Global Ideologies and Urban Landscapes Manfred B. Steger, Anne McNevin, 2013-09-13 How do political ideologies and urban landscapes intersect in the context of globalization? This volume illuminates the production of ideologies as both discursive and spatial phenomena in distinct contributions that ground their analysis in cities of the Global North and South. From Sydney to Singapore, Hong Kong to Hanoi, Las Vegas to Macau, conventional public spaces are in decline as sites of ideological dissent. Instead, we are witnessing the colonisation of urban space by market globalism (today's dominant global ideology) and securitised surveillance regimes. Against this backdrop, how should we interpret the proliferation of metaphors that claim to communicate the essence of global transformation? In what ways do space and language work together to normalise the truth claims of powerful ideological players? What kinds of social forces mobilise to contest the cooptation of language and space and to pose alternative local and global futures? This volume poses these questions against the collapse of old geographical scales and cartographic techniques for identifying the contours of civil society. The city acts as an entry point to a new spatial analytics of contemporary ideological forces. This book was published as a special issue of *Globalizations*.

The Vagabonds P. Paul Provost,2011-08-22 Traveling, a passion of this author, has prompted me to share my experiences with others, especially senior readers. This group of people, of which I am a part, has not always been privileged to take time out to travel, for various reasons. Granted, it is an expensive venture, or hobby, however, it is great fun, adventurous and a wonderful opportunity to meet people of different cultures and living standards. As creatures of habit, we love to stay put and seldom find interest in leaving home, regardless of the occasion. This book, *The Vagabonds*, tells the story of the travels and adventures of a couple, husband and wife, who truly love to travel. It encompasses places here, in the United States of America, Europe, Asia, Africa, Canada, South America, New Zealand, Australia and many other places, including various islands and villages. This author is confident that this story will capture your attention and imagination. Surely you will be anxious to share it with relatives and friends. Once you've read this book, it will be as though you have taken the venture with us. My mission, and hope, is that more seniors will become interested and venture out on cruises, or other modes of travel, to places they have never trod before. Forget about Disneyland for a while. Be a Vagabond at least once in your life. My wife, Frances J., is the cruise mistress. She started me on the cruise circuit instead of land touring. This author sailed for twenty years, while in the U. S. Navy, and thought sea life was over for me. If anything, I should be thankful that my wife loves to sail, because we cruise together, as often as we can, and it is such a relaxing mode of travel. She inspired me to undertake this work, and is my personal editor. Her inspiration is very infectious. It was a success.

The Brilliance of Bioenergy Ralph E H Sims,2013-11-05 The time for modern biomass has come. It has long been overshadowed by other, more widely-publicized renewable energy technologies such as wind, solar and hydro, and still retains an outmoded image in comparison to its apparently more attractive cousins. The potential for biomass to act as a store of solar energy, and yet to be converted efficiently when required into heat, power, transport fuels and even substitutes for plastics and petrochemicals, is not widely appreciated. The increasing abundance of well-designed, successful bioenergy projects around the world is creating new interest in this renewable, sustainable and low-emission-producing source of energy. The Brilliance of Bioenergy covers all the main resources and technologies, principles, practice, social and environmental issues as well as the economics involved. The book also presents valuable, practical experiences - both 'how to' and 'how not to' - in the form of case studies of both small and large scale projects in both developed and developing countries. The Brilliance of Bioenergy is for those wishing to learn more about biomass, the technologies and the business potential. It will be welcomed by all involved in biomass production, bioenergy utilization, planning and development, and in renewable energies in general, as well as students, academics and researchers in the subject.

Designer Suburbs Judith O'Callaghan, Charles Pickett, 2012-11-01 In the 1950s, 60s and 70s architects like Harry Seidler, Robin Boyd, Ken Woolley, Michael Dysart and Graeme Gunn applied their talents to project homes, bringing high-end design to the suburbs. Backed by Pettit & Sevitt, Merchant Builders and other project builders, architects created small, deceptively simple houses which transformed the look of suburbia. Today, the distance between the architectural profession and suburban housing has never been greater, with Australia's super-sized, energy-guzzling project homes the biggest in the world. With photographs by Max Dupain, David Moore, Wolfgang Sievers and Eric Sierins alongside original plans, *Designer Suburbs* explores the relationship between architects, builders and affordable housing since 1900 and the lessons we can learn from twentieth-century designer suburbs.

Building a Masterpiece Anne Watson,2013 Building a masterpiece explores some of the untold chapters in the long history of the Opera House's gestation, development and completion -- of individuals whose careers were made or broken by the Opera House, the companies whose reputations were secured through their association with the building, and the pioneering construction methods, innovative technologies and methodologies developed to meet the demands of its unprecedented design and challenging construction. The workers who built the building, the politicians, architects and members of the public who championed it and its often beleaguered architect are discussed as is its current world status as a symbol of Australia.To coincide with the 40th anniversary of the opening of the Sydney Opera House, this new edition of Building a Masterpiece will include a new chapter on another little known and much misunderstood story: the architect who took over from Utzon and completed the project.
