John Dewey, James Hayden Tufts

Working with German J. Peter Lupson, Doug Embleton, Elspeth Eggington, 1996 A beginner's course, teaching the basics of French, Spanish and German up to GCSE level. It is designed for students in colleges and universities studying language with a practical bias. It is suitable for use with groups, individuals with tutorial support or as core material for a supported self-study course.

Autonomous Driving Markus Maurer, J. Christian Gerdes, Barbara Lenz, Hermann Winner, 2016-05-21 This book takes a look at fully automated, autonomous vehicles and discusses many open questions: How can autonomous vehicles be integrated into the current transportation system with diverse users and human drivers? Where do automated vehicles fall under current legal frameworks? What risks are associated with automation and how will society respond to these risks? How will the marketplace react to automated vehicles and what changes may be necessary for companies? Experts from Germany and the United States define key societal, engineering, and mobility issues related to the automation of vehicles. They discuss the decisions programmers of automated vehicles must make to enable vehicles to perceive their environment, interact with other road users, and choose actions that may have ethical consequences. The authors further identify expectations and concerns that will form the basis for individual and societal acceptance of autonomous driving. While the safety benefits of such vehicles are tremendous, the authors demonstrate that these benefits will only be achieved if vehicles have an appropriate safety concept at the heart of their design. Realizing the potential of automated vehicles to reorganize traffic and transform mobility of people and goods requires similar care in the design of vehicles and networks. By covering all of these topics, the book aims to provide a current, comprehensive, and scientifically sound treatment of the emerging field of “autonomous driving.”

Automotive Ergonomics Heiner Bubb, Klaus Bengler, Rainer E. Grünen, Mark Vollrath, 2021-10-19 Ergonomics teaches how to design technology in such a way that it is optimally adapted to the needs, wishes and characteristics of the user. In this context, the concept of the human-machine system has become established. In a systematic way and with a detailed view of the complicated technical and perceptual psychological and methodological connections, this book explains the basics of

automotive ergonomics with numerous examples. The application is shown in examples such as package, design of displays and control elements, of environmental ergonomics such as lighting, sound, vibrations, climate and smell. The design of driver assistance systems from an ergonomic perspective is also a central topic. The book is rounded off by methods of ergonomic vehicle development, the use of mock-ups, driving simulators and tests in real vehicles and prototypes. For the first time, those responsible in the automotive industry and in the field of relevant research are provided with a specialized systematic work that provides the ergonomic findings in the design of today's automobiles. This provides planners and designers of today's automobiles with concrete information for ergonomic product development, enabling them to keep an eye on decisive requirements and subsequent customer acceptance. This book is a translation of the original German 1st edition *Automobilergonomie* by Heiner Bubb, Klaus Bengler, Rainer E. Grünen & Mark Vollrath, published by Springer Fachmedien Wiesbaden GmbH, part of Springer Nature in 2015. The translation was done with the help of artificial intelligence (machine translation by the service DeepL.com). A subsequent human revision was done primarily in terms of content, so that the book will read stylistically differently from a conventional translation. Springer Nature works continuously to further the development of tools for the production of books and on the related technologies to support the authors.

Plug&Play Places Robert Nadler, 2014-10-08 In post-industrial societies more and more people earn an income in creative knowledge work, a highly flexible labour market segment that demands a geographically mobile workforce. Creative knowledge work is based on an understanding of language, culture and symbolic meanings. This can best be obtained through local and national embeddedness. Yet, this necessity for embeddedness stands in contrast to the demand in geographical mobility. How is this contradiction solved by individuals? What new forms of place attachment does this bring about? This book introduces a showcase of 25 multilocal creative knowledge workers, who live in different countries at the same time. It investigates how continuous mobility becomes part of their lifeworld, and how it changes their feelings of belonging and practices of place attachment. Applying an innovative methodological mix of social phenomenology, hermeneutics and mental mapping, this book takes a detailed look at biographies and the role of places in mobile lifeworlds. *Plug&Play Places* brings forth the idea that places have to be understood as individual items, which are configured and then plugged into the 'system' of the own lifeworld. They can be 'played' without great effort once an individual needs to make use of them. This new type of place attachment is a form of subjective standardization of place, which complements the well-known models of objective standardization of places. *Plug&Play Places* is relevant for scientists who deal with mobility and its impact on individual lifeworlds, with transnational multilocality and with flexibilized labour markets. Furthermore, the book provides a detailed qualitative perspective which can enrich the explanations of quantitative research in the same field. It is an interesting reading also for practitioners engaged in urban planning, housing and real estate development. Robert

Nadler holds a doctoral degree in Urban and Local European Studies from the University of Milan-Bicocca. He is a researcher at the Leibniz Institute for Regional Geography and published on creative industries, multilocality and labour mobility.

Vertical Urban Factory Nina Rappaport, 2019-12-30 This revised edition focuses on the spaces of production in cities-- both the modernist period and today--and the technologies that have contributed to shifts in factory architecture, manufacturing, and urban design. Vertical Urban Factory tracks the evolution of the vertical urban factory from the first industrial revolution to the present and provides an analysis of the political, social, and economic factors that have shaped today's global industrial landscape. Ultimately, it provokes new concepts for the future of urban manufacturing, and the necessity of creating new paradigms for sustainable, self-sufficient urban industry. Illustrated with historic and contemporary photographs, manufacturing process diagrams, and infographics by MGMT Design.

Traffic Psychology Today Pierre-Emmanuel Barjonet, 2013-03-14 After several decades of research, practice, intervention, and instruction, traffic psychology is in need of a summary work outlining the main trends in the discipline. Traffic Psychology Today provides a theoretical basis of the topic, a summary of the acquired research in the field, practical applications for government planners, and a critical discussion of future trends. Through a series of chapters contributed by an international group of researchers under the general editorship of Pierre Barjonet, Traffic Psychology Today comprehensively synthesizes thinking in the psychology of traffic from its inception in the mid 1950s through the present day.

Sacred Performances M. E. Combs-Schilling, 1989 With penetrating insight Combs-Schilling illuminates the remarkable survival of one of the world's oldest monarchies, still ruling after 1200 years. The author unravels the paradox of this ancient yet progressive institution that has weathered invasion, economic collapse, and colonial assault. The pillars of stability for which political analysts typically search -- military strength, bureaucratic control, and commercial prosperity -- have often been absent in Morocco, sometimes for centuries. How then has the monarchy stood firm? In this remarkable book, Combs-Schilling argues that the answer is to be found in the distinctive forms of ritual practice developed during times of great crises. Unique among Islamic governments, the Moroccan monarchy became central to the popular celebrations of the most sacred rituals of Islam, cloaking itself in their sanctity. Combs-Schilling breaks new ground in thinking about ritual. The author explores the consequences of the replication and reinforcement of Morocco's national ceremonies in villages and homes and the metaphorical equivalence thereby built. The author outlines how ritual metaphors simultaneously fuse the monarchy with the hallowed prophets of Islam and the mundane structures of family life. In elucidating the forcefulness of ritual embodiment the book challenges anthropological theory. It demonstrates that rituals created realities by inscribing them deeply within the individual's body and mind. Rituals use eros and physical substance to build imaginative abstractions.

Performances of exquisite beauty and grace make the monarchy intrinsic to definitions of male and female, to experience of birth, intercourse, death, and to the ultimate longing to break death's bonds. Combs-Schilling creates a model for national political analysis that takes meaning as well as strategic power into account. The author applies the anthropological analysis of rituals to new arenas -- the nation-state and the world political economy -- without ever losing sight of the individual and the flow of daily life. The book clarifies a distinctive form of nationalism that expands the boundaries articulated by Anderson in *Imagined Territories*. Rituals rather than territory or administration came to define the Moroccan monarchy and the Moroccan nation under Western assault, and enabled them to survive. For the novice, the book provides an unusual and compelling entry into Islamic culture and history. Yet it is provocative for the expert in its reinterpretation of the strategic dimensions of Muhammad's marriages and the political potency of the rituals of Islam where power, sacrifice, and sexual identity converge. By revealing the link between national ceremony and individual identity, the author calls into question the popular view that sharply divides East and West and suggests commonalities in the structures of political-sexual power that are built into societies that operate within the cultural contexts of the world's three monotheistic faiths: Islam, Judaism, and Christianity.

Predicting Outdoor Sound Keith Attenborough, Timothy Van Renterghem, 2021-03-03 The second edition of *Predicting Outdoor Sound* is an up-to-date reference on the propagation of sound close to the ground and its prediction. New content includes comparisons between predictions and data for road traffic, railway and wind turbine noise; descriptions of source characteristics in the HARMONOISE model; propagation over rough seas, parallel low walls, and lattices; outlines of numerical methods; gabion (caged stones) and sonic crystal noise barriers; meteorological effects on noise barrier performance; and the prediction requirements for auralization. The book brings together relevant theories, prediction schemes, and data, thereby providing a basis for determining what model or scheme might be applicable for any situation. It also offers a background on useful analytical approximations and the restrictions, as well as difficulties and limitations associated with engineering prediction schemes. The text should be of considerable interest to researchers in outdoor sound propagation and, more generally, it should provide a comprehensive primer on the topic for lecturers, consultants and students in acoustics and noise control.

Banksy Ulrich Blanché, 2016-01-18 About this Book / Bristol born Banksy is usually categorized as a Street Artist, although his art, in content and form, transcends a narrow understanding of this term. This publication primarily deals with

Banksy as a contemporary Urban Artist and his relationship with consumer culture. It examines Banksy not only in light of his illicit work on the street, but also in regard to his gallery exhibitions. The study highlights representative works of his art, pieces which demonstrate his versatility, but also stand for different periods of his oeuvre. This book presents the first academic study of Banksy's art in English; with a history and discussion of the terms Graffiti, Street Art and Urban Art and a rich array of biographical information. It will be of interest to academics and the general public as well. About this Edition / Street Artist Banksy and former Young British artist Damien Hirst are two of the most popular representatives of British contemporary art. Situated in a triangle of art, consumerism and pop culture their work is among the most well-known. A systematic academic study of their artistic viewpoints and references to consumer culture has long been missing, and Ulrich Blanche is finally closing this gap: He examines Hirst's and Banksy's art against the background of the London art scene since 1980. Blanche points out connections to Duchamp, Warhol and Koons, and reflects on the role of the observer, the meaning of location and, especially, the references between art, consumer culture and marketing in their pieces. This two volume edition is the translated and expanded version of the authors dissertational thesis.

Designing Magazines Jandos Rothstein,2010-06-29 How does a designer create graphic solutions to the behind-the-scenes editorial challenges at a magazine? Designing Magazines is the complete guide to understanding the inner workings of magazines and their day-to-day management--and a great guide to using that knowledge to create visually stunning, editorially effective magazines, in both new designs and rebranding. Thirty-five experienced editors, designers, and consultants, all at the top of their fields, present their insights on the goals and process of magazine design. Chapters focus on problems faced by designers, ethical considerations, the future of the field, and many more relevant but rarely discussed issues. A look at magazines that have risen above the crowd to achieve special social importance--and how design has been a part of that success--provides additional inspiration for magazine designers everywhere. Allworth Press, an imprint of Skyhorse Publishing, publishes a broad range of books on the visual and performing arts, with emphasis on the business of art. Our titles cover subjects such as graphic design, theater, branding, fine art, photography, interior design, writing, acting, film, how to start careers, business and legal forms, business practices, and more. While we don't aspire to publish a New York Times bestseller or a national bestseller, we are deeply committed to quality books that help creative professionals succeed and thrive. We often publish in areas overlooked by other publishers and welcome the author whose expertise can help our audience of readers.

Monitoring Behavior and Supervisory Control T. Sheridan,2013-03-09 This book includes all papers presented at the International Symposium on Monitoring Behavior and Supervisory Control held at Berchtesgaden, Federal Republic of Germany, March 8-12, 1976. The Symposium was sponsored by the Scientific Affairs Division of the North Atlantic Treaty Organization, Brussels, and the government of the Federal Republic of Germany, Bonn. We believe the book constitutes an

important and timely status report on monitoring behavior and supervisory control by human operators of complex man-machine systems in which the computer is sharing key functions with the man. These systems include aircraft and other vehicles, nuclear and more conventional power plants, and processes for the manufacture of chemicals, petroleum, and discrete parts. By monitoring we mean the systematic observation by a human operator of multiple sources of information, e. g. , ranging from integrated display consoles to disparate live situations. The monitor's purpose is to determine whether operations are normal and proceeding as desired, and to diagnose difficulties in the case of abnormality or undesirable outcomes. By supervisory control we mean control by a human operator of a computer which, at a lower level, is controlling a dynamic system. In such systems, the computer-control normally operates continuously or at high data rates in loops closed through electromechanical sensors and motors. By contrast, the human operator normally signals or reprograms the computer intermittently or at a much slower pace. The human operator handles the higher level tasks and determines the goals of the overall system.

Pro-poor Growth Lukas Menkhoff,2006 The embarrassing living conditions of more than one billion poor people in developing countries in combination with the increasing gap of living standards between the poor and the rich, has provided a strong motivation for development policy to change this situation. From its beginning, policy has aimed for stimulating economic growth in order to improve living conditions for everyone. The endurance of poverty, however, has motivated to extend the traditional »growth is good for the poor« by a more targeted policy that combines growth with a particular emphasis on improving the situation of the poor. This is exactly the objective of »pro-poor growth«, a term that became popular during the late 1990s and which seemed to dominate the stage with the propagation of the Millennium Development Goals, including its goal to halve poverty by 2015. This volume contains six papers that address various core issues of pro-poor growth policies. These papers were presented at the annual meeting of the Research Committee Development Economics (Ausschuss Entwicklungsländer des Vereins für Socialpolitik) in 2005. Papers were lively discussed at the meeting and later on improved by comments from anonymous referees. All authors have done extensive research in the field of pro-poor growth, including field studies. Accordingly, their contributions - reflecting this knowledge and proficiency - pick up recent developments in the field. The discussion of most appropriate pro-poor growth policies is an ongoing process which has been documented by a growing literature. The value added of the present volume is obviously not to be more comprehensive than others but rather to continue the line of work by bringing some recent research findings - with a focus on policy relevance and empirical substantiation - to a broader audience.

Ageing and Transport Mobility Needs and Safety Issues OECD,2001-10-25 This report on the mobility needs and safety problems of ageing populations dispels many of the myths and misperceptions commonly held regarding elderly road users, and offers policy and research recommendations to provide for their safe, lifelong mobility.

Foundations of Probabilistic Logic Programming Fabrizio Riguzzi,2023-07-07 Since its birth, the field of Probabilistic Logic Programming has seen a steady increase of activity, with many proposals for languages and algorithms for inference and learning. This book aims at providing an overview of the field with a special emphasis on languages under the Distribution Semantics, one of the most influential approaches. The book presents the main ideas for semantics, inference, and learning and highlights connections between the methods. Many examples of the book include a link to a page of the web application <http://cplint.eu> where the code can be run online. This 2nd edition aims at reporting the most exciting novelties in the field since the publication of the 1st edition. The semantics for hybrid programs with function symbols was placed on a sound footing. Probabilistic Answer Set Programming gained a lot of interest together with the studies on the complexity of inference. Algorithms for solving the MPE and MAP tasks are now available. Inference for hybrid programs has changed dramatically with the introduction of Weighted Model Integration. With respect to learning, the first approaches for neuro-symbolic integration have appeared together with algorithms for learning the structure for hybrid programs. Moreover, given the cost of learning PLPs, various works proposed language restrictions to speed up learning and improve its scaling.

UXL Encyclopedia of Science Amy Hackney Blackwell,2014-12-15 What is a biome? How does rain form? Is a turtle a reptile or an amphibian? Can corn fuel a car? These questions and more can be answered using the U*X*L Encyclopedia of Science. This alphabetically organized ten-volume set opens up the entire world of science in clear, nontechnical language. Its comprehensive coverage of science topics taught in middle school science curricula and outlined in the Next Generation Science Standards makes it the perfect science reference solution for middle schools with limited budgets looking for a one stop resource. Entries from the previous edition of this title are also noted in appendix B of the English Language Arts Common Core Standards as being good examples of content that can be used to help teach the skills needed to read and digest non-fiction informational text. This resource is comprised of 800 entries that focus on a single topic, and range from 250 to 2,500 words. Many of these entries also feature helpful sidebar boxes that define key terms in that entry, as well as full-color images, charts and tables. There is also a secondary Table of Contents that organizes the articles under the scientific field that they fall under in order to aid instructors in easily identify useful content to aid in their teaching. This design and scope of coverage helped the previous edition of this title win Booklist's 20 Best Bets for Student Researchers in 2002. With the advent of the Next Generation Science Standards and the other changes in curricular focus of middle school

science, it was time to update and expand the coverage of the U*X*L Encyclopedia of Science to better meet the needs of students and teachers. With this in mind, we have reviewed all of the entries from the previous edition, and updated them as necessary. We have also added 200 new entries to broaden the scope of this title to include more biographical entries on groundbreaking scientists and science topics currently in the news (i.e. genetically modified organisms).
