Las Ideas Políticas y el Pensamiento Administrativo en la Historia Cristian Darío Castro Urrego,2012 El Libro Las ideas políticas y el pensamiento administrativo en la historia: autores y contextos de Oriente y Occidente es el resultado de una indagación centrada en buscar los vasos comunicantes entre administración y política en su devenir histórico, que no se circunscribe a la vida y obra de pensadores de Occidente, como es costumbre en este lado del océano, sino que intenta auscultar el pensamiento de Oriente tanto o más exuberante. Como resultado de esta exploración histórica y filosófica surge una apología al simbolismo político que emerge del liderazgo, el cual está inscrito necesariamente en el entramado cultural de los pueblos, de suerte que gran parte de dicho entramado está constituido por maneras de entender el significado de los símbolos que permiten el relacionamiento humano. El carácter político del libro en este contexto lo otorga la temática específica que involucra, si se permite la simplificación, tres niveles de acción: el domino, la liberación y los grados de autonomía. He derivado estas tres categorías del acto político y administrativo con el fin de abstraer en tres estados claves de evolución las ideas que no se quedan estáticas sino que vibran en un péndulo según la época, el territorio y los actores

que intervienen.

Las ideas políticas y el pensamiento administrativo en la historia Cristian Darío Castro,2012-01-01 Abordar la temática de la historia de las ideas políticas y el pensamiento administrativo como un corpus coherente e integrado es posible. Es importante encontrar nuevas formas de narrar la historia, ampliar sus objetos de estudio tanto de contexto como de autores e imprimir un sentido particular a cada época que se aborda en el proceso investigativo. En este libro se aspira a entender un aspecto de los grandes procesos y transformaciones de las ideas y actores políticos y sociales en el devenir histórico: el de las relaciones entre el pensamiento político y el administrativo. Las ciencias, las artes y ciertas concepciones filosóficas serán soportes de nuestro inquirir sobre la relación que ha existido entre estos dos importantes campos del pensamiento. Nos interesa adentrarnos en los vasos comunicantes de dos arquitecturas del pensamiento, la historia y la filosofía política, en un intento de vincular la belleza de la historia con el arte superior de la reflexión filosófica. En este empeño, las narrativas contenidas a lo largo del texto acogen como suyo el pensamiento de Aristóteles, quien interpretaba la filosofía como la construcción de principios universales, y la historia, como el estudio juicioso de eventos singulares. No siempre la filosofía y la historia suelen converger, pero en este libro se hace clara la necesidad de acercar estas disciplinas de estudio para entender la política y la administración.

Esta obra realiza una fundamentación teórica de la cultura, la estrategia y la estructura, identificando sus principales características, connotaciones, concepciones y vetas de estudio.

Information Society Karamjit S. Gill,2012-12-06 Human-centredness: A Challenge to Post-industrial Europe? The key power in industrial society has been linked to the possession of capital and factory. In the information society it could be rather different. If one accepts that that the key power in the information society will be linked not so much to the ownership of information but to human creativity nourished by that information, the productive force of today and tomorrow, could be

more and more the human brain. Making use of one's intelligence is always accompanied by positive emotion, which in turn further activates the intelligence. But, unfortunately, under present conditions workers of all levels live in fear, anxiety and stress rather than desire and motivation. The question of basic human ecology (quality of life) is, therefore, a major strategic factor. It is precisely the opposite to the mechanisms of exclusion that currently dominate our society: exclusion of young people through joblessness - but also exclusion through technology, as with the helplessness of older people or the poorly educated confronted with ticket dispensing machines or other automats. This is not idle theorizing, it corresponds to concrete facts. It is, for example, how some observers interpret the crisis at IBM. Because its programs were less 'human-friendly', it was shaken to its foundations by Apple and Microsof- though it seems since to have learnt its lesson.
