**Patient Safety and Quality** Ronda Hughes,2008 Nurses play a vital role in improving the safety and quality of patient care -- not only in the hospital or ambulatory treatment facility, but also of community-based care and the care performed by family members. Nurses need know what proven techniques and interventions they can use to enhance patient outcomes. To address this need, the Agency for Healthcare Research and Quality (AHRQ), with additional funding from the Robert Wood Johnson Foundation, has prepared this comprehensive, 1,400-page, handbook for nurses on patient safety and quality -- Patient Safety and Quality: An Evidence-Based Handbook for Nurses. (AHRQ Publication No. 08-0043). - online AHRQ blurb, <http://www.ahrq.gov/qual/nursesfdbk/>

**Sozialpolitik und soziale Lage in Deutschland** Gerhard Freiling, Gerhard Naegele, Reinhard Bisping, Klaus Hofmann, Jennifer Neubauer, 2009-07-14 Vorwort Im Jahr 1980 erschien die erste Auflage dieses Lehrbuches unter dem Titel „Sozialpolitik - Eine problemorientierte Einführung“. Damals hätte keiner von uns daran gedacht und geglaubt, dass wir 27 Jahre später die vierte Auflage vorlegen werden. Aber gerade die Unterschiede in den Themenfeldern, mit denen sich jeder Einzelne von uns in den vergangenen Jahren beschäftigt hat, waren eine wesentliche Voraussetzung für die vollständige inhaltliche Überarbeitung, Erweiterung und Aktualisierung des Lehrbuchs. Dass uns dieser Kraftakt - neben allen sonstigen beruflichen Belastungen - gelungen ist, freut uns sehr. Zugleich freuen wir uns, dass wir mit Jennifer Neubauer eine weitere (jüngere) Mitautorin gewonnen haben. Was 1980 noch in einen Band mit rund 400 Seiten passte, ist mittlerweile in der vierten, erweiterten und vollständig überarbeiteten Auflage auf zwei Bände mit 10 Kapiteln auf insgesamt über 1.200 Seiten angewachsen. Dahinter steht das mühen, die Themenbreite und Komplexität der Sozialpolitik so aufzubereiten und vorzustellen, dass einerseits „Einsteigern“ eine verständliche Einführung geboten wird und zum anderen aber auch eine differenzierte Analyse der Probleme und Entwicklungsperspektiven in den einzelnen sozialpolitischen Bereichen ermöglicht wird. Wir hoffen, dass das Ergebnis auf positive Resonanz stößt.

**PFLEGEN Fokus Alter Mensch** Roland Böhmer-Breuer, Erik Herrmann, 2021-06-15 Pflegen Fokus Alter Mensch richtet sich an alle Auszubildenden, die ihren Vertiefungseinsatz in der Altenpflege planen beziehungsweise in der generalistischen Ausbildung als Ziel den Arbeitsschwerpunkt in der Altenpflege sehen, also vor allem an diejenigen, die ihre Ausbildung in einer Altenpflegeeinrichtung beginnen. Das Buch kann ergänzend zu den generalistischen PFLEGEN-Bänden vom ersten Tag der Ausbildung an genutzt, aber auch mit jedem anderen Lehrbuch kombiniert werden. Die generalistische Pflegeausbildung hat die Pflege aller Altersstufen zum Ziel und muss sich dabei an den Besonderheiten und Eigenarten orientieren, die die Bedürfnisse von Menschen verschiedenen Alters prägen. Die Pflege alter Menschen jedoch braucht spezielles Wissen und eigene Kenntnisse von pflegerischen Interventionen, die besonders vertieft und ergänzt werden sollten. Dies ist für die Auszubildenden besonders relevant, die ihre Ausbildung in einer Altenpflegeeinrichtung beginnen und beenden und dort jeden Tag alte Menschen pflegen. Der Band Pflegen Fokus Alter Mensch vertieft pflegerisches Wissen für Pflegende in Altenpflegeeinrichtungen und stellt dabei die (Handlungs-)Kompetenzentwicklung im Sinne der Pflegeberufesetze in den Mittelpunkt. Das Buch überzeugt durch: - Infokästen und Grafiken machen deutlich, was von Bedeutung ist. Definitionen und Notfälle sind extra gekennzeichnet. - Schritt-für-Schritt-Fotografien und Abbildungen unterstützen bei der praktischen Umsetzung. Komplexe Informationen sind lernfreundlich in Tabellen aufbereitet. - Pflegesituationen am Kapitelanfang veranschaulichen Lerninhalte und stellen den Bezug zur Praxis her. Am Ende des Kapitels werden die Pflegesituationen noch einmal aufgenommen und es werden Transferaufgaben dazu gestellt - ganz im Sinne von Reflexion und Transfer

*Collection Care/Sammlungspflege* Gabriela Krist,2015-05-21 Prevention is an attempt to look into the future and have a positive influence on it – therefore it is one of the most important aspects in the area of collection care, the central, current field of applied research in conservation and restoration. With sustainability damage and loss are avoided, dangers averted and research conducted. Collection care is only successful, if the theory is appropriately implemented in museum practice.

**Trust, assurance and safety** Great Britain: Department of Health,2007-02-21 This White Paper sets out a programme of reform to the UK's system for the regulation of health professionals. It contains a number of proposals with the aim of establishing a transparent system that can be seen to be independent and accountable and introduces the principle of revalidation so that registered professionals will have to demonstrate their continued fitness to practice. There will be changes in the way that problems will be handled. In the adjudication of fitness to practise cases panels should use civil standards of proof rather than the criminal standard and the Council for Healthcare Regulatory Excellence should have enhanced powers to supervise the regulators' handling of such cases. The Government agrees that there should be a separation of investigation and prosecution from adjudication and will work with the GMC to establish an independent body to adjudicate on fitness to practice cases involving the medical profession. Other topics covered in this document are: education and the role of regulatory bodies; information about health professional and regulation for emerging professions.

The Compassionate Brain Gerald Hüther, Ph.D.,2006-06-13 Here is the ultimate explanation of the brain for everyone who thinks: a guide to how the brain works, how our brains came to operate the way they do, and, most important, how to use your precious gray matter to its full capacity. The brain, according to current research, is not some kind of automatic machine that works independently of its user. In fact, the circuitry of the brain actually changes according to how one uses it. Our brains are continuously developing new capacities and refinements—or losing them, depending upon how we use them. Gerald Hüther takes us on a fascinating tour of the brain's development—from one-celled organisms to worms, moles, apes, and on to us humans—showing how we truly are what we think: our behavior directly affects our brain capacity. And the behavior that promotes the fullest development of the brain is behavior that balances emotion and intellect, dependence and autonomy, openness and focus, and ultimately expresses itself in such virtues as truthfulness, considerateness, sincerity, humility, and love. Hüther's user's-manual approach is humorous and engaging, with a minimum of technical language, yet the book's message is profound: the fundamental nature of our brains and nervous systems naturally leads to our continued growth in intelligence and humanity.

*Work Appropriation and Social Inequality* Antonia Kupfer,2021-09-07 This volume is a collection of subject-oriented studies on paid work. Each chapter refers to the social structures that form conditions for peoples' working contexts and interprets workers' and employees' narrations on work. Work appropriation—a process of formation of subjectivity, in which workers and employees relate to the social status of their occupations and the use-value of their work in actively dealing with

the work's content and conditions—serves as a comprehensive concept for each varying subject-oriented approach in the volume. 'Work Appropriation and Social Inequality' focuses on social inequality, understood as the distribution of life chances that privilege some and discriminate others and reveals the unequal conditions for, and outcomes of, work appropriation. By analyzing work appropriation, it uses a broader concept than that of 'meaning of work' or 'meaningful work' as it includes the practice and processes of working. The volume's subject-oriented approach to work differs from the stream 'subjectivation' in going beyond individuals' desires for self-realization in work and to companies' requirements of accessing emotional and personal dimensions of their workforce. The volume contains three parts: the first lays out basic approaches to work appropriation and social inequality, the second analyses current threats to work appropriation in the UK and Germany, and the third consists of a philosophical outlook on work in the Anthropocene. The book's impact lies in pushing forward the debate on how work appropriations are linked to unequal social structures. It will therefore appeal to social scientists interested in social inequality, sociology of work and organization, as well as students and teachers at the undergraduate and graduate level in the areas of social sciences.
