Running with the Kenyans Adharanand Finn,2012-04-03 Sunday Times Sports Book of the Year Shortlisted for the William Hill Sports Book of the Year Award Winner - Best New Writer at the British Sports Book Awards After years of watching Kenyan athletes win the world's biggest races, from the Olympics to big city marathons, Runner's World contributor Adharanand Finn set out to discover just what it was that made them so fast - and to see if he could keep up. Packing up his family (and his running shoes), he moved from Devon to the small town of Iten, in Kenya, home to hundreds of the country's best athletes. Once there he laced up his shoes and ventured out onto the dirt tracks, running side by side with Olympic champions, young hopefuls and barefoot schoolchildren. He ate their food, slept in their training camps, interviewed their coaches, and his children went to their schools. And at the end of it all, there was his dream, to join the best of the Kenyan athletes in his first marathon, an epic race through lion country across the Kenyan plains.

Eat and Run Scott Jurek,Steve Friedman,2013-01-01 An inspirational memoir by Scott Jurek, one of the finest ultrarunners in the world.

The Non-Runner's Marathon Trainer David A. Whitsett,Forrest A. Dolgener,Tanjala Jo Kole,1998-02-01 Athlete. Runner. Marathoner. Are these words you wouldn't exactly use to describe yourself? Do you consider yourself too old or too out of shape to run a marathon? But somewhere deep inside have you always admired the people who could reach down and come up with the mental and physical strength to complete such a daunting and rewarding accomplishment? It doesn't have to be somebody else crossing the finish line. You can be a marathoner. The Non-Runner's Marathon Trainer is based on the

highly successful marathon class offered by the University of Northern Iowa, which was featured in a Runner's World article titled Marathoning 101. The class has been offered five times over 10 years, and all but one student finished the marathon. That is approximately 200 students -- all first time marathoners and many with absolutely no running background. This book follows the same 16-week, four-day-a-week workout plan. What makes the success rate of this program so much higher than any other? The special emphasis on the psychological aspects of endurance activities. You don't have to love to run -- you don't even have to like it -- but you have to realize that you are capable of more than you have ever thought possible. One participant in the program explained it like this: I'm doing this for me -- not for others or the time clock. I just feel better when I run, plus it helps me to cope with things in general. The skills we've learned in this class don't apply just to marathoning -- they apply to life! Just like you never know what the next step in a marathon will bring, so too, you never know what will happen next in life. But if you don't keep going, you're never going to find out. By staying relaxed, centered, and positive you handle just about anything that comes your way. This is marathon running for real people, people with jobs and families and obligations outside of running. The Non-Runner's Marathon Trainer has proven successful for men and women of all ages. Now let it work for you.

Born to Run Christopher McDougall, 2010-12-09 A New York Times bestseller 'A sensation ... a rollicking tale well told' - The Times At the heart of *Born to Run* lies a mysterious tribe of Mexican Indians, the Tarahumara, who live quietly in canyons and are reputed to be the best distance runners in the world; in 1993, one of them, aged 57, came first in a prestigious 100-mile race wearing a toga and sandals. A small group of the world's top ultra-runners (and the awe-inspiring author) make the treacherous journey into the canyons to try to learn the tribe's secrets and then take them on over a course 50 miles long. With incredible energy and smart observation, McDougall tells this story while asking what the secrets are to being an incredible runner. Travelling to labs at Harvard, Nike, and elsewhere, he comes across an incredible cast of characters, including the woman who recently broke the world record for 100 miles and for her encore ran a 2:50 marathon in a bikini, pausing to down a beer at the 20 mile mark.

80/20 Triathlon Matt Fitzgerald, David Warden, 2018-09-18 A breakthrough program for triathletes -- beginner, intermediate, and advanced -- showing how to balance training intensity to maximize performance -- from a fitness expert and elite coach. Cutting-edge research has proven that triathletes and other endurance athletes experience their greatest performance when they do 80 percent of their training at low intensity and the remaining 20 percent at moderate to high intensity. But the vast majority of recreational triathletes are caught in the so-called moderate-intensity rut, spending almost half of their time training too hard--harder than the pros. Training harder isn't smarter; it actually results in low-grade chronic fatigue that prevents recreational athletes from getting the best results. In *80/20 Triathlon*, Matt Fitzgerald and David Warden lay out the real-world and scientific evidence, offering concrete tips and strategies, along with complete

training plans for every distance--Sprint, Olympic, Half-Ironman, and Ironman--to help athletes implement the 80/20 rule of intensity balance. Benefits include reduced fatigue and injury risk, improved fitness, increased motivation, and better race results.

Blind Sunflowers Alberto Mendez,2008-07-09 A captain in Franco's army renounces winning the war - on the very day of the victory; a young poet flees with his pregnant girlfriend and is forced to grow up quickly, only to die within a few months; a prisoner in Polier's jail refuses to live a lie so that his executioner can be held accountable; and, a lustful deacon hides his desires behind the apostolic fascism that clamours for the purifying blood of the defeated. Four subtly connected tales, narrated in the same spirit but with the individual styles of the different voices; these are stories from silent times, when people feared that others might discover what they knew. The line between the victorious and the defeated is blurred - whatever one's affiliation, nobody survives unscathed.
