*Matter and Memory* Henri Bergson, 2018-11-01 Matter and Memory presents an analysis of the classical philosophical problems concerning this relation. Within that frame the analysis of memory serves the purpose of clarifying the problem. Matter and Memory was written in reaction to the book *The Maladies of Memory* by Théodule Ribot, which appeared in 1881. Ribot claimed that the findings of brain science proved that memory is lodged within a particular part of the nervous system; localized within the brain and thus being of a material nature. Bergson was opposed to this reduction of spirit to matter. Defending a clear anti-reductionist position, he considered memory to be of a deeply spiritual nature, the brain serving the need of orienting present action by inserting relevant memories. The brain thus being of a practical nature, certain lesions tend to perturb this practical function, but without erasing memory as such. The memories are, instead, simply not 'incarnated', and cannot serve their purpose.

El Reino humano, claves de la evolución histórica del *Homo sapiens* Manuel Serrano Martínez, 2022-10-14 El Reino humano recoge los principales hitos que han precedido a la aparición del hombre en la Tierra. El hombre es el final evolutivo del proceso de la vida al que le son concedidas las facultades de la inteligencia, la razón y la libertad. Se adentra el libro en la construcción de lo que hoy podemos conocer como la base de la civilización cuya principal característica original es la lucha por la hegemonía y el poder físico. La dialéctica, a la que la sociedad humana parece destinada, acaba dando paso a sucesivas revoluciones y metamorfosis surgidas del ansia por el poder ideológico, hasta llegar a la situación social actual de disgregación social en un proceso de globalismo paradójico. Además, el *Homo sapiens*, posee una serie de características propias, que lo definen en la creación, y que radican en la sed de saber, la relación amorosa, el arte, la felicidad, el dolor, la muerte, la conciencia de corporeidad, y la relación con Dios, porque es la única criatura capaz de relacionarse con el Ser.

Mind-Energy Lectures and Essays Henri Bergson, 2023-07-05 This book was originally published prior to 1923, and represents a reproduction of an important historical work, maintaining the same format as the original work. While some publishers have opted to apply OCR (optical character recognition) technology to the process, we believe this leads to sub-optimal results (frequent typographical errors, strange characters and confusing formatting) and does not adequately

preserve the historical character of the original artifact. We believe this work is culturally important in its original archival form. While we strive to adequately clean and digitally enhance the original work, there are occasionally instances where imperfections such as blurred or missing pages, poor pictures or errant marks may have been introduced due to either the quality of the original work or the scanning process itself. Despite these occasional imperfections, we have brought it back into print as part of our ongoing global book preservation commitment, providing customers with access to the best possible historical reprints. We appreciate your understanding of these occasional imperfections, and sincerely hope you enjoy seeing the book in a format as close as possible to that intended by the original publisher.

Hechos de tiempo Zenia Yébenes Escardó,2024-02-06 Estamos hechos de tiempo, habitados por tiempos múltiples y heterogéneos que se cruzan, se interfieren, se entremezclan... La política, según Zenia Yébenes, tiene que dar cuenta de ello. La memoria, entendida como la inscripción y transmisión de distintos ritmos de tiempo de vida y de materia, se constituye como un elemento crucial que modifica nuestra relación con el mundo, transformando así nuestro modo de percibirlo. El hilo conductor de estas páginas es, entonces, la articulación del tiempo y el imaginario como aquello que permanece aún impensado en la relación de lo humano con la vida y la Tierra, bios y geos. Zenia Yébenes propone imaginar otro modo de política que contemple las diferentes formas de tiempo de las que estamos hechos. Tiempos que no sean los de la nostalgia del origen perdido ni los de la memoria traumática ni únicamente los de la memoria como ejercicio deliberado y crítico. Necesitamos otra forma de mirar lo que nos constituye: el día a día, lo ordinario, la inquietante intimidad con el tiempo de los animales, el tiempo de los muertos y también el tiempo de los dioses.

*Historias de la psicología* Evelyn Hevia Jordán,Francisco Reiter Barros,Gonzalo Salas,2019 Se presentan contribuciones y reconstrucciones parciales de las historias de la psicología. Así, en plural, porque tanto cada autor y autora de los trece capítulos que componen este libro como sus editores, problematizan la noción de Historia de la Psicología como una gran narrativa del pasado disciplinar que se escribe en mayúsculas. Es, en ese sentido, una obra que pretende tributar a una interpretación histórica de la psicología, sus conceptos, sus personajes y aportes a la disciplina, así como a los usos que ha tenido (y tiene) en el campo político y social.

**La cultura como herramienta de expresión humana** Graciela Padilla Castillo,Juan Enrique González Vallés, Virginia Sánchez Rodríguez,2020-04-20 La Universidad se encuentra en pleno progreso desde su tiempo cero; de hecho, halla su carta de naturaleza en la necesidad de mejorar el medio que la nutre y por y para el que existe: la sociedad. Rompiendo las viejas membranas de la enseñanza imperante hasta el siglo XX, las nuevas (r)evoluciones de contenidos y fórmulas, como lo fuera el EEES (o Plan Bolonia) o las TIC, suponen la respuesta a esas actualizadas necesidades docentes y curriculares. Las Humanidades, las Artes, las Ciencias sociales y la Docencia se reescriben, hibridando, gracias a los nuevos lenguajes y herramientas, contenidos otrora lejanos. La nueva Academia es poliédrica, ínter y multi disciplinar, dialógica y colaborativa.

En este estado de cosas la colección Herramientas universitarias se erige como atalaya para agrupar bajo su égida al más amplio conjunto de autores internacionales que iluminen, con sus investigaciones, la panoplia de contenidos que conforman el mundo científico donde nace el futuro. La calidad intelectual queda refrendada mediante la rigurosa implantación del habitual proceso garante, basado en la revisión o arbitraje por pares ciegos (peer review) de estos capítulos, sin renunciar a la más antigua tradición universitaria que obliga al opositor de lo publicado, a soportar el peso de la prueba. Este doble modelo de evaluación, a priori y a posteriori, garantiza la calidad del contenido de los textos de esta colección. Pertenecer a la Academia, y en ello radica orgullosamente su valía, supone que todos sus miembros responden a una ambición irrenunciable: mostrar que el conjunto de sus trabajos conforma la vanguardia científica internacional. El texto que aquí se presenta está auspiciado por el Fórum Internacional de Comunicación y Relaciones Públicas (Fórum XXI), la Sociedad Española de Estudios de la Comunicación Iberoamericana (SEECI), la Asociación cultural Historia de los Sistemas Informativos y el Grupo Complutense (no 931.791) de Investigación en Comunicación Concilium.

**Pensar el cuerpo** Mabel Moraña, 2021-05-18 ¿De qué tradiciones multiculturales es heredero nuestro cuerpo? ¿Qué aspectos vinculan cuerpo individual y cuerpo social, cuerpo humano y cuerpo de ley, cuerpo sexual y cuerpo del delito? ¿Cómo entender la salud, la enfermedad, la muerte, los rituales de la sexualidad, el tratamiento del cadáver, sin analizar los conceptos vigentes e invisibles de la corporalidad? Pensar el cuerpo. Historia, materialidad y símbolo constituye una incursión transdisciplinaria y multifacética en la densidad del pensamiento occidental sobre lo corporal, a través de las épocas. El libro comprende aspectos estéticos, políticos, filosóficos, sociales y científicos que contribuyen a promover la imagen del cuerpo —y de lo post-humano— como constelación de sentidos, como espectáculo y como plataforma para la implementación de estrategias de control y de goce, de preservación y de castigo, de agresión y de solidaridad comunitaria.

Genesis and Trace Paola Marrati, 2005 Paola Marrati considers the philosophical sources of Derrida's thought through his reading of both Husserl and Heidegger. Notions such as the contamination of the empirical and the transcendental, dissemination and writing, are explained as a guiding thread that runs through Derrida's early and later works.

**Creative Evolution** Henri Bergson, J. Alexander Gunn, 2016-09-29 “Creative Evolution” is a 1907 book by French philosopher Henri Bergson. Within it, Bergson offers a version of orthogenesis to replace Darwin's evolutionary mechanism, which surmises that evolution is stimulated by a vital impetus. “Creative Evolution” was hugely popular in the early twentieth century and is highly recommended for those with an interest in evolution and allied subjects. Henri-Louis Bergson (1859–1941) was a French-Jewish philosopher. He had a significant influence on the tradition of continental philosophy during the first half of the twentieth century until World War II, and is famous for his idea that immediate experience and intuition are more important than abstract rationalism and science for understanding the nature of reality. This classic work is being republished now in a new edition complete with a chapter From “Bergson And His Philosophy” by J. Alexander Gunn.

**Gilles Deleuze** Paola Marrati,2008-05-07 2008 Outstanding Academic Title, Choice Magazine In recent years, the recognition of Gilles Deleuze as one of the major philosophers of the twentieth century has heightened attention to his brilliant and complex writings on film. What is the place of Cinema 1 and Cinema 2 in the corpus of his philosophy? How and why does Deleuze consider cinema as a singular object of philosophical attention, a specific mode of thought? How does his philosophy of film combine and further his approaches to time, movement, and perception, and how does it produce an escape from subjectivity and a plunge into the immanence of images? How does it recode and utilize Henri Bergson's thought and André Bazin's film theory? What does it tell us about perceiving a world in images—indeed about our relation to the world? These are the central questions addressed in Paola Marrati's powerful and clear elucidation of Deleuze's philosophy of film. Humanities, film studies, and social science scholars will find this book a valuable contribution to the philosophical literature on cinema and its pertinence in contemporary life.

**Reescribir entre cuerpos caminos po(e)sibles** Noemí Duran Salvadó,2017-01-10 «Re-conocer-nos» desde nuestros talentos singulares (fruto de escucharnos y transitar de un cuerpo saturado a un «cuerpo sensible»), «des-plazar-nos» (entrar en juego en lo social, pasando de un cuerpo paralizado, miedoso, a un «cuerpo errante», atrevido), «dar-nos» (combinar conocimiento, presencia y gestos para devenir «cuerpos resonantes»). Esa propuesta de conocimiento y acción sensible tiene el riesgo de empoderar a las personas y capacitarlas para remar a contracorriente de las lógicas dominantes que nos prefieren sordos ante las fuertes desigualdades sociales y sus mecanismos de perpetuación. No interesa que aprendamos a escucharnos y es en este sentido que la invitación a Reescribir entre cuerpos deviene un reto.

En los prados sembrados de ojos Antonio Colinas,2020-10-14 Dos son las coordenadas que fijan la poética de Antonio Colinas. La primera es la de su diálogo continuo del origen con el sentido de universalidad. La segunda sería la de su voz personal, a la que ha sido fiel a lo largo de cincuenta años y en la que mucho pesan la emoción, la intensidad, la pureza formal, el sentido órfico de la misma, a la vez que un afán de fundir el sentir con el pensar. Manteniéndose dichas constantes, En los prados sembrados de ojos hay voces, mensajes nuevos, que responden a otros afanes de Antonio Colinas como es el de su fidelidad a los símbolos —muy destacado el de la mujer aquí— y el de continuar yendo más allá en la indagación de los temas. Este volumen se estructura en seis partes, las cuales, a su vez, podrían ser la expresión de seis voces, de ese afán de profundizar hasta llegar a los tres poemas finales en los que la música, la figura de Cervantes y el pensamiento existencial enriquecen especialmente el texto. De tal manera que, en este libro de madurez plena, Colinas lleva hasta su último extremo cuanto había deseado para el poema: que «en él se sintiese y se pensase en igual medida y radicalmente», alcanzando así una reflexión humanista en los límites del conocimiento trascendente y del sentido de infinitud.

*Henri Bergson: Key Writings* Henri Bergson,2002-04-22 This volume brings together generous selections from his major texts: Time and Free Will, Matter and Memory, Creative Evolution, Mind-Energy, The Creative Mind, The Two Sources of

Morality and Religion and Laughter. In addition it features material from the *Melanges* never before translated in English, such as the correspondence between Bergson and William James. The volume will be an excellent textbook for pedagogic purposes and a helpful source book for philosophers working across the analytic/continental divide.

*Without Criteria* Steven Shaviro, 2012-08-24 A Deleuzian reading of Whitehead and a Whiteheadian reading of Deleuze open the possibility of a critical aesthetics of contemporary culture. In *Without Criteria*, Steven Shaviro proposes and explores a philosophical fantasy: imagine a world in which Alfred North Whitehead takes the place of Martin Heidegger. What if Whitehead, instead of Heidegger, had set the agenda for postmodern thought? Heidegger asks, "Why is there something, rather than nothing?" Whitehead asks, "How is it that there is always something new?" In a world where everything from popular music to DNA is being sampled and recombined, argues Shaviro, Whitehead's question is the truly urgent one. *Without Criteria* is Shaviro's experiment in rethinking postmodern theory, especially the theory of aesthetics, from a point of view that hearkens back to Whitehead rather than Heidegger. In working through the ideas of Whitehead and Deleuze, Shaviro also appeals to Kant, arguing that certain aspects of Kant's thought paved the way for the philosophical "constructivism" embraced by both Whitehead and Deleuze. Kant, Whitehead, and Deleuze are not commonly grouped together, but the juxtaposition of them in *Without Criteria* helps to shed light on a variety of issues that are of concern to contemporary art and media practices.

*Aesthetic Order* Ruth Lorand, 2002-11 *Aesthetic Order* challenges contemporary theories of aesthetics, offering the idea of beauty as quantitative yet different from the traditional discursive order. It will be of importance to all interested in aesthetic theory.

*Laughter* Henri Bergson, 2013-03-13 In this great philosophical essay, Henri Bergson explores why people laugh and what laughter means. Written at the turn of the twentieth century, *Laughter* explores what it is in language that makes a joke funny and what it is in us that makes us laugh. One of the functions of humor, according to Bergson, is to help us retain our humanity during an age of mechanization. Like other philosophers, novelists, poets, and humorists of his era, Bergson was concerned with the duality of man and machine. His belief in life as a vital impulse, indefinable by reason alone, informs his perception of comedy as the relief we experience upon distancing ourselves from the mechanistic and materialistic. A situation is always comic, Bergson notes, if it participates simultaneously in two series of events which are absolutely independent of each other, and if it can be interpreted in two quite different meanings. The philosopher's thought-provoking insights (e.g., It seems that laughter needs an echo. Our laughter is always the laughter of a group.) keep this work ever-relevant as a thesis on the principles of humor.

*The Order of Things* Michel Foucault, 2005-08-18 When one defines order as a sorting of priorities, it becomes beautifully clear as to what Foucault is doing here. With virtuoso showmanship, he weaves an intensely complex history of thought. He

dips into literature, art, economics and even biology in *The Order of Things*, possibly one of the most significant, yet most overlooked, works of the twentieth century. Eclipsed by his later work on power and discourse, nonetheless it was *The Order of Things* that established Foucault's reputation as an intellectual giant. Pirouetting around the outer edge of language, Foucault unsettles the surface of literary writing. In describing the limitations of our usual taxonomies, he opens the door onto a whole new system of thought, one ripe with what he calls exotic charm. Intellectual pyrotechnics from the master of critical thinking, this book is crucial reading for those who wish to gain insight into that odd beast called Postmodernism, and a must for any fan of Foucault.

**Duration and Simultaneity** Henri Bergson, 1965

**An Introduction to His Piano Works** Béla Bartók, Willard A. Palmer, This volume contains 31 pieces from *The First Term at the Piano, For Children, 10 Easy Pieces and 7 Sketches*. The informative foreword includes Bartók's specific instructions on wrist and finer action, articulations and syncopation. Each piece is prefaced by a brief introduction.
