**John Clute**

**Yellow Blue Tibia** Adam Roberts,2009-01-22 Russia, 1946, the Nazis recently defeated. Stalin gathers half a dozen of the top Soviet science fiction authors in a dacha in the countryside somewhere. Convinced that the defeat of America is only a few years away, and equally convinced that the Soviet Union needs a massive external threat to hold it together, to give it purpose and direction, he tells the writers: 'I want you to concoct a story about aliens poised to invade earth ... I want it to be massively detailed, and completely believable. If you need props and evidence to back it up, then we can create them. But when America is defeated, your story must be so convincing that the whole population of Soviet Russia believes in it - the population of the whole world!' The little group of writers gets down to the task and spends months working on it. But then new orders come from Moscow: they are told to drop the project; Stalin has changed his mind; forget everything about it. So they do. They get on with their lives in their various ways; some of them survive the remainder of Stalin's rule, the changes of the 50s and 60s. And then, in the aftermath of Chernobyl, the survivors gather again, because something strange has started to happen. The story they invented in 1946 is starting to come true ... A typically mind-blowing SF novel from one of the genre's literary stars.

*Transparent Things* Vladimir Nabokov,2012-09-06 The darkly comic *Transparent Things*, one of Nabokov's final books, traces the bleak life of Hugh Person through murder, madness, prison and trips to Switzerland. One of these was the last journey his father ever took; on another, having been sent to ingratiate himself with a distinguished novelist, he met his future wife. Nabokov's brilliant short novel sinks into the transparent things of the world that surround this one Person, to the silent histories they carry. Remarkable even in Nabokov's work for its depth and lyricism, *Transparent Things* is a small, experimental marvel of memories and dreams, both sentimental and malign. Part of a major new series of the works of Vladimir Nabokov, author of *Lolita* and *Pale Fire*, in Penguin Classics.

**Language Contact and Lexical Enrichment in Israeli Hebrew** G. Zuckermann, 2003-11-04 Israeli Hebrew is a spoken language, 'reinvented' over the last century. It has responded to the new social and technological demands of globalization with a vigorously developing multisourced lexicon, enriched by foreign language contact. In this detailed and rigorous study, the author provides a principled classification of neologisms, their semantic fields and the roles of source languages, along with a sociolinguistic study of the attitudes of 'purists' and ordinary native speakers in the tension between linguistic creativity and the preservation of a distinct language identity.

**The Bird Life of Texas** Harry Church Oberholser, 1974 This book is to give a detailed history of natural history of all the species and subspecies of indigenous birds which have occurred within the confines of the present (1973) state of Texas from the date of the first recorded bird observation in late summer of 1535 through the winter season of 1972-73.

**Rails** Barry Taylor, 2010-08-30 This is a guide to rails, a relatively homogeneous family of birds spread throughout the world. Barry Taylor and Ber van Perlo have described and illustrated 145 species of rails, including two that are newly

described, and also ten that are recently extinct and two that are almost certainly extinct. The book, based on up-to-date references and on new observations, is the first to give comprehensive information on field identification (including voice), covering all species and races for which details are known. It is also the first to provide descriptions of the immature and juvenile plumages of many species. The authors provide a detailed summary of current knowledge of all aspects of rail biology and their often complex behaviour, social structure, and family life. They explain how such apparently poorly flying birds can undertake intercontinental migrations and are such widespread and successful colonists of remote oceanic islands. They also discuss the remarkable ease and speed with which species on such islands have evolved into flightless forms in the absence of predators, a fact that has led to the rapid extinction of numerous island taxa following the arrival of man. Rail habitats are fast disappearing, say the authors, and many rails become endangered before enough is known about them to plan effective conservation measures. The book provides information on distribution, status, habitat requirements, and current threats, and it gives conservation priorities for threatened species.

Foreword by George Okumura. Includes 2,850 scientifically accurate insect illustrations. Species descriptive text accompanies each illustration.

Birds of East Asia Mark Brazil, 2009-01-01 Published in the United Kingdom and European Union in 2009 by Christopher Helm ... London--T.p. verso.

Field Guide to the Birds of East Asia Mark Brazil, 2020-01-23 This is the first single volume guide ever devoted to the eastern Asian avifauna. The eastern Asian region, centring especially on the major islands off the continental coast (including Japan and Taiwan) and the immediately adjacent areas of the Asian continent from Kamchatka in the north and including the Korean Peninsula are an important centre of endemism. Birds endemic to this region include representatives of many of the major families, from the world's largest eagle - Steller's Sea Eagle - to the tiny Formosan Firecrest. The east Asian continental coast and the offshore islands also form one of the world's major international bird migration routes, especially for waterfowl, shorebirds and raptors, while the east Asian continental mainland itself is home to a wide range of species little known to western ornithologists such as Scaly-sided Merganser, Oriental Stork and Mugimaki Flycatcher. The guide features the most up-to-date text available, which, in conjunction with extensive colour plates throughout, facilitates the field identification of all of the species known from the region. Colour distribution maps enhance the text by providing a visual analysis of the summer, winter and migratory ranges of all species.
