*The Fabric of Peace in Africa* Pamela Aall, Chester A. Crocker, 2017-06-05 Africa has experienced dozens of conflicts over a variety of issues during the past two decades. Responding to these conflicts requires concerted action to manage the crises – the violence, the political discord, and the humanitarian consequences of prolonged fighting. It is also necessary to address the long-term social and economic impacts of conflict, to rebuild communities, societies and states that have been torn apart. To accomplish this requires the involvement of institutions and groups rarely considered in formal official African conflict management activities: schools, universities, religious institutions, media, commercial enterprises, legal institutions, civil society groups, youth, women and migrants. These groups and organizations have an important role to play in building a sense of identity, fairness, shared norms and cohesion between state and society – all critical components of the fabric of peace and security in Africa. This volume brings together leading experts from Africa, Europe and North America to examine these critical social institutions and groups, and consider how they can either improve or impede peaceful conflict resolution. The overarching questions that are explored by the authors are: What constitutes social cohesion and resilience in the face of conflict? What are the threats to cohesion and resilience? And how can the positive elements be fostered and by whom? The second of two volumes on African conflict management capacity by the editors, *The Fabric of Peace in Africa: Looking beyond the State* opens new doors of understanding for students, scholars and practitioners focused on strengthening peace in Africa; the first volume, *Minding the Gap: African Conflict Management in a Time of change*, focused on the role of mediation and peacekeeping in managing violence and political crises.

Geographical Indications at the Crossroads of Trade, Development, and Culture Irene Calboli, Wee Loon Ng-Loy, 2018-12-13 Historically, few topics have proven to be so controversial in international intellectual property as the protection of geographical indications (GIs). The adoption of TRIPS in 1994 did not resolve disagreements, and countries worldwide continue to quarrel today as to the nature, the scope, and the enforcement of GI protection nationally and internationally. Thus far, however, there is little literature addressing GI protection from the point of view of the Asia-Pacific region, even though countries in this region have actively discussed the topic and in several instances have promoted GIs as a mechanism to foster local development and safeguard local culture. This book, edited by renowned intellectual property scholars, fills the void in the current literature and offers a variety of contributions focusing on the framework and effects of

GI protection in the Asia-Pacific region. The book is available as Open Access.

**imwe imba - the other room** Munashe Wadzanai, Anne Schlechters, Thomas F. Andersson, 2022-11-02 Munashe is a bright adolescent girl living in Zimbabwe. She feels a pressure to leave Zimbabwe and to follow most of her peers to a university or to work in the West. However, she is not convinced that this is what she really wants. Via Thomas, an experienced European scientist and manager, initiating a technical Start-up Hub at her boarding school, Munashe comes in contact with Anne. Imwe imba - the other room - is a novel covering the last 2 high-school years of Munashe and Anne in letters between the young women as well as from Thomas to Simon, his now retired personal and business coach. Through the letters, Anne and Simon discover unknown and fascinating aspects of the (southern) African society. Especially, since Thomas includes stories from Nelson, Munashe's grandfather and small holder farmer. Based on the stories and hearing about Munashe's activities in more technical projects, Anne develops a critical attitude towards both the current Western school system and the effectiveness of traditional Western development or aid projects. On the other side, Munashe learns that Europe is not the land of milk and honey for everybody. Munashe and Anne, assisted by Thomas, review the so-called development work activities in emerging markets and propose a promising approach to economically uplift more rural areas. In part 2, the Start-up Hub activities are proven to be sustainable and Munashe asks where do we want to go? A design is made for a more ideal (global) society and the issues faced, implementing their ideas, are discussed. The letters in this novel cover a wide spectrum of topics: personal struggles and contemplations, educational and business practices, science and art, geopolitics and historical backgrounds, change management as well as social developments. Each letter is written in an accessible language and underlined with references to allow the reader to explore more. Most of all, imwe imba wants to create awareness. Awareness for the wonderful, real life in Africa. Awareness that Africa is prosperity. Awareness that our younger generation is perfectly able to initiate change. That a single person can initiate change. That complaining or being upset about various (unacceptable) global happenings or actions is not enough. That a further polarisation and blaming the others doesn't help. That we have to do things. That we should not fear change but embrace the changes that are needed to come to the necessary improvements.

**The Crisis in Tax Administration** Henry Aaron, Joel Slemrod, 2004-05-20 People pay taxes for two reasons. On the positive side, most people recognize, even if grudgingly, that payment of tax is a duty of citizenship. On the negative side, they know that the law requires payment, that evasion is a crime, and that willful failure to pay taxes is punishable by fines or imprisonment. The practical questions for tax administration are how to strengthen each of these motives to comply with the

law. How much should be spent on enforcement and how should enforcement be organized to promote these objectives and achieve the best results per dollar spent? Over the last few years, the U.S. Congress has restricted spending on tax administration, forcing the Internal Revenue Service to curtail enforcement activities, at the same time, that the number of individual filers has increased, tax rules have become more complex, and more business have become multinational operations. But if too many cases of tax evasion go undetected and unpunished, those who may have grudgingly paid their taxes may soon find it easier to join the scofflaws. These events in combination have created a genuine crisis in tax administration. The chapters in this volume evaluate the capacity of authorities to enforce the tax laws in a modern, global economy and examine the implications of failing to do so. Specific aspects of tax law, including tax shelters, issues relating to small businesses, tax software, role of tax preparers, and the objectives of tax simplification are examined in detail. The volume also builds a conceptual basis for future scholarship, with regard not only to tax administration, but also to such fundamental questions as whether taxpayers respond mostly to economic incentives or are influenced by their experiences with the filing process and what is the proper framework for evaluating the allocation of resources within the IRS.

Secrecy and Methods in Security Research Marieke De Goede, Esmé Bosma, Polly Pallister-Wilkins, 2019-08-13 This book analyses the challenges of secrecy in security research, and develops a set of methods to navigate, encircle and work with secrecy. How can researchers navigate secrecy in their fieldwork, when they encounter confidential material, closed-off quarters or bureaucratic rebuffs? This is a particular challenge for researchers in the security field, which is by nature secretive and difficult to access. This book creatively assesses and analyses the ways in which secrets operate in security research. The collection sets out new understandings of secrecy, and shows how secrecy itself can be made productive to research analysis. It offers students, PhD researchers and senior scholars a rich toolkit of methods and best-practice examples for ethically appropriate ways of navigating secrecy. It pays attention to the balance between confidentiality, and academic freedom and integrity. The chapters draw on the rich qualitative fieldwork experiences of the contributors, who did research at a diversity of sites, for example at a former atomic weapons research facility, inside deportation units, in conflict zones, in everyday security landscapes, in virtual spaces and at borders, bureaucracies and banks. The book will be of interest to students of research methods, critical security studies and International Relations in general. The Open Access version of this book, available at [www.taylorfrancis.com](http://www.taylorfrancis.com), has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license.

*Introduction to Geopolitics* Colin Flint, 2016-10-06 This new updated edition of *Introduction to Geopolitics* presents the overarching themes of geopolitical structures and agents in an engaging and accessible manner, which requires no previous knowledge of theory or current affairs. Using new pertinent case studies and guided exercises the title explains the contemporary global power of the United States and the challenges it is facing, the persistence of nationalist conflicts,

migration, cyberwar, terrorism, and environmental geopolitics. Case studies of the rise of the so-called Islamic State, the South China Sea disputes, the Syrian civil war, the Korean conflict, and Israel-Palestine emphasize the multi-faceted nature of conflict. The book raises questions by incorporating international and long term historical perspectives and introduces readers to different theoretical viewpoints, including feminist contributions. The new edition features expanded sections on network geopolitics and non-state actors, a new section on geopolitics of transnational business, cyberwar, an interpretation of ISIS within historical geopolitical trends, as well as expanded discussion of the relevance of Boserup and neo-Malthusians to environmental geopolitics. Introduction to Geopolitics will provide its readers with a set of critical analytical tools for understanding the actions of states as well as non-state actors acting in competition over resources and power. Both students and general readers will find this book an essential stepping-stone to a deeper and critical understanding of contemporary conflicts.

**Urban Groundwater Management and Sustainability** John H. Tellam, Michael O. Rivett, Rauf G. Israfilov, 2007-01-07 Given that around 50% of the world's population live in cities, and that urban populations are expanding rapidly, the issues are important and becoming increasingly urgent. To reduce the effects of such impacts, management is required irrespective of whether the groundwater is to be used or not. This management must be based on a sound technical understanding of the interacting processes involved. The forty papers in this volume explore the state of this understanding in the context of a wide range of countries (and therefore cultures), climates, and geologies. They are divided into topic areas covering flow, chemical water quality, biological water quality, remediation, engineering, and socio-economics. An initial section sets the scene with a range of integrated regional-scale studies. The volume provides an insight into groundwater issues for other urban specialists, including planners: without communication between the disciplines involved, progress towards acceptable urban sustainability will be slow.

**Going Places** Julie Fry, Hayden Glass, 2016-03-15 Migration and the movement of people is one of the critical issues confronting the world's nations in the twenty-first-century. This book is about the economic contribution of migration to and from New Zealand, one of the most frequently discussed aspects of the debate. Can immigration, in economic terms, be more than a gap filler for the labour market and help as well with national economic transformation? And what is the evidence on the effect of migration not just on house prices but also on jobs, trade or broader economic performance? Building on Sir Paul Callaghan's vision of New Zealand as a place 'where talent wants to live', this book explores how we can attract skilled, creative and entrepreneurial people born in other countries, and whether our 'seventeenth region' - the more than 600,000 New Zealanders living abroad - can be a greater national asset.

**The Uneven Offshore World** Justin Robertson, Michael Tyralla, 2022-03-24 Informed by world-systems analysis, this book examines the shifting patterns of accommodation and resistance to the offshore world, with a particular focus on Mauritius

as a critical but underappreciated offshore node mediating foreign investment into India and Africa. Drawing on a large pool of financial data and elite interviews, the authors present the first detailed comparative study of the Mauritius-India and Mauritius-Africa offshore relationships. These relationships serve as indicative test cases of the contemporary global tax reform agenda and its promise to rein in offshore finance. Whereas India's economic power and multilateral track record have enabled it to actively shape this agenda and implement it in a robust manner, most African countries have found themselves either unable to meet its stringent criteria or unwilling to do so out of fear that it might discourage investment. Its impact on offshore financial centers has likewise been limited. A few of the least sophisticated ones appear to have fallen by the wayside, but the rest have either remained largely unaffected, or, like Mauritius, succeeded in consolidating their operations and surviving the current round of regulatory headwinds. The findings suggest that the contemporary global tax reform agenda has thus far not only failed to make good on its promise but also actually reinforced numerous existing power hierarchies. *The Uneven Offshore World* is written in an accessible style and aimed at readers without specialized knowledge of tax issues.

*The Transparency Fix* Mark Fenster,2017-07-18 Is the government too secret or not secret enough? Why is there simultaneously too much government secrecy and a seemingly endless procession of government leaks? *The Transparency*

Fix asserts that we incorrectly assume that government information can be controlled. The same impulse that drives transparency movements also drives secrecy advocates. They all hold the mistaken belief that government information can either be released or kept secure on command. The Transparency Fix argues for a reformation in our assumptions about secrecy and transparency. The world did not end because Julian Assange, WikiLeaks, and Edward Snowden released classified information. But nor was there a significant political change. Transparency has become a buzzword, while secrecy is anathema. Using a variety of real-life examples to examine how government information actually flows, Mark Fenster describes how the legal regime's tenuous control over state information belies both the promise and peril of transparency. He challenges us to confront the implausibility of controlling government information and shows us how the contemporary obsession surrounding transparency and secrecy cannot radically change a state that is defined by so much more than information.

Geography, Technology and Instruments of Exploration Fraser MacDonald, Charles W.J. Withers, 2016-04-22 Focusing on aspects of the functioning of technology, and by looking at instruments and at instrumental performance, this book addresses the epistemological questions arising from examining the technological bases to geographical exploration and knowledge claims. Questions of geography and exploration and technology are addressed in historical and contemporary context and in different geographical locations and intellectual cultures. The collection brings together scholars in the history of geographical exploration, historians of science, historians of technology and, importantly, experts with curatorial

responsibilities for, and museological expertise in, major instrument collections. Ranging in their focus from studies of astronomical practice to seismography, meteorological instruments and rockets, from radar to the hand-held barometer, the chapters of this book examine the ways in which instruments and questions of technology - too often overlooked hitherto - offer insight into the connections between geography and exploration.

*China's Great Economic Transformation* Loren Brandt,Thomas G. Rawski,2008-04-14 This landmark study provides an integrated analysis of China's unexpected economic boom of the past three decades. The authors combine deep China expertise with broad disciplinary knowledge to explain China's remarkable combination of high-speed growth and deeply flawed institutions. Their work exposes the mechanisms underpinning the origin and expansion of China's great boom. Penetrating studies track the rise of Chinese capabilities in manufacturing and in research and development. The editors probe both achievements and weaknesses across many sectors, including China's fiscal, legal, and financial institutions. The book shows how an intricate minuet combining China's political system with sectorial development, globalization, resource transfers across geographic and economic space, and partial system reform delivered an astonishing and unprecedented growth spurt.

*Russian Nationalism and the Russian-Ukrainian War* Taras Kuzio,2022-01-26 This book is the first to provide an in-depth understanding of the 2014 crisis, Russia's annexation of Crimea and Europe's de facto war between Russia and Ukraine. The book provides a historical and contemporary understanding behind President Vladimir Putin Russia's obsession with Ukraine

and why Western opprobrium and sanctions have not deterred Russian military aggression. The volume provides a wealth of detail about the inability of Russia, from the time of the Tsarist Empire, throughout the era of the Union of Soviet Socialist Republics (USSR), and since the dissolution of the latter in 1991, to accept Ukraine as an independent country and Ukrainians as a people distinct and separate from Russians. The book highlights the sources of this lack of acceptance in aspects of Russian national identity. In the Soviet period, Russians principally identified themselves not with the Russian Soviet Federative Republic, but rather with the USSR as a whole. Attempts in the 1990s to forge a post-imperial Russian civic identity grounded in the newly independent Russian Federation were unpopular, and notions of a far larger Russian 'imagined community' came to the fore. A post-Soviet integration of Tsarist Russian great power nationalism and White Russian émigré chauvinism had already transformed and hardened Russian denial of the existence of Ukraine and Ukrainians as a people, even prior to the 2014 crises in Crimea and the Donbas. Bringing an end to both the Russian occupation of Crimea and to the broader Russian-Ukrainian conflict can be expected to meet obstacles not only from the Russian de facto President-for-life, Vladimir Putin, but also from how Russia perceives its national identity.
