VIVIR CON INSUFICIENCIA RENAL Lola Montalvo Carcelén,Ana Hidalgo Pérez,2015-12-23 Esta obra, Vivir con insuficiencia renal es una obra original, útil, que puede resultar una magnífica herramienta de consulta para un colectivo que, por regla general, tiene difícil la tarea de llevar una vida cotidiana de forma satisfactoria, por las muchas restricciones que los tratamientos les imponen en hábitos básicos de la vida cotidiana, como ingerir ciertos alimentos o beber líquidos... Demasiadas veces los únicos que saben cómo llevar el día a día de una enfermedad crónica (y más las enfermedades renales) son los mismos enfermos, que llegan a ser expertos en su propio cuidado. Ana Hidalgo, como enferma experta, junto a Lola Montalvo, enfermera y cuidadora de un enfermo ERC, han realizado esta guía para ayudar a otros enfermos ERC a que den respuesta a sus dudas y puedan aprender a cuidarse por sí mismos, pudiendo llevar una vida saludable, plena y sin angustias derivadas de preguntas sin respuesta. Este libro es una herramienta única en este sentido.

Dietoterapia, nutrición clínica y metabolismo Daniel De Luis Román,Diego Bellido Guerrero,Pedro Pablo García Luna,2012-09-15 Obra multiautorial, escrita por más de 90 especialistas de España. Este libro además de revisar ampliamente la obesidad, la diabetes, lípidos y tensión arterial, hace hincapié en las patologías que frecuentemente pueden llevar diferentes grados de desnutrición (patología digestiva, neurológica, oncológica, quirúrgica, infecciosa, traumatológica, etc.). Sin olvidar las peculiaridades de la nutrición en las diversas etapas de la vida y las nuevas tecnologías disponibles para nutrir al paciente de manera artificial en situaciones límite (vías de acceso, formulaciones, etc.). Este último aspecto ha producido el desarrollo de problemas éticos e incluso legales que se desarrollan también en la obra. Igualmente es importante un apartado nuevo en esta edición, como es la Gestión e innovación en las Unidades de Nutrición Clínica para llegar a utilizar en la práctica clínica todo ese conocimiento existente e incluso desarrollar nuevas vías de investigación. Este libro se acompaña de un CD con toda la información gráfica plasmada en el mismo, así como un programa informático que sin duda facilitará la aplicación del arte de la nutrición. INDICE: Dietoterapia. Alteraciones de la energía. Hidratos de carbono. Proteínas y aminoácidos. Lípidos. Metabolismo. Nutrición en patología del tubo digestivo. Patologías específicas. Nutrición en oncología. Dietas en situaciones especiales. Soporte nutricional avanzado. Nutrición en pediatría. Nutrición y aspectos legales.

Food Composition Data H. Greenfield,2012-11-02 About twenty years ago, there was a recognition in Europe that real benefits would flow from coordinating the manner in which food composition tables were produced in the various countries of Europe. Subsequent development of computerised nutritional data bases has further highlighted the potential advantages of working together. Such cooperation could lead to improved quality and compatibility of the various European nutrient data bases and the values within them. This realisation was one of the driving forces behind the development of the Eurofoods initiative in the 1980's when those people in Europe interested in data on food composition began working together. This initiative received further impetus with the establishment of the Eurofoods-Enfant Concerted Action Project within the framework of the FLAIR (Food-Linked Agro-Industrial Research) Programme of the Commission of the European Communities. It was quickly recognised that the draft guidelines for the production, management and use of food composition data which had been prepared under the aegis of INFOODS (International Network of Food Data Systems, a project of the United Nations University), would be especially applicable to the objectives of the Concerted Action. The guidelines have been written by two recognised experts. Many people associated with FLAIR Eurofoods-Enfant have added constructive criticism and advice to that offered previously by those associated with INFOODS. Thus the guidelines are backed by a consensus in the community of those responsible for the production and use of food composition tables and nutrient data bases.

Manual on Methodology for Food Consumption Studies Margaret Cameron,Wija A. van Staveren,1988 Designed for international use, this reference manual surveys all aspects of food consumption studies: determining the purpose and design of the study, methods of data collection, analyses and interpretation of data, and presentation of results in appropriate form for study and decision-making. The methods for measuring food intake are clearly and thoroughly described, making this component available to scientists and researchers in related fields of biomedical sciences, internal medicine, dietetics, epidemiology, and public policy.

Obesidad: Un enfoque desde el conocimiento Fernando Quiroz,2021-04-26 La obesidad se ha triplicado en el mundo, ya para 2016 más de 1900 Millones de adultos tenían sobrepeso y más de 650 Millones sufrían de obesidad y el número continúa aumentando. La obesidad se asocia múltiples enfermedades crónicas como la diabetes tipo 2, el síndrome de apnea obstructiva del sueño, la hipertensión arterial, la enfermedad cardiovascular y algunos tipos de cáncer. Cada día aparecen dietas, medicamentos y tratamientos mágicos que no funcionan, adicionando frustración a la ya pesada carga que significa la obesidad. El doctor Fernando Quiroz Romero, es Médico Especialista en Cirugía de la Universidad de Valle en Cali-Colombia. Es miembro de importantes sociedades científicas nacionales e internacionales como la Asociación Colombiana de Cirugía, Asociación Colombiana de Obesidad y Cirugía Bariátrica, The American Colleague of Surgeon, The American Society for Metabolic and Bariatric Surgery, The International Federation for the Surgery of Obesity and Metabolic Disorders, entre otras. Desde 2004 está dedicado a la Cirugía de obesidad. Su contacto directo con miles de pacientes le ha mostrado la frustración que día a día viven en su lucha contra la obesidad y lo vulnerables que se encuentra frente a falsa publicidad y a charlatanes que ofrecen soluciones mágicas. Obesidad, Un enfoque desde el conocimiento, te brindará información y conocimientos necesarios no solo para comprender el problema, saber cómo prevenirlo o enfrentarlo, sino para no caigas en la trampa de tratamientos ilusorios. Cuando termines de leer Obesidad, Un enfoque desde el conocimiento, tendrás las herramientas necesarias para encontrar tu propio camino a una vida más saludable. “El conocimiento os hará libres” Sócrates

Meat Science R. A. Lawrie,2013-10-22 Meat Science, Fourth Edition focuses on the science of meat, from the initiation of life in the meat animal to the absorption of its nutrients by the human consumer. This edition updates the topics on hormonal control of reproduction and growth, pre-slaughter stress, modes of stunning and bleeding, refrigeration, eating quality, and consumer health. A section has been added on the electrical stimulation of carcasses post-mortem, emphasizing the differing

susceptibility of individual muscles to cold shock on the one hand and to undergo conditioning changes on the other. The developments, such as the mechanical recovery of meat, its modification by high pressure, its reformation after controlled comminution, and incorporation with it of proteins from abattoir waste or non-meat sources are also elaborated in this book. This publication is beneficial to students and individuals researching on the food science of meat.

Medicinal Plants in Tropical West Africa Bep Oliver-Bever,1986-01-23 First published in 1986, this book describes the most important medicinal plants in tropical West Africa and similar humid tropical climates. After a short introduction about early traditional medicine, the bulk of the book gives an account of locally occurring plants, grouped by their medicinal actions. Plants that affect the cardiovascular and nervous systems are discussed, as are those with antibiotic, insecticidal and molluscicidal properties. Those which affect the hormonal systems of humans are catalogued and so are others that act as adrenal-cortex, sex and thyroid hormones. There is a full botanical index, which includes the commonly found synonyms for many of the plants and the work is illustrated by the author's own water colours. It may be of particular interest and use to pharmacists, biochemists, botanists and pharmacologists and of great value to those who exploit locally available resources in treating diseases in tropical areas.

Analytical Chemistry of Foods C.S. James,2013-12-01 Food laws were first introduced in 1860 when an Act for Preventing the Adulteration of Articles of Food or Drink was passed in the UK. This was followed by the Sale of Food Act in 1875, also in the UK, and later, in the USA, by the Food and Drugs Act of 1906. These early laws were basically designed to protect consumers against unscrupulous adulteration of foods and to safeguard consumers against the use of chemical preservatives potentially harmful to health. Subsequent laws, introduced over the course of the ensuing century by various countries and organisations, have encompassed the features of the early laws but have been far wider reaching to include legislation relating to, for example, specific food products, specific ingredients and specific uses. Conforming to the requirements set out in many of these laws and guidelines requires the chemical and physical analysis of foods. This may involve qualitative analysis in the detection of illegal food components such as certain colourings or, more commonly, the quantitative estimation of both major and minor food constituents. This quantitative analysis of foods plays an important role not only in obtaining the required information for the purposes of nutritional labelling but also in ensuring that foods conform to desired flavour and texture quality attributes. This book outlines the range of techniques available to the food analyst and the theories underlying the more commonly used analytical methods in food studies.
