**Martin W. Bauer, Massimiano Bucchi**

Florence of Arabia Christopher Buckley, 2007-12-18 The bestselling author who made mincemeat of political correctness in *Thank You for Smoking*, conspiracy theories in *Little Green Men*, and Presidential indiscretions *No Way to Treat a First Lady* now takes on the hottest topic in the entire world—Arab-American relations—in a blistering comic novel sure to offend the few it doesn't delight. Appalled by the punishment of her rebellious friend Nazrah, youngest and most petulant wife of Prince Bawad of Wasabia, Florence Farfarletti decides to draw a line in the sand. As Deputy to the deputy assistant secretary for Near East Affairs, Florence invents a far-reaching, wide-ranging plan for female emancipation in that part of the world. The U.S. government, of course, tells her to forget it. Publicly, that is. Privately, she's enlisted in a top-secret mission to impose equal rights for the sexes on the small emirate of Matar (pronounced "Mutter"), the "Switzerland of the Persian Gulf." Her crack team: a CIA killer, a snappy PR man, and a brilliant but frustrated gay bureaucrat. Her weapon: TV shows. The lineup on TV Matar includes *A Thousand and One Mornings*, a daytime talk show that features self-defense tips to be used against boyfriends during Ramadan; an addictive soap opera featuring strangely familiar members of the Matar royal family; and a sitcom about an inept but ruthless squad of religious police, pitched as "Friends from Hell." The result: the first deadly car bombs in the country since 1936, a fatwa against the station's entire staff, a struggle for control of the kingdom, and, of course, interference from the French. And that's only the beginning. A merciless dismantling of both American ineptitude and Arabic intolerance, *Florence of Arabia* is Christopher Buckley's funniest and most serious novel yet, a biting satire of how U.S. good intentions can cause the Shiite to hit the fan.

**History of Concepts** Iain Hampsher-Monk, Karin Tilmans, Frank van Vree, 1998 Hoewel enorm invloedrijk in Duitstalig Europa, heeft de conceptuele geschiedschrijving (Begriffsgeschichte) tot nu toe weinig aandacht in het Engels gekregen. Dit genre van intellectuele geschiedschrijving verschilt van zowel de Franse geschiedschrijving van mentalités als de Engelstalige geschiedschrijving van verhandelingen door het concept. Aan de hand van praktische voorbeelden in de geschiedschrijving wordt deze vorm toegelicht door Bram Kempers, Eddy de Jongh en Rolf Reichardt.

**Training Guide for Islamic Workers** Hisham Altalib, 2001-01-01 Now more than ever before, Muslim young men and women need to improve not only their personal skills but also their group performance. This Guide presents easy-to-follow instructions which can be used by those who desire to acquire these skills. This Guide focuses on the training needs of

Muslim young men and women by providing the experience acquired by Muslim leaders over the last several decades. Thus, the new generation of leaders will be able to start from where their leaders left off, rather than having to duplicate their predecessors' successes and/or failures. Using a simple Do's and Don't's format, this Guide enables the user to optimize his/her understanding of the art and science of da'wah and how it can be applied in today's world. Like genius, leadership entails harder work for the one who was born without this skill. It is to such people that this Guide is addressed. We are confident that, with the help of Allah, the user will be able to make a quantum leap forward in the areas of growth and improvement through the proper use of the methods outlined in this Guide. Over time, there will be noticeable improvements in the areas of concepts, management, administration, and communication as well as the skills needed for conducting camps, conferences, and meetings. This Guide is supplemented by suggested workbooks which will lead to an even deeper understanding of the skills needed for successful leaders.

Handbook of the History of Economic Thought Jürgen Backhaus, 2011-11-12 This reader in the history of economic thought challenges the assumption that today's prevailing economic theories are always the most appropriate ones. As Leland Yeager has pointed out, unlike the scientists of the natural sciences, economists provide their ideas largely to politicians and political appointees who have rather different incentives that might prevent them from choosing the best economic theory. In this book, the life and work of each of the founders of economics is examined by the best available expert on that founding figure. These contributors present rather novel and certainly not mainstream interpretations of the founders of modern economics. The primary theme concerns the development of economic thought as this emerged in the various continental traditions including the Islamic tradition. These continental traditions differed substantially, both substantively and methodologically, from the Anglo-Saxon orientation that has been dominant in the last century for example in the study of public finance or the very construct of the state itself. This book maps the various channels of continental economics, particularly from the late-18th through the early-20th centuries, explaining and demonstrating the underlying unity amid the surface diversity. In particular, the book emphasizes the writings of John Stuart Mill, his predecessor David Ricardo and his follower Jeremy Bentham; the theory of Marginalism by von Thünen, Cournot, and Gossen; the legacy of Karl Marx; the innovations in developmental economics by Friedrich List; the economic and monetary contributions and "struggle of escape" by John Maynard Keynes; the formidable theory in public finance and economics by Joseph Schumpeter; a reinterpretation of Alfred Marshall; Léon Walras, Heinrich von Stackelberg, Knut Wicksell, Werner Sombart, and Friedrich August von Hayek are each dealt with in their own right.

*Putting Systems and Complexity Sciences Into Practice* Joachim P. Sturmberg, 2018-04-10 This idea-packed resource takes systems and complexity sciences out of blue-sky territory and into the concrete world of contemporary healthcare practice. Beginning with a new reframing of health and illness, its chapters redesign traditional disease-centered models of

care into modern, health-centered—and patient-centered—health service systems. The approaches shown here combine innovation and common sense to recognize and attend to patients' needs across areas including health education and training, information accessibility, health service organization and delivery, and disease in individual context. The variety of solutions applied to this wide spectrum of issues shows the suitability of systems, complexity, and adaptive thinking to the ongoing objectives of making health services more responsive, effective, and equitable. Highlights of the coverage: Healthy smoker: an oxymoron? Maybe, but it is more complicated than that Transforming monitoring and improving care with variability-derived clinical decision support Linking Gulf War illness to genome instability, somatic evolution, and complex adaptive systems Complexity of knowledge in primary care: understanding the discipline's requisite knowledge: a bibliometric study New ways of knowing and researching: integrating complexity into a translational health sciences program Understanding the emergency department ecosystem using agent-based modelling Putting Systems and Complexity Sciences into Practice is an inspiring idea book that will interest health policymakers, health financiers, organizational leaders, healthcare administrators, clinicians, researchers, students, and interested lay readers.

*Future Human Evolution* John Glad, 2006 Evolutionary selection has been radically relaxed in the human species as a result of the development of civilization, science in general, and medicine in particular. While these advances have hugely benefited current populations, they have to a significant degree released the species from the biological process which created it and maintains its viability. Formerly, natural selection took place largely as a result of differential mortality, but now that most people survive well beyond their child bearing years, selection is determined largely by differential fertility. Aside from genetic illnesses, this new selection is also characterized by a negative correlation between fertility and intelligence the core of eugenic concern for over a century. Eugenics views itself as the fourth leg of the chair of civilization, the other three being a) a thrifty expenditure of natural resources, b) mitigation of environmental pollution, and c) maintenance of a human population not exceeding the planet's carrying capacity. Eugenics, which can be thought of as human ecology, is thus part and parcel of the environmental movement. Humanity is defined, not as the totality of the currently living population, but as the number of people who will potentially ever live. This is a book about the struggle for human rights and parental responsibility.

*Film Criticism in the Digital Age* Mattias Frey, Cecilia Sayad, 2015-04-20 Over the past decade, as digital media has expanded and print outlets have declined, pundits have bemoaned a "crisis of criticism" and mourned the "death of the critic." Now that well-paying jobs in film criticism have largely evaporated, while blogs, message boards, and social media have given new meaning to the saying that "everyone's a critic," urgent questions have emerged about the status and purpose of film criticism in the twenty-first century. In *Film Criticism in the Digital Age*, ten scholars from across the globe come together to consider whether we are witnessing the extinction of serious film criticism or seeing the start of its rebirth

in a new form. Drawing from a wide variety of case studies and methodological perspectives, the book's contributors find many signs of the film critic's declining clout, but they also locate surprising examples of how critics—whether moonlighting bloggers or salaried writers—have been able to intervene in current popular discourse about arts and culture. In addition to collecting a plethora of scholarly perspectives, *Film Criticism in the Digital Age* includes statements from key bloggers and print critics, like Armond White and Nick James. Neither an uncritical celebration of digital culture nor a jeremiad against it, this anthology offers a comprehensive look at the challenges and possibilities that the Internet brings to the evaluation, promotion, and explanation of artistic works.

**Social Semantics** Harry Halpin, 2012-08-01 *Social Semantics: The Search for Meaning on the Web* provides a unique introduction to identity and reference theories of the World Wide Web, through the academic lens of philosophy of language and data-driven statistical models. The Semantic Web is a natural evolution of the Web, and this book covers the URL-based Web architecture and Semantic Web in detail. It has a robust empirical side which has an impact on industry. *Social Semantics: The Search for Meaning on the Web* discusses how the largest problem facing the Semantic Web is the problem of identity and reference, and how these are the results of a larger general theory of meaning. This book hypothesizes that statistical semantics can solve these problems, illustrated by case studies ranging from a pioneering study of tagging systems to using the Semantic Web to boost the results of commercial search engines. *Social Semantics: The Search for Meaning on the Web* targets practitioners working in the related fields of the semantic web, search engines, information retrieval, philosophers of language and more. Advanced-level students and researchers focusing on computer science will also find this book valuable as a secondary text or reference book.

**Jewish Eugenics** John Glad, 2011 *Eugenics (human ecology)* has always understood itself to be part of the struggle for human rights-- those of future generations. John Glad lays out the eugenic thrust of traditional Jewish culture and shows how Zionism itself was conceived as a grand eugenic plan. --From publisher's description.

*Bull's Balls* Ralf König, 2000 *Bull's Balls* tells the story of two lovers, Conrad and Paul who after ten years together are beginning to feel the test of time. Throw into the mix Conrad's young piano student and a well-endowed construction worker for Paul, and you end up with scenes that you won't know whether to laugh or cry.--From back cover.

*Journalism, Science and Society* Martin W. Bauer, Massimiano Bucchi, 2008-07-25 Analyzing the role of journalists in science communication, this book presents a perspective on how this is going to evolve in the twenty-first century. The book takes three distinct perspectives on this interesting subject. Firstly, science journalists reflect on their 'operating rules' (science news values and news making routines). Secondly, a brief history of science journalism puts things into context, characterising the changing output of science writing in newspapers over time. Finally, the book invites several international journalists or communication scholars to comment on these observations thereby opening the global perspective. This unique

project will interest a range of readers including science communication students, media studies scholars, professionals working in science communication and journalists.

**Identity and Control** Harrison C. White, 2012-11-21 In this completely revised edition of one of the foundational texts of network sociology, Harrison White refines and enlarges his groundbreaking theory of how social structure and culture emerge from the chaos and uncertainty of social life. Incorporating new contributions from a group of young sociologists and many fascinating and novel case studies, *Identity and Control* is the only major book of social theory that links social structure with the lived experience of individuals, providing a rich perspective on the kinds of social formations that develop in the process. Going beyond traditional sociological dichotomies such as agency/structure, individual/society, or micro/macro, *Identity and Control* presents a toolbox of concepts that will be useful to a wide range of social scientists, as well as those working in public policy, management, or associational life and, beyond, to any reader who is interested in understanding the dynamics of social life.

*The Malleus Maleficarum and the Construction of Witchcraft* Hans Peter Broedel, 2003 What was witchcraft? Were witches real? How should witches be identified? How should they be judged? Towards the end of the middle ages these were new questions, without answers hallowed by time and authority. Between 1430 and 1500, a number of learned witch-theorists attempted to provide the answers, and of these perhaps the most famous are the Dominican inquisitors Heinrich Institoris and Jacob Sprenger, the authors of the *Malleus Maleficarum*, *The Hammer of Witches*. This, the first book-length study of the *Malleus* in English, provides students and scholars with an introduction to this text and to the conceptual world of its authors. Ultimately, this book argues that although the *Malleus* was a highly idiosyncratic text, with a view of witches very different from that of competing authors, its arguments were powerfully compelling and so remained influential long after alternatives were forgotten.

**Frontier Skirmishes** Russell West-Pavlov, Jennifer Wawrzinek, 2010 The frontier has been the central metaphorical figure governing discursive configurations in the last two decades in Australia. The cultural landscape since the Australian High Court's 'Mabo' decision of 1992 has been increasingly openly defined as a site of animosity and hostility. Frontiers, both real and imagined, past and present, continue to haunt the cultural landscape of Australia. This volume explores a range of paraliterary and literary discussion of recent years which can be interpreted as displacements into the cultural realm of erstwhile frontier conflicts along the borders of white colonial settlement. The collection gathers together a distinguished group of scholars and writers from Australia, Europe and Asia to investigate the dual manifestations of frontiers - both genuinely historiographical and more broadly metaphorical - in the cultural debates taking place in the Australian public sphere from the early 1990s onwards. Long since terminated as real armed conflicts, these past skirmishes none the less continue to resonate in the consciousness of white Australia, leaving their mark upon literary texts, films, artworks, and

public discourse.--Back cover.

***Mina Stone: Cooking for Artists*** Mina Stone,2015-03-23 Chef Mina Stone has been cooking delicious lunches at Urs Fischer's Brooklyn-based art studio for the past five years and producing private gallery dinners in the New York art world since 2006. *Cooking for Artists* presents more than 70 of Stone's family-style recipes inspired by her Greek heritage and her love of simple, fresh, seasonal food. The book is designed by Fischer and includes drawings by Hope Atherton, Darren Bader, Matthew Barney, Alex Eagleton, Urs Fischer, Cassandra MacLeod, Elizabeth Peyton, Rob Pruitt, Peter Regli, Josh Smith, Spencer Sweeney and Philippos Theodorides--all members of the community of artists that delights in Stone's cooking.

***In Defence of Country*** Noah Riseman,2016-01-19 Aboriginal and Torres Strait Islander people have been protecting country since time immemorial. One way they have continued these traditions in recent times is through service in the Australian military, both overseas and within Australia. *In Defence of Country* presents a selection of life stories of Aboriginal and Torres Strait Islander ex-servicemen and women who served in the Australian Army, Navy and Air Force after World War Two. In their own words, participants discuss a range of issues including why they joined up; racial discrimination; the Stolen Generations; leadership; discipline; family; war and peace; education and skills development; community advocacy; and their hopes for the future of Indigenous Australia. Individually and collectively, the life stories in this book highlight the many contributions that Aboriginal and Torres Strait Islander servicemen and women have made, and continue to make, in defence of country.

***Living with a Dead Language*** Ann Patty,2016-06-14 “A delightful mix of grammar and growth, words and wonder.” - The Washington Post An entertaining exploration of the richness and relevance of the Latin language and literature, and an inspiring account of finding renewed purpose through learning something new and challenging After thirty-five years as a book editor in New York City, Ann Patty stopped working and moved to the country. Bored, aimless, and lost in the woods, she hoped to challenge her restless, word-loving brain by beginning a serious study of Latin at local colleges. As she begins to make sense of Latin grammar and syntax, her studies open unexpected windows into her own life. The louche poetry of Catullus calls up her early days in 1970s New York, Lucretius elucidates her intractable drivenness and her attraction to Buddhism, while Ovid’s verse conjures a delightful dimension to the flora and fauna that surround her. Women in Roman history, and an ancient tomb inscription give her new understanding and empathy for her tragic, long deceased mother. Finally, Virgil reconciles her to her new life—no longer an urban exile, but a rustic scholar, writer and teacher. Along the way, she meets an impassioned cast of characters: professors, students and classicists outside of academia who keep Latin very much alive. Written with humor, heart, and an infectious enthusiasm for words, Patty’s book is an object lesson in how learning and literature can transform the past and lead to an unexpected future.

***Essentials of Pentecostal Theology*** Tony Richie,2020-01-20 Only a few decades past, academia tended to scoff at the

very idea of serious Pentecostal theology. Today profound and variegated theological implications of this dynamic movement are the object of exploration and development across the entire spectrum of the Christian theological corpus. Arguably, an acute need has arisen for identification and evaluation of the Pentecostal movement's original and ongoing theological essentials. What is Pentecostal theology really all about anyway? This volume realizes that Pentecostal theology is at its heart a working theology undergirding and energizing believers' worship of God in prayer and praise, in holy living, and in witness to a personal experience of the risen Lord and Savior manifested in the continuing power of the Holy Spirit. Authentic implementation, if not explicit articulation, of fervent Pentecostal theology often occurs in the vitality of local churches, house fellowships, and various mission settings in America and around the world. Birthed in the fires of revival movements, essential Pentecostalism, including Pentecostal theology, continues to burn brightest wherever it is fueled most directly.
