The Enzyme Treatment of Cancer and Its Scientific Basis John Beard, 2010-01-01 In 1902, the scientist John Beard, at the time Professor at the University of Edinburgh, proposed that the pancreatic enzyme trypsin represents the body's primary defense against cancer and would be useful as a cancer treatment. Despite his documentation and reputation, he was nominated for the Nobel Prize in 1906 for his work in embryology, but most cancer experts rejected Beard's thesis outright. However, not everyone dismissed Beard. A number of physicians employed pancreatic enzymes in the treatment of patients diagnosed with advanced cancer, often with remarkable results as reported in the scientific literature. These successes provoked a heated debate about the therapy in the first decade of the 20th century. In 1911 Beard published *The Enzyme Treatment of Cancer and Its Scientific Basis*, outlining his hypothesis, and the compelling results. Though published to some very positive reviews, the book was soon forgotten as the scientific community enthusiastically latched on to Madame Curie's claim that radiation represented a simple non-toxic cure for cancer. It would be years before scientists realized radiation cured few cancers and was quite toxic, and Madame Curie herself died as a result of her exposure to uranium. Though Beard died in relative obscurity in 1924, contemporary evidence from molecular biology confirms many of his precepts. In 2010, nearly 100 years since publication of this book, it is time Beard's work be reread. With billions of dollars spent in recent decades on cancer research with only slight success, Beard's thesis warrants a thorough reconsideration.

What Went Wrong Nicholas J. Gonzalez, 2012 In 1998, Nicholas Gonzalez, M.D. received National Cancer Institute approval for a clinical trial to evaluate his nutritional-enzyme approach in the treatment of patients with pancreatic cancer. Though Dr. Gonzalez hoped the venture would initiate an era of cooperation between conventional scientists and serious alternative researchers, problems plagued the study from its beginning. The design discouraged patient participation; conventional oncologists discouraged patients from joining and at times pressured those already admitted for nutritional therapy to change to more conventional treatment. Then in 2000 the NCI insisted that all patient selection decisions be turned over to the Principal Investigator, who as it turned out helped develop the chemotherapy protocol used as the control treatment. Repeatedly, the Principal Investigator approved patients for the nutritional treatment who did not meet the entry requirements, or who were too ill or uncommitted to follow the self-administered regimen. An evaluation by government scientists in early 2005 confirmed that so many patients had failed to follow the prescribed nutritional therapy that the data

had little meaning. Despite such problems, without Dr. Gonzalez's knowledge the Principal Investigator published an article implying the study was properly run, patients complied fully and that the nutritional therapy had no effect. In response, Dr. Gonzalez, a former journalist, has written *What Went Wrong*, to bring the truth of this project to light, and show how bias, indifference, and at times incompetence undermined a promising research effort that, if properly run, might have ushered in a new direction in cancer treatment.

One Man Alone Nicholas J. Gonzalez, 2010

The Trophoblast and the Origins of Cancer Nicholas J. Gonzalez, Linda L. Isaacs, 2009-01-01 This groundbreaking analysis reveals how more than 100 years ago, the English scientist Dr. John Beard uncovered not only the likely origins of cancer but also its solution. Dr. Gonzalez explains Dr. Beard's underlying theory and explores Dr. Beard's pioneering use of pancreatic enzymes for cancer treatment. This book also showcases case histories describing cancer patients successfully treated with pancreatic enzymes by the authors. Dr. Beard's achievements, though unappreciated in his own day, are many. A research embryologist by training, he proposed that the early mammalian placenta, or trophoblast, the connection between the embryo and the maternal uterine blood supply, represents an ideal model for the study of malignancy. In its ability to divide rapidly, invade maternal tissues, and generate a blood supply, the trophoblast, Beard reasoned, initially behaves as any growing tumor might. However, the trophoblast differs from malignancy, Beard stated, because at some predetermined point it changes from an invasive tissue into the non-aggressive placenta, necessary for early embryonic life. Beard spent years searching for the key to this remarkable transformation, ultimately discovering that the very day the trophoblast changes character, the embryonic pancreas begins secreting large amounts of enzymes. Beard then proposed that since pancreatic enzymes regulate trophoblast growth, they must represent our main defense against cancer. Subsequently, in animal experiments and in clinical use with human cancer patients, Beard demonstrated pancreatic enzymes could attack and destroy cancerous tumors. In this book, you will read of Dr. Beard's discoveries, and how modern science confirms much of what he long ago proposed. Along the way, you will learn that Dr. Beard discovered stem cells, the focus of much research effort today, though he never received proper credit. And you will see that Dr. Beard may have uncovered the key to the deadly

Enzyme Nutrition Edward Howell, 1995-01-01 Why is eating food in its natural state, unprocessed and unrefined, so vital to the maintenance of good health? What is lacking in our modern diet that makes us so susceptible to degenerative disease? What natural elements in food may play a key role in unlocking the secrets of life extension? These fascinating questions, and many more, are answered in *Enzyme Nutrition*. Written by one of America's pioneering biochemists and nutrition researchers, Dr. Edward Howell, *Enzyme Nutrition* presents the most vital nutritional discovery since that of vitamins and minerals—food enzymes. Our digestive organs produce some enzymes internally, however food enzymes are

necessary for optimal health and must come from uncooked foods such as fresh fruits and vegetables, raw sprouted grains, unpasteurized dairy products, and food enzyme supplements. Enzyme Nutrition represents more than fifty years of research and experimentation by Dr. Howell. He shows us how to conserve our enzymes and maintain internal balance. As the body regains its strength and vigor, its capacity to maintain its normal weight, fight disease, and heal itself is enhanced.

TOX-SICK Suzanne Somers, 2015-04-14 "It's as if we are all on a big, chemical drunk, and the hangover is a killer."

—Suzanne Somers, in *TOX-SICK* Pioneering health and wellness advocate, Suzanne Somers, delivers a powerful answer in this expose on the immediate and long-term dangers of living in a world that has become increasingly toxic to our health. The build-up of toxins in our bodies can lead to myriad health concerns — including weight gain, food allergies, brain disorders, cancer, among many others. Conquering Cancer: Volume One Nicholas Gonzalez, 2016-09-29 This cancer case report series documents the effectiveness of the nutritional/enzyme cancer treatment designed by Nicholas J. Gonzalez, MD. The book provides an in-depth analysis of the Gonzalez Protocol in both theory and practice, with fifty representative patients with biopsy-proven pancreatic or breast cancer. This pioneering book includes patients diagnosed with a poor prognosis or terminal malignancies who did well under Dr. Gonzalez's care. Conquering Cancer: Volume Two was published in 2017 and includes 19 additional types of cancer. These two volumes of Conquering Cancer are the culmination of Dr. Gonzalez's twenty-eight-year medical career, as he died suddenly and unexpectedly in July 2015. This book is now available to all those with an interest in cancer in general, the enzyme treatment of cancer in particular, alternative medicine, and The Gonzalez Protocol®. Note: this is NOT a how-to book for self-treatment.

Thrivers Soup Heidi Bright, 2016-01-20 Cancer patients seeking to integrate meaningful spirituality with practical healing solutions can now feast on a comprehensive blend of self-care options. This book provides a variety of holistic strategies for cushioning chemotherapy and softening surgery while empowering readers to grow in consciousness. Each of more than 250 topics begins with an inspirational quote from one of the world's wisdom traditions, offers a story to foster self-care and personal transformation, and concludes with a useful tip. With passion, authenticity, and a dash of humor, this book courageously addresses medical topics such as "Finding Chemo," "Hair Pieces: Turbanator," and "Recovery: Master the Possibilities." Holistic care entries include "Nutrient Density: Thrivers Soup," "Shadow Work: Dark Night Rises," and "Field of Dreams." Explore these restorative ingredients to enhance your nutritional choices, stimulate your creative juices, foster your personal powers to transform mentally and emotionally, and deepen your connection with others and the Divine.

Therapeutic Enzymes: Function and Clinical Implications Nikolaos Labrou, 2019-09-03 Therapeutic enzymes exhibit fascinating features and opportunities, and represent a significant and promising subcategory of modern biopharmaceuticals for the treatment of several severe diseases. Research and drug developments efforts and the advancements in biotechnology over the past twenty years have greatly assisted the introduction of efficient and safe enzyme-based therapies for a range of both rare and common disorders. The introduction and regulatory approval of twenty different recombinant enzymes has enabled effective enzyme-replacement therapy. This volume aims to overview these therapeutic enzymes, focusing in particular on more recently approved enzymes produced by recombinant DNA technology. This volume is composed of four sections. Section 1 provides an overview of the production process and biochemical characterization of therapeutic enzymes, while Section 2 focuses upon the engineering strategies and delivery methods of therapeutic enzymes. Section 3 highlights the clinical applications of approved therapeutic enzymes, including aspects on their structure, indications and mechanisms of action. Together with information on these mechanisms, safety and immunogenicity issues and various adverse events of

the recombinant enzymes used for therapy are discussed. Section 4, provides discussion on the prospective and future developments of new therapeutic enzymes. This book is aimed at academics, researchers and students undertaking advanced undergraduate/postgraduate programs in the biopharmaceutical/biotechnology area who wish to gain a comprehensive understanding of enzyme-based therapeutic molecules.

Intelligent Medicine Ronald L. Hoffman,1997-08-29 For the 74 million people in their late thirties and early forties, *Intelligent Medicine* presents the complete spectrum of health-care options. Ronald Hoffman, who specializes in integrating conventional and alternative medicine, discusses each major system in the body and offers preventive techniques and treatment options for common ailments in *Intelligent Medicine*.

Intestinal Lipid Metabolism Charles M. Mansbach II,Patrick Tso,Arnis Kuksis,2011-06-28 This book was stimulated by the enthusiasm shown by attendees at the meetings in Saxon River, VT, sponsored by the Federation of American Societies for Experimental Biology (FASEB), on the subject of the intestinal processing of lipids. When these meetings were first started in 1990, the original organizers, two of whom are editors of this volume (CMM and PT), had two major goals. The first was to bring together a diverse group of investigators who had the common goal of gaining a better understanding of how the intestine absorbs lipids. The second was to stimulate the interest of younger individuals whom we wished to recruit into what we believed was an exciting and fruitful area of research. Since that time, the field has opened up considerably with new

questions being asked and new answers obtained, suggesting that our original goals for the meetings were being met. In the same spirit, it occurred to us that there has not been a recent book that draws together much of the information available concerning how the intestine processes lipids. This book is intended to reach investigators with an interest in this area and their pre- and post doctoral students. The chapters are written by individuals who have a long-term interest in the areas about which they write, and many have been speakers at the subsequent FASEB conferences that have followed on the first.

How Cancer Saved Me Wanda Hail, 2016-11-02 *How Cancer Saved Me: A One Year Diary of a Cancer Overcomer* is a detailed account of Melbourne music teacher Wanda Hail and her experiences with breast cancer and rheumatoid arthritis. Diagnosed with invasive ductal carcinoma in 2015, Wanda embarked on a journey of meticulous research into diet, health and the medical system. In her diary she shares a wide range of experiences, from the very 'normal' days with her family and friends, to detailed analyses of many different foods, therapies and medical techniques, plus summaries of seminars, books and video presentations. Woven through the entire diary is her unwavering faith, which ultimately brings her to the place where she can call herself a 'cancer overcomer'. Her courageous decision to eschew traditional treatment methods and embrace a healthy diet, lifestyle and spiritual outlook makes this diary inspirational literature for all ages. Also included are sections with recipes, music pieces and a useful index.

Prostate Cancer Jane Plant, 2012-03-31 Following the international success of *Your Life in Your Hands*, the groundbreaking book on breast cancer, Professor Jane Plant explains how her diet and lifestyle plan can be used to combat prostate cancer. This revised and updated edition includes new information to help those with other types of cancer, such as colorectal cancer and testicular cancer. In this groundbreaking book, Professor Plant illuminates the relationship between cancer and diet. The book explains the science behind the 'no dairy' diet and then gives useful advice on diet and lifestyle to maximise your health and avoid contracting cancer. For sufferers, their families and anyone who is concerned about the risk of cancer, this book is essential.

Living Proof Michael Gearin-Tosh, 2010-05-11 I was told I had cancer and that I must expect to die soon. Almost eight years later I still do my job and enjoy life. I have not had conventional treatment. Did my cancer simply disappear? Did I do nothing? Far from it. A number of things happened, some by accident, most by design. Michael Gearin-Tosh is diagnosed with cancer at the age of fifty-four. The doctors urge immediate treatment. He refuses. Intuitively, not on the basis of reason. But as the days pass, Gearin-Tosh falls back on his habits as a scholar of literature. He begins to probe the experts' words and the meaning behind medical phrases. He tries to relate what each doctor says -- and does not say -- to the doctor's own temperament. And the more questions he asks, the more adamant his refusal to be hurried to treatment. The delay is a high-risk gamble. He listens to much advice, especially that of three women friends, each with a different point of view, one a

doctor. They challenge him. They challenge medical advice. They challenge one another. On no occasion do they speak with one voice. He also turns to unexpected guides within his own memory and in the authors he loves, from Shakespeare and Chekhov to Jean Renoir, Arthur Miller, and Václav Havel. In the end, he chooses not to have chemotherapy but to combat his cancer largely through nutrition, vitamin supplements, an ancient Chinese breathing exercise with imaginative visualizations, and acupuncture. No how-to book or prescriptive health guide, *Living Proof* is a celebration of human existence and friendship, a story of how a man steers through conflicting advice, between depression and seemingly inescapable rationalism, between the medicine he rejects and the doctors he honors. Clear-eyed and unflinching, Gearin-Tosh even includes his own medical history, *The Case of the .005% Survivor*; explores general questions about cancer; and examines the role of individual temperament on medical attitudes, the choice of treatments, and, of course, survival.

In the Long Run Jim Axelrod, 2011-05-10 It's 2008. Jim Axelrod—once among the most watched correspondents on network news and the first television reporter to broadcast from Saddam International Airport in 2003—is covering the final stages of the race for the Democratic presidential nomination. He's forty-five years old and thirty pounds overweight. He's drinking too much, sleeping too little, and scarcely seeing his family. He's just figured out that the industry that pulled him up the corporate ladder is imploding as he's reaching for its final rungs. Then, out of the blue, Jim discovers his late father's decades-old New York Marathon finish times. At forty-six, Bob Axelrod ran a 3:29:58. With everything else going on in his life, Jim sets himself a defining challenge: Can I beat him? So begins a deeply felt, often hilarious, quixotic effort to run the 2009 New York Marathon. Along the way, Jim confronts his listing marriage, a career upset by the seismic changes going on throughout the television news industry, excruciatingly painful shin splints, and the worst-timed kidney stone possible. Looming over it all is the shadow of a loving father, who repeatedly lost his way in life but still has a lesson to impart. This is a book about a dead father's challenge to a son at a crossroads, but, more than that, it is about the personal costs paid when ambition and talent are not enough to ensure success. Most fundamentally, though, it is a book about learning what it takes to be happy in your own skin.

Your Life In Your Hands Jane Plant, 2012-01-31 Professor Jane Plant's international bestseller on combating breast cancer through diet and lifestyle changes has been fully revised and updated, including new information on ovarian cancer and other types of cancer. In this groundbreaking book, Professor Plant details her own experiences of suffering with breast cancer, and how she learnt of the relationship between cancer and diet. The book explains the science behind the 'no dairy' diet and gives practical advice on how diet and lifestyle changes can help prevent and overcome breast and ovarian cancer. For sufferers, their families and anyone who is concerned about the risk of cancer, this book is essential reading.
