Smart People Should Build Things Andrew Yang,2014-02-04 Andrew Yang, the founder of Venture for America, offers a unique solution to our country's economic and social problems—our smart people should be building things. Smart People Should Build Things offers a stark picture of the current culture and a revolutionary model that will redirect a generation of ambitious young people to the critical job of innovating and building new businesses. As the Founder and CEO of Venture for America, Andrew Yang places top college graduates in start-ups for two years in emerging U.S. cities to generate job growth and train the next generation of entrepreneurs. He knows firsthand how our current view of education is broken. Many college graduates aspire to finance, consulting, law school, grad school, or medical school out of a vague desire for additional status and progress rather than from a genuine passion or fit. In Smart People Should Build Things, this self-described “recovering lawyer” and entrepreneur weaves together a compelling narrative of success stories (including his own), offering observations about the flow of talent in the United States and explanations of why current trends are leading to economic distress and cultural decline. He also presents recommendations for both policy makers and job seekers to make entrepreneurship more realistic and achievable.

Finding Parker Scott Hildreth,2014-10-14 We have all heard it before. From a mother, father, friend or maybe a complete stranger. If it sounds too good to be true, it probably is. But what if it wasn't? Parker Bale finds himself in this exact predicament. A gentlemen with a very unique past, Parker completed college and is on the hunt for a job. Almost immediately he is offered the career of a lifetime. His new assignment? Find a woman to love. His boss? Kenton Ward - a self-made millionaire with a strange desire to witness a love he never had an opportunity to experience. One small catch...Parker must sign a contract with Kenton, binding him to conditions of the search for a woman. Eagerly, he signs the document without reading the legal language. Victoria Fisker doesn't trust people, has no faith in the male species and lives a quiet life keeping to herself and caring for her narcotic addicted mother. Can they look beyond their sordid pasts? Can Parker fall in love under the scrutiny of an employment contract? Can Victoria learn to trust? The love depicted in Finding Parker is not simply read, it is experienced. After reading this novel, you will without a doubt view love differently...and question the life you have been living. I wanted to resist, allowing the night to go on forever. As we walked along the beach, I pressed my feet into the sand firmly, leaving an impression deep enough to last a lifetime. And I did not look back...

The Light in the Heart Roy T Bennett,2020-02-02 It's important that what thoughts you are feeding into your mind because your thoughts create your belief and experiences. You have positive thoughts and you have negative ones too. Nurture your mind with positive thoughts: kindness, empathy, compassion, peace, love, joy, humility, generosity, etc. The more you feed your mind with positive thoughts, the more you can attract great things into your life.

Tuesdays with Morrie Mitch Albom,2007-06-29 #1 NEW YORK TIMES BESTSELLER • A special 25th anniversary edition of the beloved book that has changed millions of lives with the story of an unforgettable friendship, the timeless wisdom of older generations, and healing lessons on loss and grief—featuring a new afterword by the author “A wonderful book, a story of the heart told by a writer with soul.”—Los Angeles Times “The most important thing in life is to learn how to give out love, and to let it come in.” Maybe it was a grandparent, or a teacher, or a colleague. Someone older, patient and wise, who understood you when you were young and searching, helped you see the world as a more profound place, gave you sound advice to help you make your way through it. For Mitch Albom, that person was his college professor Morrie Schwartz. Maybe, like Mitch, you lost track of this mentor as you made your way, and the insights faded, and the world seemed colder. Wouldn't you like to see that person again, ask the bigger questions that still haunt you, receive wisdom for your busy life today the way you once did when you were younger? Mitch Albom had that second chance. He rediscovered Morrie in the last months of the older man's life. Knowing he was dying, Morrie visited with Mitch in his study every Tuesday, just as they used to back in college. Their rekindled relationship turned into one final “class”: lessons in how to live. “The truth is, Mitch,” he said, “once you learn how to die, you learn how to live.” *Tuesdays with Morrie* is a magical chronicle of their time together, through which Mitch shares Morrie's lasting gift with the world.

I wrote it as an entertainment for New York tri-state area line cooks and restaurant lifers, basically; I had no expectation that it would move as far west as Philadelphia. Anthony Bourdain An employer of mine back in the '80s was kind enough to take me on after a rough patch, and it made a big difference in my life that I knew I was the sort of person who showed up on time. It's a basic tell of character. Anthony Bourdain Anyone who doesn't have a great time in San Francisco is pretty much dead to me. Anthony Bourdain Anyone who's a chef, who loves food, ultimately knows that all that matters is: 'Is it good? Does it give pleasure?' R Data Analysis without Programming David W. Gerbing,2013-12-13 This book prepares readers to analyze data and interpret statistical results using R more quickly than other texts. R is a challenging program to learn because code must be created to get started. To alleviate that challenge, Professor Gerbing developed lessR. LessR extensions remove the need to program. By introducing R through less R, readers learn how to organize data for analysis, read the data into R, and produce output without performing numerous functions and programming exercises first. With lessR, readers can select the necessary procedure and change the relevant variables without programming. The text reviews basic statistical procedures with the lessR enhancements added to the standard R environment. Through the use of lessR, R becomes immediately accessible to the novice user and easier to use for the experienced user. Highlights of the book include: Quick Starts that introduce readers to the concepts and commands reviewed in the chapters. Margin notes that highlight,define,illustrate,and cross-reference the key concepts.When readers encounter a term previously discussed, the margin notes identify the page number to the initial introduction. Scenarios that highlight the use of a specific analysis followed by the corresponding R/lessR input and an interpretation of the resulting output. Numerous examples of output from psychology, business, education, and other social sciences, that demonstrate how to interpret results. Two data sets provided on the website and analyzed multiple times in the book, provide continuity throughout. End of chapter worked problems help readers test their understanding of the concepts. A website at www.lessRstats.com that features the lessR program, the book's data sets referenced in standard text and SPSS formats so readers can practice using R/lessR by working through the text examples and worked problems, PDF slides for each chapter, solutions to the book's worked problems, links to R/lessR videos to help readers better understand the program, and more. An ideal supplement for graduate or advanced undergraduate courses in statistics, research methods, or any course in which R is used, taught in departments of psychology, business, education, and other social and health sciences, this book is also appreciated by researchers interested in using R for their data analysis. Prerequisites include basic statistical knowledge. Knowledge of R is not assumed.

[A Ransom in Vain?](#) D. I. Sidebottom,2024-04-08 Are you surprised at the number of preachers and teachers of God's Word who apparently find it so easy to manipulate the Word just a bit in order to teach their belief instead of the Word of God? This study seeks to demonstrate this tendency via the study of two passages of Scripture: 1 Timothy 2:1-7 and Galatians 2:21. Reading the Word of God presents us with what seems to be just the opposite of what some Bible teachers are teaching.

For whom did Jesus Christ give himself as a ransom? A second question could be, what would make the death of Christ in vain? The Word of God does give answers to these two questions. Consider this statement: The effectiveness of Christ's work as mediator and ransom payer is never dependent upon the response of any human to that work. Does that sound accurate and biblical? So, listen to the preacher and then test the teaching with the Word of God. Reject the non-biblical teaching and stand upon the statements of the Scriptures. Go ahead! Accept the challenge! What does the Word say?

Dare to Lead Brené Brown, 2018-10-11 In her #1 NYT bestsellers, Brené Brown taught us what it means to dare greatly, rise strong and brave the wilderness. Now, based on new research conducted with leaders, change makers and culture shifters, she's showing us how to put those ideas into practice so we can step up and lead. Leadership is not about titles, status and power over people. Leaders are people who hold themselves accountable for recognising the potential in people and ideas, and developing that potential. This is a book for everyone who is ready to choose courage over comfort, make a difference and lead. When we dare to lead, we don't pretend to have the right answers; we stay curious and ask the right questions. We don't see power as finite and hoard it; we know that power becomes infinite when we share it and work to align authority and accountability. We don't avoid difficult conversations and situations; we lean into the vulnerability that's necessary to do good work. But daring leadership in a culture that's defined by scarcity, fear and uncertainty requires building courage skills, which are uniquely human. The irony is that we're choosing not to invest in developing the hearts and minds of leaders at the same time we're scrambling to figure out what we have to offer that machines can't do better and faster. What can we do better? Empathy, connection and courage to start. Brené Brown spent the past two decades researching the emotions that give meaning to our lives. Over the past seven years, she found that leaders in organisations ranging from small entrepreneurial start-ups and family-owned businesses to non-profits, civic organisations and Fortune 50 companies, are asking the same questions: How do you cultivate braver, more daring leaders? And, how do you embed the value of courage in your culture? *Dare to Lead* answers these questions and gives us actionable strategies and real examples from her new research-based, courage-building programme. Brené writes, 'One of the most important findings of my career is that courage can be taught, developed and measured. Courage is a collection of four skill sets supported by twenty-eight behaviours. All it requires is a commitment to doing bold work, having tough conversations and showing up with our whole hearts. Easy? No. Choosing courage over comfort is not easy. Worth it? Always. We want to be brave with our lives and work. It's why we're here.'
