Holistic Active Management of Non-Performing Loans Claudio Scardovi, 2015-11-05 This book discusses the most critical issues relating to the recovery of bad loans – a major problem that European banks urgently need to address and resolve. The book describes, in an innovative but also pragmatic way, the new approaches, techniques, and models for optimal management of non-performing loans (NPLs) and the maximization of their recovery value. Drawing on a rigorous academic background and the latest real-life experiences of major European banks, it details a novel means of dealing with NPLs based on velocity, the holistic use of tools and “accelerators”, and the active management of collaterals. Also, there is a specific focus on the smart use of “big data” and on the development of “bad banks”, at both the single bank and the system-wide level. Ultimately, credit workout is defined as a core capability for any competitive bank – and as a quite interesting business opportunity for independent, specialized “alpha” players.

Digital Economies at Global Margins Mark Graham, 2019-02-12 Investigations of what increasing digital connectivity and the digitalization of the economy mean for people and places at the world's economic margins. Within the last decade, more than one billion people became new Internet users. Once, digital connectivity was confined to economically prosperous parts of the world; now Internet users make up a majority of the world's population. In this book, contributors from a range of disciplines and locations investigate the impact of increased digital connectivity on people and places at the world's economic margins. Does the advent of a digitalized economy mean that those in economic peripheries can transcend spatial, organizational, social, and political constraints—or do digital tools and techniques tend to reinforce existing inequalities? The contributors present a diverse set of case studies, reporting on digitalization in countries ranging from Chile to Kenya to the Philippines, and develop a broad range of theoretical positions. They consider, among other things, data-driven disintermediation, women's economic empowerment and gendered power relations, digital humanitarianism and philanthropic capitalism, the spread of innovation hubs, and two cases of the reversal of core and periphery in digital innovation. Contributors Niels Beerepoot, Ryan Burns, Jenna Burrell, Julie Yujie Chen, Peter Dannenberg, Uwe Deichmann, Jonathan Donner, Christopher Foster, Mark Graham, Nicolas Friederici, Hernan Galperin, Catrihel Greppi, Anita Gurusurthy, Isis Hjorth, Lilly Irani, Molly Jackman, Calestous Juma, Dorothea Kleine, Madlen Krone, Vili Lehdonvirta, Chris Locke, Silvia Masiero, Hannah McCarrick, Deepak K. Inclusive Teamwork for Pupils with Speech, Language and Communication Needs Rosalind Merrick,2021-09-07

This book provides a rationale for teaching inclusive teamwork and for understanding communication as a collective endeavour. It shows how teamwork can be taught within schools and emphasises the role that classmates have in facilitating good communication, particularly in the face of difficulty. Grounded in evidence from hours of therapy and analysis of children's accounts of communication and children's interactions with their peers, the book explores the components of teamwork by looking carefully at the way schoolchildren really interact. It draws on research from the fields of education, psychology and speech and language therapy to propose the framework for a programme suitable for children aged 7 to 14 years, designed to include pupils with speech, language and communication needs. The programme includes activities, a set of criteria to use as an outcome measure and examples of the way that children and young people have responded in practice. In using the inclusive teamwork programme outlined in this book, teachers have the potential to support all children in developing rapport, effective communication and problem-solving skills. Providing a framework designed to meet the needs of all learners, this book will be highly relevant reading for students of education, speech and language therapy and educational psychology, as well as speech and language therapists and practitioners in the field of education.

Customer Loyalty and Supply Chain Management Ivan Russo,Ilenia Confente,2017-08-03 Many business-to-business (B2B) managers think that customers act rationally and base decisions mostly on price, customer loyalty isn't considered. Companies outsource various activities, which enable them to improve efficiency, reduce costs, focus more on core competencies and improve their innovation capabilities. Supply Chain Management synchronizes the efforts of all parties—particularly suppliers, manufacturers, retailers, dealers, customers—involved in achieving customer's needs. Despite much research, the relationship between customer loyalty and the supply chain strategy remains insufficiently explored and understood by practitioners and academics, while the theme has been extensively developed within marketing literature.

Customer Loyalty and Supply Chain Management is the result of years of work by the authors on different projects concerning the overlapping areas of supply chains, logistics and marketing, drawing a connection between the literature to provide a holistic picture of the customer loyalty framework. Emphasis is given to the B2B context, where recent research has provided some clues to support the fact that investment in operations, new technologies and organizational strategy have had a significant role in understanding B2B loyalty, particularly in the context of global supply chains. Moreover, the book provides a modernized and predictive model of B2B loyalty, showing a different methodological approach that aims at capturing the complexity of the phenomenon. This book will be a useful resource for professionals and scholars from across the supply chain who are interested in exploring the dimension of customer loyalty in the challenging supplier and customer context.

Global Corruption Report 2006 Transparency International, 2005-12-20 TI has once again shown its ability to combine research and policy analysis not just to shine a light on the deeply embedded problems of corruption ... but to propose progressive solutions. Former World Bank President James Wolfensohn on the Global Corruption Report In the health sector, corruption is a matter of life or death. It can take many forms: from medical professionals who sell medicines or services that should be freely available, to high-level government officials who embezzle money from health budgets, to pharmaceutical companies that buy influence over research agendas. The impact of corruption is always felt by the end user -- the sick person who is forced to pay over the odds or who is given unsafe, counterfeit medicines. The 2006 edition of Transparency International's Global Corruption Report shows the impact that corruption has on health care in rich and poor countries. From high-level bribery in Costa Rica to informal payments in Hungary, case studies from around the world explore the characteristics of the health sector that make it so prone to corruption. In a special section dedicated to corruption in HIV/AIDS, the report warns that the large sums being poured into fighting the world's deadliest diseases need to be safeguarded against abuse. There is also a detailed analysis of the problems of the pharmaceutical system. The report also offers an annual round-up of worldwide developments and tracks major trends in more than 40 countries. The Global

Corruption Report 2006 is the only report of its kind, and is an essential reference source for anyone who wants the latest research on how corruption affects everything from health to education and the oil and gas industries.

Novacene James Lovelock, 2020-11-10 A fascinating new study from the originator of the Gaia Theory, “who conceived the first wholly new way of looking at life on earth since Charles Darwin” (Independent) One of the world’s leading scientific thinkers offers a vision of a future epoch in which humans and artificial intelligence unite to save the Earth. James Lovelock, creator of the Gaia hypothesis and the greatest environmental thinker of our time, has produced an astounding new theory about future of life on Earth. He argues that the Anthropocene—the age in which humans acquired planetary-scale technologies—is, after 300 years, coming to an end. A new age—the Novacene—has already begun. In the Novacene, new beings will emerge from existing artificial intelligence systems. They will think 10,000 times faster than we do and they will regard us as we now regard plants. But this will not be the cruel, violent machine takeover of the planet imagined by science fiction. These hyperintelligent beings will be as dependent on the health of the planet as we are. They will need the planetary cooling system of Gaia to defend them from the increasing heat of the sun as much as we do. And Gaia depends on organic life. We will be partners in this project. It is crucial, Lovelock argues, that the intelligence of Earth survives and prospers. He does not think there are intelligent aliens, so we are the only beings capable of understanding the cosmos. Perhaps, he speculates, the Novacene could even be the beginning of a process that will finally lead to intelligence suffusing the entire cosmos. At the age of 100, James Lovelock has produced the most important and compelling work of his life.

Responding to Money Laundering Ernesto Savona, 2005-09-29 Responding to Money Laundering has its origin in the International Conference on Preventing and Controlling Money Laundering and the Use of Proceeds of Crime: A Global Approach organised by ISPAC, the International Scientific and Advisory Board of the United Nations in co-operation with the Crime and Justice Branch of the United Nations under the auspices of the Italian Government. This conference has been a

milestone in the recent international debate on money laundering. Some of the main papers presented are substantially revised and collected in this book making a major contribution to the development of expertise in the field. Divided into two sections -- Trends and Implications and Tuning the Instruments -- the chapters develop an analysis of the different aspects of the money laundering problem and attempt to tune the instruments for combating them. Globalization of the problem calls for globalization of the responses. By presenting a wide range of different approaches and

Passions and Politics Paul Ginsborg, Sergio Labate, 2019-01-30 The dominant model of democratic politics emphasizes reason at the expense of the passions. Passions have been treated as dangerous, the opposite of reason and the enemy of virtue. Paul Ginsborg and Sergio Labate challenge this model and put forward a very different view, developing an account of modern democratic politics in which both passions and reason play a crucial role. To do justice to the role of passions in politics, we must pay close attention to the way in which they circulate among us; then we must develop a suitable language to describe them - an 'alphabet of the passions' that enables us to understand how they combine with one another and connect with certain states of mind in order to shape political outcomes. Adopting this approach enables the authors to shed new light on one of the major phenomena of our time - the triumph of neoliberalism on a world scale. Neoliberalism has worked so well because it has incorporated its own romantic and individualist version of the passions into its worldview, seducing both individuals and families with the allure of consumption. By developing a new model of democratic politics based on the interplay of passions and reason, Ginsborg and Labate provide a much needed framework for understanding the crucial role that passions play in the unfolding of political life. At a time when populist leaders are on the ascendancy and political processes are shaped as much by anger, resentment and fear as they are by reason and argument, this refocusing of political analysis on the role of the passions could not be more timely.
