Criminal Court in an Effective Global Justice System Linda E. Carter, Mark S. Ellis, Charles Chernor Jalloh, 2016-11-25 International tribunals need to interface effectively with national jurisdictions, which includes coordination with domestic judicial prosecutions as well as an appreciation for other non-judicial types of transitional justice. In this book, the authors analyze the earlier international tribunals established since the 1990s and the parallel national proceedings for each. In examining the ways in which the ICC can best coordinate with national processes this book considers the ICC's present interactions with national jurisdictions and the statutory framework of the Rome Statute for interface with national jurisdictions.

The Environment-Conflict Nexus in International Law Eliana Cusato,2021-09-16 Unpacks key assumptions about the 'environment', its relationship with violent conflict, and the justification for its protection underlying international law.

Quality Control in Preliminary Examination Morten Bergsmo,Carsten Stahn,2018-09-06

The Ecology of War and Peace Eliana Cusato,2021-09-16 The connection between ecology and conflict has been the object of extensive study by political scientists and economists. From the contribution of natural resource 'scarcity' to violent unrest and armed conflict; to resource 'abundance' as an incentive for initiating and prolonging armed struggles; to dysfunctional resource management and environmental degradation as obstacles to peacebuilding, this literature has exerted a huge influence upon academic discussions and policy developments. While international law is often invoked as the solution to the socio-environmental challenges faced by conflict-affected countries, its relationship with the ecology of war and peace remains undertheorised. Drawing upon environmental justice perspectives and other theoretical traditions, the book unpacks and problematizes some of the assumptions that underlie the legal field. Through an analysis of the practice of international courts, the UN Security Council, and Truth Commissions, it shows how international law silences and even normalizes forms of structural and slow environmental violence.

The Independence of the Prosecutor Laszlo Sarkany,2024-11-15 The establishment of the International Criminal Court was a singular, even revolutionary, achievement. Uniquely within the realm of international criminal justice, the ICC Prosecutor can initiate investigations independently of any state's wishes. Why would sovereign states agree to such sweeping powers? The Independence of the Prosecutor draws on interviews with key participants to answer that question. Case studies of Canada and the United Kingdom, which supported prosecutorial independence, and the United States and Japan, which opposed it, demonstrate that state positions depended on the values and principles of those who wielded the

most power in national capitals at the time. Appendices provide a record of the arguments made by state delegations in the negotiations that produced the institutional design of the Court. This astute investigation demonstrates that now, over twenty years after its establishment, the ICC's innovative arrangement of having an independent prosecutor continues to move law and international criminal jurisprudence forward and directly combats impunity for mass atrocities.

One God, One Lord Larry W. Hurtado,2015-11-19 Larry Hurtado's *One God, One Lord* has been described as 'one of the most important and provocative Christologies of all time' (Alan F. Segal). The book has taken its place among works on Jesus as one consistently cited, consistently read, and consistently examined in scholarly discourse. Hurtado examines the early cultic devotion to Jesus through a range of Jewish sources. Hurtado outlines an early 'high' Christological theology, showing how the Christ of faith emerges from monotheistic Judaism. The book has already found a home on the shelves of many in its two previous editions. In this new Cornerstones edition Hurtado provides a substantial epilogue of some twenty-thousand words, which brings this ground-breaking work to the fore once more, in a format accessible to scholars and students alike.

Prosecutorial Discretion in the International Criminal Court Farid Mohammed Rashid,2021-12-15 This book provides the first scholarly investigation of prosecutorial discretion in the International Criminal Court (ICC) from an interdisciplinary perspective. This work analyses the discretionary power of the ICC prosecutor and its scope. It explains that there is a tendency to overlook the necessity of distinguishing between the various usages of discretion when exercised as a power authorised by the law and effect when applying indeterminate legal thresholds. The author argues that the latter indeterminacy may give decision makers an unwarranted opportunity to exercise a wide range of discretion, where extra-legal factors may be considered. In comparison, prosecutorial discretion allows decision makers to consider extra-legal considerations. This book also discusses the relevance of political considerations within the decision-making process in the context of the exercise of prosecutorial discretion. It suggests that there need not be a conflict between the broad sense of justice as outlined in the Statute and political factors in giving effect to decisions. This book will be of interest to students of international law, global governance and international relations.
