German Pop Music Uwe Schütte,2017-01-11 The development of German pop music represents a fascinating cultural mirror to the history of post-war Germany, reflecting sociological changes and political developments. While film studies is an already established discipline, German pop music is currently emerging as a new and exciting field of academic study. This pioneering companion is the first volume to provide a comprehensive overview of the subject, charting the development of German pop music from the post-war period 'Schlager' to the present 'Diskursrock'. Written by acknowledged experts from Germany, the UK and the US, the various chapters provide overviews of pertinent genres as well as focusing on major bands such as CAN, Kraftwerk or Rammstein. The volume constitutes an indispensable companion for any student, teacher and scholar in the area of German studies interested in contemporary popular culture.

Memory and Intermediality in Artists’ Moving Image Sarah Durcan, 2020-10-19 This book addresses the preoccupation with memory in contemporary artists’ moving image installations. It situates artists’ moving image in relation to the transformations of digitalization as hybrid intermedial combinations of analogue film, video and digital video emerge from mid 1990s onwards. While film has always been closely associated with the process of memory, this book investigates new models of memory in artists’ remediation of film with video and other intermedial aesthetics. Beginning with a chapter on the theorization of memory and the moving image and the diverse genealogies of artists’ film and video, the following chapters identify five different mnemonic modes in artists’ moving image: critical nostalgia, database narrative, the ‘echo-chamber’, documentary fiction and mediatized memories. Stan Douglas, Steve McQueen, Runa Islam, Mark Leckey and Elizabeth Price are of a generation that has lived through the transition from analogue to digital. Their emphasis on the nuances of intermediality indicates the extent to which we remember through media.

When Mirrors Are Windows Guillermo Rodríguez, 2016-09-01 In an ocean where myriads of rivers converge, can one sole river lend the ocean its distinct flavour? For someone who is at home with several languages, literary traditions and disciplines, is it possible for one form to criss-cross the landscape of another? In a poet’s world of mirrors, where stream and earth are sky, one may ‘sometimes count every orange on a tree’, but can one count ‘all the trees in a single orange’? In this volume, Guillermo Rodríguez explores these possibilities by analysing the works of one of India’s finest poets, translators,

essayists and scholars of the twentieth century, A.K. Ramanujan (1929–1993).

Negative/Positive Geoffrey Batchen, 2020-12-21 As its title suggests, *Negative/Positive* begins with the negative, a foundational element of analog photography that is nonetheless usually ignored, and uses this to tell a representative, rather than comprehensive, history of the medium. The fact that a photograph is split between negative and positive manifestations means that its identity is always simultaneously divided and multiplied. The interaction of these two components was often spread out over time and space and could involve more than one person, giving photography the capacity to produce multiple copies of a given image and for that image to have many different looks, sizes and makers. This book traces these complications for canonical images by such figures as William Henry Fox Talbot, Kusakabe Kimbei, Dorothea Lange, Man Ray, Seydou Keita, Richard Avedon, and Andreas Gursky. But it also considers a number of related issues crucial to any understanding of photography, from the business practices of professional photographers to the repetition of pose and setting that is so central to certain familiar photographic genres. Ranging from the daguerreotype to the digital image, the end result is a kind of little history of photography, partial and episodic, but no less significant a rendition of the photographic experience for being so. This book represents a summation of Batchen's work to date, making it be essential reading for students and scholars of photography and for all those interested in the history of the medium

The text/reader provides not only a biographical and theoretical summary of each theorist's works but also an overarching scaffolding that students can use to examine, compare, and contrast each theorist's major themes and concepts. The book also offers discussions of past social and intellectual milieus to provide a holistic picture of the development of the theories discussed.

Comprising an impressive range of essays and interviews by experts and scholars from across the globe, this book examines the medium's history, its central issues and emerging trends, and its much-discussed future. Management Consulting Matthias Kipping, Lars Engwall, 2002-06-20 This volume makes an important contribution to the growing literature on management consulting. It brings together international contributors from a wide variety of backgrounds and draws on recent empirical research from a diverse range of countries, consultancy firms, and client companies. The analysis focuses on three key areas. The first part of the book looks at the emergence and development of the consulting industry in different countries and time periods. The interplay between national systemic context and outside influences is stressed, and the efforts of consultants to become recognized as 'legitimate' knowledge carriers by their clients is highlighted, in competition — and sometimes cooperation — with other suppliers of management knowledge, notably academia. The volume goes on to consider the generation, management, and validation of consulting knowledge by consultancy organizations and management gurus, showing how these activities are influenced not only by the consultancies' own characteristics in terms of size, structure, and national origin, but also by the (national and cultural) context in which

they are operating, and by the role of 'gatekeepers', such as book publishers or journalists. The third part of the book focuses on the nature and dynamics of the consultancy-client relationship, focusing especially on the ways in which consultants convince managers of the need to hire outside advisors; on the reaction of those concerned in the client organization towards the consultants' recommendations; and on the methods used by the consultants to overcome the possible reluctance and resistance from within the organization. From a more theoretical point of view, the chapters in this volume also show that research on management consulting has to take into account different levels of analysis: the consulting industry as a whole and its position relative to other knowledge providers such as academia; the specific consultancy organization and its relationships with internal and external sources of knowledge; and the particular consultancy project and notably the interplay between the consultants and the various stakeholders within and outside the client organization.

A Flowering Tree and Other Oral Tales from India A. K. Ramanujan, 2023-11-10 This book of oral tales from the south Indian region of Kannada represents the culmination of a lifetime of research by A. K. Ramanujan, one of the most revered scholars and writers of his time. The result of over three decades' labor, this long-awaited collection makes available for the first time a wealth of folktales from a region that has not yet been adequately represented in world literature. Ramanujan's skill as a translator, his graceful writing style, and his profound love and understanding of the subject enrich the tales that he collected, translated, and interpreted. With a written literature recorded from about 800 A.D., Kannada is rich in mythology, devotional and secular poetry, and more recently novels and plays. Ramanujan, born in Mysore in 1929, had an intimate knowledge of the language. In the 1950s, when working as a college lecturer, he began collecting these tales from everyone he could—servants, aunts, schoolteachers, children, carpenters, tailors. In 1970 he began translating and interpreting the tales, a project that absorbed him for the next three decades. When Ramanujan died in 1993, the translations were complete and he had written notes for about half of the tales. With its unsentimental sympathies, its laughter, and its delightfully vivid sense of detail, the collection stands as a significant and moving monument to Ramanujan's memory as a scholar and writer. This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. This title was originally published in 1997.

The Routledge Handbook of the War of 1812 Donald R. Hickey, Connie D. Clark, 2015-10-08 The War of 1812 ranged over a remarkably large territory, as the fledgling United States battled Great Britain at sea and on land across what is now the eastern half of the U.S. and Canada. Native people and the Spanish were also involved in the war's interrelated conflicts. Often overlooked, the War of 1812 has been the subject of an explosion of new research over the past twenty-five years. The Routledge Handbook of the War of 1812 brings together the insights of this research through an array of fresh essays by

leading scholars in the field, offering an overview of current understandings of the war that will be a vital reference for students and researchers alike. The essays in this volume examine a wide range of military, political, social, and cultural dimensions of the war. With full consideration given to American, Canadian, British, and native viewpoints, the international group of contributors place the war in national and international context, chart the course of events in its different theaters, consider the war's legacy and commemoration, and examine the roles of women, African Americans, and natives. Capturing the state of the field in a single volume, this handbook is a must-have resource for anyone with an interest in early America.

Photography's Other Histories Christopher Pinney, Nicolas Peterson, 2003-04-24 Moving the critical debate about photography away from its current Euro-American center of gravity, *Photography's Other Histories* breaks with the notion that photographic history is best seen as the explosion of a Western technology advanced by the work of singular individuals. This collection presents a radically different account, describing photography as a globally disseminated and locally appropriated medium. Essays firmly grounded in photographic practice—in the actual making of pictures—suggest the extraordinary diversity of nonwestern photography. Richly illustrated with over 100 images, *Photography's Other Histories* explores from a variety of regional, cultural, and historical perspectives the role of photography in raising historical consciousness. It includes two first-person pieces by indigenous Australians and one by a Seminole/Muskogee/Dine' artist. Some of the essays analyze representations of colonial subjects—from the limited ways Westerners have depicted Navajos to Japanese photos recording the occupation of Manchuria to the changing contract between Aboriginal subjects and photographers. Other essays highlight the visionary quality of much popular photography. Case studies centered in early-twentieth-century Peru and contemporary India, Kenya, and Nigeria chronicle the diverse practices that have flourished in postcolonial societies. *Photography's Other Histories* recasts popular photography around the world, as not simply reproducing culture but creating it. Contributors. Michael Aird, Heike Behrend, Jo-Anne Driessens, James Faris, Morris Low, Nicolas Peterson, Christopher Pinney, Roslyn Poignant, Deborah Poole, Stephen Sprague, Hulleah Tsinhnahjinnie, Christopher Wright
