Money-Smart Kids Gail Vaz-Oxlade,2011-08-23 As a parent, you want the best for your kids. You work hard to provide them with every advantage. You want them to be safe, smart and healthy. Yet when it comes to money, it's a whole different story. If you're like most people, you'd rather run a mile through a desert with a camel on your back than talk about money with your children. Are you going to follow in your parents' footsteps, keeping financial matters a deep, dark secret? Or do you want your children to have a healthy, balanced attitude toward money? Then it's time to pull your head out of the sand and roll up your sleeves. Gail Vaz-Oxlade, Canada's #1 personal finance expert, believes that teaching kids about money is a parent's job. She knows that building confidence and money skills starts with an age-appropriate allowance to help your kids accomplish important tasks: Making saving a habit Learning the difference between needs and wants Using the "magic jars" to balance competing goals Creating lifelong money management skills What better gift could you give your children than the confidence to control their money, rather than letting their money control them? Let Gail help you raise "Money-Smart Kids."

Crisis in the Eurozone Costas Lapavitsas,2012-09-11 First, there was the credit crunch, and governments around the world stepped in to bail out the banks. The sequel to that debacle is the sovereign debt crisis, which has hit the eurozone hard. The hour has come to pay the piper, and ordinary citizens across Europe are growing to realize that socialism for the wealthy means punching a few new holes in their already-tightened belts. Building on his work as a leading member of the renowned Research on Money and Finance group, Costas Lapavitsas argues that European austerity is counterproductive. Cutbacks in public spending will mean a longer, deeper recession, worsen the burden of debt, further imperil banks, and may soon spell the end of monetary union itself. *Crisis in the Eurozone* charts a cautious path between political economy and radical economics to envisage a restructuring reliant on the forces of organized labour and civil society. The clear-headed rationalism at the heart of this book conveys a controversial message, unwelcome in many quarters but soon to be echoed

across the continent: impoverished states have to quit the euro and cut their losses or worse hardship will ensue.

Intellectual Property Crash Course IntroBooks,2018-02-20 Intellectual property has an increasing level been assumed to be playing a significant role with respect to the rapid pace of scientific, technological, as well as medical innovation that the world has been witnessing in the recent times. In addition to this, the changes that have been occurring in the economic environment on a global level have been also influencing the rapid development of different business models wherein the term intellectual property tends to be a central element towards the establishment of value and the overall potential growth. Intellectual property, as a result, has grown to be the largest as well as the fastest growing aspects of law in the world. As such, this fact also makes it essential for the increasing demand for professionals in the field of Intellectual Property to be well versed in the given field for dealing with IPRs (Intellectual Property Rights) across national as well as international boundaries.

The Measurement of Productive Efficiency Harold O. Fried, Shelton S. Schmidt, C. A. Knox Lovell, 1993-04-22 This work focuses on measuring and explaining producer performance. The authors view performance as a function of the state of technology and economic efficiency, with the former defining a frontier relation between inputs and outputs; the former incorporating waste and misallocation relative to this frontier. They show that insights can be gained by allowing for the possibility of a divergence between the economic objective and actual performance, and by associating this inefficiency with causal variables subject to managerial or policy influence. Derived from a series of lectures held on techniques and applications of the three approaches to the construction of production frontiers and measure of efficiency, this work will be an essential reference to scholars of a variety of disciplines who are involved with quantitative methods or policy.

Heart-life in Song Frances Harrison Marr, 1883

Kumba Africa Sampson Ejike Odum, 2020-11-03 'KUMBA AFRICA', is a compilation of African Short Stories written as fiction by Sampson Ejike Odum, nostalgically taking our memory back several thousands of years ago in Africa, reminding us about our past heritage. It digs deep into the traditional life style of the Africans of old, their beliefs, their leadership, their courage, their culture, their wars, their defeat and their victories long before the emergence of the white man on the soil of Africa. As a talented writer of rich resource and superior creativity, armed with in-depth knowledge of different cultures and traditions in Africa, the Author throws light on the rich cultural heritage of the people of Africa when civilization was yet unknown to the people. The book reminds the readers that the Africans of old kept their pride and still enjoyed their own lives. They celebrated victories when wars were won, enjoyed their New Yam festivals and villages engaged themselves in seasonal wrestling contest etc; Early morning during Harmattan season, they gathered firewood and made fire inside their small huts to hit up their bodies from the chilling cold of the Harmattan. That was the Africa of old we will always remember.

In Africa today, the story have changed. The people now enjoy civilized cultures made possible by the influence of the white man through his scientific and technological process. Yet there are some uncivilized places in Africa whose people haven't tested or felt the impact of civilization. These people still maintain their ancient traditions and culture. In everything, we believe that days when people paraded barefooted in Africa to the swamp to tap palm wine and fetch firewood from there farms are almost fading away. The huts are now gradually been replaced with houses built of blocks and beautiful roofs. Thanks to modern civilization. Donkeys and camels are no longer used for carrying heavy loads for merchants. They are now been replaced by heavy trucks and lorries. African traditional methods of healing are now been substituted by hospitals. In all these, I will always love and remember Africa, the home of my birth and must respect her cultures and traditions as an AFRICAN AUTHOR.

Moon-face and Other Stories Jack London,1919 JACK LONDON (1876-1916), American novelist, born in San Francisco, the son of an itinerant astrologer and a spiritualist mother. He grew up in poverty, scratching a living in various legal and illegal ways -robbing the oyster beds, working in a canning factory and a jute mill, serving aged 17 as a common sailor, and taking part in the Klondike gold rush of 1897. This various experience provided the material for his works, and made him a socialist. The son of the Wolf (1900), the first of his collections of tales, is based upon life in the Far North, as is the book that brought him recognition, The Call of the Wild (1903), which tells the story of the dog Buck, who, after his master's death, is lured back to the primitive world to lead a wolf pack. Many other tales of struggle, travel, and adventure followed, including The Sea-Wolf (1904), White Fang (1906), South Sea Tales (1911), and Jerry of the South Seas (1917). One of London's most interesting novels is the semi-autobiographical Martin Eden (1909). He also wrote socialist treatises, autobiographical essays, and a good deal of journalism.

Market Dynamics and Entry Paul A. Geroski,1992-04-08 This book is a comprehensive discussion of entry, and the dynamics of market structure and performance that are associated with it. Much of the work is empirical, and a wide variety of econometric results and case studies are brought together in order to evaluate existing theories of entry, and map out future directions of empirical and theoretical research.

Yvain Chretien de Troyes,1987-09-10 The twelfth-century French poet Chrétien de Troyes is a major figure in European literature. His courtly romances fathered the Arthurian tradition and influenced countless other poets in England as well as on the continent. Yet because of the difficulty of capturing his swift-moving style in translation, English-speaking audiences are largely unfamiliar with the pleasures of reading his poems. Now, for the first time, an experienced translator of medieval verse who is himself a poet provides a translation of Chrétien's major poem, Yvain, in verse that fully and satisfyingly captures the movement, the sense, and the spirit of the Old French original. Yvain is a courtly romance with a moral tenor; it

is ironic and sometimes bawdy; the poetry is crisp and vivid. In addition, the psychological and the socio-historical perceptions of the poem are of profound literary and historical importance, for it evokes the emotions and the values of a flourishing, vibrant medieval past.
