Plays for Children and Young Adults Rashelle S. Karp, June H. Schlessinger, 1991

Six Plays for Children Aurand Harris, 2014-07-03 Six Plays for Children by Aurand Harris brings together a variety of dramatic forms that have enormously enriched the literature of children's theatre in this country and around the world. These works by this respected children's theatre playwright show Harris's great versatility: in the commedia dell'arte of *Androcles and the Lion*; the musical melodrama *Rags to Riches*; the sober, absurd comedy *Punch and Judy*; the realistic historical drama *Steal Away Home*; the farce *Peck's Bad Boy*; and the musical review *Yankee Doodle*. Each of the six plays exhibits a vital theatricality which is sure to win a child's attention and response. Editor Coleman A. Jennings traces Harris's development as a playwright in a biographical study based on interviews with Harris. This enlightening section treats Harris's philosophy and teaching methods, as well as his creative process.

Language, Children and Society Olga K. Garnica, Martha L. King, 2014-05-19 *Language, Children and Society: The Effect of Social Factors on Children Learning to Communicate* investigates the processes involved in the development of communicative skills in young children, in particular as these unfold during the child's participation in social interactions in a variety of everyday, educational situations. For a fuller understanding of these processes, through which the child learns the vast array of communicative skills necessary to function effectively in social contexts, the broad range of situations in which the communicative exchanges are embedded—school, home, community, etc.—are examined. Comprised of 17 chapters, this volume begins by painting a vivid picture of human discrimination and prejudice that touches every child involved in the education process in the United States, a result that can be linked to language ignorance. The discussion then turns to some of the contributions of linguistics to education and some of the problems involved in reaching greater cooperation between linguists and educators. The relevance of developments in sociolinguistics to the study of language learning and early education is emphasized. Subsequent chapters focus on the communicative competence of kindergarten children; children's situational variation and situational competence; sex differences in the language of children and parents; and dialogue, monologue, and egocentric speech by children in nursery schools. This book will be of interest to teachers and students, as

well as to practitioners in the fields of educational psychology, psychobiology, psychiatry, linguistics, and childhood education.

Browning and the Dramatic Monologue S.S. Curry,2018-09-20 Reproduction of the original: Browning and the Dramatic Monologue by S.S. Curry

Young Children's Dyadic Pretend Play Ursula Verena Schwartz,1991 Pretend play in early childhood arises in the context of social interaction and, as such, constitutes a form of discourse indigenous to the child's world. The present study is a first detailed investigation of thematic-ideational structure in young children's dyadic pretend play with special emphasis on major generative strategies involved in the realization of coherent play action sequences. Play was conceptualized as a story in a dramatic mode where two actors jointly generate or attempt to generate ideationally coherent action sequences or play plots resulting in a complex, ever-evolving thematic structure at a number of levels of analysis. Methodological problems of analysis resulted in the creation of an analytic procedure -- Master Text -- that simultaneously addresses structural and processual features of play and is able to deal with lengthy play segments. The results characterize playing as a form of discourse which proceeds according to patterned regularities at the level of Thematic Core Structures and associated schemata which underly the plot surface. The realization of such structurizations comes about during the play process in a complex interplay with features of the setting and requires establishing and modifying a shared knowledge base. These findings are discussed in light of their significance for childhood socialization.

The Ultimate Scene and Monologue Sourcebook, Updated and Expanded Edition Ed Hooks,2010-05-19 All actors and acting teachers need *The Ultimate Scene and Monologue Sourcebook*, the invaluable guide to finding just the right piece for every audition. The unique format of the book is ideal for acting teachers who want their students to understand each monologue in context. This remarkable book describes the characters, action, and mood for more than 1,000 scenes in over 300 plays. Using these guidelines, the actor can quickly pinpoint the perfect monologue, then find the text in the Samuel French or Dramatist Play Service edition of the play. Newly revised and expanded, the book includes the author's own assessment of each monologue.

Ways with Words Shirley Brice Heath,2013-09-03 This book, first published in 1983, traces language patterns and cultural differences between 'Roadville' and 'Tracton'.

[Interaction in Human Development](#) Marc H. Bornstein,Jerome S. Bruner,2014-01-14 *Interaction in Human Development* unites theoretical essays and empirical accounts bearing directly on the nature of interactions as a principal factor and organizing feature in human mental and social development. The papers discuss all areas of interaction including genetic, environmental, life-span, interpersonal, and cultural. Ideal as a text for students and as a reference for professionals in

personality, developmental, educational, and environmental psychology, psychotherapy, behavioral medicine, and language.

Encyclopedia of Educational Psychology Neil J. Salkind, Kristin Rasmussen, 2008-01-17 The field of educational psychology draws from a variety of diverse disciplines including human development across the life span, measurement and statistics, learning and motivation, and teaching. And within these different disciplines, many other fields are featured including psychology, anthropology, education, sociology, public health, school psychology, counseling, history, and philosophy. In fact, when taught at the college or university level, educational psychology is an ambitious course that undertakes the presentation of many different topics all tied together by the theme of how the individual can best function in an educational setting, loosely defined as anything from pre-school through adult education. Educational psychology can be defined as the application of what we know about learning and motivation, development, and measurement and statistics to educational settings (both school- and community-based).

Child Psychology Robin Harwood, Scott A. Miller, Ross Vasta, 2008-01-03 This new fifth edition captures the excitement and relevance of child psychology at the beginning of the 21st century; a theme that is exemplified in the text's new subtitle: Child Development in a Changing Society. In addition to extensive research coverage, each chapter includes an additional section that relates the chapter subject to social and cultural contexts, or implications of research for social policy, public practice, or societal change. This new edition places children, child development, and the contexts in which development occurs at the center of the discourse. Thus, this edition has a strong balance of theory, research, and real-world application.

Delivering Authentic Arts Education with Student Resource Access 12 Months Judith Dinham, 2016-08-23 This practical text helps student teachers develop their confidence, understandings and skills so that they can effectively and authentically teach arts in primary and middle school classrooms. Delivering Authentic Arts Education outlines the true nature of arts education and its importance in the curriculum, emphasising the arts as forms of creative activity, meaning-making and expression in a cultural context. Chapters discuss how to recognise and build on your existing artistic abilities and pedagogical skills, how to encourage children's creativity, how to lead arts appreciation experiences, and the general principles of planning and assessment. They then examine the five arts areas: dance, drama, media arts, music and visual arts. The final part of the text contains sample learning activities and resources that demonstrate how to plan an effective lesson within a unit of inquiry. Practical tips, classroom snapshots, starter ideas and suggestions for online resources show you the links between theory and practice so you can develop arts education experiences that are purposeful, stimulating and engaging for everyone--Publisher's summary.

Delivering Authentic Arts Education 4e Judith Dinham, 2019-09-30 This market-leading practical text helps student teachers develop their confidence, understanding and skills to effectively and authentically teach arts. With a strong balance

between theory and practice, *Delivering Authentic Arts Education* outlines the true nature of the key learning area of arts education and its importance in the curriculum, emphasising the arts as forms of creative activity, meaning-making and expression in a cultural context. Initial chapters discuss how to recognise and build on existing artistic abilities and pedagogical skills, how to encourage children's creativity, how to lead arts appreciation experiences, and the general principles of planning and assessment. Part 2 specifically examines the five arts areas: dance, drama, media arts, music and visual arts. The final part of the text, *Units of Inquiry*, contains valuable sample learning activities and resources that demonstrate how to plan an effective lesson within a unit of inquiry.

Development of Cognition, Affect, and Social Relations W. A. Collins, 2014-03-18 First published in 1982. This thirteenth volume in *The Minnesota Symposia on Child Psychology* set invites six developmental scholars to present their work within the programmatic perspective in which it was conceived. The contributors to this volume work within the area of developmental social psychology, encompassing the range of problems surrounding the development of social relations, social cognition, and affective systems. There is variation not only in the domains of interest but in the methods and the ages of the participants in the research within this volume.

Towards Excellence in Early Years Education Kathleen Gooch, 2010-06-22 This book uniquely describes the work of two Early Years Professionals, drawing on their narrative accounts as they robustly describe and analyse their work with young children. Against a backdrop of increasing regulation and inspection of early years care and education, Kathy Gooch emphasizes the importance of building authentic relationships with children and their families, explores how play can be promoted as the central site for learning, and shows how professionals can use play to account for children's development and learning. In analysing the Early Year Professionals' narratives, this book explores key themes including: Traditional notions of 'teaching' and how they can be redefined The significance of talk in children's lives Teachers' professional identities How children's potential in learning can be achieved through play Celebrating knowledge, skills and understanding and re-defining what it means to be a teacher, in its broadest sense, this fascinating book brings together research and literature from across disciplines. Containing a foreword by Tricia David, it will be of interest to academics, early years educators and students on early childhood education degree programmes and initial teacher education courses, as well as others concerned with the over prescriptive nature of early education.

Selves and Identities in Narrative and Discourse Michael Bamberg, Anna De Fina, Deborah Schiffrin, 2007-12-14 The different traditions that have inspired the contributors to this volume can be divided along three different orientations, one

that is rooted predominantly in sociolinguistics, a second that is ethnomethodologically informed, and a third that came in the wake of narrative interview research. All three share a commitment to view self and identity not as essential properties of the person but as constituted in discursive practices and particularly in narrative. Moreover, since self and identity are held to be phenomena that are contextually and continually generated, they are defined and viewed in the plural, as selves and identities. In the attempt of moving closer toward a process-oriented approach to the formation of selves and identities, this volume sets the stage for future discussions of the role of narrative and discourse in this generation process and for how a close analysis of these processes can advance an understanding of the world around us and within this world, of identities and selves.

Play-based Interventions for Children and Adolescents with Autism Spectrum Disorders Loretta Gallo-Lopez, Lawrence C. Rubin, 2012 Through careful integration of theory with real-world clinical case application, each chapter in *Play-Based Interventions for Children and Adolescents with Autism Spectrum Disorders* shows clinicians how to make a diverse array of treatment approaches viable and effective.
