Life As Told by a Sapiens to a Neanderthal Juan José Millás, Juan Luis Arsuaga, 2022-05-31 A New Scientist Book of the Year Prehistory is all around us. We just need to know where to look. Juan José Millás has always felt like he doesn't quite fit into human society. Sometimes he wonders if he is even a Homo sapiens at all, or something simpler. Perhaps he is a Neanderthal who somehow survived? So he turns to Juan Luis Arsuaga, one of the world's leading palaeontologists and a super-smart sapiens, to explain why we are the way we are and where we come from. Over the course of many months, the two visit different places, many of them common scenes of our daily lives, and others unique archaeological sites. Arsuaga tries to teach the Neanderthal how to think like a sapiens and, above all, that prehistory is not a thing of the past: that traces of humanity through the millennia can be found anywhere, from a cave or a landscape to a children's playground or a toy shop. Millás and Arsuaga invite you on a journey of wonder that unites scientific discovery with the greatest human invention of all: the art of storytelling.

The Garden Next Door José Donoso,1994 A Chilean writer named Julio and his wife, Gloria, are at a low point in their lives. Constantly bickering, the pair are beset by worries about money, their writing, and their son (who may or may not be plying the oldest profession in Marrakesh). When Julio's boyhood best friend, now a famous artist, lends the couple his luxurious Madrid apartment for the summer, it is an escape for both - but in particular for Julio, who fantasizes about the garden next door and the erotic life of the lovely young aristocratic woman who inhabits it. But Julio's life - and career - unravel In Madrid: he is rebuffed by a famous literary agent, Nuria Monclus, who detests him and his novel; his son's friend from Marrakesh moves in and causes havoc; and Gloria begins to drink. In the face of pitiless adversity, Julio's talent inexorably begins to fade. The garden next door, however, is also Gloria, who has been doing some creating of her own. It is this twist that transforms Donoso's brilliant satire of the writer's life into something even greater: a carefully crafted and bitteily comic meditation on gardens, deceit, and the nature of a writer's muse.

Brain Gain Marc Prensky,2012-08-07 In an age where the answer to every question is at your fingertips, where does the human brain fit in? In one hand-held object, we are able to manage all of our calendars, documents, and interpersonal relationships with such ease that many people are lost when forced to do perform these tasks without the aid of electronics. Often heard are the calls for less technology and more face-to-face interaction, for fear that the use of all this artificial intelligence is dampening our own ability to think. Author Marc Prensky has a different idea. In this controversial and well-argued treatise, Prensky offers the idea that rather than stunting the mind—that most essential aspect of an individual's intelligence and sense of self—smart technology (and smart use of technology) enhances our humanity in ways that the brain on its own never could. Through scores of fascinating examples, Prensky shows that the symbiotic combination of the human brain and technology—from marrying the brain's strengths such as sense-making and complex reasoning abilities with technology's strengths like storing and processing large amounts of data—has great benefits for our own cognitive functioning. How should we best combine the strengths of mind and machine for maximum benefit? Prensky's call is for digital wisdom—a new interconnectedness between human and technology that is already enabling Homo Sapiens to begin the journey into the next stages of cognitive evolution.

COVID-19 James K. Farr,2021 Multiple federal agencies, through Operation Warp Speed, continue to support the development and manufacturing of vaccines and therapeutics to prevent and treat COVID-19. Effective coordination and communication among federal agencies, commercial partners,

jurisdictions, and providers is critical to successfully deploying COVID-19 vaccines and managing public expectations, especially because the initial supply of vaccine has been limited.

Engaging Contradictions Charles R. Hale, 2008-05-07 Scholars in many fields increasingly find themselves caught between the academy, with its demands for rigor and objectivity, and direct engagement in social activism. Some advocate on behalf of the communities they study; others incorporate the knowledge and leadership of their informants directly into the process of knowledge production. What ethical, political, and practical tensions arise in the course of such work? In this

wide-ranging and multidisciplinary volume, leading scholar-activists map the terrain on which political engagement and academic rigor meet. Contributors: Ruth Wilson Gilmore, Edmund T. Gordon, Davydd Greenwood, Joy James, Peter Nien-chu Kiang, George Lipsitz, Samuel Martínez, Jennifer Bickham Mendez, Dani Nabudere, Jessica Gordon Nembhard, Jemima Pierre, Laura Pulido, Shannon Speed, Shirley Suet-ling Tang, João Vargas
