The Future of the Teaching and Learning of Algebra Kaye Stacey,Helen Chick,Margaret Kendal,2006-04-11 Kaye Stacey, Helen Chick, and Margaret Kendal The University of Melbourne, Australia Abstract: This section reports on the organisation, procedures, and publications of the ICMI Study, The Future of the Teaching and Learning of Algebra. Key words: Study Conference, organisation, procedures, publications The International Commission on Mathematical Instruction (ICMI) has, since the 1980s, conducted a series of studies into topics of particular significance to the theory and practice of contemporary mathematics education. Each ICMI Study involves an international seminar, the “Study Conference”, and culminates in a published volume intended to promote and assist discussion and action at the international, national, regional, and institutional levels. The ICMI Study running from 2000 to 2004 was on The Future of the Teaching and Learning of Algebra, and its Study Conference was held at The University of Melbourne, Australia from December to 2001. It was the first study held in the Southern Hemisphere. There are several reasons why the future of the teaching and learning of algebra was a timely focus at the beginning of the twenty first century. The strong research base developed over recent decades enabled us to take stock of what has been achieved and also to look forward to what should be done and what might be achieved in the future. In addition, trends evident over recent years have intensified. Those particularly affecting school mathematics are the “massification” of education—continuing in some countries whilst beginning in others—and the advance of technology.

Matemáticas y educación Núria Gorgorió Solà, Jordi Deulofeu Piquet, Alan J. Bishop, Tommy Dreyfus, Frederik Goffree, Peter Hilton, Pearla Neshet, Kenneth Ruthven, Nicolas Balacheff, Ken Clements, Guida de Abreu, 2000-12-15 El objetivo de este libro es clarificar la complejidad actual de la enseñanza-aprendizaje de las matemáticas; las matemáticas y el currículum; el que aprende y el aprendizaje; el profesorado y la enseñanza; el contexto cultural y social de la enseñanza de las matemáticas... Complejidad manifiesta en las investigaciones que se vienen desarrollando en los últimos años en distintos países del mundo. Sin embargo, éste no es un libro árido sobre investigación en el campo de la enseñanza de las matemáticas. Los capítulos están basados en ideas procedentes de la investigación, pero sus autores y autoras analizan la complejidad actual y distintos aspectos con relación a la enseñanza de las matemáticas y la formación del profesorado.

Educational Algebra Eugenio Filloy, Teresa Rojano, Luis Puig, 2007-10-12 This book takes a theoretical perspective on the study of school algebra, in which both semiotics and history occur. The Methodological design allows for the

interpretation of specific phenomena and the inclusion of evidence not addressed in more general treatments. The book gives priority to meaning in use over formal meaning. These approaches and others of similar nature lead to a focus on competence rather than a user's activity with mathematical language.

Razonamiento algebraico elemental. Implicaciones en la formación de profesores María Burgos Navarro,2023-06-29 En los últimos años, el desarrollo del pensamiento algebraico en los primeros niveles de enseñanza ha despertado gran interés en la comunidad de investigadores en educación matemática. Diversas perspectivas teóricas y propuestas curriculares recomiendan la introducción de contenidos algebraicos desde los primeros niveles educativos, con el objetivo de enriquecer la actividad matemática escolar y de favorecer el acceso a las matemáticas en secundaria. Sin embargo, esto plantea algunas cuestiones que deben ser abordadas para su implementación. En primer lugar, clarificar la naturaleza del álgebra escolar, es decir, cuál es la esencia del razonamiento algebraico en los primeros niveles de escolaridad. En segundo lugar, diseñar propuestas curriculares que garanticen el desarrollo progresivo del razonamiento algebraico en los escolares. En tercer

lugar, la formación de los profesores para que asuman esta nueva manera de entender el álgebra y capacitarlos para su enseñanza. En este monográfico, se pretende contribuir con la descripción e instrumentalización de un modelo del razonamiento algebraico elemental, que entiende que dicho razonamiento no sólo se puede poner de manifiesto en tareas relacionadas con la aritmética, la medida, la geometría o el análisis de datos, sino que puede hacerlo con diversos grados de formalización y generalidad. Dicho modelo se emplea para mostrar el carácter algebraico en tareas escolares y diseñar posibles estrategias con las que desarrollar el sentido algebraico en escolares, abordando en este propósito los distintos enfoques del álgebra temprana. Finalmente se caracterizan los conocimientos y competencias didáctico-matemáticas del profesor en relación al razonamiento algebraico y se describen y ejemplifican acciones formativas para desarrollar los conocimientos especializados del profesor sobre álgebra elemental en las distintas facetas.
