Beyond Assessment of Quality of Life in Schizophrenia A. George Awad, Lakshmi N.P. Voruganti, 2016-06-14 This book fills a significant research gap in how to integrate quality of life data into relevant clinical care plans, and to broaden its applicability to pharmacoeconomic studies of antipsychotic medications and health policy decision-making. It also presents an argument for reformulating the concept of health-related quality of life in schizophrenia as a bio-psycho-social construct, which provides an opportunity to better explore the many factors underpinning the concept itself. Internationally renowned experts from different scientific backgrounds and scopes of expertise each make arguments for the need to invigorate quality of life as a concept in schizophrenia, by broadening its usefulness for clinical and research efforts. The book represents an important addition to the extensive contributions of its editors, Dr. A. George Awad and Dr. Lakshmi N.P. Voruganti, to the field of quality of life.

Good Strategy/Bad Strategy Richard Rumelt,2011-06-09 When Richard Rumelt's Good Strategy/Bad Strategy was published in 2011, it immediately struck a chord, calling out as bad strategy the mish-mash of pop culture, motivational slogans and business buzz speak so often and misleadingly masquerading as the real thing. Since then, his original and pragmatic ideas have won fans around the world and continue to help readers to recognise and avoid the elements of bad strategy and adopt good, action-oriented strategies that honestly acknowledge the challenges being faced and offer straightforward approaches to overcoming them. Strategy should not be equated with ambition, leadership, vision or planning; rather, it is coherent action backed by an argument. For Rumelt, the heart of good strategy is insight into the hidden power in any situation, and into an appropriate response - whether launching a new product, fighting a war or putting a man on the moon. Drawing on examples of the good and the bad from across all sectors and all ages, he shows how this insight can be cultivated with a wide variety of tools that lead to better thinking and better strategy, strategy that cuts through the hype and gets results.

Drug-Induced Headache Hans-Christoph Diener, Marcia Wilkinson, 2012-12-06 M. WILKINSON Patients with frequent or daily headaches pose a very difficult problem for the physician who has to treat them, particularly as many patients think that there should be a medicine or medicines which give them instant relief. In the search for the compound which would meet this very natural desire, many drugs have been manufactured and the temptation for the physician is either to increase the dose of a drug which seems to be, at any rate, partially effective, or to add one or more drugs to those which the patient is already taking. Although there have been some references to the dangers of overdosage of drugs for migraine in the past,

it was not until relatively recently that it was recognized that drugs given for the relief of headache, if taken injudiciously, may themselves cause headache. The first drugs to be implicated in this way were ergotamine and phenazone. In the case of ergotamine tartrate, the dangers of ergotism were well known as this was a disorder which had been known and written about for many years. In the treatment of headache, fully blown ergotism is rare and in recent years has usually been due to self-medication in doses much greater than those prescribed although there are a few recorded cases where toxic amounts have been given.

Reimagining Global Health Paul Farmer, Arthur Kleinman, Jim Kim, Matthew Basilio, 2013-09-07 Bringing together the experience, perspective and expertise of Paul Farmer, Jim Yong Kim, and Arthur Kleinman, *Reimagining Global Health* provides an original, compelling introduction to the field of global health. Drawn from a Harvard course developed by their student Matthew Basilio, this work provides an accessible and engaging framework for the study of global health. Insisting on an approach that is historically deep and geographically broad, the authors underline the importance of a transdisciplinary approach, and offer a highly readable distillation of several historical and ethnographic perspectives of contemporary global health problems. The case studies presented throughout *Reimagining Global Health* bring together ethnographic, theoretical, and historical perspectives into a wholly new and exciting investigation of global health. The interdisciplinary approach outlined in this text should prove useful not only in schools of public health, nursing, and medicine, but also in undergraduate and graduate classes in anthropology, sociology, political economy, and history, among others.

Pocket Book for Simulation Debriefing in Healthcare Denis Oriot, Guillaume Alinier, 2017-09-25 This book is a concise manual on debriefing techniques in a clinical educational context. It presents the most popular debriefing techniques and, hence, can be used as a reference manual by educators to help them achieve their intended debriefing objectives. The overarching objective of debriefing is to promote reflection and improve patient safety awareness at an individual and a team level. This book provides clear explanations of what constitutes a valuable and effective debriefing, and presents the various approaches that can be used and how debriefing differs from feedback. It includes key recommendations on aspects that directly or indirectly impact debriefing with different populations of learners such as students or qualified healthcare professionals of various levels of seniority. This book can also be used as a survival guide for both simulation educators and clinicians during debriefings. It includes several useful sections explaining the different phases of a debriefing session, which help learners develop and consolidate their knowledge, and identify potential knowledge or performance gaps and near misses. The underlying philosophy of this book is to also promote profound respect for the trainee by using a non-offensive debriefing approach. Debriefing facilitators will appreciate the several key sentences that will help them lead and engage their learners in the various phases of expressing their emotions and analyzing their experience and actions.

The Dare Harley Laroux,2023-10-31 Jessica Martin is not a nice girl. As Prom Queen and Captain of the cheer squad, she'd ruled her school mercilessly, looking down her nose at everyone she deemed unworthy. The most unworthy of them all? The freak, Manson Reed: her favorite victim. But a lot changes after high school. A freak like him never should have ended up at the same Halloween party as her. He never should have been able to beat her at a game of Drink or Dare. He never should have been able to humiliate her in front of everyone. Losing the game means taking the dare: a dare to serve Manson for the entire night as his slave. It's a dare that Jessica's pride - and curiosity - won't allow her to refuse. What ensues is a dark game of pleasure and pain, fear and desire. Is it only a game? Only revenge? Only a dare? Or is it something more? The Dare is an 18+ erotic romance novella and a prequel to the Losers Duet. Reader discretion is strongly advised. This book contains graphic sexual scenes, intense scenes of BDSM, and strong language. A full content note can be found in the front matter of the book.

The Crush Syndrome (and Lessons Learned from the Marmara Earthquake) Mehmet Şükrü Sever,2005 ARF induced by traumatic rhabdomyolysis and crush syndrome is a well-known complication occurring in the wake of natural or manmade disasters. As a matter of fact, it is the second most frequent cause of death, following the direct traumatic impact. Early recognition of the crush syndrome and rapid initiation of fluid replacement is essential as this can dramatically reduce the incidence of ARF. After the Marmara earthquake of 1999, the Turkish Society of Nephrology, in collaboration with the

Renal Disaster Relief Task Force of the International Society of Nephrology, prepared special questionnaires to obtain patient data and follow-up information to analyze the extent of the nephrological problems. This book is based on the 639 cases consequently documented, constituting an unprecedented collection of first-hand experience on crush syndrome-related ARF following earthquakes. In addition to the data / analysis gained from the Marmara earthquake, each chapter also summarizes classical information on crush syndrome. In every major natural catastrophe, a rapid, appropriate and effective international response is essential to minimize losses and be able to adequately treat victims. This can be achieved only by rational planning and the establishment of an infrastructure composed of trained personnel, equipment, supplies and transportation that can be mobilized at a few hours' notice is essential. This book has been written with the intent to make use of the experiences made after the Marmara earthquake to save more lives in similar future disasters.
