Perspectives on Pragmatics and Philosophy Alessandro Capone, Franco Lo Piparo, Marco Carapezza, 2013-11-26 This book is about the pragmatics of language and it illustrates how pragmatics transcends the boundaries of linguistics. This volume covers Gricean pragmatics as well as topics including: conversation and collective belief, the norm of assertion, speech acts, what a context is, the distinction between semantics and pragmatics and implicature and explicature, pragmatics and epistemology, the pragmatics of belief, quotation, negation, implicature and argumentation theory, Habermas' Universal Pragmatics, Dascal's theory of the dialectical self, theories and theoretical discussions on the nature of pragmatics from a philosophical point of view. Conversational implicatures are generally meaning augmentations on top of explicatures, whilst explicatures figure prominently in what is said. Discussions in this work reveal their characteristics and tensions within current theories relating to explicatures and implicatures. Authors show that explicatures and implicatures are calculable and not (directly) tied to conventional meaning. Pragmatics has a role to play in dealing with philosophical problems and this volume presents research that defines boundaries and gives a stable picture of pragmatics and philosophy. World renowned academic experts in philosophy and pragmalinguistics ask important theoretical questions and interact in a way that can be easily grasped by those from disciplines other than philosophy, such as anthropology, literary theory and law. A second volume in this series is also available, which covers the perspective of linguists who have been influenced by philosophy.

Future Times, Future Tenses Philippe de Brabanter, Mikhail Kissine, Saghie Sharifzadeh, 2014 This book examines the expression of the future in a range of diverse languages and from a variety of theoretical perspectives. It reveals the value of

linking linguistic considerations of tense and aspect to philosophical approaches to modality and time and will be a valuable resource for all those working on time, tense, and temporal reference.

Plato's Psychology (2nd Edition) T.M. Robinson,1995-03-07 Plato's Psychology, originally published in 1970 and reprinted in 1972, is still the definitive modern discussion of the nature and development of Plato's concept of psyche. In a lengthy and detailed new introduction, T.M. Robinson surveys the scope and value of a number of contributions to Plato's theory of psyche, individual and cosmic, that have appeared since 1970. He then offers his own 'second thoughts' on various aspects of the subject, revisiting inter alia such questions as the dating of the Timaeus, and the implication thereof, and the understanding and implication of the myth of the Politicus. Finally, he widens the whole discussion of Plato's cosmic psychology to include an analysis and appreciation of the remarkably close relationship between much of Plato's thinking about the universe and its origins and a good deal of twentieth-century theorizing, from Einstein to Hawking. Language, Race, and Power in Schools Pierre Orelus,2016-12-08 In this edited collection, authors from various academic, cultural, racial, linguistic, and personal backgrounds use critical discourse analysis as a conceptual framework and method to examine social inequities, identity issues, and linguistic discrimination faced by historically oppressed groups in schools and

society. Language, Race, and Power in Schools unravels the ways and degrees to which these groups have faced and resisted oppression, and draws on critical discourse analysis to examine how multiple forms of oppression intersect. This volume interrogates areas of discrimination and injustice and discusses possibilities of developing coalitions and concerted efforts across the lines of diversity.
