Four Green Houses... One Red Hotel Santiago R. T., 2019-06-06 Four green houses... One red Hotel is an ideal book for people who want to understand how the financial system really works, the central and commercial banks, the global financial crisis, financial derivatives, and for those who want to learn to invest in Real Estate as a professional, using what genuine investors and entrepreneurs use like Donald Trump and Warren Buffett: Debt and taxes.

Cracking the code UNESCO, 2017-09-04 This report aims to 'crack the code' by deciphering the factors that hinder and facilitate girls' and women's participation, achievement and continuation in science, technology, engineering and mathematics (STEM) education and, in particular, what the education sector can do to promote girls' and women's interest in and engagement with STEM education and ultimately STEM careers.

The Political Economy of Water and Sanitation Matthias Krause, 2010-04-02 According to recent estimates, around 6,000 people - mostly children under five - die every day from diseases caused by inappropriate water and sanitation (WS) services. Much of the academic and political debate surrounding this issue has focused on private sector participation. By shifting the attention towards the influence of governance, Krause examines the political and sectoral institutions that are essential for the provision of WS services. Utilizing data from sixty-nine developing countries, Matthias Krause demonstrates that the level of democracy has a statistically significant positive impact on access to WS services and that low-quality governance of sub-national governments compromises the internal efficiency of providers and the widespread access to services. This book makes a critical contribution to the water and sanitation research and will help academics and policy-makers to rethink the way in which they deal with water issues.

Heritage and Rights of Indigenous Peoples Manuel May Castillo, Amy Strecker, 2017 In 2007, the United Nations adopted the UN Declaration on the Rights of Indigenous People, a landmark political recognition of indigenous rights. A decade later, this book looks at the status of those rights internationally. Written jointly by indigenous and non-indigenous scholars, the chapters feature case studies from four continents that explore the issues faced by Indigenous Peoples through three themes: land, spirituality, and self-determination.

Public financial management in Latin America Mario Pessoa, Carlos Pimienta, Marco Varea, Adriana Arosteguiberry, Israel Fainboim Yaker, Claudiano de Albuquerque, José Adrián Vargas, Joseph Cavanagh, Benito Almudena Fernández, James L.

Chan, Gerardo Uña, Natalia Rezai, Mike Williams, 2015-08-24 The efficiency, effectiveness, and transparency of public financial management in Latin America is critical for the supervision of public resources, fiscal stability, and sustainable economic development. In recent years, the countries of Latin America have embraced reforms in public financial management and have made many important advances; however, many challenges remain. This book brings together the knowledge and experiences of IMF and IDB staff and representatives from 16 governments in the region to document these reforms, and examines the experiences and lessons learned. It is a valuable resource for those looking at issues in public financial management.

Introduction to Clinical Psychology Lynda A. Heiden, Michel Hersen, 2013-06-29 Bringing together contributions by leaders in the field of clinical psychology, this highly readable textbook provides a current perspective on theory, training, assessment, consultation, research, and outpatient and inpatient practice. Bridging the gap between theory and practice, contributors offer a professional perspective on the various specialized activities and settings of a clinical psychologist. With this unique insight, advanced undergraduate and beginning graduate students gain a realistic understanding of the life of a clinical psychologist as well as the diverse professional opportunities in the field.

How to Play Monopoly in the Real World Santiago R. T., 2019-06-06 A unique financial education handbook that contains a step-by-step guide, in which you will learn the following: How central banks work, how to read financial statements, the difference between assets and liabilities, how to earn passive income, how to use The debt and taxes to make you rich, how to analyze properties step by step, the difference between an investor and a speculator and the habits of the richest people in the world. You will learn a technique to know what investment to make and know the formulas and methods to know how much to pay, how much profit to expect and how to manage the investment. The risks are almost zero if you apply these methods. All concepts are explained with real-world examples and case studies. If you read Rich Dad, Poor Dad you may have graduated from school. When you're done reading How to play monopoly in the real world, you've graduated from the University of Capitalism with honors.

Principles of Corporate Finance Richard A. Brealey, Stewart C. Myers, Franklin Allen, 2006 Describes the theory and practice of corporate finance. The authors show how managers use financial theory to solve practical problems and as a way of learning how to respond to change by showing not just how but why companies and management act as they do. They bring fresh expertise and ideas to this textbook and partnership.

Mycotoxin Control in Low- and Middle-Income Countries Christopher P. Wild,J. D. Miller,J. D. Groopman,2016-02-15 This book provides an evaluation of measures to reduce exposure to highly toxic and carcinogenic contaminants in staple diets in Africa as well as parts of Asia and Latin America. Many of the poorest people in these regions are exposed to the pervasive natural toxins, aflatoxins and fumonisins, on a daily basis by eating their staple diet of groundnuts, maize, and other cereals. Exposure to mycotoxins at these high levels substantially increases mortality and morbidity. Aflatoxins are a cause of human liver cancer, and fatalities from acute aflatoxin poisoning outbreaks occur in Africa and Asia. The International Agency for Research on Cancer convened a Working Group of world-leading experts to review the health effects of aflatoxins and fumonisins and to evaluate intervention measures. The panel concluded that these mycotoxins not only are a cause of acute poisoning and cancer but also are a likely contributor to the high levels of stunting in children in affected populations. The Working Group also identified effective measures to reduce exposure in developing countries. The panel evaluated 15 interventions, considering the strength of the evidence as well as its completeness and its transferability at an individual, community, or national level. Four of the interventions were judged to be ready for implementation: improvement of dietary diversity; crop sorting; post-harvest measures, including improved storage; and, in Latin America for maize, optimized nixtamalization. These recommendations would be relevant for investment of public, nongovernmental organization, and private funds at the scale of the subsistence farmer, the smallholder, and through to a more advanced value chain.

Urban Form and Accessibility Corinne Mulley,John D. Nelson,2020-12-02 The growth of global urbanization places great strains on energy, transportation, housing and public spaces needs. As such, transport and land use are inextricably linked. *Urban Form and Accessibility: Social, Economic, and Environment Impacts* consolidates key insights from multidisciplinary perspectives on the relationship between urban form and transportation planning. Synthesizing the latest cutting-edge research, the book translates academic evidence into practice. Starting with an overview of the key concepts relevant to each discipline, the book covers critical elements such as governance, travel behavior, and technological disruption, showing how to move towards a more sustainable society for all city inhabitants. - Draws on evidence-based success stories from countries around the globe - Gathers global leading thinkers to provide the state-of-the-art on the topic - Examines social, economic, and environmental impacts within each chapter - Each chapter's content will have the same structure for easier discoverability

Managing for Healthy Ecosystems David J. Rapport,Bill L. Lasley,Dennis E. Rolston,N. Ole Nielsen,Calvin O. Qualset,Ardeshir B. Damania,2002-10-29 One of the critical issues of our time is the dwindling capacity of the planet to

provide life support for a large and growing human population. Based on a symposium on ecosystem health, *Managing for Healthy Ecosystems* identifies key issues that must be resolved if there is to be progress in this complex area, such as:

Health Status and Health Policy Donald L. Patrick, Pennifer Erickson, 1993 This book has two major objectives. The first is to propose the Health Resource Allocation Strategy as a social and political process for comparing costs and outcomes of alternative policy options in the health and medical care arena to select interventions with greatest benefit in relation to cost. The second objective is to provide a reference for state-of-the-art development and application of health status and quality of life measures for health care policy and research, including clinical applications. Not all policy applications of health-related quality of life involve resource allocation. Thus we present guidelines to assessment for use in program evaluation, monitoring of health policy, clinical trials, and health services research.

Lake Titicaca C. DeJoux, 2012-12-06 Lake Titicaca, because of its area and volume and its situation at high altitude within the tropics, is a unique hydrological site in the world. It should be noted that it stands at the transition point between two very distinct geographical regions: the desert fringe of the Pacific coast to the west and the great Amazonian forest extending to the Atlantic coast to the east. Many scientists have been attracted to the lake in the past because of its unusual limnological features. In this book the editors have compiled an exhaustive review of current knowledge from the existing literature and from the results of more recent observations. It is certain that this book will become the essential reference work for scientists wanting to make progress in revealing the lake's secrets. It can be stated unequivocally that this work constitutes a complete review of the present state of knowledge on Lake Titicaca and that it provides the latest results of research on this habitat.
