Sri Lanka at the Crossroads of History Zoltán Biedermann,Alan Strathern,2017-06-07 The peoples of Sri Lanka have participated in far-flung trading networks, religious formations, and Asian and European empires for millennia. This interdisciplinary volume sets out to draw Sri Lanka into the field of Asian and Global History by showing how the latest wave of scholarship has explored the island as a 'crossroads', a place defined by its openness to movement across the Indian Ocean. Experts in the history, archaeology, literature and art of the island from c.500 BCE to c.1850 CE use Lankan material to explore a number of pressing scholarly debates. They address these matters from their varied disciplinary perspectives and diverse array of sources, critically assessing concepts such as ethnicity, cosmopolitanism and localisation, and elucidating the subtle ways in which the foreign may be resisted and embraced at the same time. The individual chapters, and the volume as a whole, are a welcome addition to the history and historiography of Sri Lanka, as well as studies of the Indian Ocean region, kingship, colonialism, imperialism, and early modernity.

The Story of Cooperstown Ralph Birdsall,2019-12-10 The ensuing narrative is a faithful record of life in Cooperstown from the earliest times, except that the persons and events to be described have been selected for their story-interest, to the exclusion of much that a history is expected to contain. The dull thread of village history has been followed only in such directions as served for stringing upon it and holding to the light the more shining gems of incident and personality to which it led. Trivial happenings have been included for the sake of some quaint, picturesque, or romantic quality. Much of importance has been omitted that declined to yield to such treatment as the writer had in view. The effort has been made to exclude everything that seemed unlikely to be of interest to the general reader.

Nineteenth-Century Design Clive Edwards,2021-03-30 This is volume three in a four-volume edition of primary source materials that document the histories of design across the long nineteenth century. Each volume is arranged by appropriate sub-themes and it is the first set of primary sources to be gathered together in this comprehensive and accessible format. Design refers to more than simply products and personalities or even cultural ideas, it involves consideration of ways of design thinking and applications as well as the philosophies and the other disciplines that impinge upon it. Here, the third volume considers the issues of design production and practices including debates about the role of machine and craft, the impact of new materials and technologies as well as issues of marketing and mediation. The volumes will be of interest to a range of scholars and students, including those in art and design history, visual culture, and nineteenth-century material culture. They will also be of interest to a broad range of scholars working in areas including aesthetics, gender, politics and philosophy.

Land, Labor and the Origins of the Israeli-Palestinian Conflict, 1882-1914 Gershon Shafir,1996-08-19 Gershon Shafir challenges the heroic myths about the foundation of the State of Israel by investigating the struggle to control land and labor during the early Zionist enterprise. He argues that it was not the imported Zionist ideas that were responsible for the character of the Israeli state, but the particular conditions of the local conflict between the European settlers and the Palestinian Arab population.

Imperial Leather Anne McClintock,2013-10-01 *Imperial Leather* chronicles the dangerous liaisons between gender, race and class that shaped British imperialism and its bloody dismantling. Spanning the century between Victorian Britain and the

current struggle for power in South Africa, the book takes up the complex relationships between race and sexuality, fetishism and money, gender and violence, domesticity and the imperial market, and the gendering of nationalism within the zones of imperial and anti-imperial power.

Orientalism Edward W. Said, 2014-10-01 A groundbreaking critique of the West's historical, cultural, and political perceptions of the East that is—three decades after its first publication—one of the most important books written about our divided world. Intellectual history on a high order ... and very exciting. —The New York Times In this wide-ranging, intellectually vigorous study, Said traces the origins of orientalism to the centuries-long period during which Europe dominated the Middle and Near East and, from its position of power, defined the orient simply as other than the occident. This entrenched view continues to dominate western ideas and, because it does not allow the East to represent itself, prevents true understanding.
