**Ships and Sea-Power before the Great Persian War** H.T. Wallinga, 2018-07-17 This book presents a new theory about the developments in shipping and naval organization that culminated in the invention - around 530 BC in the eastern Mediterranean - of the trireme, and the subsequent adoption of this first specialized warship of antiquity by all the naval powers of the time. New interpretations are proposed of Greek and Assyrian iconographic data and of hitherto ignored evidence in Herodotus and Thucydides, the non-military factors determining developments are emphasized. Thucydides' fundamental essay on the genesis of Greek sea-powers is studied in depth, the rarity of these sea-powers stressed, and the peculiar background of the naval power of Phokaia and the Samian tyrant Polykrates exposed. The problem of the trireme's place of origin, the factors determining its invention, probably in Saïte Egypt, and its immediate adoption by the Persian king Cambyses are discussed. The first naval operations of the Persians are surveyed, reasons and circumstances of the trireme's introduction into the navies of the Greek city-states analysed with special attention for Themistokles' navy bill. The book offers ancient historians and classical philologists a radically new approach to archaic maritime and naval history. It will also be useful to (nautical) archaeologists.

*Narrative Setting and Dramatic Poetry* Mary Kuntz, 1993 This examination of spatial descriptions in Greek tragedy explores how this element of the tragic text participates in the creation of dramatic meaning and traces the links to earlier narrative poetry suggested by these narrative descriptions.

Die Orationes Homeri des Leonardo Bruni Aretino Peter Thiermann, Leonardo Bruni, 1993 Presents the first complete critical edition of the 'Orationes Homeri', a translation of three speeches from Iliad 9, 222-605 by Leonardo Bruni Aretino (c. 1370-1444), with an introduction and a systematic commentary.

**Metaphysics** Theophrastus, 1993 This book offers a text and translation of Theophrastus' Metaphysics, together with a full commentary, which may be used as an introduction to the terminology of Aristotle's school. The Introduction provides an assessment of Theophrastus' contribution to Peripatetic thought on the principles of being.

Athenian Trireme vs Persian Trireme Nic Fields, 2022-07-21 A fascinating and detailed exploration of one of the most

famous warships of the Ancient world - the trireme - and its tactical employment by the opposing sides in the 5th-century BC Graeco-Persian Wars. You may be familiar with the Athenian trireme - but how much do you know about the ram-armed, triple-oared warships that it dueled against at the battles of Artemision, Salamis and the Eurymedon River? How similar or different were these warships to each other? And why did the Persians rely on Phoenician vessels to form much of their navy? Much attention has been devoted to the Greek trireme, made famous by modern reconstruction - with only passing notice given to the opposing Persian navy's vessels in illustrated treatments. Join us on the Aegean as, for the first time, we reveal a rarely attempted colour reconstruction of a trireme in Persian service. Compare the form, construction, design, manoeuvrability, and tactical deployment of the opposing triremes, aided by stunning illustrations. Man the decks of these warships with the fighting complement of Greek citizen hoplites, Scythian archers and Persian marines, and learn why the Greeks placed a bounty of 10,000 drachmae on the head of Artemisia - the Karian queen and Persian admiral, and the only woman among Xerxes' commanders.

**Xerxes' Greek Adventure** H.T. Wallinga, 2017-07-31 This volume deals with Xerxes' invasion of Greece (480 B.C.), particularly as a naval operation. It examines the traditions preserved by Aischylos, Herodotos, and others against the background of the revolutionary naval developments in the period preceding Xerxes' decision to attack. Among the subjects discussed are: the naval pressure on Persian foreign policy; the strength in numbers of the Persian navy in 480; its deployment in the waters of Salamis related to the physical features of the battlefield and the position of the Greeks; Themistokles' legendary message as a key to the Persian plan of attack; the quality of the opposing ships and their tactical capabilities; the battle of Salamis itself and its outcome. The book includes maps and a photograph of the area discussed.

*Rulers of the Sea* John Nash, 2023-12-04 This is a study of sea power and maritime strategy in the Classical Greek world. More than just a study of navies and battles, it examines how the sea was used to influence events ashore and how the use of naval power combined with land power had a defining impact on the period. After an examination of the oft-overlooked practical issues of navigation and administration, the book explores the idea of a 'maritime consciousness' in Greece and how this shaped the way the Greeks engaged in war. Naval operations from the Persian Wars down to the rise of Thebes are examined at the operational and strategic level, including a catalogue of the hundreds of different maritime operations from the 5th and 4th centuries BCE. Further, while the great sea power Athens is most prominent, it looks at other city-states to examine how they utilised sea power. This new approach uses modern theory to highlight some enduring lessons of sea power. It demonstrates that Classical scholars should embrace sea power as an important concept in the Greek world. Modern scholars of naval and strategic studies should cast their gaze further back in time when looking for lessons in sea

power. This book helps to bridge the scholarship between these two disciplines.

**Ancient Greek Warship** Nic Fields, 2007-03-27 Formidable and sophisticated, triremes were the deadliest battleship of the ancient world, and at the height of their success, the Athenians were the dominant exponents of their devastating power. Primarily longships designed to fight under oar power, the trireme was built for lightness and strength; ship-timber was mostly softwoods such as poplar, pine and fir, while the oars and mast were made out of fir. Their main weapon was a bronze-plated ram situated at the prow. From the combined Greek naval victory at Salamis (480 BC), through the Peloponnesian War, and up until the terrible defeat by the Macedonians at Amorgos, the Athenian trireme was an object of dread to its enemies. This book offers a complete analysis and insight into the most potent battleship of its time; the weapon by which Athens achieved, maintained, and ultimately lost its power and prosperity.

Warships of the Ancient World Adrian K. Wood, 2013-01-22 The world's first war machines were ships built two millennia before the dawn of the Classical world. Their influence on the course of history cannot be overstated since they allowed war to be carried to distant lands, allowing for the first time the rise of empires unrestricted by maritime boundaries. The same ships enabled early Mediterranean nations to explore the Atlantic and Indian Oceans and circumnavigate Africa, while leaving a significant impact on the culture and military thought of later civilisations. The famed triremes and penteres of the Classical world were the result of centuries of technological advance and experience. A wide variety of galleys and other types of warships were built by successive civilisations, each with their own distinctive appearance, capability and utility. The earliest of these were the Punt ships and the war galleys of Egypt which defeated the Sea People in the first known naval battle, along with the contemporary ships of Minoan Crete, the first sea power. Following the fall of these civilisations, the Phoenicians built biremes and other vessels with which they created the first Mediterranean-wide trade empire, while in Greece the ships described in detail in the 'Trojan' epics established a tradition of warship building culminating in the pentekonters and triaconters which allowed the Greeks to compete for hegemony on the seas. The warships of the period are abundantly illustrated on pottery and carved seals, and depicted in inscriptions and on bas-reliefs. A number of ships have also been excavated, from Egypt to Sicily, along with marine artefacts such as anchors and a bronze ram, while there are numerous finds of armour and weapons of the types used by naval personnel in this era. To this material evidence can be added literature from such disparate sources as Homer, the Old Testament and the Classical world's first historians. The subject has been intensively studied for two and a half millennia, culminating in the contemporary works of authoritative

scholars such as Morrison, Wallinga, Rodgers and Casson. Finally there are a number of modern reconstructions, both virtual and real, which have shed new light on the technology and usage of vessels of this period. To date there are no works covering this subject which are accessible and available to non-academics. This can only be considered a serious oversight due to the importance of this fascinating period.

**Sea Power in Ancient History** Arthur MacCartney Shepard, 1924 Ældre bog fra 1925, der omhandler de græske og romerske flåder i antikken. Bogen beskriver søkrigsførelse, taktikker, bevæbninger, personel, træning og skibstyper. Herefter beskrivelser af slag og krige som henholdvis den græske og romerske flåde deltog i.

**A History of Sea Power** William Oliver Stevens, 2017-06-06 Civilization and sea power arose from the Mediterranean, and the progress of recent archeological research has shown that civilizations and empires had been reared in the Mediterranean on sea power long before the dawn of history. Since the records of Egypt are far better preserved than those of any other nation of antiquity, and the discovery of the Rosetta stone has made it possible to read them, we know most about the beginnings of civilization in Egypt. We know, for instance, that an Egyptian king some 2000 years before Christ possessed a fleet of 400 fighting ships. But it appears now that long before this time the island of Crete was a great naval and commercial power, that in the earliest dynasties of Egypt Cretan fleets were carrying on a commerce with the Nile valley. Indeed, the Cretans may have taught the Egyptians something of the art of building sea-going ships for trade and war.[1] At all events, Crete may be regarded as the first great sea power of history, an island empire like Great Britain to-day, extending its influence from Sicily to Palestine and dominating the eastern Mediterranean for many centuries. From recent excavations of the ancient capital we get an interesting light on the old Greek legends of the Minotaur and Page 16 the Labyrinth, going back to the time when the island kingdom levied tribute, human as well as monetary, on its subject cities throughout the Aegean. [Footnote 1: It is interesting to note that the earliest empires, Assyria and Egypt, were not naval powers, because they arose in rich river valleys abundantly capable of sustaining their inhabitants. They did not need to command the sea.] On this sea power Crete reared an astonishingly advanced civilization. Until recent times, for instance, the Phoenicians had been credited with the invention of the alphabet. We know now that 1000 years before the Phoenicians began to write the Cretans had evolved a system of written characters-as yet undeciphered-and a decimal system for numbers. A correspondingly high stage of excellence had been reached in engineering, architecture, and the fine arts, and even in decay Crete left to Greece the tradition of mastery in laws and government. From Torr, Ancient Ships. EGYPTIAN SHIP The power of Crete was already in its decline centuries before the Trojan War, but during a thousand years it had spread its own and Egyptian culture over the shores of the Aegean. The destruction of the island empire in about 1400 B.C. apparently was due to some great disaster that destroyed her fleet and left her open to invasion by a conquering race-probably the Greeks-who ravaged her cities by sword and fire. On account of her commanding position in the Mediterranean, Crete might again have

risen to sea power but for the endless civil wars that marked her subsequent history. The successor to Crete as mistress of the sea was Phoenicia. The Phoenicians, oddly enough, were a Semitic people, a Page 17 nomadic race with no traditions of the sea whatever....

**The Blood-Drenched Sea** Alfred S. Bradford,2019-08-15 This book is an indispensable resource for readers who want to know the whole, comprehensive story of ancient naval warfare. The Blood-Drenched Sea describes all the naval battles and wars fought in the ancient Mediterranean. In one volume are the ships, crews, and leaders who determined the course of ancient history, along with the wars and battles, told through artifacts, extant literary and visual sources, and modern reconstructions—the Egyptian mortuary temple, the Minoan domain, the legendary sack of Troy, the expansion of Greeks throughout the Mediterranean, the Athenian victory over the Persians at Salamis, and the Athenian empire, ruined by one moment of superstition. Then the Romans learned how to build ships, man them, row in tiers, and command fleets, and the volume recounts their contributions to history as well. They fought three wars with Carthage that cost them hundreds of thousands of casualties and expenditures of vast wealth, and they conquered the whole of the Mediterranean. Meanwhile, Julius Caesar expanded the empire with the conquest of Gaul and the invasion of Britain, and his adoptive son, Octavian settled the question of who would rule the new empire by winning the naval battle at Actium.

*Ships and Seafaring in Ancient Times* Lionel Casson,1994 Ever since the earliest travellers took to the water on reed rafts or inflated goatskins, ships and boats have played a paramount role in the history of the western world. The invention of the sail in Egypt in about 3500 BC resulted in ever faster and more efficient water transport, and the nations that surrounded the Mediterranean in ancient times depended on ships and seafarers for their prosperity.

Seafaring on the Ancient Mediterranean A. F. Tilley,2004 Ancient seafaring and especially our fascination with the

trireme have fuelled many books and debates, many of which are revisited and critiqued here. Alec Tilley takes his lead from the evidence itself, whether depictions on pottery or stone, or literary references, and seeks some semblance of objectivity in a field of research that, he argues, frequently indulges itself in the subjectivity of the evidence. Critiquing previous interpretations of the iconography of seafaring, he looks again at some of the iconography of the trireme and other warships, discusses the orthodox trireme debate and especially the Olympias, a recent reconstruction of an Athenian trireme. Along the way he argues that the number in the name of ancient oared ship referred to the number of files of oarsmen, highlighting the fact that many of the ancient artists who depicted ships were knowledgeable about the subject they portrayed, presents thoughts on the development of sailing and draws a series of distinctions between different types of vessels, and reviews the corpus of evidence for seafaring from pre-trireme days to the Phoenicians.
